

# Banner service and support

Industry experts and solutions for a wide range of applications across many industries

- Agriculture
- Food & Beverage
- Pharmaceutical & Medical
- Semiconductor & Solar
- Assembly
- Material Handling
- Process & Chemical
- Traffic
- Automotive
- Packaging
- Robotics
- Warehouse & Distribution

Contact a Banner Engineer about your application. Our highly skilled application engineers and industry experts are ready to support you wherever you are—worldwide.

**Selection Guide** page 8

**Legacy Products** page 357 & 618

**Applications** page 40

**Photoelectric Sensors** page 50

**Miniature** page 59

Miniature photoelectric sensors are tiny and slim, for mounting in confined spaces. Opposed-mode sensing distance is up to 15 m. Dimensions, in millimeters, range from 12x16x15 to 26x9x16.

WORLD-BEAM Q12 .....	60	VSM.....	74
M12.....	64	VS1.....	78
T8.....	68	VS2.....	81
S12/SB12.....	71	VS3.....	84

**Compact** page 87

Compact photoelectric sensors are about the size of a thumb and are either rectangular or barrel shaped. Opposed-mode sensing distance is up to 30 m and operate with ac, dc or ac/dc universal voltage. Dimensions, in millimeters, range from 35x31x15 to 81x30.7x12.2.

WORLD-BEAM QS18 .....	88	T18 .....	134
WORLD-BEAM Q20 .....	103	TM18 .....	140
MINI-BEAM .....	108	Q25.....	144
S18/M18 .....	127		

**Midsize** page 149

Midsize photoelectric sensors are rectangular or barrel shaped. Opposed-mode sensing distance is up to 60 m and operate with ac, dc or ac/dc universal voltage. Dimensions, in millimeters, range from 42x42x12.7 to 102x30.7x12.2 for rectangles and 102x30 for barrels.

WORLD-BEAM QS30 .....	150	Q40.....	175
S30.....	161	PicoDot.....	179
SM30/SM130.....	166	QM42/QMT42.....	183
T30 .....	170		

**Fullsize** page 189

Fullsize photoelectric sensors can sense distances up to 200 m, operate with ac, dc, or ac/dc universal voltage and offer E/M relay outputs. Dimensions, in mm, range from 67x52x25 to 98.6x54.6x44.5.

Q45.....	190	Q60.....	217
OMNI-BEAM .....	207		

**Fiber Optic Sensors** page 223

**Fiber Sensors** page 223

Fiber optic sensors are ideal for harsh conditions: high vibration, extreme heat, and wet, explosive or corrosive environments. In confined areas, the flexible fibers can be positioned precisely.

D10.....	226	R55F.....	240
D12.....	235		

**Plastic Fibers** page 243

Plastic fibers are for general purpose use. They tolerate severe flexing, can be cut to length during installation.

**Glass Fibers** page 260

Glass fibers are the best fiber choice for challenging environments such as high temperatures, corrosive materials and moisture.

**Special-Purpose Sensors** page 266

**Part-Sensing** page 267

Part-sensing sensors detect objects that pass through an area defined by an array of sensing beams.

LX.....	267
---------	-----

**Slot & Label** page 269

Slot sensors, sometimes called optical fork sensors because of their "forked" shape, detect objects that pass between the two arms—one with the emitter, the other with the receiver. The fixed slot width provides reliable opposed-mode sensing of objects as small as 0.30 mm.

SLM.....	270	SL.....	273
----------	-----	---------	-----

**Registration Mark & Color** page 276

Registration mark sensors detect subtle color contrasts to inspect registration marks, using one, two or three color LEDs. True color sensors accurately analyze and compare color to color or varying intensities of one color.

R58E/R58A .....	277	QC50/QCX50 .....	282
-----------------	-----	------------------	-----

**Luminescence** page 284

Luminescence sensors detect luminescence that is inherent in a material or luminophores that have been added to a material to make it luminescent.

QL50.....	285	QL56.....	288
QL51.....	287		

**Optical Touch Buttons** page 291

Ergonomic optical switches require no physical pressure to operate, eliminating the hand stress that can lead to repetitive-motion injuries.

VTB .....	453		

# Measurement & Inspection

page 292

## Light Gauging

page 295

Light gauging sensors use lasers to deliver precise, long-distance sensing at the speed of light.

LT3 .....	296	LH.....	303
LT7 .....	300	LG5/LG10.....	305

## Ultrasonic

page 308

Because ultrasonic sensors use sound waves rather than light, they are ideal for sensing uneven surfaces, liquids, clear objects and objects in dirty environments.

QT50U .....	309	M25U .....	328
S18U.....	314	T18U.....	330
WORLD-BEAM QS18U .....	317	Q45U .....	332
T30U/T30UX.....	320	Q45UR.....	336

## Measuring Arrays

page 340

Using an array of closely spaced light beams, measuring light screens are designed for profiling, inspections and process monitoring.

EZ-ARRAY .....	341	MINI-ARRAY .....	348
High-Resolution MINI-ARRAY.....	344		

## Radar

page 354

Radar sensors use Frequency Modulated Continuous Wave (FMCW) radar to reliably detect moving or stationary targets, including cars, trains, trucks and cargo in extreme weather conditions.

QT50R .....	354
-------------	-----

# Vision

page 359

## iVu Image Sensors

page 364

Touch screen image sensors delivers superior inspection performance faster and easier; no PC or external controller required.

iVu .....	364	iVu Plus .....	365
-----------	-----	----------------	-----

## PresencePlus<sup>®</sup> Vision Sensors

page 370

Full-featured vision sensors with a complete suite of location, inspection, analysis and geometric tools; all can be used simultaneously for inspecting multiple features and solving complex applications.

Pro.....	370	P4 Dedicated-Function.....	377
P4 OMNI.....	374		

## Lenses

page 381

Standard, high-performance or megapixel C-mount and Microvideo lenses provide enhanced sensor performance.

## Lighting

page 413

Specialized lighting creates all-important contrast between the feature of interest and its background.

## Index page 841

## VSM Heavy-Duty Metal Sensors

- Tough, 300 series stainless steel body with sapphire lens withstands a wide variety of chemicals and cutting fluids
- Tiny sensors are available as small as a 4 mm barrel (about the size of a single optical fiber assembly)
- Economical, self-contained sensors are available in convergent or opposed sensing modes; no separate amplifier required
- Well focused, narrow beam allows the entire sensor to be recessed into fixtures
- Smooth, stainless steel barrel is perfect for hygienic applications that require routine cleaning

See page 74

## TM18 Right-Angle Barrel-Mount Sensors

- Heavy-duty, die-cast metal housing with integral metal QD prevents sensor damage during machine assembly, transport, maintenance and operation
  - Compact, right-angle T-style housing with 18 mm threaded lens mounts easily in tight places for added sensor protection
  - All models have a visible red sensing beam for easy sensor alignment
  - Completely epoxy-encapsulated electronics deliver superior durability, especially in harsh sensing environments
  - Sensors rated IP69K for resistance to intermittent high-pressure washdown
  - Sensors have enhanced immunity to fluorescent light and sensor crosstalk
- See page 140

## L-GAGE® LH High-Precision Laser Sensors

- Extremely accurate, robust and self-contained laser displacement sensing using a 1024 pixel CMOS linear imager
- Reliable and accurate measurement results on real world targets, such as machined metal, wood, ceramic, paper and painted targets
- Non-contact precise measurement on moving processes, hot parts, machined parts, and soft or sticky parts
- Two sensors self-synchronize for thickness measurements and thickness calculation within the sensors; no external controller required
- Serial communication for use of up to 6 sensors in multi-track or process control applications
- Dedicated software for sensor setup and performance monitoring
- Precise laser spot for easy alignment to the target
- Target displacement or thickness measurement with high-resolution 4-20 mA or RS-485 serial communication outputs
- Automatic laser power and measurement rate control for reliable measurement under changing or challenging target condition

See page 303

# What's New!

## iVu Plus TG and iVu Plus BCR

- No external PC required to configure or operate sensor
- Ethernet capabilities to control and communicate with the sensor
- Multiple stored inspections
- Recognize and sort up to ten different patterns in the same inspection
- Compact, rugged IP67-rated housing is available with or without a variety of integrated ring lights—red, blue, white, green and infrared
- One-piece integrated LCD and two-piece with remote LCD models

See page 364

## EZ-LIGHT™ IP67-Rated Audible Indicator Lights

- TL50 Tower Lights with up to 4 colors in one housing
- Column Lights with 1, 2 or 3 colors
- Adjustable audible intensity to meet any environmental requirements
- A choice of black or gray housing (TL50 & CL50) and high-brightness LEDs (TL50)
- 30 mm threaded base for direct cabinet mounting with a single drilled hole

See page 428

## EZ-LIGHT™ K80 Call Light

- Illuminated dome provides easy-to-see call for assistance indication
- Battery-powered light is ideal in locations where access to power is limited or unavailable
- Pre-assembled housing and multiple mounting options make the indicator light cost-effective and easy-to-install
- Large, red 50 mm dome is visible from 180 degrees
- Flashing red notification signal ensures part bins are refilled before supplies are gone, allowing line operators to sustain production

See page 439

## WLS28 Work Light Strip

- Low-profile, 28 mm wide housing for use inside or under any industrial control cabinet or in work stations
- White LED lights in 145 to 1130 mm lighted lengths
- Cascade models for connecting multiple lights end-to-end, minimizing wiring
- High-power LEDs for superior illumination with an even pattern of light and no shadows
- Extremely long-lasting LED technology for >50,000 hours of continuous working life
- Low power consumption of less than 9 watts per foot

See page 407

## WLA Area Work Light

- Solid-state LED light for area and machine lighting
- White LED lights in four sizes
- High-power LEDs for superior illumination with an even pattern of light and no shadows
- Extremely long-lasting LED technology for >50,000 hours of continuous working life
- Rugged, sealed thermoplastic housing; IP69K rated

See page 410

## ED1G Enabling Devices

- Handheld grip-style switch typically used for manual control of machine functions including visual observations, minor adjustments, troubleshooting, calibration, etc.
- Enabling switch provides the three-position functionality (OFF-ON-OFF) required for manual control of a machine, including enabling and hold-to-run applications
- Safety function is provided when the user squeezes or releases the handlegrip enabling switch
- Suited for use as an enabling device for robotic cells
- Optional momentary push-button switch (depending on model) can provide hold-to-run, reset or jogging/inching functions

See page 615

## Fullsize

			
Series	Q45	OMNI-BEAM™	Q60
Catalog Page	190	207	217
Description	Advanced one-piece, rugged sensor with outstanding optical performance	Modular, limit-switch style, field-programmable sensor	Laser or LED sensor for low reflectivity targets, regardless of background
Maximum Sensing Range	<b>Opposed:</b> 60 m <b>Retro Laser:</b> 70 m <b>Retro Non-Polar:</b> 9 m <b>Retro Polarized:</b> 6 m <b>Diffuse:</b> 3 m <b>Convergent:</b> 100 mm <b>Glass &amp; Plastic fiber optic:</b> depends on fiber used	<b>Opposed:</b> 45 m <b>Retro Non-Polar:</b> 9 m <b>Retro Polarized:</b> 4.5 m <b>Retro Clear Object:</b> 4 m <b>Diffuse:</b> 2 m <b>Convergent:</b> 38 mm <b>Glass &amp; Plastic fiber optic:</b> depends on fiber used	<b>Adjustable-Field:</b> 2 m
Dimensions (h x w x d)	88 x 45 x 55 mm	<b>DC:</b> 76 x 45 x 55 mm <b>AC:</b> 99 x 45 x 55 mm	75 x 25 x 60 mm
Housing Material	PBT polyester	PBT polyester	ABS/Polycarbonate
Protection Rating	IP67; NEMA 6P	IP66; NEMA 4	IP67; NEMA 6
Operating Temperature	<b>DC:</b> -40° to +70° C <b>AC:</b> -40° to +70° C <b>AC/DC:</b> -25° to +55° C	-40° to +70° C	-20° to +55° C (most models)
Power Supply	10 to 30V dc, 90 to 250V ac, 24 to 250V ac, 12 to 250V dc or 5 to 15V dc (NAMUR)	10 to 30V dc, 105 to 130V ac or 210 to 250V ac	10 to 30V dc, 12 to 250V dc or 24 to 250V ac
Outputs	<b>DC:</b> Bipolar NPN/PNP <b>AC:</b> SPST or SPDT Relay <b>NAMUR:</b> Constant current	<b>DC:</b> Bi-Modal™ <b>AC:</b> SPST relay	<b>DC:</b> Bipolar NPN/PNP <b>AC/DC:</b> SPST or SPDT Relay
Output Response Time	Depends on model	Depends on model	Depends on model
Adjustments	LO/DO switch, sensitivity adjustment control	Field-programmable for 4 operating parameters	2 momentary push buttons/ remote program wire

## Fiber Optic Sensors

			
Series	D10	D12	R55F
Catalog Page	226	235	240
Description	High-performance, low-contrast sensor with numeric or bargraph display	Versatile, high-power sensor with bargraph display	Fiber optic sensor for outstanding color contrast sensitivity
Maximum Sensing Range	Range varies with power level/speed selection and with fiber optics used	Range varies depending on sensing mode and fiber optics used	Range varies depending on sensing mode and fiber optics used
Dimensions (h x w x d)	36 x 10 x 68 mm	<b>Plastic Fibers:</b> 30 x 12 x 64 mm <b>Glass Fibers:</b> 30 x 12 x 70 mm	25 x 30 x 85 mm
Housing Material	ABS/Polycarbonate	ABS	ABS/Polycarbonate
Protection Rating	IP50; NEMA 1	IP11; NEMA 2	IP67; NEMA 6
Operating Temperature	-20° to +55° C, depending on model	-40° to +70° C or -20° to +70° C, depending on model	-10° to +55° C
Power Supply	10 to 30V dc, 12 to 30V dc, 12 to 24V dc or 15 to 24V dc	10 to 30V dc	10 to 30V dc
Outputs	<b>Expert Numeric Discrete:</b> Two solid-state <b>Expert Numeric Analog/Discrete:</b> 0 to 10V or 4 to 20 mA and Solid-state <b>Expert Bargraph Discrete:</b> Bipolar NPN/PNP <b>Discrete:</b> Bipolar NPN/PNP <b>Expert Small Object Counter:</b> NPN or PNP	<b>Expert:</b> Solid-state <b>Standard:</b> Solid-state <b>AC Coupled:</b> Bipolar NPN/PNP	Bipolar NPN/PNP
Output Response Time	Depends on model	<b>Expert:</b> 200 µs ON/OFF <b>Standard:</b> 50 or 500 µs ON/OFF <b>AC Coupled:</b> 50 µs ON/OFF	50 µs

\* Operating temperature range for plastic fiber optic assemblies is typically -30° to +70° C and -140° to +250° C for metal-sheathed glass fiber optic assemblies. See the Fiber Sensor section (beginning on page 243) for specific fiber optic temperature information.

## Measuring Arrays

## Radar

Series	R-GAGE™
Catalog Page	354
Description	Radar-based sensor for a wide variety of outdoor or challenging applications
Operating Principle	Frequency Modulated Continuous Wave (FMCW) radar
Detectable Objects	Objects containing metal or similar high-dielectric materials
Radio Frequency	24 GHz, ISM Band
Range	up to 15 m
Dimensions	100 x 74 x 46 mm
Power supply	12 to 30V dc
Housing Material	ABS/polycarbonate
Protection Rating	IP67
Operating Temperature	-40° to +65° C
Output Configuration	Bipolar NPN/PNP
Adjustments	DIP-switch functions

Vision Lights			
			
<b>Series</b>	<b>Ring Lights</b>	<b>Area Lights</b>	<b>Backlights</b>
<b>Catalog Page</b>	416	418	420
<b>Description</b>	Mounts directly to the sensor for easy setup and illuminates any object directly in front of the sensor	Provides even illumination in a concentrated area	Installs behind the target, directly facing the sensor; has a highly diffused surface and uniform brightness

		
<b>Linear Array Lights</b>	<b>On-Axis Lights</b>	<b>Low-Angle Ring Lights</b>
421	422	422
Provides high-intensity illumination of large areas, at long distances	Provides collimated illumination along the same optical path as camera	Illuminates nearly perpendicular to the direction of an inspection

		
<b>Spot Lights</b>	<b>Tubular Fluorescent Lights</b>	<b>Structured Lights</b>
423	424	424
Provides even illumination in a small concentrated spot	Features flicker-free high-intensity illumination of large areas	Uses Class 2 laser line for 3-dimensional sensing

For additional Vision Lighting selection information, see page 415.

<b>Protection Rating</b>	IP69K (depending on installation)	IP62; NEMA 2	IP62; NEMA 2	IP66; NEMA 4X
<b>Operating Temperature</b>	-40° to +50° C	0° to +50° C	0° to +50° C	-20° to +50° C
<b>Power Supply</b>	12 to 30V dc	12 to 30V dc	12 to 30V dc	12 to 30V dc
<b>Output configuration</b>	One NPN or PNP & NO or NC, depending on model	One user-selectable PNP or NPN	One NPN or PNP, depending on model; programmable for light or dark operate	One NPN or PNP, depending on model

## Safety Light Screens

Series	EZ-SCREEN® Type 4	EZ-SCREEN® Type 2	PICO-GUARD™
Catalog Page	473	489	502
Description	2-piece system <ul style="list-style-type: none"> <li>• 14 or 30 mm resolution light screen</li> <li>• 14 or 25 mm resolution LP light screen</li> <li>• 2-, 3- or 4- Beam Grids</li> <li>• Single-beam Points</li> </ul>	2-piece, 30 mm resolution light screen system for lower risk applications	Fiber Optic System <ul style="list-style-type: none"> <li>• 2-, 3- or 4- Beam Grids</li> <li>• Single-beam Points</li> </ul> For use with PICO-GUARD controller
Safety Rating (Depends on model)	Type 4 /Category 4/PLe	Type 2 /Category 2	Type 4 /Category 4
System Components	Emitter, receiver and one cordset for each. Optional interfacing components available.	Emitter, receiver and one cordset for each. Optional interfacing components available.	1 to 4 fiber optic element pairs, plus a controller
Range	14 or 30 mm: up to 18 m 14 or 25 mm: up to 7 m Grids & Points: up to 70 m	up to 15 m	up to 31 m
Supply Voltage	24V dc	24V dc	24V dc
Safety Output	2 PNP OSSD	2 PNP OSSD	2 PNP OSSD
Aux. Output	Yes	—	Yes
Response Time	8 to 56 ms, depending on model	11 to 25 ms	13 ms
Defined Area (Protected Height)	14 mm resolution: 150 to 1800 mm 30 mm resolution: 150 to 2400 mm 14 or 25 mm resolution: 270 to 1810 mm Grids: 500 to 1066 mm Points: 25 mm beam diameter	150 to 1500 mm	Grids: 500 to 1066 mm Points: 9 to 25 mm beam diameter
Cascading	Allow up to 4 emitter/receiver pairs (14, 25 or 30 mm systems) to be wired together to form a single safety device. Only matched pairs must be the same length and resolution.	—	Multiple PICO-GUARD controllers can be interconnected

# Selection Guide

## Safety Laser Scanner

Series	AG4
Catalog Page	503
Description	Two-dimensional, programmable area scanner
Safety Rating (Depends on model)	Type 3/Category 3
System Components	Laser scanner, configuration cordset and communication cordset
Protective Field	up to 6 m
Warning Field	up to 15 m
Scanning Angle	190°
Supply Voltage	24V dc
Safety Output	2 PNP OSSD
Aux. Output	2 PNP
Response Time	80 ms (adjustable to 640 ms)

## Safety Controllers

Series	SC22-3/-3E	PICO-GUARD™
Catalog Page	526	508
Description	Four standard models and four models for direct connectivity to EtherNet/IP and Modbus TCP industrial networks	Two models with different output configurations and one model with muting
Safety Rating (Depends on models)	Category 2, 3 or 4	Type 4/Category 4
Functional Stop Category	0 & 1	0
Voltage	24V dc	24V dc
Inputs	22 input terminals monitor safety and non-safety devices.	Up to 4 fiber optic channels (optical channels) controlling one or more optical elements, depending on optical element. Also, two inputs for external safety devices (USSI)* or mute, depending on model.
Safety Output	6 PNP (3 pair)	2 PNP OSSD
Aux. Output	10 discrete status outputs, EtherNet/IP & Modbus TCP	3 or 7 solid-state, depending on model
Output Response Time	10 ms	Optical channels: 13 ms USSIs: 7 ms (except muting)

\* USSI = Universal Safety Stop Interface

## Safety Modules

					
Series	E-Stop & Interlocked Guard	Universal Input	Safety Mat	Muting	Safe Speed
Catalog Page	531	539	541	544	548
Description	Modules monitor contacts of E-stop switches, guard interlock switches or the outputs of other safety modules.	Modules monitor one or two solid-state PNP or relay contact outputs from safety or non-safety devices, such as sensors or safety light screens.	Modules monitor one 4-wire safety mat (or multiple connected in series).	Modules suspend safeguarding during non-hazards time in the machine's cycle.	Modules monitor two sensors with PNP outputs for rotation and linear movements.
Safety Rating (Depends on model)	Category 2 or 4, depending on model	Category 2, 3 or 4	Category 3 (with mat)	Category 2, 3 or 4	Category 3
Functional Stop Category	0 & 1	0	0	0	0
Supply Voltage	24V ac/dc, 115V ac & 12-24V dc, 230V ac & 12-24V dc or 24V dc	24V ac/dc	115V ac & 12-24V dc or 230V ac & 12-24V dc	24V dc	24V ad/dc
Safety Outputs	2 NO, 3 NO, 4 NO, 2 NO & 2 NO w/delay or 4 NO & 4 NO w/delay	3 NO or 2 NO	4 NO	2 PNP OSSD or 2 NO	2 NO
Aux. Outputs	1 NC, 1 NC & 2 PNP, or 1 NC (immediate) & 1 NC (delayed)	1 NC	1 NC & 2 PNP	1 PNP or 1 NC	1 NC
Output Response Time	25, 35 or 50 ms	25 ms	50 ms	10 or 20 ms	700 or 350 ms

# Selection Guide

## Safety Modules

Series	Extension Relay	Interface Relay
<b>Catalog Page</b>	550	552
<b>Description</b>	Single or dual (depending on model) input channels accept the outputs of a primary safety device. Modules provide additional safety outputs for a primary safety device. Typically interfaced with safety modules with relay outputs.	One dual input accepts the single or dual safety output of a primary safety device. Typically interfaced with devices solid-state OSSD Outputs. Module increases switching current capacity (up to 6 amps) for the output of a primary safety device.
<b>Safety Rating (Depends on model)</b>	Category 2, 3 or 4 (Depends on hookup)	Category 2, 3 or 4 (Depends on hookup)
<b>Functional Stop Category</b>	0 or 1	0
<b>Supply Voltage</b>	24V dc or 24V ac/dc, depending on model	24V dc
<b>Safety Outputs</b>	4 NO or 4 NO (w/delay)	3 NO or 2 NO
<b>Aux. Outputs</b>	—	1 NC, depending on model
<b>Output Response Time</b>	20, 30 or 35 ms, depending on model	20 ms

## Two-Hand Control

Series	DUO-TOUCH® SG THC Modules	DUO-TOUCH® SG Run Bars
Catalog Page	556	564
Description	Two-Hand Control Modules; STB compatible	Two-hand control Run Bar with pre-mounted STB buttons
Inputs	Two STB Self-Checking Touch Buttons or Form C Mechanical Button	Requires IIC Two-Hand Control logic device for safe guarding applications
Safety Rating	Category 4 (module); Type IIC	Dependent on controller/module
Modules	Five models with different supply voltage, outputs and control functions (example, muting)	Five models with different supply voltage, outputs and control functions (purchased separately)
Supply Voltage	24V ac/dc, 115V ac/24V dc or 230V ac/24V dc, depending on model	10 to 30V dc
Safety Outputs	2 NO or 4 NO	—
Aux. Outputs/Function	<b>AT-FM-10K:</b> none <b>All others:</b> 1 NPN, 1 PNP & 1 NC	Models with or without E-Stop buttons
STB Touch Buttons	6 models with varying supply voltage, output type, cable and housing material  Kits with modules and STB buttons available	2 x STBVP6

# Selection Guide

## Safety Interlock Switches

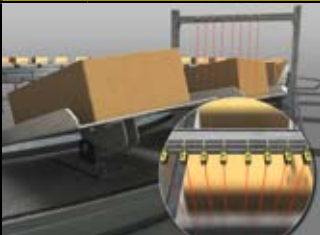

Series	PICO-GUARD™	Magnet	Hinge	Compact Plastic & Metal	Locking
Catalog Page	568	569	572	578 & 584	587
Type	Fiber Optic	Magnetic	Electromechanical Non-Locking	Electromechanical Non-Locking	Electromechanical Locking
Package Style	2-piece	2-piece	1-piece	2-piece	2-piece
Housing Material	Plastic or metal	Plastic	Plastic or metal	Plastic or metal	Plastic or metal
Actuator Contacts	For use with PICO-GUARD controller	1 NO & 1 NC	2 NC & 1 NO, SPDT (Form C), 1 NC & 1 NO, or 2 NC	2 NC & 1 NO, 1 NC & 1 NO, 2 NC, 1 NC, or 1 NO & 1 NC	1 NC & 1 NO, 2 NC, 2 NC & 1 NO, or 3 NC
Solenoid Contacts	—	—	—	—	1 NC & 1 NO, or 1 NC

## Emergency Stop & Stop Control Devices

				
Series	PICO-GUARD™	Mechanical E-Stop Buttons	Rope Pull Switches	Enabling Devices
Catalog Page	599	601	605	615
Description	Optical E-Stop Push Buttons	Mechanical E-Stop Push Buttons	E-Stop and Stop Control Rope Pulls	Stop Control Enabling Devices
Housing Material	Plastic or metal	Plastic or metal	Plastic or metal	Plastic
Contacts	For use with PICO-GUARD controller	2 NC, 1 NC & 1 NO, or 2 NC & 1 NO	<b>Safety Contacts:</b> 2 NC or 4 NC <b>Aux. Contacts:</b> 2 NO or 1 NO	2 NC & 1 NO Aux. or 2 NC & 1 NO Aux. & 1 NO momentary push button, or 2 NC & 2 NO momentary push button

<p><b>Wood Profiling</b></p>  <p><b>Objective:</b> To accurately profile wooden moldings, regardless of color.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 295</p>	<p><b>Liquid Level Monitoring</b></p>  <p><b>Objective:</b> To monitor the level of liquid in a tank by sending a continuous signal that represents the current depth.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 309</p>	<p><b>Roll Size</b></p>  <p><b>Objective:</b> To monitor the decreasing size of a roll of material, so it can be replaced when empty.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 309</p>	<p><b>Pallet Load</b></p>  <p><b>Objective:</b> To detect that a pallet with packages stacked at different heights is loaded and ready for wrapping.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 309</p>
<p><b>Loop Control</b></p>  <p><b>Objective:</b> To control the amount of play in a loop of clear plastic within a set range.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 314</p>	<p><b>Liquid Level Detection</b></p>  <p><b>Objective:</b> To accurately determine the level of liquid in a narrow tube.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 314</p>	<p><b>Bottle Counting</b></p>  <p><b>Objective:</b> To count tinted glass bottles on a conveyor in a soft drink bottling operation.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 317</p>	<p><b>Liquid Level Detection</b></p>  <p><b>Objective:</b> To monitor the level of soap in a reservoir in a car wash.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 317</p>

## Sensor Applications

### Loop Control of Clear Plastic

**Objective:**  
To control the speed of a web by reliably detecting the clear plastic film.

page 320

### Moonroof Detection

**Objective:**  
To reliably detect the presence of clear glass to ensure that the moonroof has been installed.

page 320

### Pharmaceutical Bottle Detection

**Objective:**  
To reliably detect clear bottles in an aseptic environment.

page 328

### Inverted Object Detection

**Objective:**  
To detect a product that has flipped over by measuring small differences in height.

page 332

### Height Measurement

**Objective:**  
To verify that a stack of boards has the correct number.

page 336

### Ink Level

**Objective:**  
To monitor the ink level in a printer tray.

page 336

### Web Thickness

**Objective:**  
To measure the thickness of webbing.

page 336

### Empty Rack Verification

**Objective:**  
To verify that all glass hard disks are removed from the holding rack after the disks are rinsed.

page 330

### Carton Sizing

**Objective:**  
To measure height, length and width of cartons for storage or palletizing

page 340

### Plastic Bottle Detection

**Objective:**  
To ensure that clear bottles are properly placed on a conveyor.

page 340

### Carpet Web Detection

**Objective:**  
To determine the location of two edge transitions on carpet web: air to selvage and selvage to tufting.

page 340

### Vehicle Separation

**Objective:**  
To detect vehicle separation in an Automated Vehicle Classification (AVC) system.

page 348

### Edge Monitoring

**Objective:**  
To track the edge of a web as it rolls, to make sure it stays aligned.

page 348

### Train and Tram Detection

**Objective:**  
To detect and locate a train or tram in a tunnel

page 354

### Cargo Positioning

**Objective:**  
To detect and position cargo on a truck bed

page 354

### Automobile Detection in Drive-Through

**Objective:**  
To detect the presence of large moving or stationary objects, regardless of shape or color.

page 354

# Applications

## Vision Applications

<b>Label Alignment Inspection</b>  <p><b>Objective:</b> To verify that each bottle has a label applied and that each label is applied straight.</p> <p>ONLINE LOOK FOR MORE INFO page 364</p>	<b>Date/Lot Code Inspection</b>  <p><b>Objective:</b> To verify each package has a date/lot code printed on it.</p> <p>ONLINE LOOK FOR MORE INFO page 364</p>	<b>Punch Hole Inspection</b>  <p><b>Objective:</b> To verify that the expected number of holes exist on a small metal part.</p> <p>ONLINE LOOK FOR MORE INFO page 364</p>	<b>Vial Stopper Inspection</b>  <p><b>Objective:</b> To ensure that a stopper is properly inserted as each vial leaves the filling station</p> <p>ONLINE LOOK FOR MORE INFO page 364</p>
<b>Part Flaw Detection</b>  <p><b>Objective:</b> To detect bent or missing connectors, and make sure electronic components are correctly oriented.</p> <p>ONLINE LOOK FOR MORE INFO page 364</p>	<b>Intelligent Mail Bar Code (IMB) Reading</b>  <p><b>Objective:</b> To sort mail by reading the information encoded in the bar code.</p> <p>ONLINE LOOK FOR MORE INFO page 364</p>	<b>Lot Code Inspection</b>  <p><b>Objective:</b> To verify that a readable lot code is present on the chip.</p> <p>ONLINE LOOK FOR MORE INFO page 364</p>	<b>Pharmaceutical Insert Verification</b>  <p><b>Objective:</b> To read and verify data matrix code on the documentation prior to the final packaging process.</p> <p>ONLINE LOOK FOR MORE INFO page 364</p>
<b>Vial Fill Level and Cap Seal Inspection</b>  <p><b>Objective:</b> To rapidly verify that vials are filled to the correct level and that the vial caps are correctly aligned.</p> <p>ONLINE LOOK FOR MORE INFO page 370</p>	<b>Stamped Metal Pin Inspection</b>  <p><b>Objective:</b> To check for correct count, straightness and pitch of connector pins on a stamped metal subassembly.</p> <p>ONLINE LOOK FOR MORE INFO page 370</p>	<b>Color Inspection and Verification</b>  <p><b>Objective:</b> To inspect pour spouts for correct insertion and color.</p> <p>ONLINE LOOK FOR MORE INFO page 370</p>	<b>Capping and Fill Inspection</b>  <p><b>Objective:</b> To make sure bottles are filled and capped properly.</p> <p>ONLINE LOOK FOR MORE INFO page 370</p>
<b>Verification of Two Bar Codes on a Part</b>  <p><b>Objective:</b> To read and verify 1D and 2D bar codes on a part.</p> <p>ONLINE LOOK FOR MORE INFO page 370</p>	<b>Product ID and Lot Control</b>  <p><b>Objective:</b> To track a batch of a pharmaceutical product.</p> <p>ONLINE LOOK FOR MORE INFO page 370</p>	<b>Label Inspection in a Wet Environment</b>  <p><b>Objective:</b> To confirm that each bottle in a wet environment has a label in the correct position.</p> <p>ONLINE LOOK FOR MORE INFO page 370</p>	<b>2D Stamped Bar Code Verification</b>  <p><b>Objective:</b> To detect and verify a dot-peened bar code on a metal part.</p> <p>ONLINE LOOK FOR MORE INFO page 370</p>

## Wireless Applications

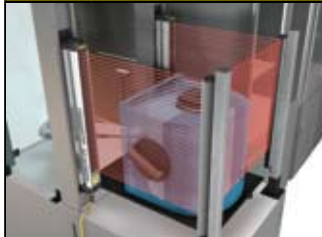

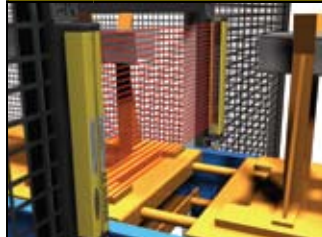

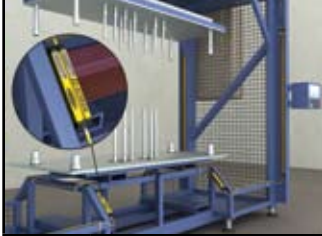

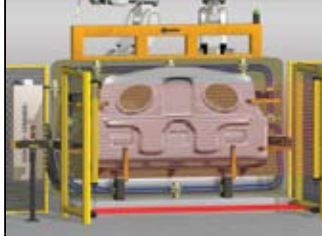

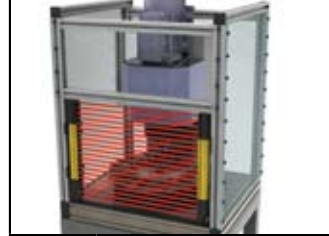

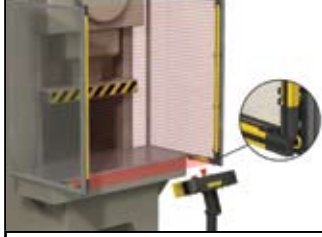

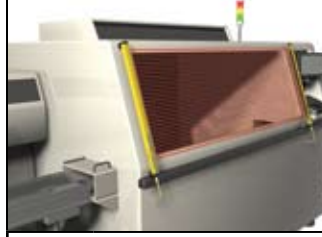

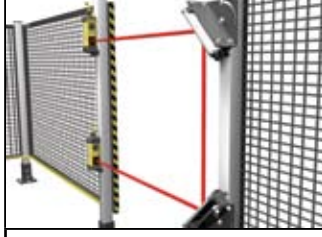

<p><b>Preventative Maintenance</b></p>  <p><b>Objective:</b> To gather I/O data such as temperature and vibration on a mobile Automated Storage and Retrieval System (AS/RS) crane motor.</p> <p>page 393</p>	<p><b>Warehouse Door</b></p>  <p><b>Objective:</b> To control the routing of an Automated Guided Vehicle (AGV) through a facility a FlexNode is positioned at each door.</p> <p>page 391</p>	<p><b>Report Activated Emergency Shower Location</b></p>  <p><b>Objective:</b> To alert management when and where an emergency shower has been activated.</p> <p>page 390</p>	<p><b>Rotary Bottle Filler Monitoring</b></p>  <p><b>Objective:</b> To monitor fill level, temperature and pressure to determine when to activate the inflow into the tank.</p> <p>page 392</p>
<p><b>Gated Community Entry</b></p>  <p><b>Objective:</b> To open/close gates by detecting presence/absence of vehicles using a wireless M-GAGE Node.</p> <p>page 394</p>	<p><b>Call for Parts (Flooring Monitoring)</b></p>  <p><b>Objective:</b> To allow operators to call forklift drivers to deliver additional parts or remove completed assemblies.</p> <p>page 391</p>	<p><b>Energy Management</b></p>  <p><b>Objective:</b> To control and optimize energy consumption by turning on and off industrial fans and air movers.</p> <p>page 390</p>	<p><b>Pick-to-Light</b></p>  <p><b>Objective:</b> To deploy a wireless pick-to-light system using a FlexNode equipped with low-power EZ-LIGHT models.</p> <p>page 391</p>
<p><b>Environmental Monitoring</b></p>  <p><b>Objective:</b> To maintain optimal temperature and relative humidity using a wireless Node.</p> <p>page 393</p>	<p><b>Process Tank Level Monitoring</b></p>  <p><b>Objective:</b> To maintain optimal fill level with a FlexPower Node and power-optimized ultrasonic sensor.</p> <p>page 390</p>	<p><b>Valve Temperature Monitoring in a Steam Power Plant</b></p>  <p><b>Objective:</b> To monitor the valve temperature to identify possible energy losses and schedule repairs.</p> <p>page 393</p>	<p><b>Failing Conduit Replacement</b></p>  <p><b>Objective:</b> To replace failing wired systems with a Node and Gateway pair.</p> <p>page 385</p>
<p><b>Robotics Retrofit</b></p>  <p><b>Objective:</b> To eliminate the need for slip rings using a FlexNode to capture data onboard a moving robot.</p> <p>page 390</p>	<p><b>HVAC Control</b></p>  <p><b>Objective:</b> To manage energy by monitoring the HVAC system and identifying areas where improved efficiency is possible.</p> <p>page 390</p>	<p><b>Tank Level Pressure</b></p>  <p><b>Objective:</b> To maintain tank levels using a submersible pressure sensor and a FlexNode.</p> <p>page 390</p>	<p><b>Automated Parts System</b></p>  <p><b>Objective:</b> To schedule pick up of a pallet by an AGV simply by pressing a button at a workstation.</p> <p>page 391</p>

# Applications

## Indicator & Actuator Applications

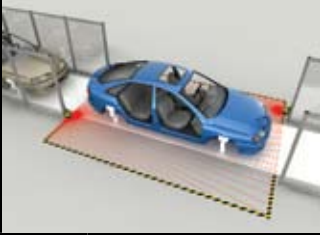

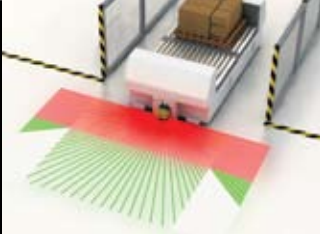

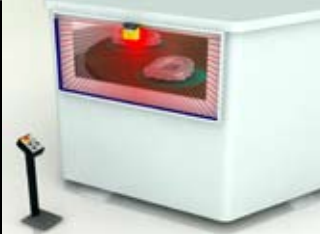

<p><b>Machine Status Indication</b></p>  <p><b>Objective:</b> To clearly indicate where in the process the machine is, and when the machine needs attention.</p> <p>ONLINE LOOK FOR MORE INFO page 428</p>	<p><b>Pump Panel Status Indication</b></p>  <p><b>Objective:</b> To use multiple lights and audible alert to communicate pump status, even from a distance.</p> <p>ONLINE LOOK FOR MORE INFO page 428</p>	<p><b>Checkout Lane Status Indication</b></p>  <p><b>Objective:</b> To identify which grocery store lanes are open, which are closed and which are about to close.</p> <p>ONLINE LOOK FOR MORE INFO page 427</p>	<p><b>Conveyor Jam detection</b></p>  <p><b>Objective:</b> To use an indicator light and audible alert to signal a conveyor jam.</p> <p>ONLINE LOOK FOR MORE INFO page 427</p>
<p><b>Part Loaded Indicator</b></p>  <p><b>Objective:</b> To signal to an operator that a part is placed correctly, without leaving the station.</p> <p>ONLINE LOOK FOR MORE INFO page 427</p>	<p><b>Process Inspection Indicator</b></p>  <p><b>Objective:</b> To allow an inspector to monitor the pass/fail reading of several sensors at the same time.</p> <p>ONLINE LOOK FOR MORE INFO page 427</p>	<p><b>Remote Level Indication</b></p>  <p><b>Objective:</b> To alert the operator that a sensor has detected that the content level is running low.</p> <p>ONLINE LOOK FOR MORE INFO page 427</p>	<p><b>Traffic Control</b></p>  <p><b>Objective:</b> To indicate the status of a loading dock.</p> <p>ONLINE LOOK FOR MORE INFO page 440</p>
<p><b>Call for Parts</b></p>  <p><b>Objective:</b> To alert personal to refill bins before parts are depleted.</p> <p>ONLINE LOOK FOR MORE INFO page 427</p>	<p><b>Incorrect Pick Signal</b></p>  <p><b>Objective:</b> To indicate whether the operator is picking from the correct bin or wrong bin.</p> <p>ONLINE LOOK FOR MORE INFO page 444</p>	<p><b>Wide Bin Confirmation</b></p>  <p><b>Objective:</b> To provide compact part-pick confirmation for a shelf with a wide opening.</p> <p>ONLINE LOOK FOR MORE INFO page 444</p>	<p><b>Call for Service</b></p>  <p><b>Objective:</b> To signal and indicate that service is required using a hanging indicator and push button.</p> <p>ONLINE LOOK FOR MORE INFO page 444</p>
<p><b>Enclosure Lighting</b></p>  <p><b>Objective:</b> To provide bright, even illumination where space is limited.</p> <p>ONLINE LOOK FOR MORE INFO page 405</p>	<p><b>Order Fulfillment</b></p>  <p><b>Objective:</b> To guide a packer to the next item in an order and to confirm the pick.</p> <p>ONLINE LOOK FOR MORE INFO page 448</p>	<p><b>Long Bin Pick-to-Light</b></p>  <p><b>Objective:</b> To provide pick-to-light sensing for bins that extend beyond the rack.</p> <p>ONLINE LOOK FOR MORE INFO page 450</p>	<p><b>Part Pick Verification</b></p>  <p><b>Objective:</b> To indicate which part to pick for an assembly and to verify the pick is done.</p> <p>ONLINE LOOK FOR MORE INFO page 453</p>

## Machine Safety Applications

<p><b>Personnel Protection with Fixed Blanking</b></p>  <p><b>Objective:</b> To protect hands and fingers from the hazardous parts of a carton erector.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 469</p>	<p><b>Guarding in ESD-Sensitive Environment</b></p>  <p><b>Objective:</b> To guard a wafer cell in an environment sensitive to electrostatic discharge.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 469</p>	<p><b>Safe Material Access</b></p>  <p><b>Objective:</b> To prevent injury while allowing materials into a process.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 469</p>	<p><b>Perimeter Guarding</b></p>  <p><b>Objective:</b> To combine a light screen and mirrors to guard access to a work cell.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 469</p>
<p><b>Vertical and Horizontal Guarding</b></p>  <p><b>Objective:</b> Guarding of two sides of machine because of separate operator load and unload stations.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 469</p>	<p><b>Weld Cell Protection</b></p>  <p><b>Objective:</b> To protect operators in semi-automated operations involving the manual feeding and/or removal of parts.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 469</p>	<p><b>L-Configured Guarding</b></p>  <p><b>Objective:</b> To link multiple light screens to safeguard a robotic cell.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 469</p>	<p><b>Small Machine Guarding</b></p>  <p><b>Objective:</b> To provide low-profile, point-of-operation guarding for small machinery.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 481</p>
<p><b>U-Configured Guarding</b></p>  <p><b>Objective:</b> To guard multiple sides of a machine without overlapping light curtains.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 481</p>	<p><b>L-Configured Guarding without Overlapping</b></p>  <p><b>Objective:</b> To provide continual sensing with no gaps.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 481</p>	<p><b>Lower-Risk Machine Guarding</b></p>  <p><b>Objective:</b> To provide guarding for a lower-risk application.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 489</p>	<p><b>Lower-Risk Machine Guarding</b></p>  <p><b>Objective:</b> To protect personnel from a machine that can cause slight injuries.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 489</p>
<p><b>Perimeter Guarding</b></p>  <p><b>Objective:</b> To shut off the hazardous motion of a tube bender when someone enters the cell.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 494</p>	<p><b>Single-Point Access Guarding</b></p>  <p><b>Objective:</b> To prevent personnel from accessing a hazardous area.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 494</p>	<p><b>Entry/Exit Guarding with Muting</b></p>  <p><b>Objective:</b> To prevent personnel from accessing a hazardous area.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 502</p>	<p><b>Explosive Environment Point-of-Operation Guarding</b></p>  <p><b>Objective:</b> To protect hands from a hazard while allowing material to pass through, by spacing individual Points as needed.</p> <p><a href="#">ONLINE</a> <a href="#">LOOK FOR MORE INFO</a> page 494</p>

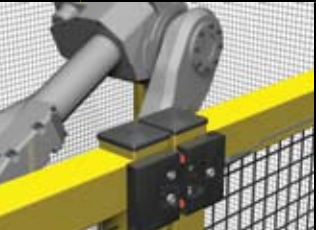

# Applications

## Machine Safety Applications

<b>Moving Door Monitoring</b>  <p><b>Objective:</b> To prevent passengers from being struck by closing doors.</p> <p>page 494</p>	<b>Explosive Environment Guarding with Muting</b>  <p><b>Objective:</b> To provide entry/exit guarding and muting, using Points in an explosive environment.</p> <p>page 494</p>	<b>Monitoring Access to an Assembly Line</b>  <p><b>Objective:</b> To detect the presence/absence of objects or personnel as vehicles move along an assembly line.</p> <p>page 503</p>	<b>Collision Avoidance</b>  <p><b>Objective:</b> To provide collision avoidance for automated guided vehicle (AGV).</p> <p>page 503</p>
<b>Two-Zone Monitoring</b>  <p><b>Objective:</b> To detect the approach of personnel to each of two operator work stations of a robotic cell.</p> <p>page 503</p>	<b>AGV Turn Clearance</b>  <p><b>Objective:</b> To detect the presence of personnel or objects in the path of the automated guided vehicle (AGV).</p> <p>page 503</p>	<b>Point-of-Operation Guarding</b>  <p><b>Objective:</b> To detect a hand, arm or entire body using reference container monitoring.</p> <p>page 503</p>	<b>Whole Body Detection</b>  <p><b>Objective:</b> To safeguard a pallet load/unload station using two scanners with field pair switch over.</p> <p>page 503</p>
<b>Monitoring of Multiple Safety Devices</b>  <p><b>Objective:</b> To provide monitoring of safety light grids, interlock switches, E-Stop button and a run bar with one safety controller.</p> <p>page 526</p>	<b>Monitoring of Multiple Safety Devices</b>  <p><b>Objective:</b> To monitor a safety light screen, self-checking touch buttons and an E-Stop button with one safety controller.</p> <p>page 526</p>	<b>Emergency Stop Monitoring</b>  <p><b>Objective:</b> To stop a machine's operation in an emergency, using a module with three output switching channels.</p> <p>page 531</p>	<b>Emergency Stop Monitoring</b>  <p><b>Objective:</b> To stop a machine's operation in an emergency, using a module with four output switching channels.</p> <p>page 531</p>
<b>Gate Monitoring</b>  <p><b>Objective:</b> To monitor a door-guarding switch, whether the switch is mechanical or magnetic.</p> <p>page 523</p>	<b>Mat Monitoring</b>  <p><b>Objective:</b> To monitor a safety mat that provides area guarding by responding to pressure.</p> <p>page 541</p>	<b>Safe Material Access</b>  <p><b>Objective:</b> To prevent injury while allowing material into a process.</p> <p>page 523</p>	<b>Two-Hand Control Monitoring</b>  <p><b>Objective:</b> To monitor any actuation device pair, using a module with two redundant output contacts.</p> <p>page 554</p>

## Machine Safety Applications

<h3>Two-Hand Control Monitoring</h3>  <p><b>Objective:</b> To monitor any actuation device pair, using a module with four redundant output contacts.</p> <p>page 554</p>	<h3>Two-Hand Control Monitoring with Muting</h3>  <p><b>Objective:</b> To use a two-hand control to start a cycle and mute during the cycle's safe portion.</p> <p>page 554</p>	<h3>Door Monitoring</h3>  <p><b>Objective:</b> To provide door guarding using compact, barrel shaped interlocking switches.</p> <p>page 507</p>	<h3>Gate Monitoring</h3>  <p><b>Objective:</b> To monitor the position of a swing gate using a pair of interlocking switches.</p> <p>page 507</p>
<h3>Door Monitoring</h3>  <p><b>Objective:</b> To provide door guarding in an explosive environment, using fiber optic switches.</p> <p>page 507</p>	<h3>Door Monitoring</h3>  <p><b>Objective:</b> To provide door guarding in an environment cleaned with chemicals, using a fiber optic switch.</p> <p>page 507</p>	<h3>Door Monitoring</h3>  <p><b>Objective:</b> To safeguard a door in an area with heavy machine traffic.</p> <p>page 507</p>	<h3>Swinging Gate Monitoring</h3>  <p><b>Objective:</b> To safeguard a hazard with a guard, gate or door that is mounted on a hinge.</p> <p>page 572</p>
<h3>Gate Monitoring</h3>  <p><b>Objective:</b> To prevent trapping or crushing by protecting an interlocked breakaway guard with an integral hinge.</p> <p>page 572</p>	<h3>Switch Door Locking</h3>  <p><b>Objective:</b> To lock out an area until a machine's hazardous motion stops.</p> <p>page 587</p>	<h3>Sliding Door Monitoring</h3>  <p><b>Objective:</b> To instantly stop a hazardous machine when sliding door is opened.</p> <p>page 587</p>	<h3>Emergency Stopping</h3>  <p><b>Objective:</b> To instantly stop the hazardous motion of a conveyor from multiple points, using a heavy-duty switch.</p> <p>page 507</p>
<h3>Emergency Stopping</h3>  <p><b>Objective:</b> To instantly stop the hazardous motion of a conveyor from multiple points, using a center-mounted switch.</p> <p>page 605</p>	<h3>Emergency Stopping</h3>  <p><b>Objective:</b> To instantly stop the hazardous motion of a conveyor from multiple points, using an end-mounted switch.</p> <p>page 605</p>	<h3>Emergency Stopping</h3>  <p><b>Objective:</b> To instantly stop the hazardous motion of a machine from a safe distance.</p> <p>page 605</p>	<h3>Emergency Stopping</h3>  <p><b>Objective:</b> To instantly stop the hazardous motion of a machine from a safe distance.</p> <p>page 599</p>
