BOSCH

Filtros Bosch.

Sólo quien es líder en desarrollo de tecnologías de sistemas automotrices, puede ofrecer una línea de filtros tan completa y eficiente. Son los filtros Bosch que usted ya conoce.

- ▶ Amplia cobertura de mercado.
- ▶ Actualización tecnológica garantizada por controles constantes.
- ▶ Fabricación sobre un riguroso control de certificación de calidad Bosch.

Indicaciones de uso del catálogo

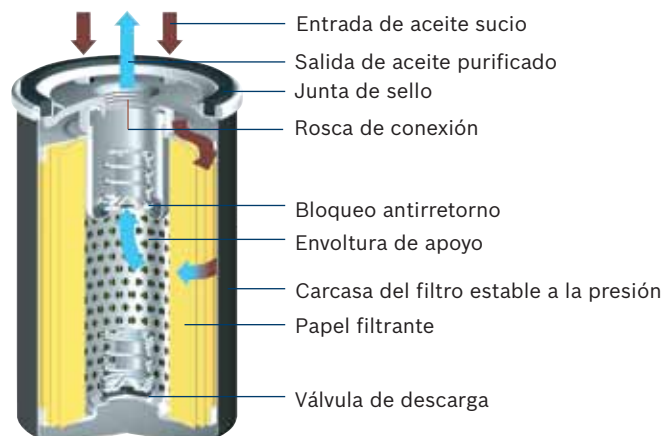

Tecnología de los filtros.

Filtros de aceite.

Protección de los componentes del motor.

- ▶ Válvula de retención impide que el motor funcione sin que haya lubricación.
- ▶ Válvula de descarga garantiza la lubricación del motor incluso en casos de filtro obstruido.
- ▶ Junta de sello especial, resistente a la agresión del aceite del motor y a altas temperaturas, garantiza la estanqueidad durante toda la vida útil del filtro.
- ▶ Cuerpo resistente a la presión y componentes metálicos con protección anticorrosivo.

Filtros de aire.

Depuración del aire de admisión.

- ▶ Papel especialmente desarrollado para evitar roturas, incluso en condiciones de humedad excesiva, y resistencia a altas temperaturas.
- ▶ Dimensiones externas con ajuste perfecto.
- ▶ Total estanqueidad en las uniones.
- ▶ Moldura de sello en poliuretano que proporciona flexibilidad, ajuste exacto y durabilidad durante toda la vida útil del filtro.
- ▶ Filtros con tela perforada proporcionan más resistencia mecánica.

Filtros de combustible. Protección de los componentes del motor.

- ▶ Los componentes del sistema de inyección de combustible operan hoy en día con precisión de micrones (um). Esto significa que la más mínima impureza en el combustible ya es suficiente para causar desgastes a las partes móviles del motor.

Existen diferentes filtros de combustible:

- ▶ Filtros Jetronic, para motores con inyección electrónica.
- ▶ Filtros de combustible gasolina/alcohol, para vehículos con carburador.
- ▶ Filtros Diesel.

Filtros de papel en rollo y filtros de papel estrella.

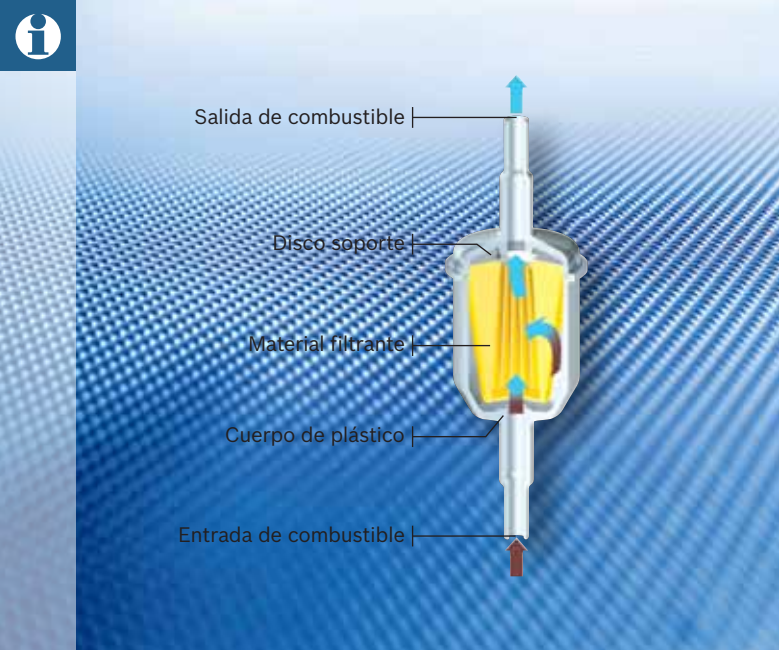

El empleo del papel estrella o en rollo está de acuerdo con las exigencias de los fabricantes de vehículos, para la Línea Jetronic o Diesel. Para los motores que usan carburador es utilizado papel estrella.

Filtros de combustible. Protección de los componentes del motor.

Filtros de combustible para inyección electrónica (Jetronic).

- ▶ Tienen doble rebordeado, proporcionando más resistencia a la vibración, temperaturas elevadas y agresiones de los combustibles.
- ▶ Existe en las versiones con papel estrella o rollo, dependiendo del tamaño:
 - 0,2 - 0,41 -> estrella
 - 0,4 - 0,61 -> rollo

Tecnología de los filtros.

Filtros de combustible. Protección de los componentes del motor.

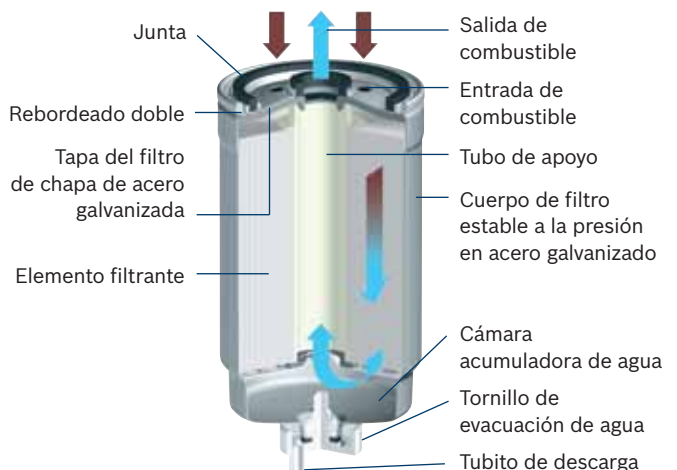

Filtros de combustible para vehículos con carburador.

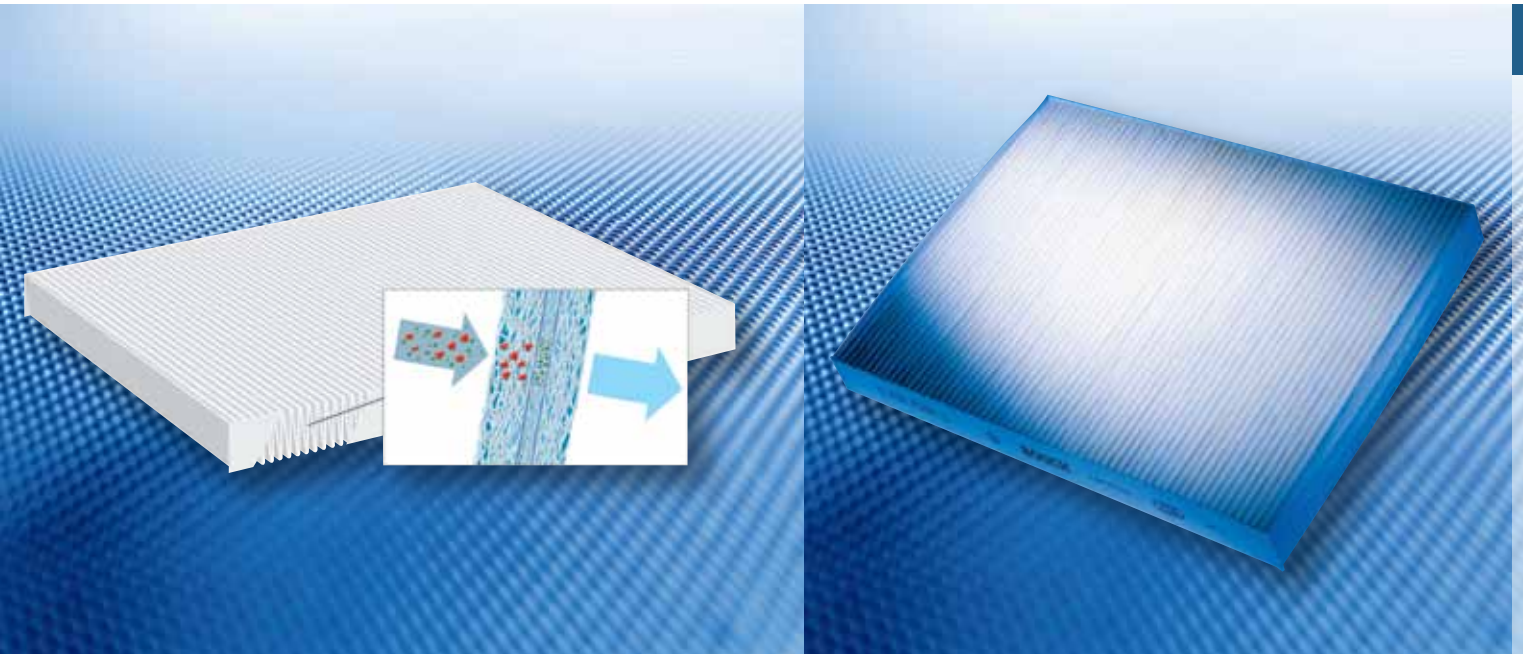

- ▶ Utilización universal en todos los motores con carburador, para conductos de combustible de 6 a 8 mm de diámetro.
- ▶ Carcasa semitransparente en poliamida.
- ▶ La excelencia del papel filtrante permite una óptima relación entre eficiencia de filtración y vida útil del filtro.

Filtros de combustible. Protección de los componentes del motor.

Filtros de combustible diesel.

- ▶ Tiene doble función: separar el agua del combustible Diesel y eliminar las impurezas.
- ▶ Además del rebordeado doble, tiene una junta de sello interna, proporcionando más resistencia a las vibraciones, temperaturas elevadas y agresiones del combustible.
- ▶ Los tipos de filtros dependen de la indicación de los fabricantes de vehículos:
 - filtros de lana;
 - filtros de cartucho de papel;
 - filtros blindados.

Filtro de cabina.

Aire más saludable en el interior de su vehículo.

- ▶ Material filtrante con tres o cuatro capas optimiza la filtración.
- ▶ Resistencia elevada a la humedad del aire.
- ▶ Camada central cargada electrostáticamente filtra las partículas inferiores a 0,001 mm, que usualmente pueden llegar hasta los pulmones de los pasajeros.

Filtro de cabina estándar.

Los filtros de cabina estándar Bosch están estructurados con tres capas de fibras.

La camada central contiene micro fibras cargadas electrostáticamente, garantizando filtración de hasta en 100% de todo el polen y otras partículas contaminantes del aire.
