INVECTOR-DS

INVECTOR-DS (DOUBLE SEAL) CHOKE SYSTEM

A REVOLUTIONARY STEP FORWARD IN CHOKE TUBES

The new Browning Invector-DS choke tube system is the biggest leap forward in design since interchangeable choke tubes were introduced. With the Invector-DS, we've really done our homework and taken the proven thin wall, muzzle thread choke concept to the next level of shot pattern performance. The exclusive brass alloy band at the base of the tube seals out gas and grit that can work its way between the barrel and tube, making the Invector-DS tubes easy to remove even after extensive shooting. Thin wall construction reduces the flare at the end of the barrel for a sleeker shotgun appearance. Lastly, the Invector-DS offers the most consistent, reliable patterning of any system ever. With all these features, you can't lose with Invector-DS.

Longer overall length, as much as 1 1/8" longer than a leading competitor, allows a gradual choke taper and more parallel surface for denser shot patterns, better pattern percentages and faster shot velocities.

Front threads are precision cut for easy installation and removal, and help minimize barrel flare.

Extended Invector-DS choke tubes have crisp knurling for a sure grip and are clearly marked for easy identification.

All Invector-DS choke tubes are highly polished inside and out and produce dense, predictable patterns.

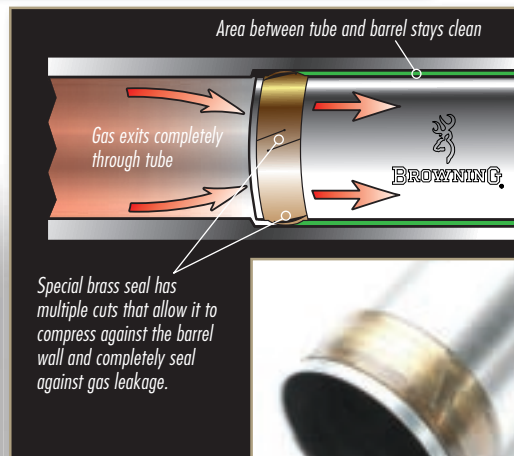

Invector-DS after extensive shooting

Competitor's tube after extensive shooting

Competitor's tube after extensive shooting

Special brass seal has multiple cuts that allow it to compress against the barrel wall and completely seal against gas leakage.

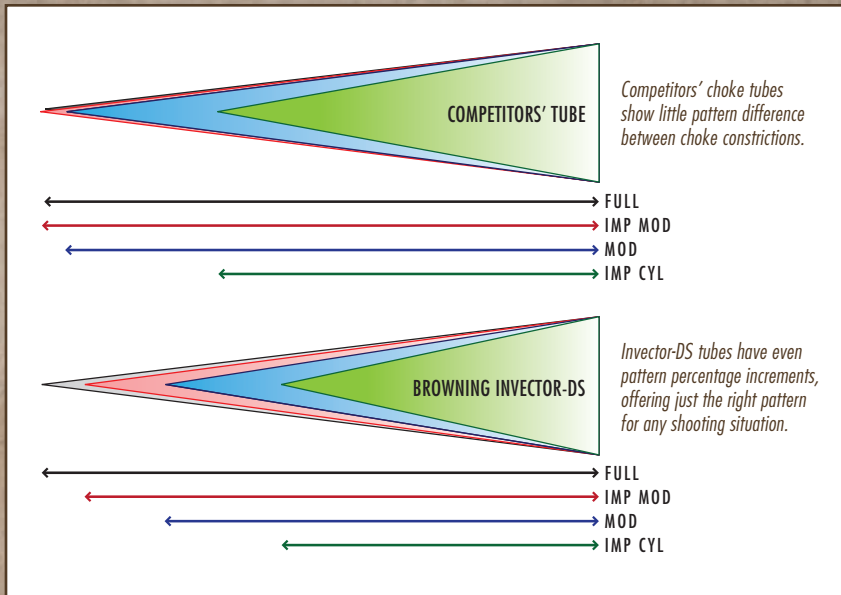

After extensive shooting, competitors' choke tubes without a gas seal show significant grit and residue build up on the tube. The innovative gas seal on Browning Invector-DS tubes keeps the choke tube cleaner, for easier removal and installation.

EXCLUSIVE BROWNING INVECTOR-DS GAS SEAL

Invector-DS choke tubes feature a proprietary brass seal that prevents gas and grit from slipping into the space between the barrel and choke tube. This durable, long lasting seal compresses tightly against the barrel wall to minimize residue build up on the threads for easier installation and removal than any other choke system with muzzle threads. The seal also helps keep the choke tube snug in the barrel.

THE SHOT PATTERN YOU WANT.

When you thread in a choke tube, you expect it to give you the shot pattern you need for the shooting situation at hand. Invector-DS does this better than any of the competitions' choke systems. From full to cylinder, the internal geometries of Invector-DS choke tubes have been tested again and again to ensure that patterns tighten consistently and reliably. With Invector-DS you get even shot spacing between chokes when it comes to pattern percentages, and the pattern you want when you take the shot.

NEW INVECTOR-DS CHOKE TUBES

- Fits flush with the end of the barrel but are longer than competitors' tubes
- Proprietary differential banded gas seal eliminates residue build up and makes chokes easy to remove and install
- Integrated spring suspension holds the seal tight, yet allows expansion against the barrel wall for a perfect fit and a smooth transition for the shot column entering the choke
- Gas is controlled at the interface between choke and where it seats in the bore
- From skeet to full choke, patterns tighten consistently and reliably

DESCRIPTION	12 GA. CODE #	PATTERN PERCENTAGES	SUGG. RETAIL
Full	1133253	75-80 %	\$39.99
Light Full	1133243	70-75 %	39.99

A5

COME HELL
OR HIGH WATER

100,000
ROUND GUARANTEE
OR FIVE YEARS

HUMPBACK ACQUISITION ADVANTAGE

GET THE HUMPBACK ACQUISITION ADVANTAGE

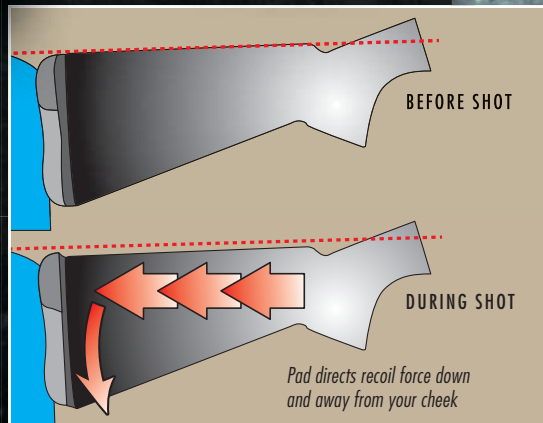

Built from rugged and lightweight aircraft-grade aluminum alloy, the A5 receiver's shape is more than a throwback for the sake of nostalgia. The familiar humpback receiver profile melds seamlessly with the rib to extend your sight plane, aiding in natural sight alignment for quicker target acquisition.

INFLEX II TECHNOLOGY

INFLEX II TECHNOLOGY RECOIL PAD

The new Inflex II Technology recoil pad is the next generation of the most recoil absorbing pad available. A softer new outer material provides better lateral stability, even better recoil absorbing performance and is super slippery to prevent snagging on clothing when shouldering. Internal directional deflection construction guides the comb down and away from your cheek for greater shooting comfort and faster, more accurate follow-up shots.

THE NEW A5. THE HUMP IS BACK.

You may notice a family resemblance, but let's get one thing straight — this ain't your Grandpa's Auto-5. In fact, the iconic humpback-shaped receiver is the only thing this new Browning autoloader shares with its legendary namesake. The all new Browning A5 is built to be the most reliable, fastest cycling, best performing and softest shooting recoil-operated (yes, recoil-operated) autoloader on the planet. And we are so confident in the A5, we are standing behind it with a 100,000 round or five-year guarantee that this shotgun will work, come hell or high water. Standing firmly behind this claim is the ultra-reliable, honed to perfection Kinematic Drive System. Other innovations, like the new Invector-DS choke tube system and Inflex II recoil pad are sure to place the A5 right at the top of the industry. With the recoil-operated A5 and our gas-operated Maxus autoloaders, we are poised to dominate every aspect of the autoloading shotgun market. These two guns complement one another in the same way thunder goes with lightning, and the way Browning goes with number one.

KINEMATIC DRIVE™ SYSTEM

In its simplest term, kinetic energy is the energy of motion. The new Browning A5 makes better use of kinetic energy with its powerful, short recoil-operated Kinematic Drive System. Kinematic Drive harnesses recoil energy and converts it into the mechanical motion needed to operate the action. This concept is tried and true, and now perfected by the company that broke ground first with autoloading shotguns. The beauty of Kinematic Drive is the simplicity of design for consistent, reliable function with any load and under the full extremes of weather, temperature, moisture and grime. We believe the new Kinematic Drive is so reliable that the A5 is the first ever autoloading shotgun to carry a 100,000 round or five year guarantee. This gun is designed to work, come hell or high water. Operation is clean because gases are sent out the barrel and away from the action. There's also extreme load versatility. The extensively tested Kinematic Drive offers reliable performance with virtually all loads down to 7/8 ounce light target with no adjustments.

VECTOR PRO™ LENGTHENED FORCING CONE

We were the first manufacturer to recognize the performance advantages of a back-bored barrel and to make it a standard feature on our shotguns. Now we have gone a step further with our Vector Pro lengthened forcing cone. Longer, tapered Vector Pro dimensions minimize shot deformation and maximize pattern uniformity, consistency and density. Back-boring increases bore diameter specifications and decreases friction between the shot cup and the bore to maximize shot pellet velocity and to reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they're needed to bag more upland birds, waterfowl and clay targets. A larger bore diameter can let gases slip by the shot cup, resulting in both reduced pellet velocity and blown patterns. A smaller bore diameter means the forcing cone can deform pellets, leading to flyers and poor ballistic performance. Our back-bore specifications represent the ideal bore dimensions.

A5 HUNTER GAUGE: 12 | GLOSS FINISH STOCK AND FOREARM

RECEIVER Strong, lightweight aluminum alloy • Black anodized gloss finish **BARREL** Lightweight profile • Flat, ventilated rib **ACTION** 3" chamber • Recoil operated Kinematic Drive is ultra-reliable and cycles a wide range of loads **STOCK** Gloss finish walnut with close radius pistol grip • Sharp 22 lines-per-inch checkering • Shim adjustable for cast and drop **FEATURES** Vector Pro™ lengthened forcing cone • Three Invector-DS™ choke tubes • Inflex II Technology recoil pad • Brass front bead sight • Ivory mid-bead sight • One 1/4" stock spacer and one 1/2" stock spacer, plus lengthened screws for total length of pull adjustment of 3/4" • Included ABS case (not shown)

A FULL SELECTION OF EXTRA BARRELS FOR THE A5 ARE LISTED ON PAGE 44.

*NOTE: Weights listed are approximate.

Features and looks are only part of the A5 equation for success. The new A5 feels incredibly balanced in your hands from pad to muzzle. It feels light and swings fast. Put an A5 to the real test by picking one up. The grip is comfortable, and the forearm is compact and narrow, placing your front hand closer to the bore line for superior hand-eye coordination and pointability.

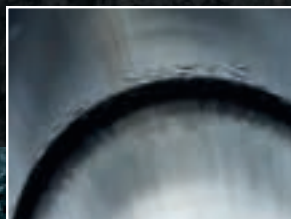

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

After 500 rounds of steel shot, the higher-quality Browning barrel shows no wear.

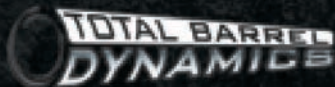

The forcing cone of the competition's barrel is pitted and damaged beyond repair after 500 rounds of steel shot.

STEEL SHOT PERFORMANCE

The strength of a Browning barrel is legendary, and is built to handle the punishment of steel shot. Unlike some manufacturers' barrels whose guns face an uncertain future after shooting steel, we have long been at the forefront of dependable steel shot performance and durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, a Browning A5 barrel will last a lifetime.

TURNKEY MAGAZINE PLUG

The patented TurnKey Magazine Plug is easily removed in seconds using a vehicle key, allowing the magazine plug to be removed in mere seconds.

SPEED LOAD PLUS

Speed Loading has been popular on Browning autoloaders for decades. Our patented feeding system sends the first shell loaded into the magazine directly into the chamber. Unloading is just as easy with the Speed Unload feature that makes emptying the magazine fast and easy, without having to cycle and chamber every shell with the bolt handle.

ERGONOMIC BOLT LATCH

The A5 includes a Bolt Latch located just ahead of the trigger guard. This handy addition locks the bolt to the rear when the magazine is unloaded and releases a shell from the magazine when the bolt is closed to make loading quick. The oversized shape makes the Bolt Latch easy to locate and operate with or without gloves.

INVECTOR-DS

INVECTOR-DS™ CHOKE SYSTEM

Better patterning, lighter weight and a sleeker barrel profile are all reasons to check out the new Invector-DS (Double Seal) interchangeable choke tube system. The combination of muzzle-end threads and thin-wall construction allowed us to design a longer, more gradually tapered choke tube that results in more evenly scaled patterns. From cylinder to extra full, patterns tighten consistently in reliable steps. The longer choke taper also produces extremely consistent, dense shot patterns. The flare at the end of the barrel that accommodates the choke tube is also greatly reduced for improved shotgun appearance. A slightly lighter overall barrel weight is achieved for faster swinging and improved balance.

Invector-DS choke tubes have been tested and proven to reduce shot deformation for fewer flyers and gaps in the pattern. The more gradual taper also allows higher shot velocities for hard hitting performance.

To prevent gas and fouling from slipping between the barrel and choke tube we've added a proprietary differential-banded brass seal. This seal compresses against the barrel wall when tightened to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system. It also keeps the tube snug in the barrel. View the full line of new Invector-DS choke tubes on pages 4-5.

SHOTGUNS

725

CITORI

BECOME
ONE
WITH THE
GUN

AT LONG LAST, WE BRING
YOU THE NEW CITORI
725. IT IS LOWER,
LIGHTER, FASTER AND
EVERY BIT AS RUGGED
AS THE CITORI
LEGEND DEMANDS.

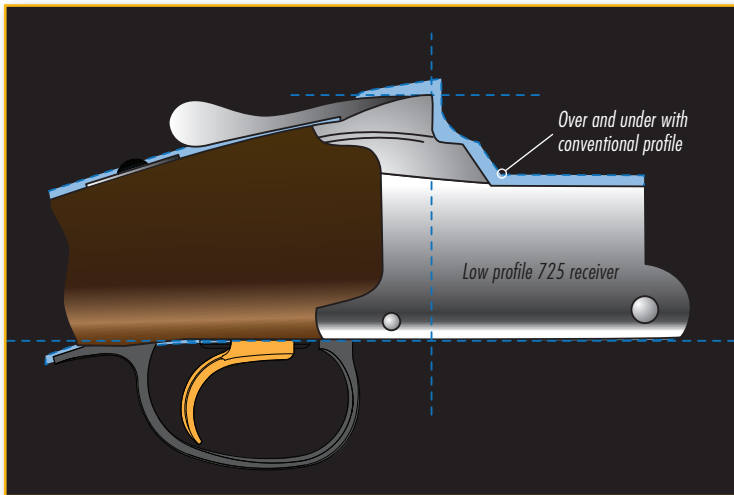

**FIRE
LITE**
MECHANICAL
TRIGGER

FIRE LITE MECHANICAL TRIGGER

The exclusive new Fire Lite Mechanical Trigger is a big part of the Citori 725's performance package. Unlike an inertia trigger, Fire Lite does not rely on recoil to set the next shot. Instead, you get immediate second shot capability. The innovative design features reduced take up, a crisp break and shorter overtravel.

THE NEW CITORI 725 — BECOME ONE WITH THE GUN.

The new Citori 725 is the evolution of John M. Browning's legendary B25 Superposed, now with the modern performance advantage of a low-profile receiver. The new 725 receiver is significantly lower than other Citori 12 gauge receivers, yet the 725 shares the renowned durability of generations of Citori over and unders with the rugged full-width hinge pin and tapered locking bolt design. With a 725, you get the "one with the gun" feeling you want, with the long lasting durability you expect from a Browning over and under. And the features don't stop there. The 725 showcases the all-new Fire Lite mechanical trigger that offers unmatched feel and lighter pull weights than ever before. Inflex II Technology has also been added to make shooting more comfortable. On top of it all is a beautiful look that, while familiar, is sleek and fresh. The Citori 725, get your hands on the next over and under performance tradition.

Improved recoil control and less muzzle jump are two of the big benefits of a low-profile receiver. There is also the "one with the gun" feeling that makes the shotgun act like an extension of your body.

ERGO
BALANCED

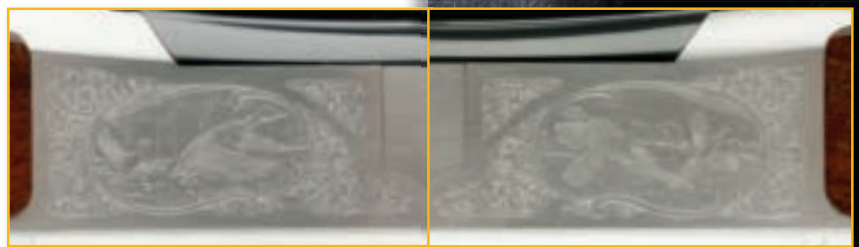

The new low-profile receiver makes the Citori 725 feel incredibly balanced in your hands, and gives you the "one with the gun" feeling you want. Put a 725 to the real test by picking one up. The 725 feels light and swings fast. The grip is comfortable, and the forearm is narrow and sleek to place your front hand closer to the bore line for superior hand-eye coordination and pointability.

725 CITORI

LOCKING BOLT AND HINGE PIN

Unlike other low profile over and unders, the Citori 725 features a transverse-mounted, full-width tapered locking bolt and full-width hinge pin to maintain the legendary Browning strength and reliability counted on for generations. The locking bolt engages a full-width tapered recess in the rear barrel lugs. Tapering the bolt and recess allows the bolt to seat deeper, accommodating for wear. Unlike guns with side-mounted trunnions, the 725's hinge pin extends the full width of the receiver for maximum strength. Like the original Citori, the 725 is engineered to wear in, not out.

The 725's full width hinge pin provides maximum strength and long-lasting endurance.

INFLEX II TECHNOLOGY

NEW INFLEX II TECHNOLOGY RECOIL PAD

The new Inflex II Technology recoil pad is the next generation of the most recoil absorbing pad available. A softer new material provides better lateral stability, even better recoil absorbing performance and is super slippery to prevent snagging on clothing when shouldering. Internal directional deflection construction guides the comb down and away from your cheek for greater shooting comfort and faster, more accurate follow-up shots.

The competitors' trunnions are weaker and provide only a fraction of the bearing surface that the 725's full-width hinge pin provides.

BECOME
**ONE
WITH THE
GUN**

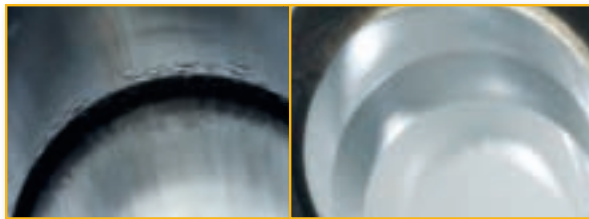

TRIPLE TRIGGER SYSTEM

All 725 target shotguns come equipped with the Triple Trigger™ System, which fine tunes finger-to-trigger length of pull. Choose a wide checkered, narrow smooth or wide smooth canted trigger shoe.

THE BEST TARGET SHOTGUN EVER BUILT.

Many over and under shooters prefer a low-profile receiver. The lower profile moves the shotgun down and into your body for improved recoil control and reduced muzzle jump for faster target acquisition and more accurate follow up shots. There is also that “one with the gun” feeling, the sensation that the shotgun is an extension of your body that just feels natural and inspires confidence. The new Citori 725 delivers all this without compromising the legendary durability that Browning shotguns are known for. Unlike other low profile guns that rely on undersized trunnions and narrow, tapered pins to lock up their receivers, the 725 still has the rugged full-width hinge pin and transverse mounted locking bolt design of the original Citori. That means the 725 is built strong enough to compete year after year and round after round of breaking clay targets. While this kind of use will wear out lesser low profile over and unders, it simply wears a Citori in. If that isn’t enough, the new Fire Lite mechanical trigger delivers a smooth pull with a light squeeze. Inflex II Technology recoil control keeps you shooting all day with none of the beat down feeling you get with lesser recoil pads. With all the strength of the legendary Citori, plus all the performance and recoil absorbing advantages of a lower profile, the 725 is the total performance package.

The forcing cone of the competition's barrel is pitted and damaged beyond repair after 500 rounds of steel shot.

After 500 rounds of steel shot, the higher-quality Browning barrel shows no wear.

STEEL SHOT PERFORMANCE

Our barrels are made to handle the punishment of steel shot. Unlike some manufacturers whose guns face an uncertain future after shooting steel, we have long been at the forefront of dependable steel shot performance and durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, Browning Citori 725 barrels will last a lifetime.

INVECTOR-DS™ CHOKE SYSTEM

BETTER PATTERNING, LIGHTER WEIGHT AND A SLEEKER BARREL PROFILE ARE ALL REASONS TO CHECK OUT THE NEW INVECTOR-DS (DOUBLE SEAL) INTERCHANGEABLE CHOKE TUBE SYSTEM.

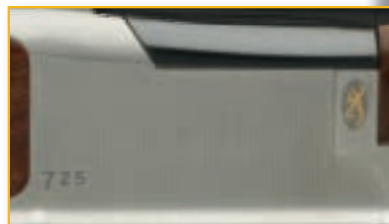

The combination of muzzle-end threads and thin-wall construction allowed us to design a longer, more gradually tapered choke tube that results in more evenly scaled patterns. From cylinder to extra full, patterns tighten consistently in reliable steps. The longer choke taper also produces extremely consistent, dense shot patterns. The flare at the end of the barrel that accommodates the choke tube is also greatly reduced for improved shotgun appearance and a slightly lighter overall barrel weight is achieved for faster swinging and improved balance. Invector-DS choke tubes have been tested and proven to reduce shot deformation for fewer flyers and gaps in the pattern. The more gradual taper also allows higher shot velocities for hard hitting performance. To prevent gas and fouling from slipping between the barrel and choke tube we've added a proprietary differential-banded brass seal. This seal compresses against the barrel wall when tightened to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system. It also keeps the tube snug in the barrel. View the full line of new Invector-DS choke tubes on pages 4-5.

TRIPLE TRIGGER SYSTEM

All Sporting Clays, XT and XS Series Citori shotguns come equipped with the Triple Trigger™ System, which fine tunes finger-to-trigger length of pull. Choose a wide checkered, narrow smooth or wide smooth canted trigger shoe.

LOCKING BOLT AND HINGE PIN

The Citori features a heavy-duty, transverse-mounted, full-width tapered locking bolt that engages a full-width tapered recess in the rear barrel lugs. Tapering the bolt and recess allows the bolt to seat deeper, accommodating for wear. The hinge pin extends across the width of the receiver for maximum strength. Engineering like this ensures the Citori wears in, not out.

HAMMERS AND HAMMER EJECTORS

For positive primer ignition, Citori hammers are driven by powerful coil-type mainsprings. The convenient barrel selector allows a shooter to choose which barrel fires on the first pull of the single trigger, and the second pull fires the remaining barrel. Ejectors are fired by a sharp hammer blow for more positive ejection than the push imparted by competitors' ejectors. The automatic ejectors eject fired hulls when the breech is opened and elevate unfired shells for easy removal.

HAND-FINISHED PERFECTION. Often we hear "you get

what you pay for." That isn't entirely true, because with a Browning Citori, you get much more. The Citori boasts a level of hand fitting, polishing and assembly that rivals guns often costing hundreds or even thousands of dollars more. The extra attention to detail in every Citori does more than assure smooth operation and flawless looks. It adds longevity and integrity to the gun so it's ready for the next generation. Looking for a high performance, high value over and under for a pheasant, quail or dove hunt? Get your hands on a Citori.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

VECTOR PRO™ LENGTHENED FORCING CONES ON 12 AND 20 GAUGE CITORI SHOTGUNS VECTORPRO™

We were the first manufacturer to recognize the performance advantages of a back-bored barrel and to make it a standard feature on our shotguns. Now we have gone a step further with our Vector Pro lengthened forcing cone. Longer, tapered Vector Pro dimensions minimize shot deformation and maximize pattern uniformity, consistency and density. Back-boring increases bore diameter specifications and decreases friction between the shot cup and the bore to maximize shot pellet velocity and to reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they're needed to bag more upland birds, waterfowl and clay targets. A larger bore diameter can let gases slip by the shot cup, resulting in both reduced pellet velocity and blown patterns. A smaller bore diameter means the forcing cone can deform pellets, leading to flyers and poor ballistic performance. Our back-bore specifications represent the ideal bore dimensions.

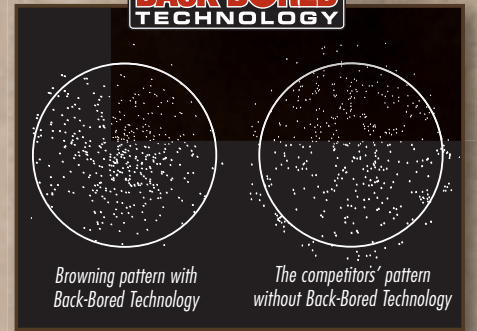

INVECTOR™ CHOKE TUBE SYSTEMS

The proven Standard Invector (28 gauge, .410 bore) or Invector-Plus™ (12, 20 gauge) interchangeable choke tube systems are featured on every Citori shotgun (except Citori 725) and provide consistent, dense shot patterns in the constriction needed for the specific shooting situation. The longer choke taper inside an Invector-Plus choke tube works with back-bored barrels and Vector Pro™ lengthened forcing cones to produce dense patterns with uniform densities and fewer flyers. The superior designs of the Invector systems are far more durable than the choke systems found in competitors' guns, especially when shooting steel shot loads. The Invector systems eliminate gases slipping between the choke tube and barrel that could damage both the choke tube and the barrel. See pages 152 to 155 for a complete listing of choke tubes.

STEEL SHOT PERFORMANCE

The strength of Browning barrels is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels that show pitting after shooting steel, we have pioneered construction that maximizes steel shot performance and barrel durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, Browning Citori barrels will last a lifetime.

CHROME CHAMBERS

For increased durability and corrosion resistance, all Citori shotguns have hard chrome-plated chambers to resist the toll that thousands of shells can take on lesser quality guns.

Eligible for the Growth Insurance Program. See page 31 for details.

- Three Invector-Plus™ choke tubes • Ivory front bead sight

ENGINEERED FOR YEARS OF PERFORMANCE.

High-quality fit and finish make the Citori one of the most durable, longest-lasting guns you can own. When you open the breech of a Citori, the quality is evident. Precision manufacturing and hand-fitting ensures enduring quality and smooth operation. Timeless, elegant and exquisitely built, the Citori remains the quintessential over and under shotgun.

CITORI LIGHTNING FEATHER COMBO

GAUGE: 20, 28 | GLOSS FINISH STOCK AND FOREARM

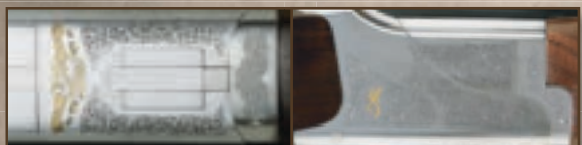

- RECEIVER** Lightweight alloy with steel breech face and hinge pin
- High-relief engraving **BARRELS** Combo includes 3" chambered 20 gauge and 2¾" chambered 28 gauge barrels in 27" length • Ventilated rib
- ACTION** Single selective trigger • Hammer ejectors • Top-tang barrel selector/safety **STOCK** Gloss finish walnut • Lightning-style stock and forearm
- FEATURES** Vector Pro™ lengthened forcing cones on 20 gauge barrels • Three Invector-Plus™ 20 gauge choke tubes • Three Standard Invector™ 28 gauge choke tubes • Ivory front bead sight • Fitted luggage case included

CITORI 625 SPORTING, SMALL GAUGE

GAUGE: 20 (SHOWN), 28, .410 | GLOSS OIL FINISH STOCK AND FOREARM

- RECEIVER** Steel • Silver nitride finish • High-relief engraving with gold embellishment **BARRELS** Ventilated top and side rib • Tapered, floating top rib
- Ported on 20 **ACTION** Single selective trigger • Hammer ejectors • Top-tang barrel selector/safety **STOCK** Gloss oil finish Grade III/IV walnut stock with close radius pistol grip and right-hand palm swell • Schnabel forearm **FEATURES** Vector Pro™ lengthened forcing cones on 20 • Five Diamond Grade extended Invector-Plus™ choke tubes on 20 • Standard Invector™ on 28 and .410 • Sporting recoil pad
- Triple Trigger™ System • HiViz® Pro-Comp fiber-optic sight

Citori 625 Sporting, Small Gauge, Bottom

Citori 625 Sporting, Small Gauge, Right

CITORI XS SPECIAL WITH LOW POST RIB AND ADJUSTABLE COMB

GAUGE: 12 | SATIN FINISH STOCK AND FOREARM

RECEIVER Steel • Silver nitride finish • Gold accented, high-relief XS Special engraving
BARREL Lightweight profile • Ventilated top and side ribs • Tapered, floating low post top rib • Ported
ACTION Single selective trigger • Hammer ejectors • Top-tang barrel selector/safety **STOCK** Satin finish walnut with right-hand palm swell • Adjustable comb • Semi-beavertail forearm with finger grooves
 • Ideal for skeet and sporting clays **FEATURES** Vector Pro™ lengthened forcing cones • Five Invector-Plus™ Midas™ Grade choke tubes • Triple Trigger™ System • HiViz® Pro-Comp fiber-optic sight

CITORI XS SPECIAL WITH HIGH POST RIB AND ADJUSTABLE COMB

GAUGE: 12 | SATIN FINISH STOCK AND FOREARM

RECEIVER Steel • Silver nitride finish • Gold accented, high-relief XS Special engraving
BARREL Lightweight profile • Ventilated top and side ribs • Tapered, floating high-post top rib • Ported
ACTION Single selective trigger • Hammer ejectors • Top-tang barrel selector/safety **STOCK** Satin finish walnut with right-hand palm swell • Adjustable comb • Semi-beavertail forearm with finger grooves
 • Ideal for skeet and sporting clays **FEATURES** Vector Pro™ lengthened forcing cones • Five Invector-Plus™ Midas™ Grade choke tubes • Triple Trigger™ System • HiViz® Pro-Comp fiber-optic sight

TRULY INNOVATIVE.

Even on the rack, a Browning Cynergy sets itself apart from other over and under shotguns. Open the breech and you'll know why. The low-profile

Cynergy is a new experience in over and under shotguns with performance, recoil control, speed and reliability that you must shoot to fully appreciate.

REVERSE STRIKER MECHANICAL TRIGGER

The Cynergy features the innovative Reverse Striker ignition system; a striker-based, mechanical trigger that offers the benefits of a crisp feel, reduced locktime and less overtravel than other over and under shotguns. Because inertia is not needed for the hammers to set, the design eliminates the possibility of the second barrel not firing. Cynergy target models are equipped with the Triple Trigger™ System, allowing you to adjust the length of pull and switch between styles of trigger shoes: Wide checkered, narrow smooth or wide smooth canted.

INFLEX TECHNOLOGY RECOIL PAD

The Inflex Technology recoil pad system provides long travel recoil reduction for a massive 25% decrease in felt recoil on 12 gauge guns and makes recoil virtually non-existent on small gauge guns. A slick Parylene coating prevents the pad from snagging on clothing and allows the recoil pad to remain soft. Three pad lengths are available in 1/2" increments to provide length of pull adjustment to fit a wide variety of shooters. A 1/4" spacer is included for customizing. See page 29 for accessories. (Inflex Technology pad not available on Cynergy Classics.)

VECTOR PRO™ LENGTHENED FORCING CONES ON 12 AND 20 GAUGE CYNERGY SHOTGUNS

We were the first manufacturer to recognize the performance advantages of a back-bored barrel and to make it a standard feature on our shotguns. Now we have gone a step further with our Vector Pro lengthened forcing cone. Longer, tapered Vector Pro dimensions minimize shot deformation and maximize pattern uniformity, consistency and density. Back-boring increases bore diameter specifications and decreases friction between the shot cup and the bore to maximize shot pellet velocity and to reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they're needed to bag more upland birds, waterfowl and clay targets. A larger bore diameter can let gases slip by the shot cup, resulting in both reduced pellet velocity and blown patterns. A smaller bore diameter means the forcing cone can deform pellets, leading to flyers and poor ballistic performance. Our back-bore specifications represent the ideal bore dimensions.

MONOLOCK HINGE

The strong MonoLock Hinge design is the engineering behind the Cynergy's low profile receiver. The MonoLock Hinge is the integration of the monobloc and the hinge, and has up to 300% more surface area to pivot on than traditional trunnion-style hinges. Rectangular locking pins provide extra strength and feature a "Wear-In Relief" that keeps the action tight. Jeweling adds a beautiful appearance, smoother function and improves durability.

VECTOR**PRO**

CHROME CHAMBERS

For increased durability and corrosion resistance, all Cynergy shotguns feature hard chrome-plated chambers to resist the toll that thousands of shells can take on lesser quality guns.

STEEL SHOT PERFORMANCE

The strength of Browning barrels is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels that show pitting after shooting steel, we have pioneered construction that maximizes steel shot performance and barrel durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, Browning Cynergy barrels will last a lifetime.

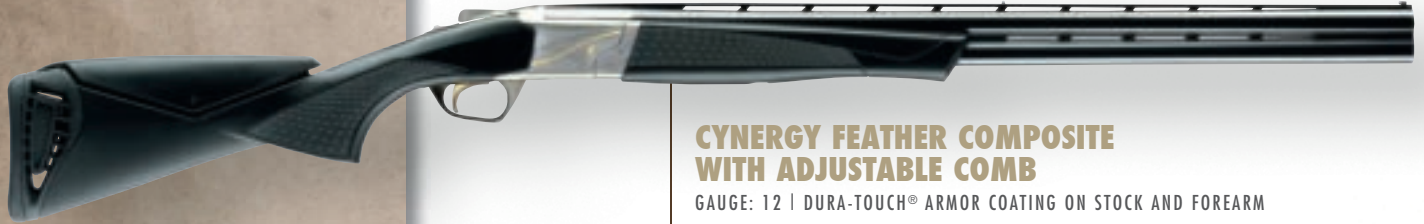

CYNERGY FEATHER GAUGE: 12 (SHOWN), 20, 28, .410 | GLOSS OIL FINISH STOCK AND FOREARM

GAUGE: 12 | DURA-TOUCH® ARMOR COATING ON STOCK AND FOREARM

RECEIVER Lightweight alloy with steel breech face • Gold enhanced grayed finish • Ultra-low profile • MonoLock Hinge • Jewelled monobloc

BARREL Lightweight profile • Ventilated top and side ribs **ACTION** Reverse Striker ignition system • Impact Ejectors • Top-tang barrel selector/safety

STOCK Black composite with rubber overmoldings in grip areas • Dura-Touch® Armor Coating • Adjustable comb **FEATURES** Vector Pro™ lengthened forcing cones • Three Invector-Plus™ choke tubes • Inflex Technology recoil pad system • ¼" stock spacer • Ivory front and mid-bead sights

DURA-TOUCH®
Armor Coating

ADJUSTABLE COMB

Composite models include an integrated, adjustable comb system that allows the gun to be easily customized to your individual needs. Drop at comb adjustments are made in 1/8" increments. For cast on/cast off customizing, accessory combs are available on page 29.

SUPERIOR GRIPPING SURFACES

Composite Cynergy models combine molded-in rubberized textured gripping surfaces and our proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climates and weather conditions.

IMPACT EJECTORS

Impact Ejectors are aided by the punch of a secondary striker spring for more positive, reliable ejection of fired hulls from the chambers. Unfired shells are elevated for easy removal.

CYNERGY CLASSIC FIELD GAUGE: 12 (SHOWN), 20, 28, .410 | GLOSS OIL FINISH STOCK AND FOREARM

Short Wood Recoil Pad	11410	34.99
Medium Wood Recoil Pad	11411	34.99
Long Wood Recoil Pad	11412	34.99
1/4" Composite Stock Spacer	11430	7.99
1/4" Wood Stock Spacer	11431	7.99
Cast-on Adj. Comb, Composite	11420	24.99
Cast-off Adj. Comb, Composite	11421	24.99

*NOTE: All new guns are shipped with medium pads.

Length of pull is adjustable from 13 3/4"-15" with the purchase of the recoil pads and stock spacers above. See page 22 for details on Inflex pads.

INVECTOR -PLUS™ CHOKE TUBE SYSTEM

The Invector-Plus interchangeable choke tube system provides consistent, dense shot patterns in the constriction needed for your shooting situation. The longer choke taper inside an Invector-Plus choke tube works with Back-Bored Technology to produce patterns with more uniform densities and fewer flyers. The superior design eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel. See pages 152 to 155 for a complete listing of choke tubes.

CHROME CHAMBERS

The BT-99 features a chrome-plated chamber to resist the toll thousands of shells can take on lesser quality guns. Corrosion resistance is also greatly improved.

VECTOR PRO™ LENGTHENED FORCING CONE

Longer, tapered Vector Pro dimensions minimize shot deformation and maximize pattern uniformity, consistency and density. Back-boring increases bore diameter specifications and decreases friction between the shot cup and the bore to maximize shot pellet velocity and reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they're needed to smoke clays.

BROWNING QUALITY AT EVERY LEVEL.

From the Micro to the top-end Golden Clays model, a BT-99 will deliver all day long. There is not a better single-barrel trap gun, at any price, than the rugged BT-99. These tough, reliable guns are built to elevate your trap game.

FOREARM

A beavertail forearm helps control recoil and assists hand-eye coordination.

RIB

High-post, 1/2" rib.

EXTRACTOR

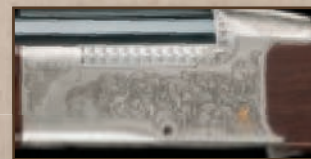

The BT-99 features an extractor to lift hulls.

BT-99 GRADE III GAUGE: 12 | GLOSS FINISH STOCK AND FOREARM

RECEIVER Steel • Silver nitride finish • Gold accented, high-relief engraving **BARREL** High-post ventilated rib • Ported **ACTION** Extractor only **STOCK** Gloss finish Monte Carlo Grade III/IV walnut stock • Beavertail forearm **FEATURES** Vector-Pro™ lengthened forcing cone • Three Invector-Plus™ choke tubes • Adjustable comb optional • Ivory front and mid-bead sights

BROWNING GROWTH INSURANCE PROGRAM

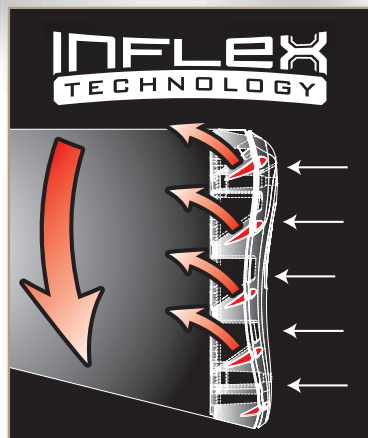

Purchasing a firearm for a growing shooter is a tough decision to make. You can choose an inexpensive "youth" model with questionable quality that will soon be outgrown. Or you can buy a quality adult-size firearm they can "grow into" but may prevent them from reaching their shooting potential because of poor fit. We offer the perfect solution with the Growth Insurance Program. Purchase a new Browning Micro Midas or Micro firearm and you are eligible to purchase a full-size stock at 50% off the retail price down the road. That's a big savings for you, and it allows the shooter to enjoy a firearm of the highest quality that is sure to fit and maximize their shooting performance and enjoyment, both now and for years to come. Visit browning.com for complete details.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

MAXIMUM RELIABILITY. MAXIMUM PERFORMANCE.

Real-world reliability is the most important feature any manufacturer can build into a firearm. That's why it was the first priority when we set about developing the Browning Maxus. The Power Drive Gas System is designed to perform under harsh hunting and shooting conditions with a wide array of loads. But reliability isn't the whole story. The Maxus delivers 18% less felt recoil for greater comfort, 44% less muzzle jump for more accurate follow-up shots, 19% faster bolt speed and 24% faster locktime than the nearest competitor. Unequaled reliability and features, all found in the finest, most reliable gas-operated autoloader ever to swing on a bird.

INFLEX TECHNOLOGY RECOIL PAD

The Inflex Technology recoil pad is the softest pad on any autoloader. More than a mass of recoil absorbing material, it has been engineered with directional deflection to pull the comb down and away from your face with every shot for even greater comfort and faster follow-up shooting.

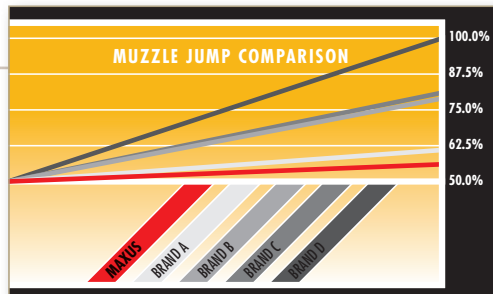

SPEED LOCK FOREARM

The traditional screw-on magazine cap has been replaced with the patented Speed Lock Forearm. This secure forearm attachment system makes taking down the Maxus for cleaning or storage fast and makes attaching or removing the sling a snap.

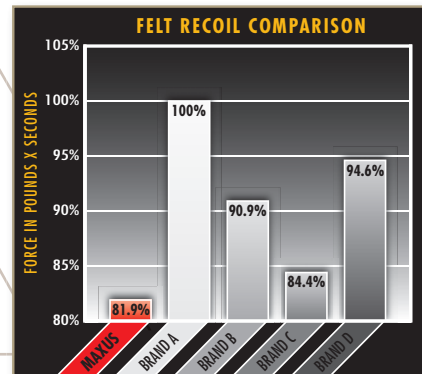

THE SOFTEST SHOOTING AUTOLOADER EVER

Felt recoil is more than just an instantaneous peak force; it is the total energy absorbing experience when you fire a shell. While no recoil reduction system can escape the laws of physics, the Maxus will change your mind about recoil control. The Power Drive Gas System, Inflex Technology recoil pad, back-boring and natural Browning balance combine to transfer up to 18% less total felt recoil force to your shoulder than other autoloaders on the market.

LESS MUZZLE JUMP

Less felt recoil means less muzzle jump and that instantly translates into more birds in your bag. The Power Drive Gas System works perfectly with the Inflex Technology recoil pad to reduce muzzle jump as much as 44% compared to the competition.

STEEL SHOT PERFORMANCE

The strength of Browning barrels is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels that show pitting after shooting steel, we have pioneered construction that maximizes steel shot performance and barrel durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, a Browning Maxus barrel will last a lifetime.

The forcing cone of the competition is pitted and damaged beyond repair after 500 rounds of steel shot.

After 500 rounds of steel shot, the higher-quality Browning barrel shows no wear.

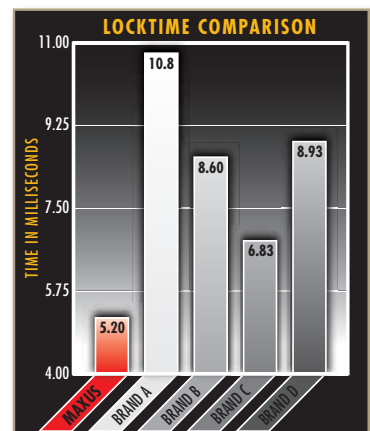

VECTOR PRO™ LENGTHENED FORCING CONE

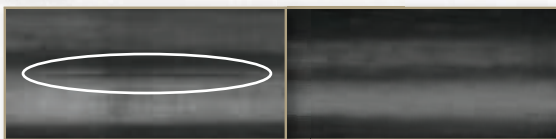

We were the first manufacturer to recognize the performance advantages of a back-bored barrel and to make it a standard feature on our shotguns. Now we have gone a step further with our Vector Pro lengthened forcing cone. Longer, tapered Vector Pro dimensions minimize shot deformation and maximize pattern uniformity, consistency and density. Back-boring increases bore diameter specifications and decreases friction between the shot cup and the bore to maximize shot pellet velocity and to reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they're needed to bag more upland birds, waterfowl and clay targets. A larger bore diameter can let gases slip by the shot cup, resulting in both reduced pellet velocity and blown patterns. A smaller bore diameter means the forcing cone can deform pellets, leading to flyers and poor ballistic performance.

Our back-bore specifications represent the ideal bore dimensions.

VECTORPRO

TOTAL BARREL DYNAMICS

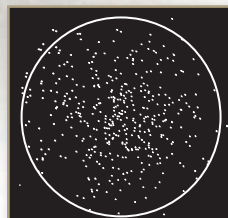

The competitors' choke tube is grooved and pitted after shooting 500 rounds of steel shot.

Browning's Invector-Plus choke tube is still flawless after 500 rounds of steel.

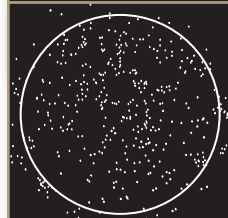

INVECTOR-PLUS™ CHOKE SYSTEM

The proven Invector-Plus interchangeable choke tube system works with Vector Pro™ and back-boring to offer consistent, dense shot patterns with just the constriction needed for the shooting situation. The longer choke taper inside an Invector-Plus choke tube produces consistent patterns with more uniform densities and fewer flyers. The superior design of the Invector-Plus system is far more durable than the choke systems found in our competitors' guns, especially when shooting steel shot. Invector-Plus eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel. See page 152 through 155 for a complete listing of choke tubes.

BACK-BORED TECHNOLOGY

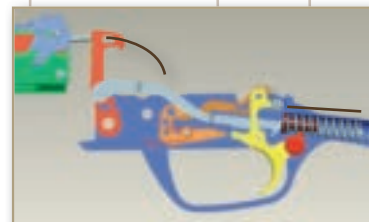

Browning pattern with Back-Bored Technology

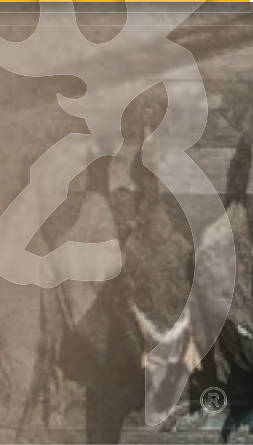

The competitors' pattern without Back-Bored Technology

LIGHTNING TRIGGER

A great feeling trigger isn't just for the rifle crowd. The Lightning Trigger is the finest fire control system ever offered in an autoloading shotgun. It is designed to offer a smooth, crisp feel with minimal travel. With locktimes averaging .0052 seconds, the Lightning Trigger is 24% faster than the nearest competing autoloader, making every pull perfect. It's also easy to remove for cleaning.

BAR N' GRILL

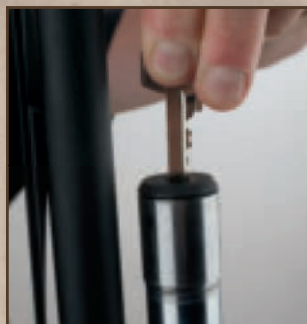

MAGAZINE CUT-OFF

The Maxus is equipped with a magazine cut-off that allows you to easily unload the chamber to change loads for different birds without cycling a shell from the magazine.

MAXIMUM GRIP

Composite models combine in-molded textured gripping surfaces and our proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate conditions.

TURNKEY
MAGAZINE PLUG

The patented TurnKey Magazine Plug is easily removed using a vehicle key. Combined with the Speed Lock System, the magazine plug can be removed from the Maxus in mere seconds.

POWERDRIVE
GAS SYSTEM

The Power Drive Gas System is the finest gas system on any autoloading shotgun ever. Extensive research and testing have produced a piston design that is extremely reliable in all conditions, regardless of the heavy or light loads being used. The gas piston features larger exhaust ports that dump gases faster with heavy loads to control recoil and 20% longer stroke travel to increase reliability with light loads. A patented, enclosed seal design keeps residue out of the action for cleaner operation. Maxus with Power Drive equals outstanding performance.

SPEED LOAD
PLUS

Speed Loading has been popular on our autoloaders for decades. Our patented feeding system sends the first shell loaded into the magazine directly into the chamber. Unloading is just as easy with the Speed Unload feature that makes emptying the magazine fast and easy, without having to cycle and chamber every shell with the bolt handle.

Armor Coating

MAXUS SPORTING CARBON FIBER

GAUGE: 12 | DURA-TOUCH® ARMOR COATING ON STOCK AND FOREARM

RECEIVER Strong, lightweight aluminum alloy • Carbon fiber finish on top and bottom **BARREL** Lightweight profile • Flat, ventilated rib • Carbon fiber finish **ACTION** Gas-operated autoloader • 3" chamber • Power Drive Gas System reduces recoil and cycles a wide range of loads **STOCK** Composite with close radius pistol grip • Speed Lock Forearm • Textured gripping surfaces • Shim adjustable for length of pull, cast and drop • Carbon fiber finish • Dura-Touch® Armor Coating **FEATURES** Vector Pro™ lengthened forcing cone • Five Invector-Plus™ choke tubes • Inflex Technology recoil pad • HiViz® Pro-Comp fiber-optic front sight • Ivory mid-bead sight • Two ¼" stock spacers • Included ABS case

OPTIMAL DIMENSIONS

The Maxus features a trim forearm and close radius pistol grip to maximize control. An externally relieved steel magazine tube reduces weight for a faster swing while retaining durability. Drop and cast can be tuned using the included stock shim kit. A low rib is in line with the top of the receiver and translates into dead-flat point of impact.

BROWNING QUALITY AND LASTING VALUE.

If you put value right next to performance when selecting an autoloading shotgun, pick up a reliable, no-nonsense Browning Silver. These value-added guns offer features like Browning fit and finish, predictable handling and reliable versatility — the things that matter most to hunters — when hunting pheasant, duck, deer or turkey. With a Silver, affordability doesn't require compromise.

LOAD VERSATILITY

The Active Valve-equipped gas piston efficiently adjusts to reliably fire a wide range of loads. 12 gauge 3" models fire everything from light, 1 oz., 2¾" target loads to the heaviest 3" magnums. The larger 3½" version is built to handle a similar range, from 1½ oz., 2¾" field loads up to hard-hitting 3½" magnums. Competitors' guns can't match this versatility.

TRIGGER

The trigger guard is large and has carefully rounded edges to accommodate gloved fingers. Additionally, the Silver's entire trigger assembly can be removed in just seconds for a thorough cleaning.

LESS RECOIL WITH THE ACTIVE VALVE

The self-adjusting Active Valve gas system in Silver autoloaders diverts gases from fired shells to operate the action instead of adding to recoil. When shooting light loads, most of the gases operate the action. With magnum loads, only a small amount of gas is necessary to operate the action, while the remaining gases are vented through the Active Valve and out the top of the forearm and away from the receiver for clean, reliable operation. The gas piston and Active Valve operate independently, putting less pressure on the gas piston for greater longevity and more efficient operation than the competitors' gas-operated autoloaders. Because the Active Valve expels unnecessary gases, it reduces recoil before it ever strikes your shoulder — without the need for heavy hydraulic recoil dampers, sticky gel pads and gimmicky gel stock inserts. Superior recoil reduction from the Active Valve also equals faster, more accurate follow-up shots and all-day shooting comfort regardless of the loads you shoot.

Light Load (1 oz.)

Heavy Load (2 oz.)

BACK-BORED BARREL TECHNOLOGY

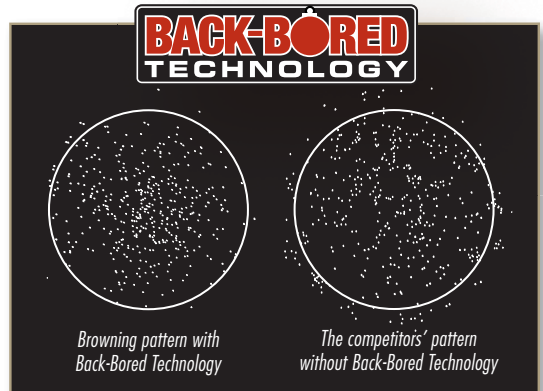

Back-boring reduces friction between the shot cup and the bore for increased shot pellet velocity, minimized pellet deformation for more uniform patterns and reduced felt recoil. We were the first manufacturer to put back-boring and its advantages into production shotguns. Through intense research, our back-bore specifications have been perfected and represent the ideal bore diameter needed to minimize shot deformation and maximize pattern uniformity, consistency and density. Any larger and gases slip by the shot cup, resulting in reduced pellet velocity and blown patterns. Any smaller, and the forcing cone will deform pellets and result in poor ballistic performance, flyers and uneven, spotty pellet coverage on the target.

INVECTOR-PLUS™ CHOKE TUBE SYSTEM

The proven Invector-Plus interchangeable choke tube system comes on every Silver shotgun to provide consistent, dense shot patterns in just the constriction needed for your shooting situation. The longer choke taper inside an Invector-Plus choke tube works hand-in-hand with Back-Bored Technology to produce consistent patterns with more uniform densities and fewer flyers. The superior design of the Invector-Plus system is far more durable than the choke systems found in competitors' guns, especially when shooting steel shot loads. Invector-Plus eliminates gases slipping between the choke tube and barrel that could damage both the choke tube and the barrel. See pages 152 to 155 for a complete listing of choke tubes.

STEEL SHOT PERFORMANCE

The strength of Browning barrels is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels that show pitting after shooting steel, we have pioneered construction that maximizes steel shot performance and barrel durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, a Browning Silver barrel will last a lifetime.

Browning pattern with Back-Bored Technology

The competitor's pattern without Back-Bored Technology

Eligible for the Growth Insurance Program. See page 31 for details.

SILVER HUNTER MICRO MIDAS

GAUGE: 12 (SHOWN), 20 | SATIN FINISH STOCK AND FOREARM

- RECEIVER** Strong, lightweight aluminum alloy • Semi-humpback design • Silver finish
- BARREL** Lightweight profile • Ventilated rib **ACTION** Gas-operated autoloader • 3" chamber
- Active Valve System reliably cycles a wide range of loads **STOCK** Satin finish • Compact 13" length of pull for smaller shooters **FEATURES** Three Invector-Plus™ choke tubes
- Ivory front bead sight • One ¼" stock spacer

MAGAZINE CAPACITY

- 2¾": Four in magazine, one in chamber.
 - 3": Three in magazine, one in chamber.
 - 3½": Three in magazine, one in chamber.
- (A three-shot magazine adapter plug is included.)

Mossy Oak® Break-Up Infinity® camo will be offered in conjunction with New Break-Up® camo on select Browning extra barrels.

IMPORTANT: DO NOT ATTEMPT THE USE OF 3½" CHAMBERED BARRELS WITH 3" RECEIVERS NOR 3" CHAMBERED BARRELS WITH 3½" RECEIVERS.

WHACK 'EM AND STACK 'EM.

When heavy birds like Canada and snow geese are diving on your blind, or big toms are strutting out yonder, nothing beats the pure power and reliable performance of a burly Browning 10 gauge shotgun.

**THE BROWNING BPS.
THE BEST PUMP SHOTGUN AVAILABLE.**

In an industry cluttered with budget-priced, lesser quality pump shotguns, the BPS remains a steadfast alternative with rugged steel construction and legendary Browning precision. There is a BPS shotgun ready to chase nearly every game, from slug models for deer, to small gauge guns for doves, to competition-worthy trap models. The BPS has proven itself reliable and has seen tough duty in marshes, cornfields and on shooting ranges. Rely on a BPS to come through, regardless of the conditions.

TANG SAFETY

The thumb-operated, top-tang safety on the BPS can easily be operated with the right or left hand, even with gloved fingers.

BACK-BORED BARREL TECHNOLOGY

We were the first manufacturer to recognize the advantages of a back-bored barrel. Back-boring increases the bore diameter to reduce friction between the shot cup and the bore to maximize shot velocity and reduce felt recoil. Our back-bore specifications have been researched, perfected and represent the ideal bore diameter needed to minimize shot deformation and maximize pattern uniformity, consistency and density. Any larger and gases slip by the shot cup, resulting in reduced pellet velocity and blown patterns. Any smaller, and the forcing cone will deform pellets and result in poor ballistic performance, flyers and uneven, spotty pellet coverage on the target.

INVECTOR™ CHOKE TUBE SYSTEMS

The proven Standard Invector (28 gauge, .410 bore) or Invector-Plus™ (12, 20 gauge) interchangeable choke tube systems are featured on every BPS shotgun and provide consistent, dense shot patterns in the constriction needed for the specific shooting situation. The longer choke taper inside an Invector-Plus choke tube works with back-boring to produce dense patterns with uniform densities and fewer flyers. The superior designs of the Invector systems are far more durable than the choke systems found in competitors' guns, especially when shooting steel shot loads. The Invector systems eliminate gases slipping between the choke tube and barrel that could damage both the choke tube and the barrel. See pages 152 to 155 for a complete listing of choke tubes.

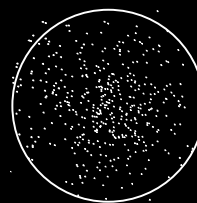

STEEL SHOT PERFORMANCE

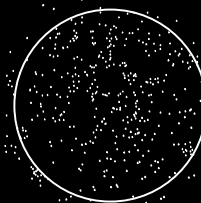

The strength of Browning barrels is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels that show pitting after shooting steel, we have pioneered construction that maximizes steel shot performance and barrel durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, a Browning BPS barrel will last a lifetime.

BACK-BORED TECHNOLOGY

BPS HUNTER GAUGE: 12 (SHOWN), 16, 20, 28, .410 | SATIN FINISH STOCK AND FOREARM

RECEIVER Forged and machined steel **BARREL** Ventilated rib **ACTION** Bottom ejection • Dual steel action bars • Top-tang safety **STOCK** Satin finish walnut **FEATURES** Three Invector-Plus™ choke tubes with 12 and 20 • Three Standard Invector™ with 16, 28 and .410 • Recoil pad on 12 gauge model • Brass front bead sight

MAGAZINE CAPACITY

2¾": Four in magazine, one in chamber.
 3": Three in magazine, one in chamber.
 3½": Three in magazine, one in chamber.
 (A three-shot magazine adapter plug is included.)

BPS UPLAND SPECIAL GAUGE: 12, 16, 20 (SHOWN) | SATIN FINISH STOCK AND FOREARM

RECEIVER Forged and machined steel **BARREL** Ventilated rib **ACTION** Bottom ejection • Dual steel action bars • Top-tang safety **STOCK** Satin finish walnut • English-style straight grip **FEATURES** Three Invector-Plus™ choke tubes with 12 and 20 • Three Standard Invector™ with 16 • Brass front bead sight

Eligible for the Growth Insurance Program. See page 31 for details.

BPS MICRO

GAUGE: 20 | SATIN FINISH STOCK AND FOREARM

RECEIVER Forged and machined steel
BARREL Compact 22" length • Ventilated rib
ACTION Bottom ejection • Dual steel action bars • Top-tang safety **STOCK** Satin finish walnut • Compact dimensions to suit smaller shooters **FEATURES** Three Invector-Plus™ choke tubes • Brass front bead sight

BOTTOM EJECTION AND LOADING

Unique bottom ejection provides operating convenience by throwing empty shells straight down, out of your line of sight, making the BPS the best pump shotgun choice for both right- and left-handed shooters.

RELIABLE PUMP-ACTION

The proven pump-action design of the BPS is sound and reliable. All components are durably constructed of solid steel and housed inside a receiver machined from a solid block of forged steel. Rigid double slide bars are made from heat-treated steel to eliminate twisting and binding for faster, more efficient operation. The BPS offers smooth operation in all conditions and gives you the ability to stay on target while delivering rapid follow-up shots. A convenient serrated slide release is located at the rear of the trigger guard.

BROWNING GROWTH INSURANCE PROGRAM

Purchasing a firearm for a growing shooter is a tough decision to make. You can choose an inexpensive "youth" model with questionable quality that will soon be outgrown. Or you can buy a quality adult-size firearm they can "grow into" but may prevent them from reaching their shooting potential because of poor fit. We offer the perfect solution with the Growth Insurance Program. Purchase a new Browning Micro Midas or Micro firearm and you are eligible to purchase a full-size stock at 50% off the retail price down the road. That's a big savings for you, and it allows the shooter to enjoy a firearm of the highest quality that is sure to fit and maximize their shooting performance and enjoyment, both now and for years to come. Visit browning.com for complete details.

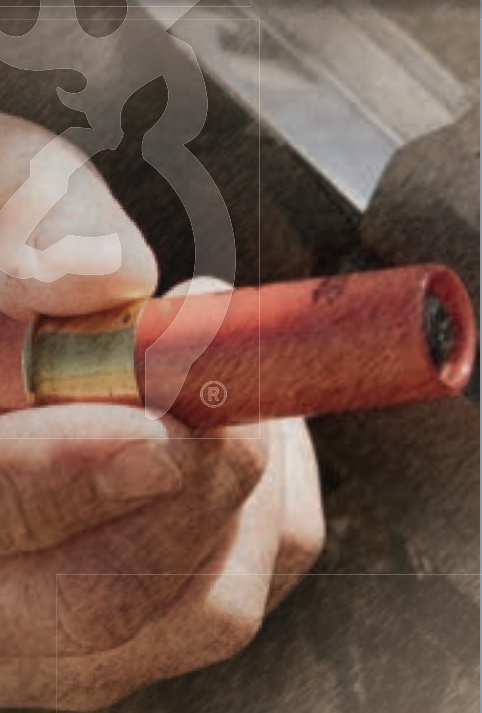

Mossy Oak® Break-Up Infinity® camo will be offered in conjunction with New Break-Up camo on select Browning extra barrels.

IMPORTANT: DO NOT ATTEMPT THE USE OF 3½" CHAMBERED BARRELS WITH 3" RECEIVERS NOR 3" CHAMBERED BARRELS WITH 3½" RECEIVERS.

PERFORMANCE

The smooth, anti-bind performance of our A-Bolt centerfire rifles is also found in the A-Bolt Shotgun action.

BARREL

The A-Bolt Shotgun features a fully rifled 1 in 28" twist barrel designed exclusively for use with sabot-type slugs. You can expect superb accuracy with the A-Bolt shotgun — 1 1/2" groups or better are typical at 100 yards.

RUGGED AND ACCURATE.

If shotguns and sabots are big game necessities where you live, now is the time to experience the feel and accuracy of a bolt-action shotgun for whitetail hunting. Browning A-Bolt Shotguns look, handle and feel like our venerable A-Bolt rifle with the same fast-cycling 60° bolt lift, easy-to-reach top-tang safety, detachable box magazine and sweet trigger feel. An adjustable rear sight and fiber-optic front sight are included, plus the receiver is tapped for scope mounts. Want hard-hitting accuracy from a shotgun? Start shooting the A-Bolt Shotgun today.

DETACHABLE MAGAZINE

A detachable magazine on a hinged floorplate allows you to quickly reload. Extra magazines can be carried for fast reloading. (Two shell capacity.)

STOCK

The rugged composite stock features the familiar right-hand palm-swell pistol-grip of the A-Bolt rifle. Checkered gripping surfaces and Dura-Touch® Armor Coating provide security in all conditions.

MICRO MIDAS — SHORT ON NOTHING BUT SIZE.

Browning Micro Midas guns are built to our highest quality standards and sized to fit smaller shooters perfectly in every way. Compact Micro Midas models feature shorter lengths of pull and are slimmer and trimmer to comfortably accommodate smaller hands and shorter finger to trigger reach. All Micro Midas firearms are backed-up by the Growth Insurance Program that allows owners to buy full-sized stocks at a great discount should the need arise. It's a guarantee that these little Brownings won't soon be outgrown.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

Eligible for the Growth Insurance Program. See below for details.

BROWNING GROWTH INSURANCE PROGRAM

Purchasing a firearm for a growing shooter is a tough decision to make. You can choose an inexpensive "youth" model with questionable quality that will soon be outgrown. Or you can buy a quality adult-size firearm they can "grow into" but may prevent them from reaching their shooting potential because of poor fit. We offer the perfect solution with the Growth Insurance Program. Purchase a new Browning Micro Midas or Micro firearm and you are eligible to purchase a full-size stock at 50% off the retail price down the road. That's a big savings for you, and it allows the shooter to enjoy a firearm of the highest quality that is sure to fit and maximize their shooting performance and enjoyment, both now and for years to come. Visit browning.com for complete details.

SYSTEM INTEGRATION FOR TOTAL ACCURACY.

From the start, the Browning X-Bolt was designed as an integrated system with the goal of delivering tack-driving accuracy. A long list of innovative features, time-tested quality and straight-from-the-box accuracy ensure that the X-Bolt will deliver for you on your next whitetail, elk or varmint hunt.

X-LOCK™ SCOPE MOUNTING SYSTEM

Securely mounted optics are essential for accuracy and precision on any rifle. To ensure the X-Bolt has the most stable scope mounting system possible, X-Lock mounts feature a four screw per base design that replaces the traditional two screw system. With the bases secured at all four corners, you get more accurate placement and more secure attachment to the receiver. See page 143 for more details on the new X-Lock Scope Mounting System.

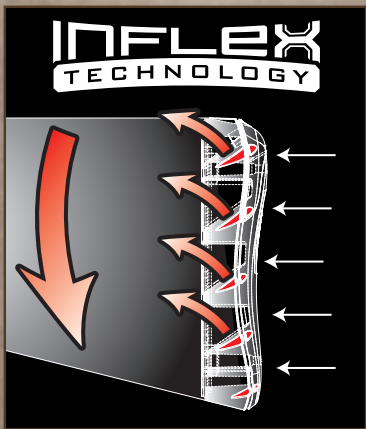

X-BOLT WHITE GOLD GLOSS FINISH STOCK

- RECEIVER** Stainless steel • Polished finish • Glass bedded • Drilled and tapped for scope mounts • Scroll engraving on front and rear receiver
- BARREL** Stainless steel • Polished stainless finish • Free-floating
- Hand chambered • Target crown **ACTION** Bolt-action • 60° bolt lift
- Adjustable Feather Trigger™ • Detachable rotary magazine
- Top-tang safety • Bolt unlock button **STOCK** Gloss finish checkered walnut • Rosewood fore-end grip and pistol grip cap **FEATURES** Sling swivel studs installed • Sling swivels included • Inflex Technology recoil pad

INFLEX TECHNOLOGY RECOIL PAD

The Inflex Technology recoil pad is standard on every X-Bolt rifle. This ultra soft pad offers the best recoil absorption available on any rifle. The proprietary construction and material promote a directional deflection of recoil forces, pulling the stock comb away from your face to reduce felt recoil and muzzle climb.

Eligible for the Growth Insurance program. See page 54 for details.

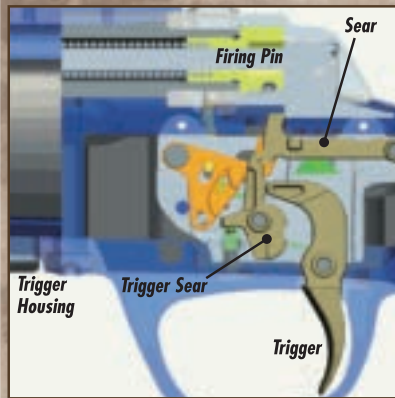

X-BOLT MICRO MIDAS SATIN FINISH STOCK

RECEIVER Steel • Low-luster blued finish • Glass bedded • Drilled and tapped for scope mounts **BARREL** Low-luster blued finish • Free-floating • Hand chambered • Target crown **ACTION** Bolt-action • 60° bolt lift • Adjustable Feather Trigger™ • Detachable rotary magazine • Top-tang safety • Bolt unlock button **STOCK** Satin finish checkered walnut • Compact 12½" length of pull for smaller shooters **FEATURES** Sling swivel studs installed • Inflex Technology recoil pad (Scope and mounts not included)

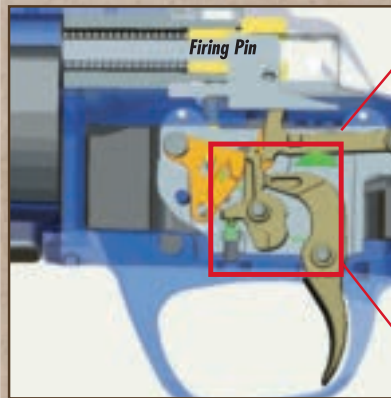

FEATHER TRIGGER™

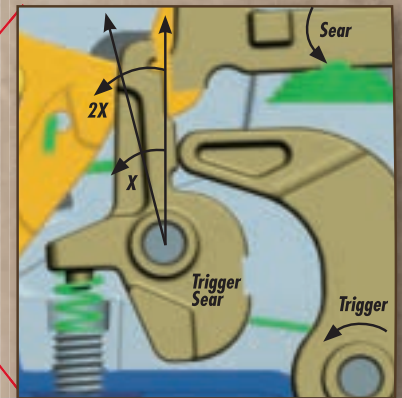

For precise shooting there is absolutely no substitute for a crisp, predictable trigger. The X-Bolt's three-lever Feather Trigger™ provides a clean, crisp pull with no take-up or creep and minimal overtravel. The trigger is screw adjustable from 3 to 5 lbs. and factory pre-set at approximately 3½ lbs. An alloy trigger housing contains hard chromed steel components that are highly polished on all critical contact surfaces. Precise engagement angles mean the X-Bolt Feather Trigger feels light and stays that way through many thousands of rounds. Unlike competitors' triggers that rely on a secondary finger piece lever, the Feather Trigger was designed right, from the very start.

Full sear engagement (Ready to fire)

THE X-BOLT — A PRECISION RIFLE FOR DISCRIMINATING MARKSMEN.

With a Browning X-Bolt you get more than total accuracy, you also get total quality. Medallion and Hunter rifles feature top-notch fit, finish and stock checkering. The receiver is carefully bedded into the stock to ensure no forces that could hinder accuracy act upon the barrel. Touches like these are what elevate the X-Bolt above the competition.

60° BOLT LIFT

Short 60° bolt lift is fast cycling and allows you to work the bolt quickly without the scope getting in the way. The bolt is machined from solid steel bar stock for strength and custom rifle precision. Three locking lugs provide exceptional bolt strength.

X-BOLT MEDALLION GLOSS FINISH STOCK

PERFORMANCE WHEN IT MATTERS MOST.

The Browning X-Bolt is a rifle waiting to be called upon to bring down a trophy big game animal. The total accuracy advantage gives you the confidence in the field to make longer shots. Inflex Technology recoil control keeps you on your quarry. Fast-operating 60° bolt lift lets you quickly chamber another round — should you need more than one.

- Drilled and tapped for scope mounts **BARREL** Low-luster blued finish • Free-floating • Hand chambered • Target crown
- ACTION** Bolt-action • 60° bolt lift • Adjustable Feather Trigger™ • Detachable rotary magazine • Top-tang safety
- Bolt unlock button **STOCK** Satin finish checkered walnut
- FEATURES** Sling swivel studs installed • Inflex Technology recoil pad (Scope and mounts not included)

BARREL

A free-floating barrel is essential for utmost accuracy. The X-Bolt is free-floated by bedding the front and rear of the action for stability. This maintains barrel to stock spacing for consistent accuracy. A recessed muzzle crown helps protect the rifling from damage. Barrels are triple checked for interior finish, straightness and air-gauged for uniformity.

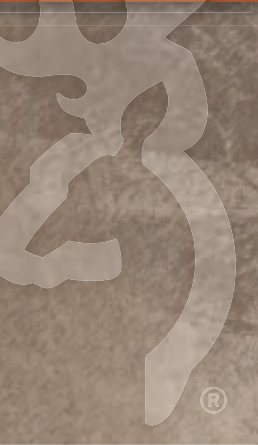

BOLT UNLOCK BUTTON

Conveniently located on top of the bolt handle, the bolt unlock button allows the bolt to be unlocked and opened with the safety in the on safe position. The bolt unlock button works in conjunction with the top-tang safety to provide an extra margin of safety when checking and unloading the chamber. The safety blocks the trigger sear and features a firing pin block for added security.

MAGAZINE

The X-Bolt is fed from a detachable rotary magazine constructed from a durable, lightweight polymer. Cartridges are picked up from the center of the magazine, directly in-line with the bolt, instead of offset as with traditional leaf-spring magazines, for a straight shot right into the chamber. An ergonomic magazine-mounted release lets the magazine drop directly downward and into your hand. The magazine sits flush with the bottom of the rifle for a sleek appearance. Additional magazines can be kept loaded and carried for easy access.

DEPENDABILITY YOU CAN RELY ON.

Get your hands on one of the most reliable, best looking, from-the-box-accurate rifles ever, the Browning A-Bolt. These rifles have proven their value in chilly Texas whitetail stands, pursuing antelope in the high deserts of Wyoming and putting the crosshairs on massive bull elk high in the Colorado Rockies. The A-Bolt is also available with the BOSS® device that dials in barrel harmonics to precisely match the ammunition used for unequalled accuracy. Never doubt your rifle, choose a rugged Browning A-Bolt.

BOLT-ACTION

With a fast 60° lift that doesn't have you banging your hand on the scope, the bolt incorporates a non-rotating sleeve that runs the full length of the bolt. When unlocked, three guide ribs on the bolt sleeve align with the three locking lugs to allow the bolt to slide smoothly. When locked, the three lugs provide massive bolt strength. The A-Bolt feeds smoothly because of its unique, patented cartridge depressor. This cartridge depressor stays in position, independent of the bolt rotation, as the bolt slides gently over the cartridges in the magazine. The bolt face is recessed, completely surrounding the cartridge base.

MAGAZINE

Hinged floorplate with detachable box magazine makes it simple and fast to load a spare magazine.

MAGAZINE CAPACITY

Magnum calibers: Three in magazine, one in chamber.
Standard calibers: Four in magazine, one in chamber.
223 Rem.: Five in magazine, one in chamber.

A-BOLT TARGET RIFLES. TACK-DRIVING ACCURACY STRAIGHT FROM THE BOX.

Now you can experience jaw-dropping bolt-action rifle performance. Browning A-Bolt Target rifles feature a precise target-style, single-set trigger that is factory-adjusted to approximately 9-14 ounces (250-400 grams) of pull weight in the set mode, and also operates as a conventional trigger with an adjustment range of 4-6 lbs. Fitted with a 28" target barrel, the action is carefully bedded into a beautiful laminated stock with a wide fore-end for exceptional stability on sandbags or from a bench rest. A fully adjustable comb allows you to gain perfect eye-to-scope alignment, even with large objective target optics. Lastly, a close radius pistol grip ensures an easy reach to the trigger, so you can squeeze the most out of an A-Bolt Target rifle's accuracy.

THE BOSS® DEVICE

The Ballistic Optimizing Shooting System (BOSS) is designed to maximize accuracy from the A-Bolt. The BOSS device quickly and easily tunes barrel harmonics to precisely match the specific ammunition fired, resulting in amazingly tight groups. The BOSS device is available as an option on the Medallion, Composite Stalker, Stainless Stalker, M-1000 Eclipse and Stainless M-1000 Eclipse. An interchangeable, non-ported BOSS-CR is also included.

BOSS-CR ACCESSORY

This accessory is also included with all BOSS-equipped A-Bolt rifles and offers all the accuracy advantages of the original BOSS without the muzzle brake feature.

BEDDED ACTION AND FREE-FLOATED BARREL

The barrel is free-floating and the action is glass bedded at the recoil lug and at the front of the receiver to maintain the proper spacing around the barrel for consistent accuracy. Every A-Bolt features a recessed muzzle crown to protect the rifling. Barrels are hand chambered and triple checked for interior finish, straightness and air-gauged for uniformity.

BOSS[®]-CR ACCESSORY

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, no-hole BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS.

NEVER LEAVE YOUR LEVER.

Most lever-action rifles suffer from accuracy problems caused by the limitations of the flat-nosed ammunition for which they are chambered. Not the Browning BLR. The BLR utilizes a reliable box magazine that protects bullet tips and allows it to fire powerful game-dropping magnum cartridges. An extremely smooth rack and pinion-driven bolt locks tight to the barrel and gives the BLR the kind of superior accuracy that rivals many bolt-actions.

**HAMMER**

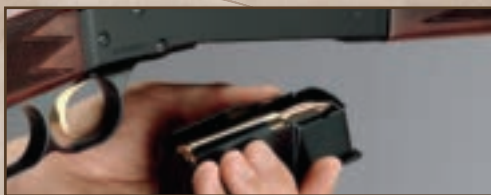

The fold-down hammer has two positions at half-cock so the status of the rifle is readily seen. The folding hammer provides an added measure of safety when the hammer is at half-cock. The hammer has four basic positions: Full-cock, half-cock, folded hammer position and dropped, or fired position.

ACTION

Advanced, lightning fast, glass-smooth rack and pinion lever-action. Strong rotating head, multiple-lug breech bolt with a recessed bolt face and side ejection.

TRIGGER

Wide groove design trigger with crisp, smooth pull. The trigger travels with the lever to avoid pinching your fingers when cycling.

**MAGAZINE**

The flush-mounted detachable box magazine has a capacity of three magnum or four standard rounds, plus one in the chamber.

**TAKEDOWN FEATURES**

BLR Takedown models are just as accurate and reliable as their unified counterparts but much easier to transport and store. The rifle is easily and quickly assembled without tools by simply sliding the barrel half into the receiver half and locking them together with the flip of a lever. The lever mechanically engages a stout locking lug into a recess in the bottom of the receiver. The system is rugged, precise and blends seamlessly into the styling of the rifle.

SCOPE MOUNTS

A scout-style scope mount is available as an accessory for BLR Takedown models. This one-piece alloy base mounts forward of the receiver and stays attached to the barrel half of the rifle when disassembled to retain the scope's zero. A long eye-relief scope is required (not included). The receiver is also drilled and tapped for conventional scope bases and rings (not included). Three scout-style scope mounts are available for BLR Scout models, depending on the caliber (see chart on page 142).

**RECEIVER**

Lightweight, sturdy machined aircraft-grade aluminum. Drilled and tapped to accept scope mounts.

SIGHTS

Low profile, square notch, screw adjustable rear sight aligns easily with a highly visible gold bead on raised ramp front sight.

HARD-HITTING AUTOLOADER ACCURACY.

There is still only one Browning BAR. These legendary autoloaders combine pinpoint accuracy with the raw strength to fire magnum cartridges. The dependable BAR features a multi-lug rotary bolt that secures the bolt to the barrel for unmatched strength. The piston-operated gas system is reliable and softens felt recoil to reduce muzzle climb.

THE BOSS® DEVICE

The Ballistic Optimizing Shooting System (BOSS) is designed to maximize accuracy from the BAR. The BOSS device quickly and easily tunes barrel harmonics to precisely match the specific ammunition being fired to deliver amazingly tight groups. The BOSS device is available as an option on the BAR MK II Safari.

BOSS-CR DEVICE

The BOSS-CR device offers all the accuracy advantages of the original BOSS device without the muzzle brake feature.

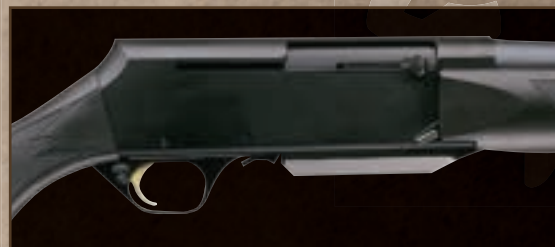

MAGAZINE

Detachable box magazine with a unique hinged floorplate allows you to lower the floorplate, detach the empty magazine and snap in a full magazine in mere seconds.

ADJUSTABLE SHIM SYSTEM

ShortTrac® and LongTrac® BAR rifles include six shims that let you customize the drop at comb and cast on/off of the rifle to your ideal dimensions.

RECEIVER

The Safari model uses a richly blued one-piece ordnance steel receiver with scroll engraving. Stalker, ShortTrac® and LongTrac® models have an aircraft-grade aluminum alloy receiver. All BAR rifles are drilled and tapped for scope mounts. The bolt release lever is incorporated into the receiver.

ACTION

The BAR is a gas-operated autoloader with a high-strength, multiple-lug rotating bolt that locks directly into the barrel. Every cartridge loaded into the chamber of the BAR is surrounded by a recessed bolt face, which is encircled by the barrel and then surrounded by the receiver. A seven-lug bolt and precise breech-to-chamber relationship give the BAR exceptional accuracy and the strength to handle magnum loads. The strong and very rigid action bar/inertia block link-up improves accuracy by reducing barrel vibration. The buffering system reduces wear and stress on the rifle's mechanism.

MAXIMUM GRIP

Camo composite BAR models combine checkered or overmolded gripping surfaces and Browning's proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate conditions.

A RIMFIRE THOROUGHbred.

To pick up the one-of-a-kind T-Bolt is to want one. More often than not, "rimfire" is associated with entry level. Not here. These rifles are elegant, built to our highest standards of quality and immensely fun to shoot. The unique straight-pull bolt cycles fast and locks up tightly for unmatched accuracy.

Buttstock Magazine Storage

STOCK

Available in both right- and left-hand models, T-Bolt rifle stocks are full-size to comfortably fit adults. Durable Composite models feature a Monte Carlo comb and include magazine storage in the buttstock. Walnut stocked Sporter models feature trim dimensions with a satin finish and cut checkering. Walnut Target/Varmint models feature a Monte Carlo comb and wide forearm for stability on the bench. All models include dual action screws for solid attachment, sling swivel studs and a synthetic buttplate.

TRIGGER

The three-lever trigger design combined with a short-travel firing pin give a crisp break, quick lock time, no take-up and minimal overtravel. It is also externally adjustable for pull weight.

ACTION

Receiver is machined from steel barstock. Features crossbolt lockup and an enlarged bolt handle pivot point moved forward for smoother action. The mainspring runs directly through the massive pivot pin. Cocking effort is split between opening and closing for ease of operation. The bolt features dual extractors and a red cocking indicator band. Right-side ejection on both right- and left-hand models.

SAFETY

Top-tang, thumb operated two-position safety can be operated without changing from a shooting grip.

BARREL

Target/Varmint models feature a 22" heavy varmint profile. T-Bolt Sporter models feature a 22" medium sporter profile. All are free-floating and have a semi-match chamber and target muzzle crown.

SIGHTS

Receiver is drilled and tapped for scope mounts. (Scope and mounts not included.) See page 142 for scope rings and bases for T-Bolt rifles.

T-BOLT COMPOSITE SPORTER NON-GLARE COMPOSITE FINISH STOCK

RECEIVER Steel • Blued finish • Drilled and tapped for scope mounts **BARREL** Medium sporter • Blued finish • Free-floating • Semi-match chamber • Recessed crown **ACTION** Straight pull bolt-action • Top-tang safety • Adjustable trigger • Right- and left-hand models have right side ejection **STOCK** Composite • Textured gripping surfaces • Matte black • Spare magazine storage compartment **FEATURES** Sling swivel studs installed (Scope and mounts not included)

LEVER-ACTION PERFORMANCE AND FUN.

Highly accurate and quick handling, a Browning BL-22 will win your heart. These time-tested favorites include performance features like ultra short 33° lever throw for fast action — even with small hands — and the same Browning quality that is never compromised.

Eligible for the Growth Insurance Program. See page 54 for details.

BL-22 GRADE I MICRO MIDAS GLOSS FINISH STOCK AND FOREARM

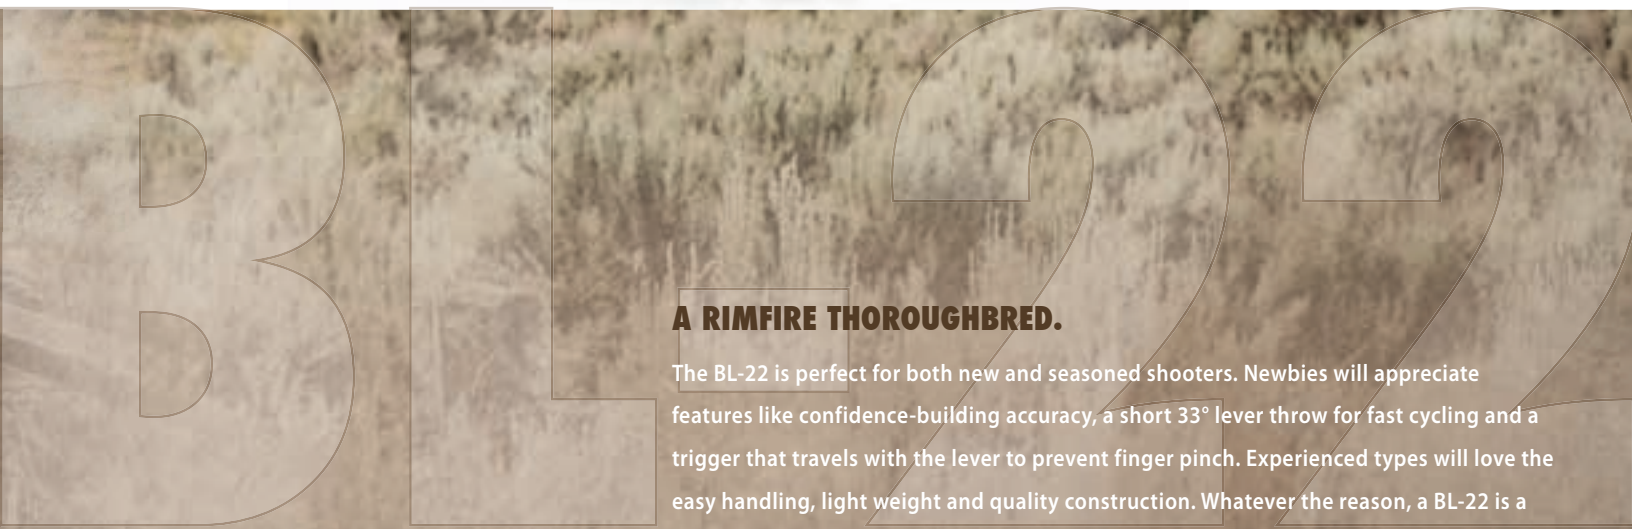

RECEIVER Steel • Blued finish • Grooved for scope mounts **BARREL** Blued finish • Recessed crown **ACTION** Lever-action • Short 33° lever throw • Tubular magazine **STOCK** Gloss finish American walnut • Straight grip • Compact 12" length of pull for smaller shooters **FEATURES** Adjustable sights

BL-22 GRADE I AND II

GLOSS FINISH STOCK AND FOREARM

RECEIVER Steel • Blued finish • Grooved for scope mounts • Grade II is scroll engraved **BARREL** Blued finish • Recessed crown **ACTION** Lever-action • Short 33° lever throw • Tubular magazine • Grade II has gold-colored trigger **STOCK** Gloss finish American walnut • Straight grip • Grade II has cut checkering **FEATURES** Adjustable sights

A RIMFIRE THOROUGHbred.

The BL-22 is perfect for both new and seasoned shooters. Newbies will appreciate features like confidence-building accuracy, a short 33° lever throw for fast cycling and a trigger that travels with the lever to prevent finger pinch. Experienced types will love the easy handling, light weight and quality construction. Whatever the reason, a BL-22 is a must have for every gun collection.

A JOHN M. BROWNING ORIGINAL.

The design ingenuity of John M. Browning is the stuff of legends. Experience it for yourself with one of his original designs, the classic SA-22. Quick to the shoulder and intuitive to point, the SA-22 is an enduring legend and an honor to the greatest gun inventor that has ever lived.

ACTION

Takedown autoloader with bottom ejection.

RECEIVER

Grade I is engraved with scroll design and a polished, blued finish. Grade VI models are available in polished blued or satin grayed finish.

ENGRAVING

Grade VI models are deeply engraved with game scenes. Game figures are 24 karat gold-plated.

SIGHTS

Gold bead front and adjustable, folding leaf rear.

TRIGGER

Blued on Grade I. Gold on Grade VI.

BARREL

Drilled and tapped to accept a scope mount.

SAFETY

Manual trigger-blocking safety is mounted on the trigger guard.

MAGAZINE

Tubular. Capacity: 11 Long Rifle cartridges.

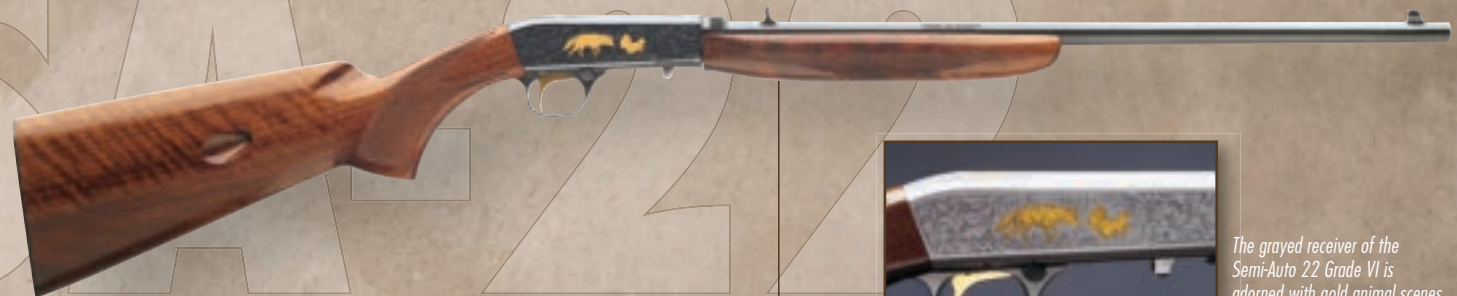

STOCK AND FOREARM

Select American walnut is checkered with a polished gloss finish.

SEMI-AUTO 22 GRADE I GLOSS FINISH STOCK AND FOREARM

RECEIVER Steel • Takedown design • Polished blued finish • Scroll engraving **BARREL** Polished blued finish • Drilled and tapped for scope mounts **ACTION** Autoloading • Bottom ejection • Tubular magazine • Crossbolt safety **STOCK** Gloss finish select American walnut • Checkered **FEATURES** Adjustable sights with gold bead front sight blade

ONE FUN LITTLE GUN.

The Buck Mark Rifle is compact, easy to shoot and always ready to hunt squirrels and rabbits, or tip over aluminum cans. Lightweight, accurate and extremely reliable, the Buck Mark Rifle is tough to put down for any reason except to reload.

ACTION

The straight blowback design offers enhanced simplicity and reliability.

FRAME

Machined to exacting tolerances from a solid billet of 7075-T6 aluminum. The stock structure is a part of the pistol frame, reducing weight and the number of parts.

SLIDE

Built-in recess and raised side panels for an improved cocking grip. The convenient manual slide release is easily operated with the shooting or support hand.

SIGHTS

Sporter models feature a TRUGLO®/Marble® fiber-optic sight system.

BARREL

Sporter model features a lightweight, tapered sporter-weight barrel. Target models feature a steel bull barrel. The chamber in every Buck Mark Rifle barrel is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

SAFETY

Large manual thumb safety.

MAGAZINE RELEASE

Positioned adjacent to the trigger guard for convenient operation.

GET YOUR HANDS ON 85% OF THE GREATEST PISTOL IN HISTORY.

John M. Browning developed the Model 1911 to fire the powerful 45 ACP cartridge. We developed it to fire the 22 L.R. and, after extensive testing and research, determined that 85% of the original size was ideal for the smaller cartridge. Put one in your hands and we know that you'll agree. The grip is comfortable even in large hands and feels equally at home in smaller ones. The lightweight alloy construction is anything but light duty. Own a little piece of history today.

ACTION

The straight blowback design offers enhanced simplicity and reliability.

FRAME

Machined from aircraft-grade aluminum to exacting tolerances.

SLIDE

Vertical serrations provide an improved cocking grip. The convenient manual slide release is easily operated with the shooting or support hand.

SAFETY

Large manual thumb safety and grip safety.

MAGAZINE

The steel magazine body is heat-treated for long-term feeding reliability and long life. Our coil spring provides a consistent follower angle. 10-round capacity.

MAGAZINE RELEASE

Positioned adjacent to the trigger guard for convenient operation.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

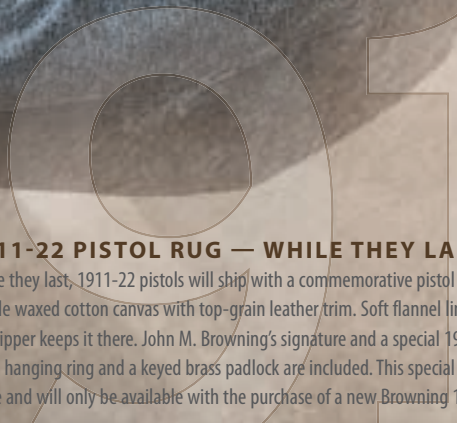

Manual thumb safety and grip safety.

Slide serrations provide a secure grip.

Magazine release is positioned adjacent to the trigger guard for ease of use.

1911-22 PISTOL RUG — WHILE THEY LAST!

While they last, 1911-22 pistols will ship with a commemorative pistol rug. These top quality rugs are made from supple waxed cotton canvas with top-grain leather trim. Soft flannel lining protects the pistol inside and a nylon coil zipper keeps it there. John M. Browning's signature and a special 1911-2011 logo adorns the outside. A solid brass hanging ring and a keyed brass padlock are included. This special commemorative pistol rug is a \$49.99 retail value and will only be available with the purchase of a new Browning 1911-22 while supplies last.

BUCK MARK® PRECISION.

Precisely made and a blast to shoot, the affordable Buck Mark is proudly "Made in the USA" and features a machined aluminum frame, precision rifled barrel, smooth trigger and fully-adjustable sights. More than accurate enough for serious competition or an afternoon plinking at the range, the versatile Buck Mark is always game for a good time.

BUCK MARK PLUS UDX

- RECEIVER** Alloy • Matte blued finish • Finger grooves
- BARREL** Slabside • Matte blued finish • 5½" length
- ACTION** Blowback • Single-action trigger
- GRIPS** Walnut Ultragrip DX® ambidextrous
- FEATURES** Pro-Target™ adjustable rear sight • TRUGLO®/Marble's® fiber-optic front sight

Pro-Target rear sight offers finer adjustment clicks for greater accuracy.

Ultragrip RX® adds control and comfort.

ACTION

The straight blowback design offers enhanced simplicity and reliability.

SLIDE

Built-in recess and raised side panels for improved cocking grip. The convenient manual slide release is easily operated with your shooting or support hand.

BARREL

Most models have bull barrels for improved stability. Lite models have a steel barrel liner inside an ultralight aluminum sleeve. The chamber is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

REAR SIGHT

A 16-click per revolution adjustable Pro-Target™ sight is standard on all models. This sight provides a finer range of adjustment over the industry's standard of 12-clicks per revolution.

FRONT SIGHT

Plus models feature a TRUGLO®/Marble's® fiber-optic front sight.

BUCK MARK LITE GREEN/GRAY

RECEIVER Alloy • Matte green or gray finish **BARREL** Alloy sleeved • Matte green or gray finish • Fluted • Available in 5½" length **ACTION** Blowback • Single-action trigger **GRIPS** Ultragrip RX® ambidextrous **FEATURES** Pro-Target™ adjustable rear sight • TRUGLO®/Marble's® fiber-optic front sight

BARREL Tapered bull 5½" • Matte blued finish
ACTION Blowback • Single-action trigger
GRIPS Ultragrip RX® ambidextrous
FEATURES Pro-Target™ adjustable rear sight • TRUGLO®/Marble's® fiber-optic front sight

FRAME

While many popular 22 pistols are cast or fabricated from sheet metal stampings, each Buck Mark frame is CNC machined from 7075-T6 aluminum to exacting tolerances.

MAGAZINE

The magazine body is heat-treated for long-term feeding reliability. Coil spring provides more consistent follower angle. 10-round capacity.

MAGAZINE RELEASE

Positioned adjacent to the trigger guard for convenient operation.

TRIGGER

Compare it to the competition and feel its light, crisp break with less creep and overtravel.

SAFETY

Large, manual thumb safety. The trigger is disconnected when the magazine is removed for added safety.

GRIPS

Several wood, laminate and composite styles are available. Soft nitrile rubber Ultragrip RX® (URX) and wood Ultragrip Deluxe® (UDX) ambidextrous grips have ergonomic finger grooves for enhanced control.

A LEGEND YOU CAN RELY ON.

The Browning Hi Power is one of the most revered pistols of all time. This ground-breaking firearm was originally designed by John M. Browning and perfected in the years following his death by Fabrique Nationale's prolific designer, Dieudonne Saive. The Hi Power has proven itself around the world in the hands of law enforcement, military, special operations forces and law abiding citizens. Add a legendary piece of functional firearm history to your collection now with a Browning Hi Power.

SAFETY

A large, ambidextrous manual thumb safety is conveniently located on the frame just above the grip.

SIGHTS

Hi Power pistols are available with fixed, low-profile three-dot sights. The Hi Power Standard is also available with optional low-profile target sights that are adjustable for windage and elevation.

MAGAZINE CAPACITY

Double-stack magazine design. A 13-round magazine is standard in 9mm. 10-round models in 9mm are available where required by law. Follow state and local laws regarding magazine capacity.

FRAME AND SLIDE

The frame and slide are built from solid steel, yet remain lightweight. The heft of the Hi Power keeps recoil light and manageable for accurate firing, even at a rapid rate. The Hi Power's balance in your hand is impeccable.

TRIGGER

The light single-action trigger breaks clean and crisp. This is the system preferred by professionals around the world.

HI POWER MARK III (FIXED SIGHTS)

RECEIVER Steel • Black epoxy finish **BARREL** 4 $\frac{1}{2}$ " • Black epoxy on slide • Low profile fixed sights **ACTION** Locked breech • Single-action trigger • Ambidextrous thumb safety **GRIPS** Composite panels • Thumb rest **FEATURES** Extra magazine

*B25 Special Flowers***B25 SUPERPOSED™**

The most requested Custom Shop model is the legendary Superposed, the last design undertaken by John M. Browning before his death in 1926 and the culmination of his firearms ingenuity and wisdom. The Superposed is the finest and most respected over and under design ever. As in all of Browning's work, the Superposed delivers perfect balance, economy of proportion and eye-appealing design. As beautiful as a custom Superposed is, it deserves to be carried afield and used, just as Mr. Browning intended.

CCS 25 B5**EXPRESS RIFLES**

HI POWER RENAISSANCE SILVER

HI POWER RENAISSANCE GOLD

CUSTOM MADE IN BELGIUM

The Custom Gun Shop of Fabrique Nationale and the Herstal, Belgium Engravers' Cooperative, will make available on special order many different custom enhancements. These firearms will be fully assembled, fitted and engraved in Belgium to the personal designs and specifications of the shooting enthusiast.

PRICE

Prices for the basic firearm, before custom enhancement, are available from the sales department at Browning in Morgan, Utah by calling (801) 876-2711. All prices are subject to change due to changing world currencies.

HOW TO BUILD A CUSTOM GUN

Visit browning.com/custom to view or download the Browning Custom Shop brochure. In addition to showcasing the firearms available, this brochure displays and explains the many grades, engraving patterns, checkering patterns, stock and forearm designs and personal touches available to the customer.

HOW TO ORDER

All inquiries for Custom Gun Shop products will be submitted to headquarters in Morgan, Utah. Once the basic specifications have been determined, a written order should be placed with the Morgan office. The specifications will be reviewed with the Custom Shop in Belgium, and a price and delivery date will be determined.

DELIVERY

Actual production time will be based on the complexity and detail of the custom order. An approximate delivery date will be furnished with the factory cost quotation.

SAFES

30 Years

**BROWNING PROSTEEL SAFES —
30 YEARS OF PROTECTING WHAT MATTERS TO YOU MOST.**

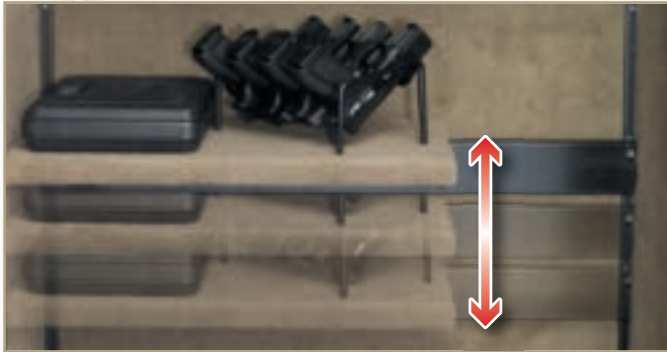

Browning ProSteel safes have come a long way in the past 30 years, with vastly more models, colors and interior options than ever before. We now make even better use of the interior space, with higher gun capacities and improved storage organization capabilities. One thing that hasn't changed is the quality and commitment to protect your family, guns and valuables. Browning ProSteel safes — 30 years of being The Best There Is®.

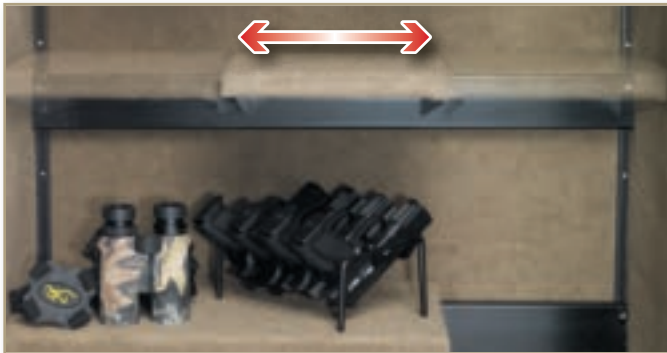

AXIS™ ADJUSTABLE SHELVING

THE MOST VERSATILE SAFE INTERIOR EVER DESIGNED. PERIOD.

Browning ProSteel safes lead the industry when it comes to managing safe interior storage. Nowhere is our expertise more evident than with our innovative Axis Adjustable Shelving (patent pending). Unlike shelves in other safes that are either fixed in position or only offer vertical adjustment, Axis shelves can be adjusted both vertically and horizontally, to accommodate items over a broad range of sizes while working around long guns. All premium Browning Pro-Steel safes feature the Axis Adjustable Shelving system. Platinum Plus and Gold Series safes come fully loaded with an all-shelf interior that can be customized to meet your needs. Additional Axis shelves can be purchased to convert your Medallion or Silver Series safe to an all-shelf interior as well (see page 120 for details). Check out a Browning ProSteel safe with Axis Adjustable Shelving and imagine the treasures you could fill one with.

A vertical track mounted to the back of the safe interior allows the horizontal rail to be repositioned up or down along the vertical axis.

The cantilevered design of the Axis Adjustable Shelving can be placed anywhere left or right along the horizontal axis. Shelving can also be combined to make one long shelf.

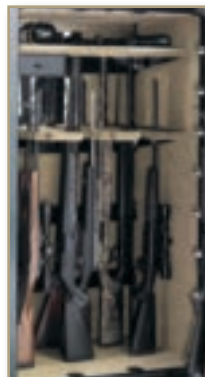

From all gun to all shelves and all points in between, Axis Adjustable Shelving offers more versatility than any other safe shelving available. The possibilities are almost endless.

Arrangement Option #3

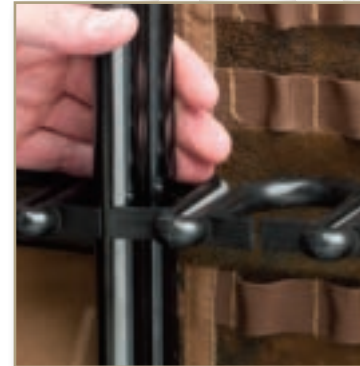

DPX® STORAGE SYSTEM
BETTER THAN EVER. AGAIN.

None can match the convenience, versatility or style of our patented DPX storage system (U.S. patent #7,409,790) — except us. This revolutionary system gets even better in 2012 with the New DPX Scope Saver™ (patent pending) found exclusively on Browning ProSteel safes. This new addition allows scoped rifles to be mounted on the door where they are easy to access. The Scope Saver protects scoped firearms from adjacent firearms and other contents in the safe, ensuring that time spent sighting-in isn't wasted. In addition, the space that would be taken up by a scope in a traditional safe is now freed up for another firearm. While other safes will store your guns, no other safe will protect them and keep them ready for you to use like a Browning ProSteel safe.

NEW DPX SCOPE SAVER

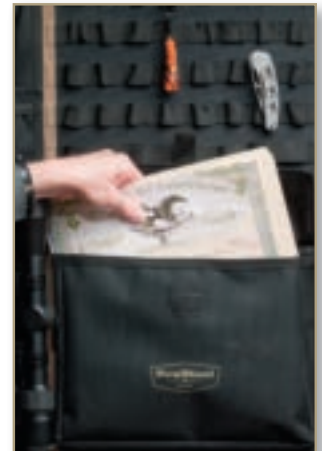

Found exclusively on Browning ProSteel safes, it keeps scoped rifles protected and ready for use.

The Quick Access DPX Barrel Rack features flexible polymer wings that hold the barrel in place, yet bend to allow firearms to easily be pushed into or pulled out of the rack.

DPX Handgun Pouches allow you to store handguns on the door or in the body of the safe.

The DPX MOLLE system, along with pockets and pouches, allow for organization and storage of smaller items.

HOW MANY GUNS CAN I STORE IN MY BROWNING PROSTEEL SAFE?

The gun capacity description is a series of three numbers, for example 11/22+7. The first number is the long gun capacity of the main interior portion of the safe, with part of the space used for shelves (11 in the example). The second number is the interior long gun capacity if the shelves are removed for an all gun interior (22 in the example). The "plus" number (+7 in the example) is the long gun capacity on the back of the door. The door back capacity can be used to store long guns whether or not shelves are used in the interior. Since capacity is determined by safe size and features, each safe will have different interior capacities.

UP TO 30% MORE STORAGE THAN OTHER SAFES		
CAPACITY COMPARISON	Browning ProSteel 26 Cu. Ft. Model	Other Brand 25-28 Cu. Ft. Safe
Long Gun Capacity with Side Shelves in Place	17 guns	11-14 guns
Fast Access Guns	9 guns	2 guns
Gun Locations	Interior and door back	Interior only

All firearms, accessories and contents displayed are not included with safes.

UNI-FORCE™ LOCKING SYSTEM. TOP-LEVEL PROTECTION FROM THE NAME YOU TRUST.

Anti-pry corner bolts, rigid diversion bars and layer upon layer of hardened lock protection, all for the purpose of securing your firearms and valuables from theft. Uni-Force is found only inside our Duo-Formed® Door and provides the finest protection in the gun safe industry. This innovative design ensures rigidity, strength, security and protection. Ensure that which is yours remains yours. Lock it up with a Browning ProSteel safe.

1 UNI-FORCE™ LOCKING SYSTEM

A punch attack involves drilling through the body to access the bolts, then hammering on the bolts until the lock breaks. Our finest safe locking mechanism, the Uni-Force System, incorporates robust cam locks and a heavy-duty multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. With the Uni-Force System, pounding forces go to the cams and diversion bars, not the lock, for unmatched protection against this type of attack.

2 PRY-STOP CORNER BOLTS

Extensive attack testing revealed that door corners are especially vulnerable to pry attack. Our innovative Pry-Stop Corner Bolts extend diagonally from a reinforced support at the corners of the door and add needed security to the more vulnerable corner areas.

3 LOCKING BOLT DIRECTION

Most Browning ProSteel safes have locking bolts that extend into the door frame from all four sides of the door to add extra resistance to pry attack. Safes with bolts on three sides have them on both sides of the door and on the top edge.

4 OMNIBARRIER® LOCK PROTECTION

The lock is the most important security component of a safe. It is also one of the most delicate and susceptible to drill and punch attacks. Our rugged OmniBarrier Lock Protection literally surrounds the critical lock with steel hard plate and steel components to protect it from drill, punch and push attacks.

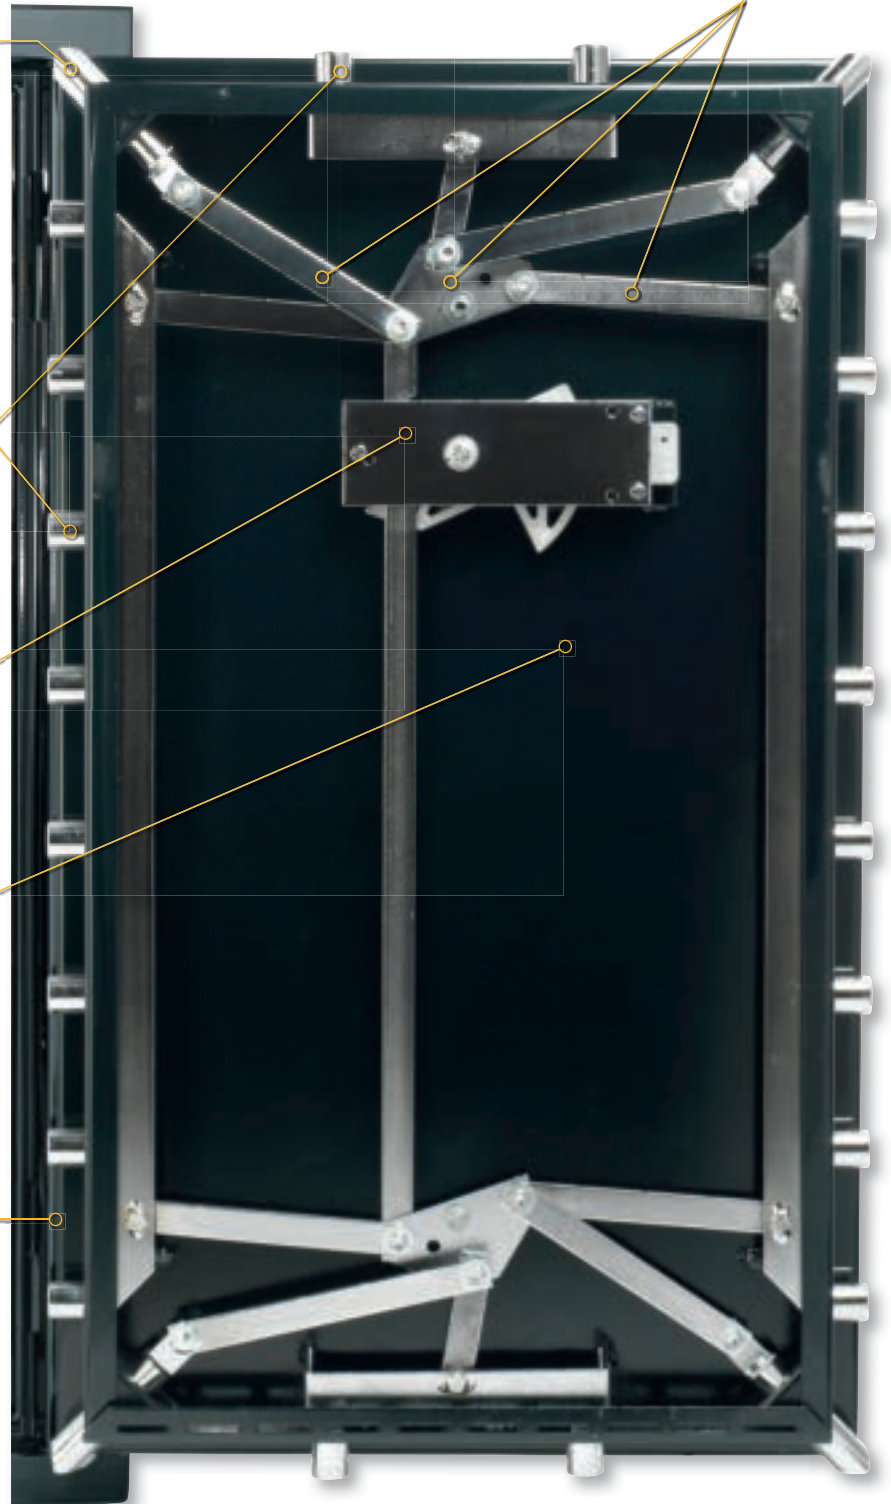

5 DUO-FORMED® DOOR

Our finest door is built using formed layers of steel to provide superior strength, pry resistance and attack protection. A full second panel adds outstanding strength. The door face is 1 $\frac{5}{16}$ " thick.

6 REINFORCED DOOR FRAME

Browning ProSteel safes are built with a sturdy reinforced door frame that resists prying or pounding attacks. Our door frames are constructed from the same thickness of steel as the body and are bent, not welded, for superior strength, rigidity and pry resistance. Some safe manufacturers cut costs by not reinforcing the door frame, making the door opening itself a prime point for attack.

FORCE DEFLECTOR™ CLASS-LEADING SECURITY FROM PATENTED INNOVATION.

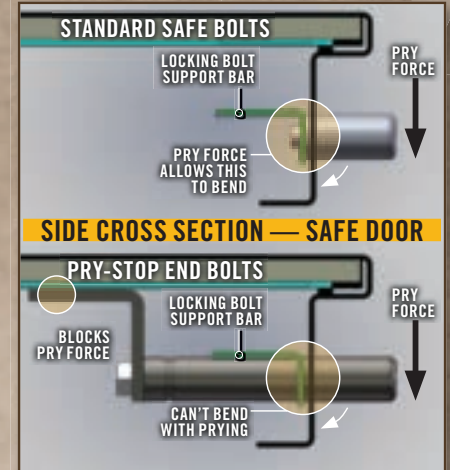

When it comes to a Browning ProSteel safe, we believe the term value should never be mistaken for compromise. Our patented Force Deflector System is a prime example of that philosophy. Force Deflector combines serious lock protection features with a rigid formed door design to offer best-in-class security and protection for all of your prized possessions.

1 FORCE DEFLECTOR™ SYSTEM

The patented, class leading Force Deflector Locking System prevents energy transfer to the lock better than many systems found on safes costing much more. This simple, yet innovative design uses a rotating cam to prevent forces on the bolt or handle from reaching the lock.

2 PRY-STOP END BOLTS

We don't cut corners; we add more protection to them. Pry-Stop End Bolts are over double the length of standard bolts and are attached to high-strength steel angle iron that prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts help secure the door corners.

**3 LOCKING BOLTS**

When it comes to locking bolts, there is strength in size and numbers. Bigger locking bolts, and more of them, equal better security as larger diameter locking bolts are much less likely to bend than smaller bolts.

4 HARDENED STEEL PINS

Hardened steel pin lock protection is designed to combat drill attacks. Located directly in front of the locking mechanism, the smooth, hardened steel pins are extremely difficult to drill through. Unlike steel plate protection, the pins rotate freely and are more likely to bend or break drill bits.

5 RELOCKER

The Force Deflector™ Locking System includes a relocker that is triggered during an attack on the safe. The relocker secures the boltwork in the safe and prevents it from being actuated.

6 BODY STEEL THICKNESS

Body steel thickness is of utmost importance and is more critical than just being the first line of defense against drill or cut attacks. In a fire, heavier gauge steel offers better protection because it flexes less and will be less likely to crack along welds that allow heat to enter.

BROWNING PROSTEEL SAFES. WE SET THE STANDARD FOR FIRE RESISTANCE.

When comparing fire ratings on safes, the most important thing to understand is that there are no industry standards for rating the level of fire protection a safe provides. Manufacturers set their own ratings, based on their own testing methods, that can be overinflated. Test inconsistencies lead to confusing ratings that vary by manufacturer, leaving customers to decide if they trust the manufacturers' claims or not. We have provided high quality gun safes for 30 years. In that time we have learned a few things when it comes to fire protection, notably that it pays to offer honest fire ratings and gain the trust of our customers. We back up that trust with advanced fire protection features and a proven record of providing quality products. Extensive testing, industry-leading engineering and decades of experience go into every Browning ProSteel safe, resulting in best-in-class fire resistance.

WHAT MAKES A SAFE FIRE-RESISTANT?

Fire resistance is made up of several factors:

First, the amount of insulation is the most important factor. More insulation means more protection; it really is that simple.

Second, construction of the safe is hugely important. Thicker steel, fully welded gap-free body construction and reinforced door frames all reduce heat-caused flex that could open gaps in the safe and allow heat to enter. Strategic placement of insulation and external hinges means there are no gaps in fire insulation for improved protection.

Third, all Browning ProSteel safes include a Palusol® strip that expands to seal around the door frame and eliminate gaps where heat could enter. You can be confident that Browning ProSteel safes offer excellent protection for your valuables in case of fire.

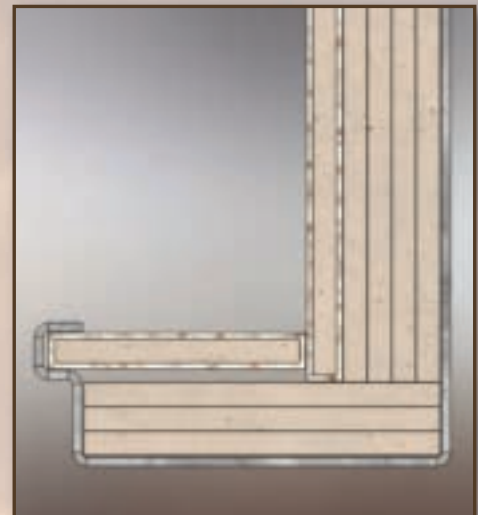

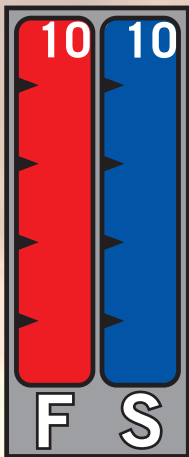

OUR FIRE TESTING PROCEDURE

Our years of experience developing new safes help us understand the fire protection a safe will offer based on its construction. But that's not enough. Since the Browning name is on the line, we test every design based on a stringent test specification — our own.

To begin, we take a finished safe and place it into our on-site test furnace. We position thermocouples between the safe and the furnace walls on all four sides of the safe to record ambient temperatures of the furnace and the safe. On initial startup of the furnace, all burners are lit so the temperature inside the furnace reaches a test temperature of 1200° F within the first five minutes of the test. The temperature of the thermocouples is recorded every minute and the burners are adjusted as needed to

maintain an average temperature of 1200° F for the duration of the test. Three thermocouples are also mounted inside the safe, two just above the top shelf and the third in the middle of the safe. During testing, the internal temperature of the safe is not to rise more than 275° F. When the temperature inside the safe increases 275° F above ambient temperature, the time is recorded and the test is completed. For example, if the ambient temperature at startup is 75° F when a thermocouple inside the safe reads 350° F, the test is done. Only then is the fire rating calculated.

In contrast, some safe manufacturers will slowly ramp up to the test temperature, leaving the majority of the test at much lower temperatures than the final rating shows. Others place the thermocouples at the bottom of the safe where there is less heat. This measures the coolest air first, resulting in a higher rating claim. Worse yet, some base their fire ratings on design alone without actually testing their designs. Rest assured that the fire protection in a Browning ProSteel safe is The Best There Is®.

GUN SAFE WARRANTY

ProSteel offers a Gun Safe Warranty equal to the best in the industry.

Browning ProSteel safes manufactured after January 1, 2006 include a generous warranty that covers:

- **ATTEMPTED BREAK IN** • **BREAK IN** • **FIRE** •

If a safe has one of these situations and your homeowner's insurance policy does not cover the damage to the safe, ProSteel will repair or replace the safe. The contents are not covered. Shipping costs for new safe, if necessary, are included.

Some restrictions apply. See Safe Owner's Manual or browning.com for complete warranty information.

Workmanship warranty information is included.

SAFE FEATURE ICONS

The icons below highlight key features of Browning ProSteel safes, and help you quickly identify and compare the features of different safe models.

FIRE/SECURITY RATINGS

Fire and Security thermometers make it easier to compare the level of protection Browning ProSteel safes provide in these two important areas. The "F" indicates fire protection and the "S" indicates security level. Higher numbers mean better protection.

	<p>FORCE DEFLECTOR™ LOCKING SYSTEM – The Force Deflector Locking System (U.S. patent #7,665,405) prevents bolt or handle forces from reaching the lock by using a rotating cam device. It prevents energy transfer to the lock better than most systems used in the safe industry.</p>		<p>PRY-STOP CORNER BOLTS – Pry-Stop Corner Bolts provide better protection than other pry-defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack at the vulnerable corner areas.</p>
	<p>UNI-FORCE™ LOCKING SYSTEM – Our finest safe locking mechanism uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, for protection unmatched by other locking systems.</p>		<p>PRY-STOP END BOLTS – Superior to other bolt designs which allow the locking bolt support bar to bend. Pry-Stop End Bolts are over 2½ times longer and attach to a high-strength steel angle iron which prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.</p>
	<p>1" FORMED DOOR – The 1" Formed Door is engineered with a rugged steel face, back and reinforcement panels to provide excellent strength and attack protection compared to the competition.</p>		<p>LOCKING BOLTS (VARIABLE SIZE) – The rugged steel pieces that move behind the door frame to actually hold the safe door locked and closed. Bigger bolts, and more of them, provide greater security.</p>
	<p>DUO-FORMED® DOOR – The best safe door we offer is formed from multiple layers of steel, carefully formed together to provide superior strength, pry resistance and attack protection. Full second panel for outstanding strength. The door face is 1¾" thick.</p>		<p>BOLT DIRECTION – Better safes have locking bolts extending from all four sides of the door for extra resistance to pry attack. Safes with bolts on three sides have them on both sides of the door and on the top edge.</p>
	<p>OMNIBARRIER® LOCK PROTECTION SYSTEM – A carefully engineered structure of steel hard plate and steel components designed to protect the safe lock from drill, punch and push attacks.</p>		<p>BODY THICKNESS (VARIABLE MEASURE) – The thickness of the steel that comprises the safe body. A smaller gauge number means thicker steel, which provides more security than thinner steel. The thickest Browning ProSteel safe body is ¾" (on Platinum® Plus) and this specification is not shown in gauge measurement.</p>
	<p>FIRE RATING (VARIABLE TIME) – A laboratory measurement of time and temperature (in Fahrenheit) used to compare the relative amount of fire resistance provided by a safe. Safes with a longer fire rating time provide more fire protection than a safe with a shorter time.</p>		<p>LIGHT PACKAGE / LED – The interior light package includes two light modules to illuminate the safe interior. They make it easier for you to find items inside the safe.</p>
	<p>LAYERS OF INSULATION – The most important factor in fire protection is the total thickness of the insulation in the safe. More insulation means more protection from fire. Our safes use ½" thick gypsum panels, so the number of layers multiplied by ½" shows the total insulation thickness in inches.</p>		<p>DPH SYSTEM – The Duo-Plus Handgun Storage System (patent pending) maximizes the storage of handguns and small valuables on the door back. It has a pouch and Handgun Loop system to allow easy access to smaller items on the door back.</p>
	<p>REINFORCED DOOR FRAME – The door opening of the safe is strengthened by a U-shaped steel channel around the entire perimeter to create added pry and attack resistance.</p>		<p>DPX® SYSTEM – (U.S. patent #7,409,790) The patented Duo-Plus Extra Storage System includes a rack to store long guns on the door back. There is also a variety of pouches and pockets to store other valuables on the door back. See page 99 for a complete description.</p>
	<p>180° HEAVY DUTY HINGES – Rugged hinges are machined from solid steel bar stock for strength. The hinges allow the door to swing open 180° for unhindered access to the safe interior. Hinge-side locking bolts maintain full security even if the hinges are cut off. The door is removable to simplify moving of the safe.</p>		<p>AXIS™ – Axis Adjustable Shelving (patent pending) is the most versatile on the market. By combining multiple, moving shelves and an array of tracks, small and large items alike now fit in the safe and take up only the minimum amount of shelf space. See page 98 for a complete description.</p>
	<p>UL® SECURITY CONTAINER RATING – The industry standard test and rating for home/personal safes. Requires minimum construction specifications and passing a laboratory attack test. Our premium safes far exceed the minimum requirements for the UL Residential Security (Tool Attack) listing.</p>	<p>WHY STEP UP? Starting with the flagship Platinum Plus Series, there is a "Why Step Up?" section at the top of the description area for each series. This section is a list of just the features that distinguish that series from the series below it in the safe line up. "Why Step Up?" is an easy comparison between Browning ProSteel safe series.</p>	

THE PINNACLE OF PROTECTION

WHY STEP UP TO A PLATINUM PLUS SERIES SAFE? Massive $\frac{3}{16}$ " steel body

• 1200°F/120 min. fire protection • Grade VI interior package

ANTI-PRY FEATURES Massive $\frac{3}{16}$ " steel body • Pry-Stop Corner

Bolts at all four corners of the door • 1½" chromed locking bolts, four-sided door coverage • Uni-Force™ Locking System with Anti-Pry

• Tight-tolerance door fit • 1¾" thick Duo-Formed® Door

ADDITIONAL SECURITY FEATURES Uni-Force Locking System

• OmniBarrier® Lock Protection System • UL® tool attack listed • S & G® Group II lock with key lock dial and five-year limited warranty

INTERIOR/CONVENIENCE AND APPEARANCE FEATURES Axis™ Adjustable Shelving • Premium DPX® Storage System • Quick Access DPX Barrel Rack with New Scope Saver • Four DPX Handgun Pouches

• Integrated Jewelry Box • Knurled five-spoke Buckmark handle • Elk scene bonded to the safe door • Elevated floor makes removing guns easier • Baked-on, high-gloss finish

GRADE VI INTERIOR FEATURES Premium DPX Storage System with simulated leather trim • Quick Access DPX Barrel Rack with Scope Saver System • Interior cedar walls and ceiling • Interior light package

• Worn leather-look microfiber interior covering

FIRE PROTECTION 1200° F/120 min. fire protection • Five layers of ½" fire-resistant insulation in the body • Four layers of ½" fire-resistant insulation in the door • Premium 3-in-1 Palusol® fire seal for added fire protection

• Worn leather-look microfiber interior covering

FIRE PROTECTION 1200° F/120 min. fire protection • Five layers of ½" fire-resistant insulation in the body • Four layers of ½" fire-resistant insulation in the door • Premium 3-in-1 Palusol® fire seal for added fire protection

INTERIOR COLOR

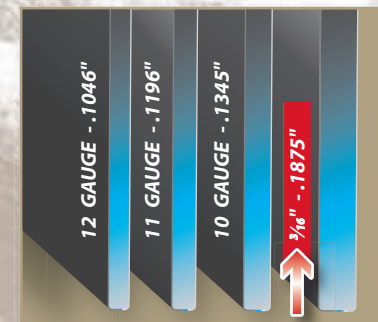

GRADE VI INTERIOR

Platinum Plus Series safes feature the stunning Grade VI Interior Package. The Grade VI interior is lined with cedar paneling that creates interesting visual appeal. The shelves are lined with worn leather-look microfiber, and the DPX® system on the door back panel is trimmed in simulated leather. The Axis™ Adjustable Shelving and DPX Barrel Racks with New Scope Saver feature offer the ability to store more than ever before.

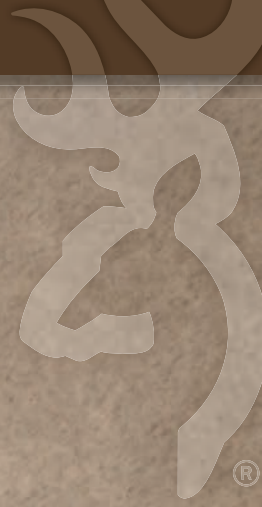

AXIS™ ADJUSTABLE SHELVING

Platinum Plus Series safes come with an Axis All-Shelf interior standard, allowing you customize your safe interior from all shelves to all guns and all points in between.

MASSIVE $\frac{3}{16}$ " STEEL BODY

$\frac{3}{16}$ " steel makes the safe heavier and tougher to move, is more time consuming to cut or drill through and flexes less when heated for better protection in a fire.

SECURITY DOOR BUILT-IN CONCEALMENT AND SECURITY

The Browning ProSteel Security Door has taken in-home security to a new level. With the appearance of a standard residential door, the Security Door is the perfect option for the consumer who prefers to be more discreet about the presence and location of valuables. The Security Door includes a UL® Listed S & G® Type I Electronic Lock with a keypad that can be mounted and concealed up to seven feet from the vault to further hide the true nature of the door. The Security Door features a six-panel door style to help blend in with other residential doors and can be painted to match. The minimum rough door opening for the Security Door is 83" x 36".

SECURITY DOOR FEATURES 1 7/8" thick Duo-Formed® type door • 1 1/4" chromed locking bolts • 1" of fire-resistant insulation in the door face • Residential interior straight brass handle • UL® Listed S & G® Type I Electronic Lock • Concealed hinges • Internal lock release to open the door from within the vault • Door swings out a full 180° when open

FACTORY-INSTALLED ACCESSORIES

JEWELRY BOX

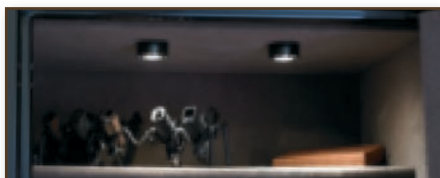

The Jewelry Box option makes storing and finding jewelry inside a safe much easier and convenient. The elegant Jewelry Box conveniently holds jewelry and small items inside the safe in an organized, protected manner. Exterior is synthetic leather; interior is lined with jeweler's velvet. Mounted on half shelf below gun rack on most safe models.

Optional on Gold, Medallion and Silver Series safes.

Standard on Platinum Plus Series safes.

Factory installed only.

Suggested Retail: \$69.95

MEDALLION/SILVER SERIES LED LIGHT PACKAGE OPTION

This integrated LED lighting package makes locating objects on shelves or identifying the right firearm convenient and easy. The two included LED light modules are wired to a door-activated switch and illuminate when the door is opened. Factory installation adds a seamless look with no exposed wiring.

Optional on Medallion and Silver Series safes.

Standard on Platinum Plus and Gold Series safes.

Factory installed only.

Suggested Retail: \$129.00

FILE HANGER

The file hanger attaches easily to the side of any shelf allowing you to store documents. Can even be mounted above gun storage to take advantage of unused space. Includes one file hanger and two box-bottom hanging file folders.

Suggested Retail: \$19.95

LOCK OPTIONS

The locks below are available as factory-installed options.

Availability by series is described in the information for each lock.

S & G[®] ELECTRONIC LOCK

The S & G Electronic Lock is an advanced security system manufactured by the leader in the lock industry. Includes many technical security features.

Available on all models.

Suggested Retail: \$89.00

SECURAM BIOMETRIC LOCK

The SecuRam Biometric Lock uses the uniqueness of an individual fingerprint as the combination in this advanced security solution. The lock opens with either a fingerprint or a multi-digit code. It is highly secure and operates very quickly. Simple programming instructions. LCD Screen. Not available on Sporter, Bronze, Compact, Tactical Series safes and the Security Door.

Suggested Retail: \$279.00

INTERIOR OPTIONS

NEW

MEDALLION/SILVER SERIES ADDITIONAL AXIS™ SHELVES

Additional shelves are available for Medallion and Silver Series safes with the new Axis Adjustable Shelving. Adding shelves allows you to convert the interior of the safe to an all-shelf interior, while still maintaining long gun and small item storage on the door back thanks to the DPX Storage System. Available for Medallion and Silver Series Safes only. Set of two shelves.

Suggested Retail: \$99.95

NEW

LED SAFE LIGHTING KIT

Our New Safe Lighting Kit is the best aftermarket lighting solution available today. The expandable, linear design allows you to place long-lasting LED lighting wherever you want it in your safe. A motion sensor turns on the lights when the door opens and automatically shuts them off after 30 or 60 seconds with no motion or when the door closes. Each kit comes complete with six LED light tubes with six LEDs per tube, three flexible connectors, mounting clips with hook and loop tape, A/C adapter and a motion sensor power module.
Suggested Retail: \$69.99

USER INSTALLED ACCESSORIES

You can install all of the safe accessories shown on this page. All new Browning ProSteel safes are pre-drilled and include a molded fire-resistant electrical pass-through sleeve that accommodates the power cord for a light kit or dehumidifier.

**EVERDRY™
ELECTRIC DEHUMIDIFIER**

The EverDry Electric Dehumidifier removes humidity from the interior of a safe and protects against rust. The 18" long EverDry should be used on safes 30" wide and larger. Cord is removable for installation.
Suggested Retail: \$29.95

**FLEXIBLE EVERDRY™
ELECTRIC DEHUMIDIFIER**

The Flexible EverDry is flat and easily bends to take up less space and makes installation easier, especially in small safes. Removes humidity from the interior of a safe and protects against rust. Plug is removable for installation. LED indicates unit is operating.
Suggested Retail: \$39.95

DRY-ZONE

Absorbs moisture without electricity, and is rechargeable in an oven. It can be reactivated indefinitely. One 500-gram box protects up to 37 cubic feet of enclosed space, about the volume of a standard 30" wide safe.
Suggested Retail: \$19.95

PISTOL RACK

Store handguns more efficiently and increase storage space on shelves. Access to handguns is made easier by placing them in an upright position. 4 or 6 capacity gun models available.
Suggested Retail: \$29.95 — 6-Gun
Suggested Retail: \$19.95 — 4-Gun

DPX® HANDGUN POUCHES

Store more handguns in your safe with the versatile DPX Handgun Pouches. These versatile pouches include snap-straps to allow use on the MOLLE System used on the DPX and also hook and loop fasteners for use on carpeted interior surfaces. Set of two. Not intended for use as a belt holster.
Suggested Retail: \$29.95

ZERUST® PROTECTANT

Small capsule emits an invisible vapor that forms a corrosion- and rust-resistant barrier on metal surfaces. Volatile Corrosion Inhibitors (VCIs) have been used for years to protect metal parts in industrial and commercial applications. One capsule protects a standard 30" wide safe for one year.
Suggested Retail: \$7.99

VCI GUN SOCKS

Browning's VCI (Vapor Corrosion Inhibitor) Gun Sock seals out moisture. VCI penetrates into the smallest crevices where oils cannot reach, driving out moisture. Provides full protection by forming a vapor enclosure around firearm from muzzle to butt. The VCI Sock, when used in a safe or cabinet, will offer additional protection to all metal items in the enclosed area. One size fits most firearms.
Suggested Retail: \$16.00

HERITAGE GRAPHICS

Now it is possible to show allegiance to these great organizations that work to preserve our rights and hunting heritage. The Heritage Graphics option can be ordered to replace the game scene on many safes. You can support your favorite organization by proudly showing its logo and graphics on a gorgeous Browning ProSteel safe. We make a donation to the respective organization for each Heritage Graphics option sold. Available on all safes in the Platinum® Plus, Gold®, Medallion®, Silver® and Select Series models. (Except Sand Metallic finishes.)

RUGGED AND HANDSOME.

There is no better way to protect and transport your firearm than within a fitted gun case. These handsome cases are available in a variety of styles and feature rugged construction, water-repellent coatings, brass corner accents, deep pile fleece linings, rigid framing, secure locks and comfortable handles. Some cases even include accessory compartments for small items such as choke tubes. Most cases have moveable padded blocks that can be customized to precisely fit your gun. Show your appreciation and show off your firearm with a Browning fitted case.

EXCEPTIONAL PROTECTION.

Bruiser gun cases offer exceptional protection for your valuable firearms during airline travel and transportation. The high-density, double wall polyethylene construction makes this case one tough "Bruiser." For added protection, foam inserts can be extended outward to keep guns separated or pushed inward if not needed.

An O-ring sealed tongue and groove lid provides excellent weather resistance. Recessed wheels offer easy mobility. Corrosion-inhibiting Zerust® inserts are added to each case to help protect your firearms from rust. Bruiser gun cases are offered in double gun and single takedown models.

Foam inserts protect guns from each other

Zerust insert protects all metal surfaces from rust

VCI GUN SOCKS

VCI (Vapor Corrosion Inhibitor) penetrates into the smallest crevices to drive out moisture where oils cannot reach. It provides full protection by forming a vapor enclosure around the firearm from muzzle to butt. The VCI Sock, when used in a gun safe or cabinet, will offer additional protection to all metal items in the enclosed area. One size fits most firearms. Drawstring closure.

NEVER MISS A SHOT.

A stable rest is essential to making accurate rifle shots. Unfortunately, the terrain you are in dictates the quality of the rest you have at hand, and that can mean the difference between a clean hit or a miss at a once-in-a-lifetime trophy. Give yourself an edge with a set of Browning MOA Shooting Sticks. Ultra-light, ultra-strong 6061-T6 aircraft aluminum construction minimizes flex. Collapsible MOA Shooting Sticks take down into a compact bundle small enough to carry in a backpack, and internal shock cords put the sticks into action fast and keep the pole sections connected. A durable powder coat finish reduces glare. Long-wearing carbide steel tips provide positive footing. Textured rubber yoke protects your firearm, yet allows easy repositioning. You will never miss a shot with a set of MOA Shooting Sticks.

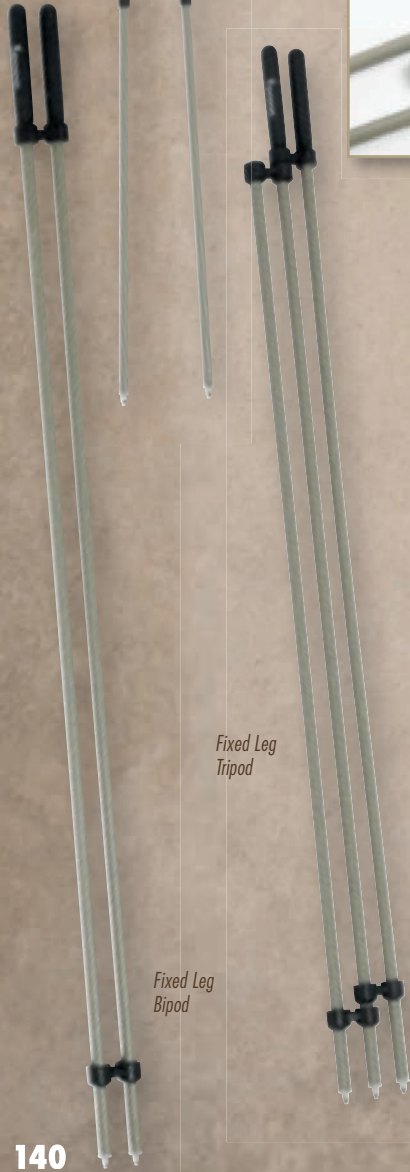

COLLAPSIBLE SHOOTING STICKS

- Easy to carry, quick to deploy • Extends to 40" length for sitting or kneeling shooting positions • Lightweight 9mm aluminum legs collapse into three segments of 14½" • Leg segments are secured by heavy-duty elastic shock cord • 1½" internal ferrule quickly guides poles together for tight, rigid fit • All-terrain gripper feet with carbide steel tips • Rubber coated yoke secures gun, but allows for easy repositioning • Textured, powder-coated poles minimize reflection

GET A GOOD REST.

Wring every bit of accuracy out of your rifle and ammo with MOA Shooting Rests. These durable rests provide you with a rock-solid platform to hit the smallest targets from the bench or prone position. Polymer pellets won't absorb moisture like beanbags or sawdust filling.

MOA TWO-PIECE REST

- Ballistic nylon construction • Rubberized top and bottom hold both gun and bag in place while shooting • Polymer pellet fill allows for easy repositioning and provides a solid rest • D-ring and snap hook keep set together while storing
- Heel/toe design provides stable shooting platform

NEW

NEW

MOA WINDOW MOUNT SHOOTING REST

- Ballistic nylon construction • Rubberized top and bottom hold both gun and bag in place while shooting • Polymer pellet fill allows for easy repositioning and provides a solid rest • Polymer filled wings provide a stable position over shooting house windows or over treestand frames
- V-frame rest provides a solid platform for firearm

MOA UTILITY SHOOTING REST

- Ballistic nylon construction • Rubberized top and bottom hold both gun and bag in place while shooting
- Polymer pellet fill allows for easy repositioning and provides a solid rest • Perfect for rifles or handguns

INTEGRATED SCOPE MOUNT SYSTEM

- Integrated Scope Mounts unite the ring and base into a single, ultra-rigid unit
- Machined from 7000 series aluminum
- Eliminates alignment problems and the possibility of a loose connection between bases and rings

SCOPE BASES

- Browning Scope Bases are machined from solid steel
- Double recoil shoulder design holds rings securely, even under magnum recoil
- Compatible only with Browning Scope Rings below
- T-Bolt two-piece and SA-22 one-piece base designs are alloy and only compatible with Browning rimfire rings (Code # 12365)
- Maxus, Gold, Silver, BPS and Buck Mark bases are Weaver-type bases and are not compatible with Browning rings
- BLR Takedown bases are Weaver-type, one-piece scout-style bases for a long eye-relief scope and are not compatible with Browning rings

SCOPE RINGS

- Ultra-rigid vertically split rings use oversize hardware for extra strength and ease of installation
- Standard, Intermediate and High rings are available for both 1" and 30mm diameter scopes
- Compatible with the two-piece Scope Bases for A-Bolt, BAR, BLR shown above and the X-Lock bases for X-Bolt rifles shown on page 143

THE HEIGHT IS DETERMINED BY MEASURING FROM THE TOP OF THE BASE TO THE BOTTOM OF THE SCOPE RING.*

STANDARD (.300")

For scopes with an objective up to 44mm and a standard barrel contour

INTERMEDIATE (.400")

For scopes with an objective up to 50mm and a standard barrel contour

HIGH (.500")

For scopes with an objective up to 56mm and a standard barrel contour

* Barrel contour, optic size and preferred eye relief all affect the fit of the scope on a rifle.

SOLID X-LOCK™ MOUNTS

Securely mounted optics are essential to the accuracy and precision of any rifle. To ensure the X-Bolt™ has the most stable mount possible, it features the X-Lock scope mounting system that uses four screws per base, replacing the traditional two-screw standard. The scope bases are then secured at all four corners rather than only held at the center of the base, offering more accurate placement of the bases on the receiver. The revolutionary X-Lock system holds the base tighter to the rifle than any other system.

Browning X-Lock Integrated Mounting System

Browning X-Lock Bases

X-LOCK™ MOUNTING SYSTEM SCOPE RINGS AND BASES FOR X-BOLT™ RIFLES

- Integrated Scope Mounts unitize the ring and base into a single unit
- Machined from 7000 series aluminum
- Eliminates alignment problems and loose connections between bases and rings
- Choose from integrated mounts in Standard, Intermediate and High rings
- Will accommodate both 1" and 30mm diameter scopes in gloss, matte and nickel finishes
- X-Lock bases are machined from solid steel, and mount with four base screws per base at each corner, offering more accurate placement of the base on the receiver (See page 142)

X-BOLT™ EXTRA MAGAZINES

The X-Bolt uses a detachable rotary magazine constructed from a durable lightweight polymer. The magazine is designed to feed cartridges directly in line with the bolt, instead of offset as with traditional leaf-spring magazines, for a straight path right into the chamber. An ergonomic magazine-mounted release lets the magazine rotate directly downward and into the hand. The magazine sits flush with the bottom of the rifle for a sleeker appearance. Additional magazines can be kept loaded and carried in your pocket or pack for easy, safe access.

BALLISTIC OPTIMIZING SHOOTING SYSTEM

BOSS®-CR ACCESSORY

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, no-hole BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS.

HUNTING DOGS PREFER BROWNING KENNEL GEAR.

At Browning we understand the strong and lasting bond between a hunter and his dog. For 2012 we're introducing a complete line of high quality kennel accessories to help make sure your hunting dogs are safe, healthy and properly trained for the game you pursue. Training hunting dogs right takes dedication, patience and determination and your dogs will learn faster when you're using Browning training accessories in your kennel. They're constructed of the highest quality materials so they'll stand up to years of heavy use. Our kennel gear is just what your four-legged hunting partners need, at home and in the field.

GIVE YOUR DOGS THE REST THEY DESERVE.

After a long day in the field your hard-working dogs deserve a good night's sleep on a quality Browning Dog Bed. Get one that is comfortable and fits them properly, with lots of room to stretch out and relax their tired muscles. Both round and rectangular models are available to fit the available space in the kennel or around your home.

KEEP YOUR DOGS SAFE AND WARM IN A BROWNING DOG VEST.

Give your dogs the protection they deserve from sharp branches, thorns and stones with a Browning Dog Vest. The Neoprene Vest adds warmth to your dog's core while they sit in a damp blind or boat. The Safety Vest lets everyone in your party know where your dogs are when hunting in dense cover or tall grass.

GIVE YOUR DOGS A NEW LEASH ON LIFE.

Get your dog a new Browning leash and take her for a walk in high style. Select latigo leather, nylon webbing or a fine woven rope model. Heavy-duty snap rings and loop handles insure a secure hold. Leads come in either 4 foot or 6 foot lengths. A training lead or walking lead is a great idea and can help make your dog feel more secure, especially when there are other dogs, cars and children around.

LEATHER LEADS **NEW**

- Top-grain latigo leather • Heavy-duty brass snap hook • Loop handle • 4' length

CHECK OUT OUR SLIP LEADS AND CHECK CORDS.

High-drive hunting dogs can get pretty excited. When they do you'll want a slip lead or check cord to remind them just who's in charge. Choose from solid core or multi-filament rope construction that's durable and effective. All slip leads come in either 4 foot or 6 foot lengths. The check cords are a generous 30 feet in length to give your dogs plenty of room to roam and explore while still keeping them close at hand and easy to control.

KNIVES —

THE MOST ESSENTIAL TOOL.

The knife is one of mankind's oldest and most basic tools. Over the ages a good knife was a means of finding and preparing food, building a shelter, starting a fire and keeping the wild dingos from stealing your supper. Today a sharp knife can be just as important. Whether hunting, backpacking, fishing or working around your home, keeping a sharp knife handy always makes good sense. We offer a wide selection of razor-sharp blades and attractive handle materials to meet every use you can imagine. From dressing big game to filleting fish, from braving the wilderness to whittling by the campfire, give yourself a sharper edge with a Browning knife.

RUSS KOMMER

For nearly 30 years Russ Kommer has earned his living as a highly respected big game hunting guide in Idaho and the wilds of Alaska. The work of a guide doesn't end with leading clients to trophy game animals; it starts there. Once an animal is on the ground the real work begins. Over the years Russ used many knives to dress and skin countless animals, yet found each knife lacking in performance. He drew upon his wealth of hands-on experience and started designing and producing his own knives. It turned out that Russ had a knack for this art and has become a talented, award-winning knifemaker. What started as a hobby and the search for a better blade has led to numerous best-in-show awards. Russ creates and personally field tests his designs to ensure they meet the toughest standards — his own. Browning is honored to team with Russ to produce many of the knives throughout this catalog.

KNIVES

DECLARE YOUR INDEPENDENCE.

There was a time in the not so distant past when nearly everything you purchased was built in America, and the term Made in the USA stood for the highest quality. Made in the USA still means something special to us, and that's why we're proud to offer the Independence Series knives. This collection was designed in the USA by famed knifemaker Russ Kommer. All the materials are sourced from American companies, and the knives themselves are built here in the USA. Their quality is evident from first glance. Functional designs have been tried and tested in real-world hunting situations to make certain their balance is perfect and their blades stay sharp. Get your hands on an Independence Series knife and take a bit of homegrown Browning quality into the field on your next hunting trip.

TAKE CARE OF YOUR GAME.

The Game Reaper is a combination bone saw and guthook, giving you a versatile, two-in-one tool that makes quick work of gutting and field dressing any big game animal. The T-shaped handle with machined grooves gives you a sure grip with better control so the blade is less likely to slip. It's lightweight and easy to pack. When your game is down, get to work with your Game Reaper.

T-Handle Saw comes with a durable nylon belt sheath

THE ULTIMATE HUNTING SET.

Years of extensive field research have culminated with the ultimate three-piece hunting set, the Hard Core Hunter. Demanding hunters are sure to appreciate the hand saw with its 4¾" long high carbon steel push/pull blade that makes fast work of wood or game. The custom T-handle shape minimizes hand fatigue. The knife has a drop point main blade and a unique canoe-shape handle with Dura-Touch® Armor Coating for complete comfort and control. A small caping knife offers precision for delicate field chores from caping a hide to peeling an apple. All blades fit into a slim, one-of-a-kind compact carry system with a unique swivel belt clip that makes both the saw and knives easily accessible.

With just a little practice and a sharp, quality Browning Outdoorsman Fillet knife, you can lay out some very impressive and tasty fillets in minutes. They are made to easily cut fillets with veteran-like ease. The razor-sharp German X50CrMoV15 steel blade provides just the

amount of flex and feedback needed to glide over bones and carve perfect fillets every time. Tough, full tang canoe-shaped molded handles provide a secure non-slip grip even when wet, for added control and comfort.

Incredibly versatile, the Woodsman Bird and Trout fixed blade knives and new Dirty Bird and Trout folding models are ideal for wingshooters and fishermen alike. Their unique blade shapes offer superb balance and ease of handling that enables intricate cuts in tight places like wing joints. Fixed blade models have either a resin-impregnated linen handle with mirror-polished blade and

bolsters, or a utilitarian Mossy Oak® Duck Blind® handle. The Woodsman models have 12C27 stainless steel blades and the Dirty Bird and Trout blades are 440 stainless steel. The folders feature a folding liner lock with 440 stainless steel blades. Select a black G-10 handle or aluminum covered in Mossy Oak® Duck Blind® camo. Both have handy pocket clips.

PRECISION AND BEAUTY

Knives similar to the Classic Series first appeared way back in the 1969 Browning catalog. Today's Classic Series knives have all the features that made the original models so prized, and more. Razor sharp blades are fancy scroll etched and embellished with a gold Buckmark. Precision construction means the blade locks open with a snap. These folding models are thin and hardly noticed in a pocket or purse, and make excellent gifts. Select from a variety of handle materials including stainless, wood, stag or mother-of-pearl scales.

A TRADITION OF QUALITY

The warm feel of real stag or a hardwood handle on a fine knife is assurance that you have a quality, well-built tool. One of these Big Game Hunting knives will be all the knife you need to deal with any chore. Their canoe-shape and finger grooves give you precise maneuverability. The 440 stainless steel drop point blades are razor-sharp. Stag model has high-polished stainless bolster with finger guard and lasered Buckmarks. The Stag model has a leather tie. Leather sheaths are included with both knives.

packer SERIES

Designed by experienced guide and imaginative knifemaker Russ Kommer, Packer Series knives were conceived on the unforgiving frontiers of Alaska. The unique handle design and blade shapes maximize the cut efficiency and reduce wrist fatigue. Packers come in three different blade designs: A multi-use modified drop point, a big belly semi-skinner and a modified

drop point with a guthook. The knives feature genuine stag handles and a beautiful leather sheath. We have also teamed up with the Rocky Mountain Elk Foundation to offer knives with highly figured burl wood handles and a laser engraved RMEF logo on the bolsters, along with a nylon sheath.

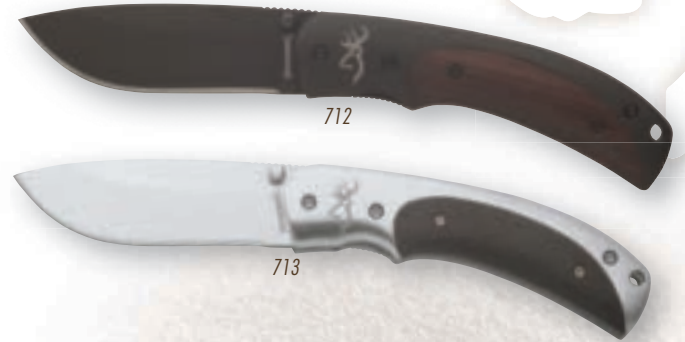

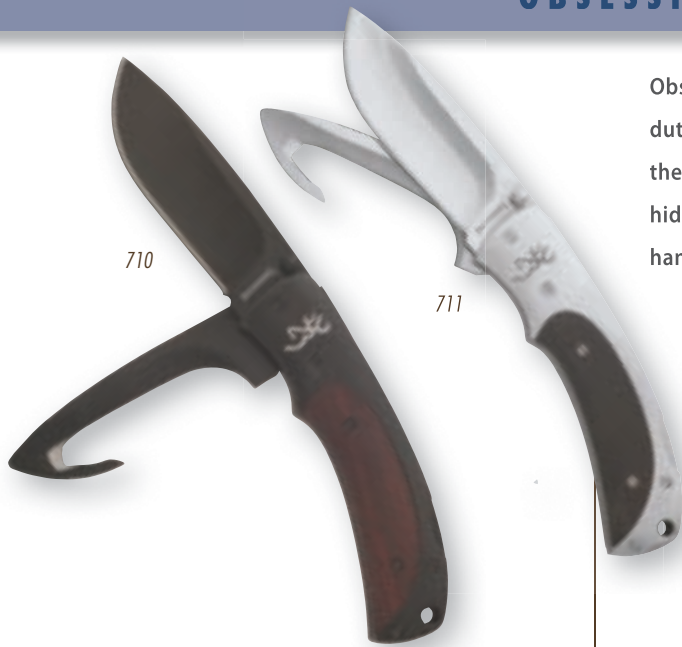

PACKER SERIES KNIVES

782	Packer RMEF, Burl Wood with Guthook	3 ¹ / ₈ "	322782	39.95

Obsession knives give hunters the perfect tool for dressing and skinning duties. The main blade is a drop point design, and twin-blade models include the best guthook blade ever. The guthook's long throat efficiently funnels the hide without puncturing the rumen, and in the closed position, fits inside the handle for comfort and safety.

OBSESSION SERIES KNIVES

KODIAK KNIVES. STILL THE TOUGHEST AND NOW EVEN MORE VERSATILE.

We've improved our popular Kodiak series knives by tucking away the guthook inside the frame, keeping it out of the way when using the main blade. The guthook now has a larger throat to keep the hide from bunching up for cleaner cutting. The three-blade model has a push/pull saw that cuts with each stroke to make field dressing a simple task. These knives incorporate two different locking systems — a button liner lock and a lock-back — to lock all the blades more securely. All Kodiak models come with a handy nylon sheath that can be worn in either the horizontal or vertical position.

James Crowell

This unique knife is a joint design effort between James Crowell and Reggie Barker, the only two men to have won an American Bladesmith Society (ABS) World Cutting Championship. Jim Crowell is well known in the knife industry and the first to win the ABS World Championship. Reggie Barker is known as "The Sharpest Man in Texas," and won the ABS World Champion title for the third time at the 2007 BLADE Show. He's also won the 2004 and 2005 ABS World Championship Cutting Competition. The Browning Crowell/Barker Competition knife includes a top-grain leather sheath and a Certificate of Authenticity, signed by both Jim Crowell and Reggie Barker.

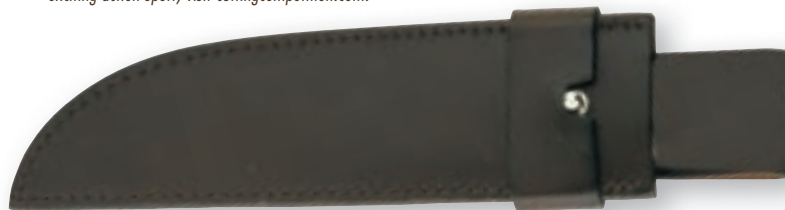

Reggie Barker

This knife is approved for select International Cutting Competition Trail (ICCT) events. To learn more about this exciting action sport, visit cuttingcompetition.com.

Nothing is used more in the kitchen than a good set of sharp knives. Kitchen knives must be durable, have a variety of blade shapes for specific tasks and remain sharp, especially when used for processing wild game. The 14-piece Outdoorsman Kitchen Cutlery set has everything necessary for the home or cabin, including a hollow-ground boning knife that holds a razor edge, game shears and a sharpening steel. The set also includes standard kitchen cutlery and a uniquely designed carving fork with a pigtail twist so it won't bend when lifting a 10-pound roast from the pan. The set has a standard chef's knife with an innovative scalloped blade to reduce friction for carving meat, and six elegant steak knives for table use. Another favorite will be the bread knife, with large serrations, to make slicing warm homemade bread easy. The knives are made from quality German steel with full tangs to ensure the Outdoorsman Set will last. Metal Browning Buckmarks are set in the durable injection molded handles.

Here are three tools you can't be without when camping or doing chores around the yard. Our new Outdoorsman's Axe is specially designed to reduce hand fatigue, shock and to take more wood with each swing without binding. It's perfect for making kindling or quartering big game. Grab our new Outdoorsman's Shears and use them to clear a

shooting lane or for butchering big game, easily cutting through briskets, bone, legs and ribs, making field dressing a cinch. Pull our new diamond-coated Field Sharpening Steel from your pocket and keep an edge on any blade. It has a stainless steel handle and guard and a durable nylon sheath.

OUTDOORSMAN'S AXE

TYPE Axe **BLADE** One-piece head is hot-forged, hollow ground, high carbon 1055 tool steel • Integrated tang extends down into handle **HANDLE** Injection-molded polypropylene and fiberglass, lightly textured • Overall length 23¾" • Weight 2 lbs. 6 oz. **FEATURES** Handle is shaped for easy hand placement when cutting smaller pieces • Sheath included

Includes tough nylon sheath with snap and Buckmark logo

OUTDOORSMAN'S SHEARS

TYPE Shears **BLADES** High carbon tool steel **HANDLES** Tough polypropylene and rubber • Telescopes from 21" to 28" **FEATURES** Lower blade is serrated on one edge • Large guthook for severing pieces of hanging tissue • Sheath included

Includes tough nylon sheath with snap and Buckmark logo

Overall collapsed length is only 21" and weight is 2.14 lbs.

FIELD STEEL

TYPE Sharpening steel **HANDLE** Knurled for a sure grip **FEATURES** Two-piece steel reverses for use and storage • Stores compactly in its own sheath with belt loop

HOW TO CHOOSE A FLASHLIGHT

We are a leading manufacturer of portable battery-powered lighting for hunters and shooters. With more than 50 styles in our product line, how do you choose the light that best meets your needs? Read on.

SIZE, WEIGHT AND POWER

Smaller and lighter are better. New high-output LEDs from manufacturers like Luxeon® and Cree® are incredibly powerful and efficient, and don't require the size and weight of the old C and D battery lights to achieve the same light output. Our Alpha and Alpha Max flashlights, with a single AA battery, are brighter than the flashlights of the past and are no bigger than a shotgun shell.

LED VS. XENON BULBS

LEDs are preferred over Xenon and other types of filament bulbs for most uses. LEDs use batteries more efficiently, illuminate at equal or greater distance, emit a clean white versus a dull yellow beam and will not burn out under normal use. And the newest LEDs, like computer chips, get better every year. Watch for upgrades of 20% - 80% or more in brightness in many of our lights for 2012.

HAND-HELD OR HANDS-FREE

Headlamps and cap lights allow the use of both hands for other tasks like dressing a deer, fixing the truck or finding a path through the woods. With modern technology many headlamps are as powerful as larger hand-held flashlights. Several headlamps, such as MicroBlast and Phantom can be worn either as a headlamp or clipped to the brim of a hat.

LONG RUN TIME

Using digital circuitry, highly-efficient LEDs, and new types of low-resistance switches, we are now able to offer extra long run time on many lights. Most Tactical Hunter lights will run for 20-60 hours on the low setting, even on a single AA battery — which might be the difference between getting home and waiting until morning to hike out.

BATTERIES

Lithium batteries are used in many of our highest-performing lights, such as Catalyst, Hunt Master and Nitro. Lithium batteries pack about twice the power of alkaline batteries for their weight, and operate at very cold temperatures. Convenient AA and AAA alkaline batteries are also used extensively because they cost less than lithium and are more readily available. The latest integrated circuit designs in our Hi Power, Pro Hunter, Zeta and Alpha flashlights boost the performance of alkaline batteries to approach the performance of lithium batteries.

SWITCH SETTINGS

Multiple switch settings (high, low and in-between) preserve battery life and allow selecting between colors and flashing options. Lock-out switches found on most of our lights keep the light from accidentally turning on.

RED, GREEN AND BLUE

Colored LEDs help preserve your night vision and are great for map reading. They are less obvious than white light to many types of game animals.

BROWNING ADOPTS ANSI FL-1 PERFORMANCE STANDARDS

Beginning in 2010, the major flashlight manufacturers agreed to use the same standards (ANSI-FL1) for measuring performance, so you can make an apples-to-apples comparison between models. We are proud to endorse and participate in these standards for portable lighting.*

Lumens = Brightness.

A traditional 2D cell flashlight is approximately 15 - 20 lumens.

Battery Life (Run Time) is defined as the time elapsed from when the batteries are new to when the light reaches 10% of the original brightness.

Maximum Distance is measured as the distance in meters from the light source to where it decreases in brightness to 0.25 lux — about the brightness of the full moon on a clear night.

* For Browning lights with multiple settings, the Lumens, Battery Life and Distance are stated at the highest setting (100% power), unless indicated otherwise.

TACTICAL HUNTER CONTROL POINT FLASHLIGHTS

• All-aluminum construction and O-ring sealed for water resistance • Advanced digital circuitry delivers maximum power • Rugged Tactical Hunter design with lock-out switch and Deep Pocket™ carry clip
LENGTH 5.6" **BRIGHTNESS** 210 lumens **EFFECTIVE DISTANCE** 190 meters

CONTROL POINT

The Browning Control Point is as powerful as any two-battery light we've ever offered. This wonder combines the latest Luxeon® LED with a pair of 3V Lithium batteries and advanced electronics for a flashlight that outperforms all other flashlights in its class. In addition to tremendous light output and superior battery life, Control Point flashlights now offer five brightness levels to provide just the light you need (high [100%], medium-high [80%],

medium [60%], medium-low [35%], low [10 lumens]) and three flashing modes (fast strobe, normal strobe and S.O.S.). A rotating selector switch on the tailcap controls the electronics and a tactical, push button on/off switch on the end of the light makes it easy to turn the light on in a momentary function. Try a Control Point and see why this light outshines all the rest in the portable lighting market.

WHEN DARKNESS FALLS...

With great looks and the potential to squeeze every last drop of energy from a pair of common, easy-to-find AA alkaline batteries, our award winning Hi Power flashlights blend innovative technology with a striking appearance. The latest advancements in circuitry allow the AA-powered LED Hi Power to rival most lithium-powered lights for both lumen output and battery life. Protecting this leading-edge technology is a precision-machined aluminum housing, available with tough resin inlays or the same American walnut used for our firearms, set into the grip for a great new look. The side located, push-button switch is simple to use and includes a lock-out to keep the switch from accidentally turning on. One thing is for certain, when it comes to looks, convenience, battery life and sheer lumen output, the Hi Power flashlight is sure to be the first light you reach for.

HI POWER FLASHLIGHTS

- All-aluminum construction with walnut or black resin handle inlays
- Latest generation Cree® XP-E LED is rated for 50,000 hours use
- High-low electronic switch with lock-out • O-ring sealed for water resistance • Includes lanyard and two AA batteries **LENGTH** 5.25"

NEW L.E.D.
20% BRIGHTER

Martin Buser and his Happy Trails Kennels sled dog teams have won the grueling 1,161 mile Iditarod Trail Sled Dog Race an impressive four times. Their 1997 victory still holds the course record for the fastest finish time. Martin has relied on the Browning Nitro headlamp since 2008 to steer his team through the darkest Alaskan nights. "I am always searching for durable, unique products to give me an edge. The long-reaching, focused beam of the Nitro stretches past 80 feet of the sled team and makes finding trail markers easier. The lithium batteries are great because they last longer and are less affected by the cold than alkaline batteries."

— MARTIN BUSER

PRO HUNTER FLASHLIGHTS

Pro Hunter flashlights feature long-running, powerful LEDs, rugged lightweight polymer bodies with rugged aluminum lens rings, and O-ring sealed for water resistance. The Classic Pro and Twin Beam+ are among the most powerful lights in their class. Both sport a screaming Cree® XP-C LED for maximum lumens and distance. The Twin-Beam+ includes a new "Mean Green" LED rated at 70 lumens, and a Soft-Sunshine LED for blood tracking. Affordable and easy to find AAA batteries are included with all models. A tactical-style lock-out end cap disables the switch to assure the light is not turned on accidentally. A carrying lanyard and ribbed body provide maximum grip in wet or cold weather. ANSI rated for water resistance. LEDs are rated for 50,000 to 100,000 hours and will not burn out under normal use.

RGB FLASHLIGHT

The Pro Hunter RGB features a pair of high-intensity LEDs for long distance, one wide view LED for maximum peripheral vision and one red-green-blue LED that enhances night vision and is stealthier around game animals. The RGB is a bright 40 lumens on the high setting. Black with matte aluminum lens ring. Three AAA alkaline batteries (included.) All this, and the RGB is easy on your wallet too.

PRO HUNTER LED

The original Pro Hunter flashlight features unbreakable, long-running LEDs. The center 0.5W LED pushes 25 lumens out to 50 meters and two green LEDs provide improved night vision and safety, and are stealthy around game animals. Dura-Touch® Armor Coating enhances your grip in all conditions.

CLASSIC PRO

Pure power is what these lights are all about. The Classic Pro is rated at 100 lumens, out to 100 meters and beyond. A tactical end-cap switch with high, low and flashing settings is simple to use and includes a lock-out that disables the switch to protect the batteries. The Classic Pro is certain to become a favorite for performance, good looks and cost-efficiency.

TWIN BEAM+

With 100 lumens in the main beam, the new Twin Beam+ is the ultimate hunting flashlight. The main beam uses a Cree® XP-C LED to throw 100 lumens of light out to 100 meters. A new green Cree XP-C LED emits 70 lumens — easily 15 times more powerful than other green LEDs that give off 4-5 lumens — for the maximum in stealthy brightness without disturbing the animals nearby. A Soft-Sunshine LED limits glare for better up-close map reading and tracking. The light flashes in any setting (including green) by holding down the switch for 2 seconds. Memory feature returns to the most recent setting when you turn the light back on. Three AAA batteries are included.

PRO HUNTER HEADLAMPS

- All LED bulbs for reliability and maximum battery life
- 100,000 hour LEDs never need replacement
- Ultralight, ultratough polymer housing construction
- Comfortable elastic headband
- RGB includes a wide view LED for maximum peripheral vision and one red-green-blue LED that enhances night vision
- Escape features Soft-Sunlight LED that reduces glare to make reading and examining close objects easier on your eyes
- Maxus features Focus Control with adjustable spot-to-flood beam, three brightness levels and flashing

PRO HUNTER RGB HEADLAMP

Based on the best-selling Pro Hunter RGB flashlight, the RGB headlamp features the same extremely functional LED set with two high-intensity LEDs for long distance, a wide-view LED for maximum peripheral vision and one Red-Green-Blue LED. Colored LEDs enhance night vision and safety, and are more stealthy around game animals. Black front with charcoal accents.

PRO HUNTER ESCAPE HEADLAMPS

Escape headlamps feature three high-intensity LEDs for maximum brightness and long distances (up to 45 lumens and 40 meters) and one Soft-Sunlight LED for up-close lighting. The Soft-Sunlight LED is helpful when examining leaves, bark and grass at close distances for a blood trail, because it reduces glare and shadows. Also perfect for reading books and maps. Escape has three light settings, plus flashing. Maximum run time 32 hours. In Mossy Oak® camo patterns: Break-Up Infinity®, Duck Blind® and Blaze®.

PRO HUNTER MAXUS HEADLAMP WITH FOCUS-CONTROL

Maxus is a versatile, technically-advanced, powerful headlamp worthy of the name. Zoom lever on front adjusts the focus of the main LED from spot to flood. Powerful Cree® LED sends 85 lumens to 80 meters or more. Three light levels (High, Medium, Low) and Flashing setting extend the maximum run time on Low to 24 hours. Memory switch returns to the most recent setting when you turn the light on. Plus two green and two red LEDs offer maximum stealth, safety and protect night vision. Black front with charcoal accents.

Once you first use a Pro Hunter headlamp, you will reach for it time and time again. Not only do they free up both hands, but feature the latest in LED technology and circuit design to give the brightest output and longest run times. The three inexpensive AAA Alkaline batteries used to power Pro Hunter headlamps are interchangeable with many other devices such as GPS and walkie-talkies. Durable lightweight polymer housings feature easy-to-use switch buttons. All headlamps tilt up and down to direct the light where needed, and come with adjustable, snug-fitting elastic headstraps.

PHANTOM HEADLAMP

- Weighs only 2.4 oz. including single AA battery
- Choose between red, green or blue LEDs, plus a powerful Luxeon® white LED for distance
- Pivoting optical diffuser for flood lighting
- Clips to a cap or use with headstrap **BRIGHTNESS** 90 lumens **EFFECTIVE DISTANCE** 70 meters

The Phantom headlamp is 80% brighter in 2012. It's the smallest, most powerful AA headlamp in our line-up. It features a flip-down diffuser that softens light into a flood beam for up close tasks. A comfortable elastic headstrap and easy-to-use hat clip are included.

NIGHT SEEKER™ RGB CAP LIGHT

- Adjustable tilt allows the light to pivot up and down to aim the light where it is needed
- Two white LEDs for all-purpose use
- One RGB LED offers night vision, safety and stealth
- Wear on the brim of a cap, as a pocket light or on a pack strap
- LEDs are rated for 100,000 hours use
- BRIGHTNESS** 15 lumens
- EFFECTIVE DISTANCE** 20 meters

3715100

The Night Seeker™ RGB cap light features two white LEDs plus a cool RGB LED which shines first red, then green, then blue — all from a single LED — just by pushing the switch. Like other Night Seeker lights, the RGB is made from lightweight polymer with an integrated clip that swivels to allow the light to be easily directed.

NIGHT SEEKER™ PRO CAP LIGHT

- Adjustable tilt allows the light to pivot up and down to aim the light where it is needed
- One Nichia® 0.5 Watt LED for distance illumination
- Two green LEDs for night vision, safety and stealth
- Wear on the brim of a cap, as a pocket light or on a pack strap
- LEDs are rated for 100,000 hours use
- BRIGHTNESS** 20 lumens
- EFFECTIVE DISTANCE** 35 meters

- Wear on the brim of a cap, as a pocket light or on a pack strap
- LEDs are rated for 100,000 hours use
- BRIGHTNESS** 15 lumens
- EFFECTIVE DISTANCE** 20 meters

3715081

Cap lights are one of the best ideas ever, and we have the best executed designs available. Night Seeker™ cap lights are durably constructed from a lightweight polymer to keep weight to a minimum. An integrated clip swivels to allow the light to be easily directed. The unique clip is also highly versatile. In addition to attaching to the brim of a cap, the clip can be attached to your shirt pocket, backpack strap or folded out to allow the light to stand on its own.

BUCKMARK® 6D LANTERN

- Bright fluorescent and LED lantern • Steady on and flashing modes
- Durable polymer and metal construction with rubber accents for durability

HEIGHT 9.25" **BRIGHTNESS** 350 lumens (Fluorescent)

There isn't a better camp lantern than the Buckmark 6D. The light source is a replaceable fluorescent bulb which puts out 350 lumens for 12 hours, perfect for use around camp and general purpose lighting, or turn it on to the economy setting (140 lumens / 20 hours). The second light source is a 0.5 watt white LED that will run for 168 hours (7 days) when long-term lighting, as in an emergency situation, is needed. The third light source is a pair of 5mm red LEDs that will run for 264 hours (11 days) for stealth lighting or reading a map and long-term use as a marker, a night light or hanging in the tent. The red LEDs can also be set to blinking mode in an emergency.

CLOTHING

NOW IN REALTREE CAMO.

WE ARE EXCITED TO ANNOUNCE THE ADDITION OF REALTREE® CAMO PATTERNS TO OUR LINE OF HUNTING CLOTHING.

We know that every hunter has their own sense of what works best when it comes to camouflage. We know that the background and vegetation for every hunt varies and that these conditions constantly change with the seasons. Selecting your camo to precisely match the conditions is the hallmark of the serious, successful hunter.

That's why we are pleased to now offer our most popular clothing items in your choice of Realtree or Mossy Oak camo patterns. These two great brands represent the backbone of the hunting camo industry. No matter when and where you hunt, Browning has the Realtree or Mossy Oak pattern that will let you fade into the background, never to be seen until it's time to smile for the camera with your once in a lifetime trophy animal.

REALTREE™

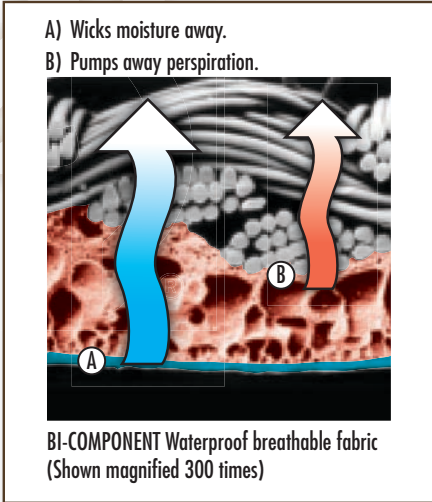

MOSSY OAK®
BRAND CAMO

HMX® BI-COMPONENT WATERPROOF BREATHABLE FABRIC TECHNOLOGY IS HERE.

Our clothing continues to lead the industry with high performance, Bi-Component HMX waterproof and breathable fabrics. HMX is different because it combines the advantages of the two most widely used technologies. Hydrophilic Monolithic systems do not transport perspiration vapor, but only the liquid perspiration formed when the vapor condenses. Hydrophobic Microporous systems transport vapor, but do not transport condensed perspiration. By using a Bi-Component system we utilize the advantages of both technologies to move both water vapor and condensed water to the outside of the garment keeping you protected from internal moisture. At the same time, HMX totally prevents water entry from the outside.

The revolutionary Bi-Component technology found in HMX fabrics provides the level of protection and comfort you have come to expect from Browning Technical Clothing, The Best There Is®.

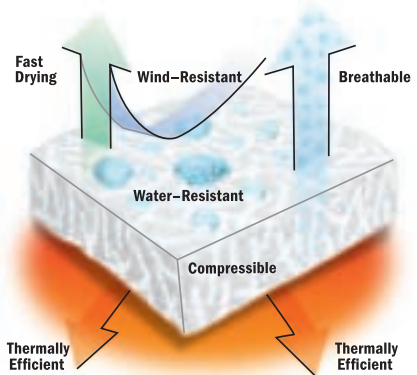

STAY WARMER WITH PRIMALOFT INSULATION

WHAT MAKES PRIMALOFT SO GOOD? IT KEEPS YOU WARM, IN ANY CONDITIONS, WET OR DRY.

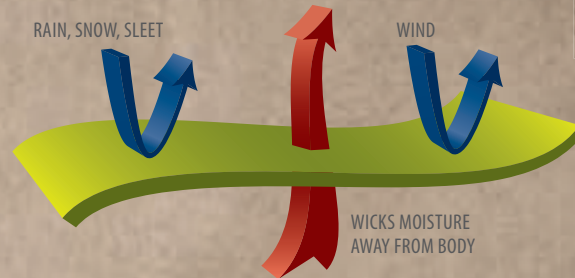

PrimaLoft is a premium performance insulation engineered for superior warmth, water resistance, loft, softness and compressibility. These fibers are the finest in the industry and are densely packed to retain heat better for improved thermal efficiency. PrimaLoft fibers are specially treated to repel water molecules and absorb less water to make it more water-resistant and faster drying than other polyester insulations. Tightly-compressed fibers also make PrimaLoft highly wind-resistant as the smaller, finer fibers compress more and are lighter, less bulky, more breathable and extremely compressible. That's what makes our clothing with PrimaLoft insulation so good.

Being cold is a thing of the past with the addition of PrimaLoft insulation to the Browning Technical Clothing line-up. PrimaLoft is a premium performance, fine-fiber, high-loft insulation engineered to keep you warmer, drier and more comfortable in extreme conditions — even if it gets wet. PrimaLoft is so good, it was chosen by the US Military with over 1,000,000 PrimaLoft military garments deployed in active service around the world.

WHAT MAKES PRE-VENT SO GOOD? BEING WATERPROOF, WINDPROOF AND BREATHABLE.

Pre-Vent is our waterproof/breathable fabric that has stood the test of time. It was introduced in 2005 to meet the requests of demanding hunters who were tired of getting wet during difficult weather conditions. Since that time, thousands of satisfied hunters have come back time and again to Pre-Vent as the waterproof/breathable fabric of choice. It has been used in 2-Layer, 2.5-Layer and 3-Layer jackets, pants and gloves to meet different weather conditions and geographic differences.

INCLUDED™**

HOT NEWS — NO MORE COLD HANDS!

Cold hands are the bane of outdoorsmen, and the main cause is moisture collecting between the outer shell of the glove and the interior waterproof liner. It's just like inserting a small plastic bag inside a larger bag, then filling the space between the two bags with ice water. You can put your hand inside the inner bag and not actually be wet, but you'll still have cold, stiff fingers. We've adopted the new OutDry membrane lamination process that eliminates the space between the outer shell fabric and the inner waterproof liner so there's no place for chilling moisture to collect. We do this by inserting the waterproof liner into the outer glove shell, and then fusing the liner to the inside surface of the fabric shell. That means no more torn or loose fitting liners, no more soggy gloves and no more cold fingers. You also get a sleeker fit and improved finger dexterity so you'll be able to load and shoot with greater confidence. OutDry is everything a serious outdoor glove should be.

REVOLUTIONARY ODORSMART GIVES YOU AN ADVANTAGE IN THE GAME FIELD. IT CAN MAKE THE DIFFERENCE BETWEEN SUCCESS AND GOING HOME EMPTY HANDED. THE SECRET IS CONTROLLING ODORS BEFORE THEY BECOME A PROBLEM.

Odor is caused by specific bacteria that thrive on human skin. When bacteria metabolize, their waste produces odors that can be detected by deer and other big game animals. So how does OdorSmart work? Simply stated, OdorSmart attacks the bacteria on the skin and in the "microclimate" immediately around the skin, killing them BEFORE they have a chance to develop odors. With just normal use and care, OdorSmart will last for the life of the garment and does not require recharging or other special care. Just launder as instructed on the care label. OdorSmart technology is available in Browning base layers, in lining materials where it inhibits the growth of bacteria, and also in insulations where it attracts and neutralizes odor-causing bacteria in the structure of the insulation thus keeping it off the skin. The combination of OdorSmart in baselayer, linings and insulation provides you with multiple layers of defense against odor.

HYDRO-FLEECE — THE BEST IS BACK AND BETTER THAN EVER.

2-layer Hydro-Fleece with PrimaLoft® Sport insulation models are the warmest hunting parkas, jackets and pants we offer. The combination of the loftier soft shell fabric and thermally efficient PrimaLoft insulation provide a level of protection and comfort never before possible. Four pieces are available, including a parka and matching bib and a lighter weight jacket and pant. 3-layer Hydro-Fleece Soft Shell models add a new dimension with a form-fitting design to minimize weight and bulk. The 3-layer fabric features new Hydro-Fleece fabric on the outside with a smooth, fully-taped knit lining on the inside for ease of movement. Jacket and matching pant are available.

WHAT DOES IT MEAN TO BE WATERPROOF?

Here's what makes Browning technical clothing different from many of our competitors. Waterproof fabrics like HMX® and Pre-Vent® have been specially created to meet our very high standards for waterproofness and breathability. Since shell fabrics are your first defense against the elements, we don't cut corners on quality. Taped Seams mean that every seam is fully-taped or we don't call it "waterproof." End of story. We are very involved in developing the correct tape and using only manufacturers who have years of experience seam-taping garments. Construction of Browning waterproof garments means they are designed and constructed to resist water entry at all closures including the cuffs, hoods, pockets and zippers. The Browning name is your assurance that corners are never cut for the sake of cost. When you see the HMX or Pre-Vent labels on our garments, you know you can rely on them to perform to the highest standards.

TRANSITIONS
base · insulation · protection

**TRANSITIONS —
AWARD WINNING PROTECTION**

Browning Transitions has won prestigious awards for design excellence and performance in the field including "Best of the Best" from *Field and Stream* and the "Award of Excellence" from *Sporting Classics*. We are very proud of these accomplishments and we are constantly innovating to help you stay warm and dry in the worst weather the Great Outdoors can throw at you.

All waterproof, breathable models in the Protection Layer feature HMX® bi-component fabrics for extreme waterproofness and high breathability for maximum comfort. We have also added a new PrimaLoft® vest and pant for a new dimension of warmth in the Insulation layer. The great layering concept represented by Transitions continues to make it one of the most versatile apparel assortments available by combining Base, Insulation and Protection layers, all utilizing leading-edge technology.

BASE layer

Base layer wicks perspiration away from the skin and keeps you warm and dry, not cold and clammy, even when moving. Anti-microbial technology is added to Big Game garments to control the growth of odor-causing bacteria to reduce human odor.

INSULATION layer

Insulation layer is available to meet specific needs based on weather conditions and activity level. In dry weather, layer 2 garments make excellent outer pieces. Choose from down or PrimaLoft® models.

PROTECTION layer

The Protection layer is the first line of defense against wind, rain and snow. Layer 3 garments are designed to maximize protection with minimal bulk. Choose one of several styles featuring HMX® or WindKill™.

PRIMALOFT — WARMER, DRIER, SOFTER.

Looks can be deceiving. At first glance our PrimaLoft clothing looks much like any other insulated clothing. In reality, it is much more. The combination of superfine PrimaLoft Sport insulation and highly-constructed shell and lining fabrics provide unbelievable warmth with minimal weight or bulk. Unlike down, PrimaLoft Sport continues to insulate even when wet, and dries incredibly fast. When you layer it under a waterproof shell, it offers outstanding protection from cold, wet weather. Because of its lightweight comfort and warmth, you may find yourself wearing it alone in less demanding weather.

The liner jacket and vest can stuff into the chest pocket for storage. The new pant has a stuff bag for storage.

700 DOWN IS NATURE'S INSULATION.

Natural goose down has the highest warmth-to-weight ratio of any insulation making it the proven winner when it comes to warmth. That's why the Transitions Series uses the finest 700 fill power goose down. This specially selected down provides optimum loft and warmth with minimal weight. It is surrounded by high count, down-proof fabric to assure optimum loft and compactness. No coatings or laminations are added to maximize breathability. Although designed as insulation layer garments, they are great when used alone as outerwear in cold, windy, dry weather or layered under any Transition outer shell for maximum protection from the elements.

ILLUSION — PURSUING PERFECTION.

Illusion combines the ruggedness, quietness and comfort of a soft shell with our HMX® bi-component waterproof, breathable fabric for the ultimate in hunting gear. Every seam has been sealed with matching 3-layer tape to make Illusion models truly waterproof for reliable protection in nasty conditions. OdorSmart™ anti-microbial treatment keeps human scent to a minimum. The form-fitting jacket minimizes bulk and weight and is backpack friendly, allowing you to access the pockets when wearing a pack. The pant moves easily with you, making it ideal for stalking game, and the new gloves offer the latest OutDry® protection against moisture and cold.

DILLON™

WHAT DOES IT MEAN TO BE WINDPROOF?

Our Dillon WindKill™ clothing is different because it's made from a laminated fabric that blocks the passage of wind through the fabric while breathing away perspiration. Our windproof clothing is designed and constructed to prevent wind from sneaking in through cuffs and zippers. This combination of laminated fabric and design features ensures that Dillon WindKill clothing is totally windproof, not just wind-resistant, and that's no empty, hot-air claim.

DILLON WINDKILL™ PANT

DELUGE™

DELUGE — ULTRALIGHT WITH HEAVYWEIGHT PROTECTION.

Imagine carrying a full rain suit in your pack and forgetting it's there until the raindrops start falling. Then you'll experience the protection afforded by the lightweight HMX® 2.5-layer fabric in our Deluge rain gear. Deluge is so light and stuffs away into such a small package, it easily goes anywhere in a backpack. It can be worn alone in warmer weather, or layered over Base or Insulation layer garments when the rain or snow starts to fly.

XPO — EXCEPTIONAL COMFORT AND PERFORMANCE.

Our XPO (eXtended Performance Outerwear) is designed to be affordable, tough, comfortable and functional in all types of weather conditions. XPO features Pre-Vent®, a waterproof, windproof, breathable fabric that ensures protection from the most severe conditions you are likely to encounter in the field, yet remains breathable to let perspiration escape. Importantly, Pre-Vent does all this at a very competitive price, without skimping on other features that matter like abundant pockets, quality zippers and rugged construction.

XTENDED PERFORMANCE OUTERWEAR

XPO BIG GAME 4-IN-1 PARKA

GEAR 'TRIEVER®

Our innovative Gear 'Trierer puts all your game calls, flashlights and other small accessories right at your fingertips. Just clip it into your pocket or to a gear strap. Give a quick pull and these items are instantly available. Let go and they instantly retract back into your pocket or pack. That means no more looking in the frozen mud for your favorite duck call or dropping your only flashlight out of the treestand in the early morning darkness.

HELL'S CANYON — AS TOUGH AS YOU ARE.

Tough as nails, our Hell's Canyon is a top-seller because it offers tremendous value and performance. The rugged 3-layer fabric is both water- and wind-resistant. The moisture-wicking OdorSmart™ fleece on the inside keeps you warm and helps control human odor. Go the distance in Hell's Canyon.

HELL'S CANYON GLOVES

- Wind- and water-resistant Hell's Canyon fabric throughout • Overlay on palm and thumb for firm grip • Contoured trigger finger • Comfortable fleece cuffs for snug fit **SIZES** S-XL

**HELL'S CANYON FULL THROTTLE
— GO TOP SPEED.**

Lighter weight Hell's Canyon Full Throttle gear brings a level of high performance to your hunt. The 2-layer fabric features a rugged water- and wind-resistant woven outer shell bonded to moisture-wicking OdorSmart™ featherweight fleece on the inside. Because there is no lamination layer, there is less resistance to airflow through the fabric for increased breathability. You will stay dry and comfortable in warmer weather and higher activity levels as perspiration is quickly moved away from your body. Crank up the intensity of your next hunt with Hell's Canyon Full Throttle.

HELL'S CANYON FULL THROTTLE JACKET

- Woven 2-layer bonded fabric is highly water- and wind-resistant and extremely breathable
- Lightweight moisture wicking fleece lining with OdorSmart™ anti-microbial technology
- Differential cut (longer in the back)

4X MICROFLEECE — THE RIGHT FLEECE.

4X Microfleece has four times the wind resistance of regular fleece. It is ideal for nearly all hunting situations. Under fair skies, in warmer temperatures, 4X adds just the right amount of insulation and wind protection. When layered underneath a waterproof parka, it offers excellent insulating performance with little bulk.

THE STAPLE FOR EVERY HUNTER — 650 DOWN.

Down is the ultimate natural insulator. It is light, compact and extremely warm. For these reasons you should have down as a staple in your gear collection, and you need look no further than Browning. Our 650 Down Jackets and Vests make ideal layering garments in frigid conditions and are excellent as a stand alone piece. Their stylish look also makes them suitable to wear around the ranch or back in town when the temperatures drop.

BROWNING

THE HIGH COUNTRY JACKET IS THE CLASSIC COMBINATION OF STYLE, GOOD TASTE AND COMFORT.

Our new High Country Jackets are constructed to take you into the wilderness in comfort. The heavier outer shell fabric with a high tear strength takes the abuse from brush, trees, rocks, mud and machinery. The outer shell shields you from light rain and heavy winds, while warm down insulation protects you in freezing weather.

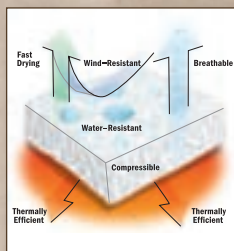

THE BIGGEST THING TO HIT THE MARSH SINCE THE INVENTION OF MUD.

If you thought everything that might improve waterfowl clothing had already been done, you need to listen to what a little dirty bird is telling you — it's our secret about the all-new Dirty Bird waterfowl line. In short, it's the most effective, ergonomic and comfortable clothing that has ever taken its place in a frozen pit blind or poled a jon boat through dark, flooded timber. We've taken our classic Pre-Vent® fabric, PrimaLoft® Synergy insulation and combined it with highly functional tailoring to produce a feature-rich selection of parkas, jackets, bibs and pants, along with base and insulation layers. They will keep you warmer, drier and more comfortable than anyone else in the marsh, including those dirty birds. Dirty Bird waterfowl. It's what you always wanted your waterfowling gear to grow up to be.

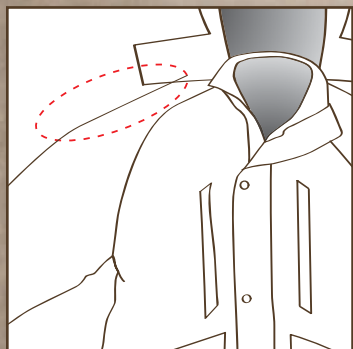

WATERPROOF, BREATHABLE PRE-VENT® FABRIC

On outerwear pieces, we use Pre-Vent, an exceptional 100% waterproof yet breathable fabric in the Dirty Bird shell. Pre-Vent easily shrugs off snow, sleet, rain, water, wind, mud and anything else that Mother Nature and your favorite marsh want to throw at you.

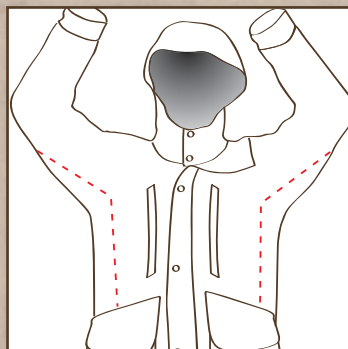

PRIMALOFT® SYNERGY INSULATION

Browning's PrimaLoft Synergy insulation is a combination of both fine and ultra fine fibers that raises the bar for continuous filament insulation. It's soft, lightweight, quick-drying and provides excellent insulating properties, even when wet. Because it doesn't require quilting to stay in place it won't restrict your freedom of movement. You'll find that hitting fast-flying crossing birds was never easier than when you're wearing a Dirty Bird jacket.

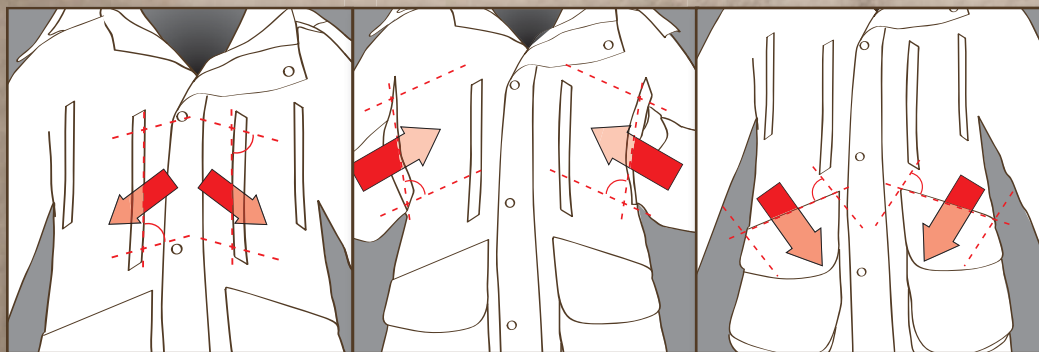

RAGLAN SLEEVE CONSTRUCTION

On outerwear the raglan sleeves are cut at a long tapering angle right up to the collar line. This means that the top of the sleeve is one seamless piece of fabric all along the shoulder with no exposed seams to leak, even in the worst downpours.

ARROW GUSSETS

The Arrow Gusset armpit design has a smooth, tapering shape as it rises along the side to under the sleeve. It makes the garment fit better and gives you a much greater range of movement. That's an important advantage when you're facing a big flock of dirty birds crossing both ways in front of your decoy spread.

ANGLE-ENTRY POCKETS

Angle-Entry pockets are designed around the human arm and hand. When your hands are above your elbows they naturally point up, and when they are below your elbows they point down. The interiors of the two zippered chest accessory Angle-Entry pockets and the shell pockets are slanted down to more naturally fit your hands, while the two handwarmer Angle-Entry pockets slant up. No more breaking your wrists to fish another shell or a call out of your parka pockets.

JUST LOOK AT THAT DIRTY BIRD!

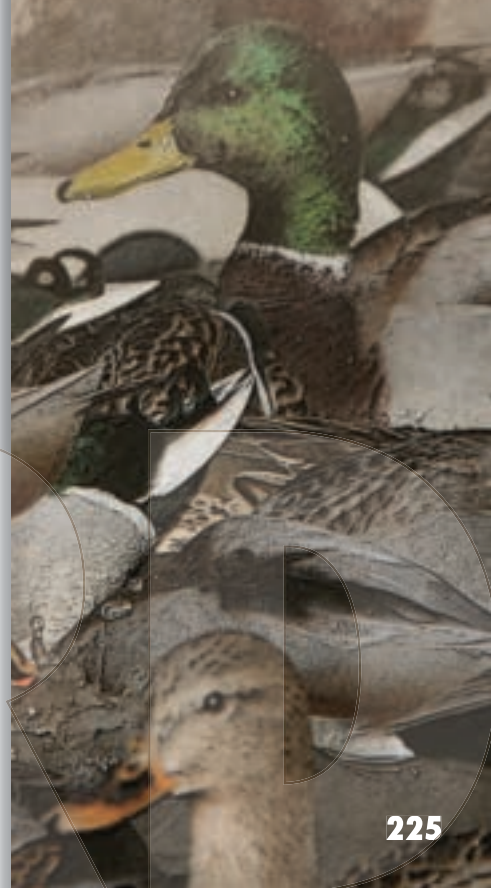

We start off with a durable, waterproof and breathable Pre-Vent® fabric shell that's tailored with a full raglan sleeve to eliminate sewn seams along the top of the shoulder. PrimaLoft® Synergy insulation is a mix of fine and ultrafine synthetic fibers that keep you warm and dry in any weather. The Arrow Gusset rises along the side and smoothly tapers under the arm pit to a sharp point to improve mobility and increase your range of motion. The Angle-Entry pockets are all designed around how the human hand and arm work, not the other way around. The opening and interior on each pocket easily accepts your hand, even when wearing gloves. You'll never have to tie yourself in knots just getting into your pockets again.

DIRTY BIRD 4-IN-1 PARKA

SHELL Pre-Vent® waterproof, breathable fabric shell • Angle-Entry pocket design • Two upper Angle-Entry handwarmer pockets • Two zippered chest Angle-Entry accessory pockets • Two lower bellows shell Angle-Entry pockets with magnetic closure and internal pleat • Raglan sleeve design eliminates top shoulder seam for a more waterproof design • Arrow Gusset arm pit design and articulated elbow for greater range of motion • Overlay forearm patches to prevent wear • Detachable, adjustable hood • Inside security pocket • External and internal storm flap • Adjustable, watertight laminated cuffs • Molded shoulder strips prevent wear on shoulder areas • Internal waist drawcord • Mesh moisture barrier strip between shell and lining • X-Change System compatible • License tab **LINER** Camo fleece reverses to solid-color woven fabric • PrimaLoft® Synergy insulation • Set-in sleeves • Elasticized bottom and cuffs • Two slash pockets on each side • X-Change System compatible **SIZES** S-3XL

THESE DIRTY BIRDS LOVE COLD, NASTY WEATHER.

When the clouds settle low on the marsh, the wind is spitting industrial-grade sleet and your dog wants to share your hot coffee, you want to be wrapped in a Dirty Bird Insulated Parka or Wader Jacket. The waterproof, breathable Pre-Vent® fabric shell keeps water out and allows perspiration to escape. PrimaLoft® Synergy insulation keeps you warm, and the SelectWeight™ design puts more insulation around the torso to keep your body core warm, while lighter insulation is used in the sleeves to help you swing smoothly on those dirty birds when they finally decide to come calling on your decoys.

PS: Tell your dog that next time it's his turn to make the coffee.

DIRTY BIRD INSULATED PARKA

MEANWHILE, BACK AT THE MARSH...

The weather looks better today. The wind has tapered off and your dog has finally stopped begging for more hot coffee. Today is perfect for trying out the new Dirty Bird Vari-Tech™ System. Start off with our base layer garment having a mid-layer fleece wrapped around your upper body and a stretchable lightweight poly-jersey fabric on the arms. Now add a waterproof, breathable top layer like the Dirty Bird Vari-Tech Jacket and Half Bib. The jacket has a high-performance Pre-Vent® waterproof, breathable outer shell and PrimaLoft® Synergy insulation. Like the base layer, the Vari-Tech design puts the high-loft insulation around your torso, while a lighter 3-layer bonded fabric is used in the jacket sleeves and bib legs for ease of movement. Any weather is great weather for ducks and the new Dirty Bird Vari-Tech waterfowl clothing.

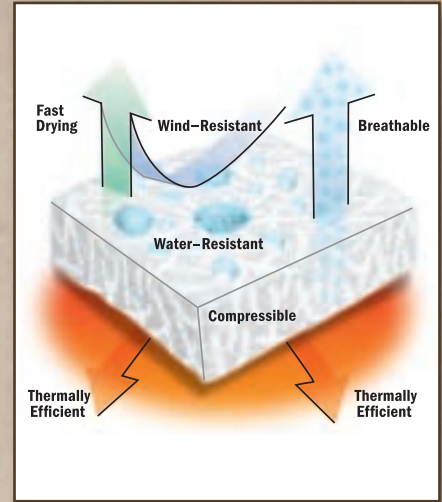

VARI-TECH™ DESIGN

Our new Vari-Tech Temperature and Motion Design combines heavier insulation in the body where you need it to stay warm and lighter insulation in the sleeves where you want a full range of motion. PrimaLoft® Synergy insulation is used in the body of the jacket and a bonded 3-layer fabric in the sleeves so you get warmth where you want it and ease of movement where you need it. You get the best of both worlds with Vari-Tech.

ARTICULATED KNEE CONSTRUCTION

Our new Vari-Tech Temperature and Motion Design adds highly-tailored pleated leg construction that is pre-curved to follow the natural bend of your knee. This means less bunching of material behind your knee when sitting in your blind or boat, and greater ease of motion when your hunt requires active movement through brush, mud and other obstacles, or when climbing in and out of boats and blinds.

PRIMALOFT® SYNERGY INSULATION

PrimaLoft Synergy insulation is a combination of both fine and ultra fine fibers that raises the bar for continuous filament insulation. It's soft, lightweight, quick-drying and provides excellent insulating properties, even when wet. Because it doesn't require quilting to stay in place, it won't restrict your freedom of movement. You'll find that hitting fast-flying crossing birds was never easier than when you're wearing a Dirty Bird Jacket.

DIRTY BIRD SMOOTHBORE IS THE PERFECT CENTERPIECE OF THE LAYERING SYSTEM.

Once you have your Dirty Bird base layers and your outer layers in hand, you'll need something to wear right in between. That's where the new Dirty Bird Smoothbore mid-layer comes in. Constructed of a mid-weight fleece with a smooth, quiet outer facing, these tops are ideal for adding warmth on colder days or they can be worn alone in milder weather.

BROWNING HAS THREE WORDS FOR COLD, WET HANDS — BYE BYE BIRDIE.

When your hands are cold and wet and your fingers feel like ten stiff icicles about to shatter all over the bottom of the duck blind, it's hard to focus on hunting. That's why we have added OutDry® technology to our most popular gloves for 2012. The problem with traditional gloves is that water gets trapped between the outer fabric shell and the waterproof interior liner. This water acts as a heat sink and quickly robs your hands of warmth, especially in cold and windy conditions. With OutDry technology, we insert a waterproof liner into the glove's outer fabric shell and then use a sophisticated heat and pressure process to fuse the liner right to the interior surface of the exterior shell. This eliminates the places where water can get trapped. Your hands stay warmer and you're able to focus on the task at hand — filling your limit of dirty birds.

Jacket shown stuffed into its own pocket

PRIMALOFT — WARMER, DRIER, SOFTER.

Looks can be deceiving. At first glance our clothing with PrimaLoft insulation looks much like any other insulated clothing. In reality, it is much more. The combination of superfine PrimaLoft Sport insulation and highly-constructed shell and lining fabrics provide unbelievable warmth with minimal weight or bulk. Unlike down, PrimaLoft Sport continues to insulate even when wet, and dries incredibly fast. When you layer it under a waterproof shell, it offers outstanding protection from cold, wet weather. Because of its lightweight comfort and warmth, you may find yourself wearing it alone in less demanding weather. The liner jacket and vest can stuff into the chest pocket for storage. The new pant has a stuff bag for storage.

FULL CURL WOOL — THE EVOLUTION OF NATURE'S MOST FUNCTIONAL FABRIC.

First there was wool, supremely versatile yet itchy. Then came non-itch wool blends that were just as versatile but more comfortable to wear. Now, we have taken wool to an even higher level with Full Curl Wool, and this wonder fabric has never been more comfortable and effective against the elements. Full Curl combines a durable 7 oz. wool blend outer fabric with WindKill™ windproof and water-resistant lamination and soft tricot lining for the ultimate wool fabrication. Fleece side panels are added to increase breathability. The 3-in-1 Parka relies upon another of nature's wonders — goose down — to provide insulation in the removable down vest. The rugged, time-honored performance of wool makes the Full Curl ideal for nearly all conditions, terrains and activity levels.

VAPOR MAX TAKES COMFORT AND ODOR CONTROL TO THE MAX.

Vapor Max combines a comfortable 100% polyester wicking fabric with OdorSmart™ silver ion anti-microbial treatment. OdorSmart helps control human odors to give you the edge on the keen noses of wary game. Available with a crew neck in both short sleeve and long sleeve variations, it dries quickly after exertion and keeps you comfortable in any condition.

PHEASANTS FOREVER — JOIN THE CAUSE.

Without the conservation efforts of Pheasants Forever, millions of acres of prime pheasant habitat would be lost. Pheasants Forever chapters all over the United States work to protect, restore and enhance wildlife habitat by establishing and maintaining local and regional projects. From encouraging farmers to leave longer wheat stubble, to the purchase of upland habitat land, Pheasants Forever continues to work to preserve America's favorite game bird. To become a member or volunteer, please call toll free (877) 773-2070. With every purchase of a Browning Pheasants Forever product, we proudly makes a contribution to this most worthy conservation organization.

Bird'n Lite®

WIDE NYLON SHOULDER STRAPS TRANSFER THE LOAD TO YOUR SHOULDERS, YET STILL LET YOU SWING THROUGH THE BIRD NATURALLY

THE QUICK-RELEASE STERNUM STRAP HELPS KEEP THE WEIGHT CENTERED BETWEEN YOUR SHOULDERS FOR IMPROVED BALANCE AND LESS FATIGUE

BIRD'N LITE — WHERE TRADITION AND INNOVATION COME TOGETHER.

Upland hunters are immersed in tradition. It's all about being afield with a good dog, a well-traveled Citori and feeling the heft of shells and birds swinging in your favorite vest. Now's the time to upgrade your upland gear and check out our Bird'n Lite series. Bird'n Lite Jackets and Vests feature an integrated load-bearing system that lifts the load higher and balances it between your shoulders and hips for more comfort and stability, all without sacrificing the look of traditional upland hunting gear. With Bird'n Lite, you can carry more, with less effort, for far longer than you would ever have wanted to with your old hunting vest. Start a new tradition with our Bird'n Lite Jackets and Vests. See the entire Bird'n Lite System in action at browning.com.

THE FULLY-ADJUSTABLE LOAD BEARING STRAPS LET YOU PLACE YOUR LOAD'S CENTER OF GRAVITY WHERE IT'S MOST COMFORTABLE TO CARRY

ERGONOMICALLY-CONTOURED, PADDED ADJUSTABLE WAIST BELT OFFERS ADDED SUPPORT TO YOUR LOWER BACK AND ALLOWS PART OF THE LOAD TO BE CARRIED ON YOUR HIPS FOR GREATER COMFORT

QUICK-RELEASE COMPOSITE BUCKLE ALLOWS FOR QUICK ON AND OFF, BOTH AT THE TRUCK OR IN THE FIELD

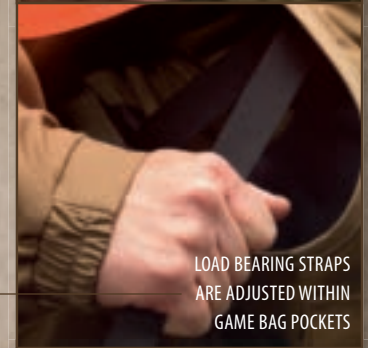

Bird'n Lite®

BIRD'N LITE JACKET — YOU'LL NEVER GO AFIELD WITHOUT IT.

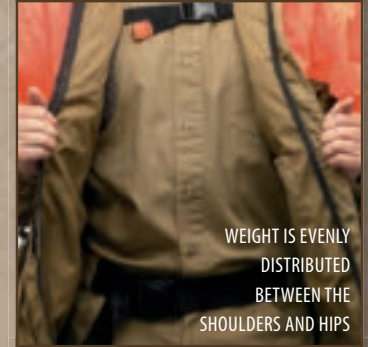

Now you can have the best of both worlds — a state-of-the-art load carrying system built right into a traditional looking jacket you'll be proud to wear afield. Bird'n Lite Jackets lift your load higher and let you select the ideal balance point between your shoulders and hips for both comfort and stability. The blaze orange shoulder and sleeve overlays let other hunters know exactly where you are, while the traditional khaki body helps hide the smudges and scuffs that are part of every upland hunt. The bloodproof game bag is easy to access, and there are pockets galore for every item you might want to take into the field. When you're ready to load up and move out on your next upland hunt, you're ready for a Browning Bird'n Lite Jacket.

BIRD'N LITE VEST — THE FINEST FOR THE FIELD.

If covering miles of open ground laden with shells, birds, water, lunch, a jacket, training transmitters and all the sundry items you need in the field make you think you need a backpack instead of an upland vest, take a look at our Bird'n Lite Strap Vest. This innovative vest utilizes the patented Bird'n Lite Technology load bearing system that secures and distributes the weight of heavy loads, making walking all those miles much more comfortable. Gone are the days of heavy, swinging game bags, picking wet feathers off your water bottle and rubbing sore shoulders. Hitch up a Bird'n Lite Strap Vest and enjoy hunting all over hill and dale.

BIRD'N LITE VEST AND PANT — COMPLETE YOUR HUNTING OUTFIT.

Complete your ensemble with the Bird'n Lite Vest and Pant. The vest offers all the latest Bird'n Lite features in a comfortable, more traditionally-styled upland bird vest. The pants have a relaxed fit for all-day comfort and are constructed of rugged poly/cotton twill with briar-resistant nylon overlays front and back. A zipper fly and snap-button flaps on the rear pockets make them a perfect pair of pants for upland game. Both the Bird'n Lite Vest and Pant are available with Pheasants Forever embroidery.

IMPACT GEL

REACTAR G2

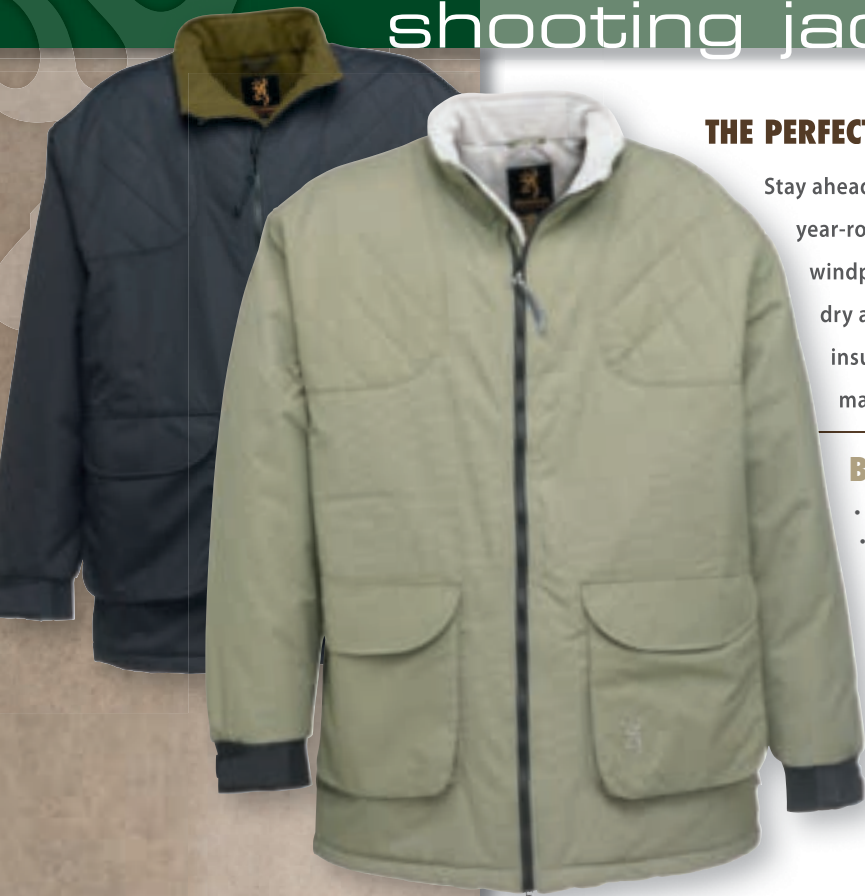

REACTAR G2 PAD WITH IMPACT GEL™ FOR BETTER PERFORMANCE.

Shooting all day can take a heavy toll on your shoulder. Take the sting out of shooting with the REACTAR G2 pad. The REACTAR G2 pad features an ultra-flexible recoil absorption material called Impact Gel™ that absorbs recoil forces better than any other pad on the market. Most amazingly, the REACTAR G2 pad with Impact Gel performs so well at a thickness of only 8mm, it won't change your length of pull or affect your point of aim. To reap the benefits of greater comfort and less fatigue, try a Made in the USA REACTAR G2 pad today.

"There is no better endurance test on shooting gear than an Argentina dove hunt. After 3,300 shells fired in just three short days, I found Browning's new REACTAR shirt really performs. It's comfortable to wear, the pad is soft and molds right to your shoulder. The generous pad is oversized to cover a larger area on your shoulder so you are protected no matter where you shoulder your gun. The pad is thin enough that it doesn't affect mounting the gun or the length of pull. Best of all, I had no bruising or soreness. It's a must-have for anybody planning a full day of shooting, and it lives up to our motto, The Best There Is.®"

— Rafe Nielsen, Browning Product Manager

THE PERFECT JACKET FOR HOT SHOTS.

REACTAR™ G2

Stay ahead of your shooting competitors by dusting targets year-round in the Ballistic Shooting Jacket. The waterproof, windproof, breathable Pre-Vent® fabric keeps hardcore shooters dry and protected from the wind while the Thermolite® insulation adds warmth. Oversized shell pockets feature magnetic closures that hold the pocket flaps open or closed.

BALLISTIC INSULATED SHOOTING JACKET

- Pre-Vent® waterproof, windproof, breathable fabric • Warm insulation
- Double shooting patches accommodate both right- and left-hand shooters • REACTAR™ G2 pad pockets (pad sold separately) • Two bellows pockets with magnetic fasteners to hold flaps open or closed • T-cuffs • Stand-up, zip-through collar • Brushed tricot lining • Two-way front zipper • Neoprene cuffs with hook and loop adjustment tabs • Drawcord bottom • Buckmark and Claymaster embroideries **SIZES** S-3XL

SAFETY BLAZE CAPS – A SMART CHOICE IN THE FIELD.

A little visibility goes a long way, and wearing a Blaze cap in the field is a good idea. When upland hunting, a Blaze cap helps communicate to your hunting partners where you are in a corn field or tall grass. When big game hunting, Blaze lets other hunters see you from hundreds of yards away. But don't think for a second that a Blaze cap has to be boring. We offer several styles of Blaze caps that are both highly visible and look cool enough to wear to the mall and make it easier for your significant other to find you there too.

HALL OF FAME

HALL OF FAME

RICK CAMUGLIA

is a long-time Browning shooter with multiple sporting clays titles, nearly all won with Browning autoloading shotguns. A short list of his victories includes multiple National and Regional FITASC Championships, nine-time New Mexico State Champion, two-time HOA Arizona State Champion and two-time HOA Colorado State Champion. He is also an eight-time NSCA All-American Team member. Rick prefers to shoot the Maxus® autoloader.

ANDY DUFFY

is the only shooter to win three NSCA National Championships, with back-to-back wins in 1994 and 1995. He has been on the NSCA All-American Team 17 times, Team USA 20 times and won more world, national and local sporting clays championship titles than he can shake a stick at. In 2005, he was honored by being inducted into the NSCA Hall-of-Fame. When Andy isn't dusting clays with his Citori®, you will find him instructing others in the ways of shotgunning.

MATT HUGHES

is a nine-time UFC® World Welterweight Champion and was inducted into the UFC Hall of Fame in 2010. Matt's toughness and work ethic are legendary in the UFC, something he attributes to growing up on a farm in rural Illinois. Matt spent a good portion of his early years hunting and shooting — passions that have never left him. Those passions now see him in front of the camera as the host of the Browning-sponsored "Trophy Hunters TV."

JOHNNY MEITZEN

started shooting competitively in 1987 and is currently a NSCA Level III instructor. He has won a number of shooting titles including two-time NSCA Nationals Vet Champion and two-time NSCA Nationals FITASC Vet Champion. Johnny is a six-time All-American Sporting Team member, two-time Team USA Sporting member and two-time Team USA FITASC member. He also has many state and zone championship titles to his credit. Johnny is a die-hard Citori® man. His current model of choice is the Citori 625 Sporting.

DEEANN MASSEY

was introduced to sporting clays shooting by her husband Jeff, who taught her to shoot in their backyard. She shot in her first tournament in the summer of 1996. In 1997, ten days before the Sporting Clays National Championship, she purchased her first 12 gauge Browning Gold. She used the Gold to tie for Ladies High Overall. Since then she has won two National Championships and has been a five-time runner-up. She has been on the 1st All-American Team twelve times and Team USA seven times. She has also won the Michigan State Ladies Championship twelve times, the Zone Three Ladies Championship ten times and has numerous other wins in local and regional competition. She has been a member of the Browning Pro Staff Team for thirteen years. DeeAnn currently shoots the Cynergy® over and under.

ROBBIE PURSER

started shooting skeet at the tender age of six. Over the years he has accumulated an impressive list of shooting titles including 1980 World Skeet Champion, 1991 and 1998 NSCA Champion, Zone 4 Champion, Quail Unlimited Champion, four-time Ducks Unlimited Champion, 2002 Sportsman Team Challenge Champion and an ESPN Great Outdoor Games gold medalist. He is also a twelve-time All-American Team member, a member of Team USA and a ten-time Georgia State Champion. All told, Robbie has more than 200 tournament wins to his credit — all with Browning autoloaders.

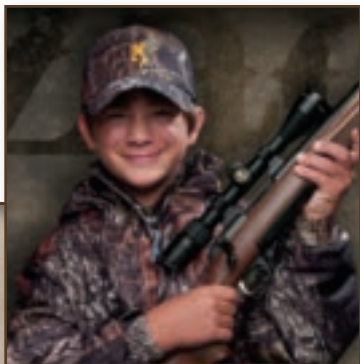

BRODY SIKES

is a rising star on the clay target scene, winning the 2010 North American Grand Prix FITASC event at Claythorne Lodge. Just 20 years old, Brody shoots a Browning Citori™ for clay targets and a Silver™ in the blind. A product of the popular SCTP development program, Brody and his Citori will be in the winner's circle for years to come.

ZAC COOPER

When Zac was born, his parents decided that instead of giving up hunting for a while, they would adapt to new ways of hunting. And at four months of age, Zac was on a plane to Iowa for a whitetail hunt. He took his first two deer at age five, and hunting has since become a way of life for Zac. He has gained national recognition for his speaking ability, and has been a guest speaker at such events as the 2009 QDMA National Convention, the University of Florida's Field Day, the Sportsman's Spectacular, and Florida's National Field Day. Zac is also a leader in school, serving in student government while maintaining straight-A grades. Zac has two long-term goals: To be a positive influence on today's youth and to help get them into the sport of hunting. See him in his hunting DVD titled "Little Man, Big Dreams."

KRISTY LEE COOK

brought her amazing voice to the TV screen on the 7th season of "American Idol®." Now Kristy is a rising country music singer and hosts the Browning-sponsored TV show "Goin' Country." Kristy possesses an infectious passion for everything she does, whether it is performing, hunting or saving horses through the Kristy Lee Horse Heaven Foundation.

FRED ZINK

Fred founded Zink Calls™ in 2001 primarily to fulfill the needs of waterfowlers and professional callers who demanded high-end calls. A nationally-recognized goose caller in his own right, Zink's business continues to grow and set new standards in the call industry. Zink's high-octane 24/7 DVD series is designed to speak to hunters with exciting footage that shares the hunting experience with the viewers. In 2012, look for Fred to be shooting the Browning Maxus™ as he continues his quest to bring new hunters into the sport and grow the outdoor industry.

FOSTER AND MATT BARTHOLOW

are rising stars on the ATA trapshooting circuit, and both shoot Browning Citori shotguns. The brothers came up through the Scholastic Clay Target Program and have made their mark within the Open ranks. Whether in a shoot-off with legendary Leo Harrison III or winning the Preliminary Doubles event at the Grand American, both will tell you that the Citori shotgun is a workhorse that just keeps on shooting, round after round, year after year.

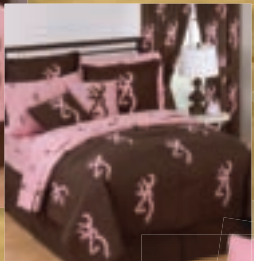

STEPHEN LE BLANC

A man of many talents, Stephen has a degree in wildlife biology, is a master taxidermist, an award-winning wildlife sculptor and an avid hunter. His impressive hunting résumé includes a North American Grand Slam of sheep and the Africa Big Five that consists of elephant, white rhino, cape buffalo, lion and leopard.

THE BROWNING NAME IS STILL FIRST IN THE FIGHT FOR FREEDOM.

The name of John M. Browning remains legendary in elite military and police circles. No other individual has contributed more to the security of our great country and to the individual safety of many generations of our warriors.

As such, it's natural that the tactical reputation of John M. Browning be carried forward with pride among today's generation of elite tactical and security professionals.

Our mission was straightforward. Design the most functional and innovative tactical blades possible, using the finest materials and most modern manufacturing processes available to produce the ultimate knives for the working professional. The result is Browning's new Black Label Tactical Blades.

We think John M. Browning would be very proud that a new generation of warriors will proudly carry his name into today's battle for freedom.

Designed in the USA by Russ Kommer

RUSS KOMMER

Russ Kommer is a world leader in cutting edge knife design. Browning's Black Label Tactical Blades represent his latest project, bringing custom grade workmanship, exquisite materials and cutting edge design together to produce the most efficient and exotic tactical blades available anywhere, at any price.

BLACK LABEL
TACTICAL BLADES

HARD CORE TACTICAL TOOLS.

These magnificent fixed blade knives are proof that Black Label beauty is more than skin deep. From their razor sharp partially serrated edges to their hardened steel glass breaking points, these robust blades are ready and able to help you cut, pry, slash and smash your way into or out of any tactical situation.

★ *Designed in the USA by Russ Kommer*

The hardened steel glass breaking point allows you to shatter auto or window glass for entry or escape.

**TRADITIONAL CLASSICS
MADE MODERN.**

No Browning tactical knife collection would be complete without these Point Blank models. A tribute to the classic U.S. military fighting blades of the past, their beefy clip point blades and hidden tangs are updated by using the most modern steels and molded modular polymer sheaths. The rugged and robust Pandemonium fixed and folding knives offer a new compound curve edge profile that makes the traditional deep belly blade shape even more useful.

BLACK LABEL
TACTICAL BLADES

TACTICAL ELEGANCE.

Whoever said tactical blades had to be bold, black and brutish has never handled a Browning Black Label Sliver or Turning Point folder. These knives exude a subtle grace from every angle that we like to call "tactical elegance." Sleek yet strong, these compact blades represent the pinnacle of highly functional yet stylish tactical knives. You'll find they are equally at home for a day in the field or a night out on the town, and give you an added sense of personal security wherever they are carried.
