

A full range of IP68 rated environmentally sealed circular connectors designed to provide secure and safe connections in harsh or hostile conditions. This now includes the new EXPLORA ATEX Zone 2 approved Hazardous Area connectors. The Power Buccaneer range consists of the miniature 400 Series, Mini, Standard and the 900 series. Each range has flex cable connector, in-line flex cable

connector and panel mounting connector options. With a wide choice of alternatives from 2 to 25 poles, BNC connections and screw, solder or crimp terminations, the Buccaneer range provides the answer to many design problems. The Data Buccaneer range includes designs for Ethernet, USB, Mini USB, SMB and FireWire interfaces. Ethernet Buccaneer meets Cat 5e requirements for

data rates up to 100Mbps, USB and Mini USB Buccaneer meets USB version 2.0 specification for data rates up to 480Mbps, SMB Buccaneer has a frequency response up to 4GHz, and FireWire Buccaneer meets IEEE1394a performance to 400Mbps. For wireless applications there's the USB Bluetooth adapter, RS232/485 Bluetooth wireless link and the SMB waterproof antenna.

Bulgin's extensive range of fuseholders are designed to give the degree of protection demanded in today's sophisticated electronic equipment. Carrying world-wide safety approvals from UL, VDE, CSA, SEMKO and IMQ, all types are manufactured from high grade flame retardant nylon and polyester materials.

Designed primarily for 5 x 20mm and 6.3 x 32mm size fuses with protection against shock to categories PC1, PC2 and PC3. There's a choice of styles for in-line, PCB mounting and panel mounting (screw or snap fit) with terminal options for solder, 2.8mm, 4.8mm or 6.3mm tabs or PC spills.

Dust and waterproof designs provide a front of panel seal up to IP68 in both 5 x 20mm and 6.3 x 32mm size fuses. Fuse carrier styles include captive drawer, screw cap - with screw driver release, bayonet cap - with screw driver release and screw cap - with finger release.

A full range of quality mains rated connectors conforming to IEC and EN 60320 specifications carrying UL, CSA, VDE and other approvals. With electrical ratings up to 20A, 250V (UL) these connectors offer solutions to most mains powered

applications. The combinations of mounting styles and terminations include: flange fixing, snap to panel and PCB mounting together with 2.8/solder tabs, 4.8 and 6.3 faston tabs, screw terminal and PC spill versions. Completing the range are insulating boots, retaining

clips and safety covers.

In addition to the standard black moulding, most styles are also available in either white or grey and special colours to match OEM equipment can also be supplied.

With over 26,000 combinations Bulgin's Polysnap mains power inlet modules offer a very adaptable and flexible solution to panel design. Polysnap allow combinations of mains inlets and outlets, filtered inlets, switches, fuseholders, voltage selectors, indicators and circuit breakers mounted in

either horizontal or vertical format bezels ready for quick snap-fit assembly. The compact design occupies the minimum of panel area and a single rectangular mounting hole, offering easy installation for this mains power entry module. To complement Polysnap the Polyflange range offers

a flange fixing alternative for designers who prefer the security of screw fixing. All types and variations are available through Bulgin's extensive distribution network.

DISTRIBUTION BOXES

Housed in tough ABS boxes and panels these IEC EN60320 Distribution Units have combinations of four, five or six outlets together with neon indicator,

fuse and switch options. The three sizes are available in various combinations and, other than the compact version, all have shuttered outlets. The

larger enclosed versions are also available with EMI filtering.

Manufactured from Stainless Steel, Bulgin's extensive range of vandal resistant security switches are designed with a high resistance to wear and tear, corrosion and harsh use in potentially hostile environments such as access control applications. The front and rear panel mounted versions have three

profiles – prominent, domed and low profile – with a choice of switching and IP66 & 68 front panel sealing that, combined together, meet the ergonomic, electrical and environmental demands of switch panel design. The low profile style switches are now also available with a latching, push on - push off, action.

The dot and ring LED illuminated versions can be driven from 6, 12 and 24V sources, with a variety of illumination colours and are now available with front and rear of panel sealing options. Other switch types include conventional push-button and toggle switches.

This range of panel mounting LED indicators consists of many different bezel styles, types of LED's and colours. The range has developed to meet the many different needs of panel design including IP66

environmentally sealed versions for use where a front panel seal is needed. The vandal resistant LED indicators are designed to complement the vandal resistant switches, they have

similar profiles with stainless steel bodies, sealing to IP67 and are built to withstand harsh environments.

GENERAL PURPOSE

This long established series of connectors still find many uses where small, but lower current connections are needed. The range consists of

circular and rectangular styles with 3, 4, 6 and 8 poles, in a choice of configurations, with current ratings up to 6 Amps. The 8 pole round has become

the standard connector for the disco and lighting industry and is available in cable and chassis mounting versions.

Manufactured from quality mouldings and metal components to ensure a secure and reliable connection, Bulgin's battery holder range caters for battery sizes; AAA(R03), AA(R6), C(R14), D(R20), PP3(6R61) and CR123, accommodating 1, 2, 3 or 4 cells.

There's a choice of fixing styles including screw and

flange panel fixing, PCB and base mounting versions.

The panel mounting versions are now available in two styles; standard fixing and front panel sealed to IP67, extending the applications into harsher external environments where dust or water would inhibit equipment operation.

The open frame styles are designed to be either PCB or base mounted and most have an interlocking facility to join adjacent holders together.

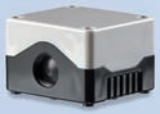

Principle applications include portable equipment and memory back-up.

A range of IP67 rated enclosures designed for electronics and control station applications. Manufactured in UL94V-0 rated polycarbonate and UL94-HB rated ABS. The three sizes are suitable for mounting one, two or three 22mm components and

can be supplied with or without mounting holes. The enclosures are available in black and grey as standard with the option of yellow and transparent lids. Each enclosure also has two M20 pre-formed knock-outs that can be used with the standard cable

glands. Other accessories include a combination mounting foot for use on TS32 & TS35 DIN rail and separate mounting brackets for wall mounting.
