Handbook of Analytical Methods for Dietary Supplements (Part# ASB-00091008-001)

By Frank Jaksch, Mingfu Wang, and Mark Roman

Get it **FREE** with your next qualifying order*

In June, 2005, the American Pharmacists Association (APhA), the national professional society of pharmacists, released the reference book titled, Handbook of Analytical Methods for Dietary Supplements. The reference is a unique compilation that provides current methods plus appropriate validation data, when known, for 38 common supplements in the marketplace.

Analytical method development is a critical component of dietary supplement manufacturing and is a must for product identity according to the FDA and the recently published good manufacturing practices (GMPs) for dietary supplements. The Handbook of Analytical Methods for Dietary Supplements provides a convenient starting point for laboratories to develop and validate analytical testing methods for dietary supplements.

The reference contains monographs on the following 38 dietary ingredients: Artichoke, Ascorbic Acid, Bilberry, Black Cohosh, Boswellia, Chamomile, Chaste Tree, Chondroitin Sulfate, Coenzyme Q10, Devil's Claw, Echinacea, Ephedra, Epimedium, Feverfew, Ginger, Ginkgo, Ginseng, Glucosamine, Goldenseal, Gotu Kola, Griffonia, Guggul, Hops, Kava, Melatonin, Milk Thistle, Olive Leaf, Passionflower, Red Clover, Rhodiola, Schisandra, Senna, Siberian Ginseng (Eleuthero), Skullcap, Soy, Turmeric, Valerian, Willow Bark.

Each monograph follows a standard format for quick reference: chemical names, formulas, and structures, along with information on solubility and other physical and chemical data; a description of common uses for each dietary supplement and its mode of action; discussion of reference standards and/or marker compounds used; information and directions for using various component-specific methods; and chromatography specifications and representative chromatograms, when available.

The work is written by Frank Jaksch, President and CEO, ChromaDex, Inc., Irvine, Calif., a supplier of phytochemical reference standards and a leader in the creation of botanical reference materials; Mingfu Wang, PhD, Assistant Research Professor, New Use Agriculture and Natural Plant Products Program, Rutgers University, Piscataway, NJ; and Mark Roman, PhD.

Purchase a minimum of \$1250 from the ChromaDex catalog and get the Handbook of Analytical Methods for Dietary Supplements at no cost (\$179.95 value).*

*You must purchase ChromaDex products at list price to qualify for the above offer. This offer will be shipped to you within 4-6 weeks after receipt of your order. Message from the President & CEO

Welcome to the new 2011 ChromaDex Catalog

While the economic and regulatory climate of 2010 presented the industries served by ChromaDex with many challenges, ChromaDex continued developing new products and services for our clients. We “set THE standard” for phytochemical reference standards. The ChromaDex reference standard line now exceeds 4000 unique materials. Every week we are adding new Botanical Reference Materials (BRMs) to our portfolio of products. From identity testing of raw materials to in process tests to final product testing, ChromaDex provides the complete range of phytochemical reference standards needed to be cGMP compliant.

ChromaDex continues to commit resources to our Contract Services Group. In 2010 we added a new Q-TOF mass spectrometer and a triple quad mass spectrometer to our analytical arsenal. Our world class team of natural product and analytical chemists has dramatically expanded our range of contract services and research capabilities. ChromaDex has increased its chemical synthesis capabilities to provide products that are equivalent to natural ones but are produced via synthetic routes.

Our phytochemical library became a reality in 2009. ChromaDex offers a range of phytochemical libraries for use with high throughput screening techniques.

ChromaDex now offers fine, specialty ingredients for use as a dietary supplement. Beginning with high purity resveratrol, ChromaDex just added pterostilbene to its new pTeroPure line of dietary supplement ingredients. 2011 will be an exciting year for this emerging product line. Several additional specialty ingredients for dietary supplement use are planned for launch.

ChromaDex is committed to providing the industries we serve with innovative products and services. If you don't see what you need in our catalog, please do not hesitate contacting us as we are adding new products and services daily.

We look forward to working with you now and into the future.

Sincerely,

Frank Jaksch

About ChromaDex

ChromaDex is a Natural Products company supplying phytochemical reference standards and reference materials, related contract services, and specialty, fine bulk ingredients to the dietary supplement, nutraceutical, food and beverage, functional food, pharmaceutical, and cosmetic markets.

For over 10 years, ChromaDex has provided reference standards, materials, kits, and various products that are necessary for quality control of raw materials and consumer products. Also, available are fine chemicals and phytochemicals for research and new product development. Bioluminex, a bio-analytical method to identify the presence of toxic or harmful compounds in water, dietary ingredients, food products, and food ingredients is available exclusively from ChromaDex.

In addition, the company operates a modern laboratory in Boulder, Colorado. At this location, ChromaDex provides contract services consisting of routine contract analysis, sophisticated contract research; and consulting services, such as regulatory support, new ingredient or product development, risk management, and litigation support services. Further, ChromaDex licenses or develops intellectual property utilizing its unique knowledge of natural products and green chemistry.

Boulder, Colorado

Recently, ChromaDex announced the introduction of the pTeroPure line of novel phytochemical ingredients. Resveratrol and pterostilbene are now available in large quantities at purities that exceed 99%.

ChromaDex offers its products in the United States, Canada, and around the world through distributors in Australia, South Africa, Brazil, France, Germany, India, Italy, Japan, Korea, Mexico, New Zealand, Poland, South America, Spain, Sweden, Taiwan, and the United Kingdom. The company was established in 1999 and is headquartered in Irvine, California. ChromaDex is a Life Science business that is publicly traded (OTC stock symbol is CDXC.OB)

ChromaDex is a Natural Products company. Established in 1999 to supply phytochemical reference standards for the dietary supplements industry, we now list over 4000 items in our phytochemical catalog. ChromaDex is the leading provider of high purity phytochemical reference standards and reference materials to the pharmaceutical, nutraceutical, dietary supplement, food and beverage, and cosmetic industries.

Over the past five years, ChromaDex has built a world-class team of scientists, covering every aspect of natural products chemistry. To provide the best possible service to our clients, ChromaDex has concentrated its capabilities into one modern laboratory located in Boulder, Colorado. ChromaDex is a Life Science business that is publicly traded. (OTC stock symbol CDXC.OB)

ChromaDex has the staff and equipment resources to provide a wide range of contract services for our clients as well as support internal research and manufacturing activities.

Analytical Services

ChromaDex provides a wide range of Contract Analysis. These Contract Services are ideal for companies, teams, and individuals requiring testing of everything from a single raw material to a complex finished product. The work is performed using the latest analytical techniques in our 13,000 square foot Boulder Colorado Laboratory.

Identity Testing

Provide confirmation of identity utilizing high performance thin layer chromatography (HP-TLC), nuclear magnetic resonance imaging (NMR) or liquid chromatography (HPLC) of:

- Plant species
- Raw material
- Active compounds
- Marker compounds
- Constituents in finished products

Analytical Testing

Perform complete analytical testing of raw materials or finished products using mass spectrometry, gas or liquid chromatography and/or HP-TLC for:

- Quantification of active compounds
- Verification of label claims
- Product homogeneity

Contaminant Testing

Offer unique analytical techniques to identify:

- Adulterants
- Analogs
- Microbiological contamination
 - Total aerobic plate count
 - Yeast and mold
 - Listeria
 - Salmonella
 - Pseudomonas
 - Enterobacteriaceae
 - Staphylococcus aureus
- Pesticides
- Metals

Stability Studies

Measure short and/or long term stability of a product using monitored chambers. Duration can be from days to years depending upon client requirements:

- Room temperature
- Accelerated (40° C, 75% relative humidity)
- Custom

Contract Research Services

Method Development and Implementation

Having at your finger tips fast, accurate analytical methods is crucial to the success of a company. For example:

- Create customer specific analytical methods using HP-TLC, HPLC, GC, GC/MS, and/or LC/MS instrumentation
- Consolidate methods to allow faster analysis, reducing costly equipment change over and related downtime
- Refine existing customer methods to yield a more accurate and reliable technique
- Implement customer methods in the Boulder Laboratory

Method Validation

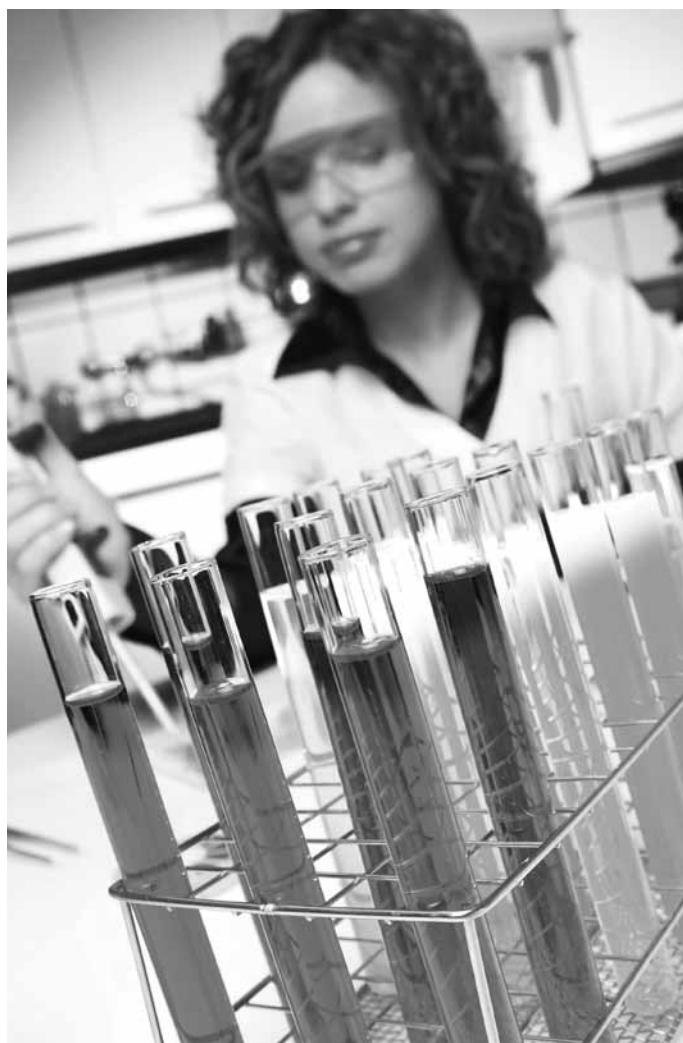

Validating an analytical method is an involved process that is best performed at a qualified laboratory like ChromaDex. Method validation insures the robustness of the method. ChromaDex can:

- Perform a single laboratory validation
- Organize and administer a multiple laboratory validation
- Work with organizations like the Association of Analytical Communities (AOAC) to validate a customer method

Target Compound Isolation

Isolating or extracting a specific chemical compound or family of compounds is a service that ChromaDex has a wealth of experience in performing. For example:

- Isolate a key compound from biomass or a complex matrix
- Identify side stream compounds of interest during the isolation process
- Separate a specific compound from an intermediate or extract product
- Create a library of compounds from an extraction process for use in high throughput screening

Synthetic Chemistry

Synthesizing a specific compound can be a more cost effective means of obtaining a consistent material at the required quantities and purity. ChromaDex is uniquely positioned to provide services such as:

- Perform feasibility studies
- Identify economical synthetic routes to achieve end product
- Synthesize the desired final product using low cost intermediate starting materials
- Take an existing synthetic route and reduce the total number of required steps
- Improve yield from a client's synthetic process

Process Development

Utilizing our years of experience and knowledge gained from isolation and synthesis chemistry, ChromaDex has the ability to scale up processes from milligrams to kilograms of material. ChromaDex can:

- Perform feasibility studies
- Identify the most cost effective scale up approach
- Optimize process yields
- Minimize or eliminate impurities or unwanted side stream compounds
- Define and implement scale up parameters

Fermentation

Employing knowledge and techniques developed as part of a Natural Science Foundation (NSF) funding initiative ChromaDex can now aid clients in exploring fermentation as a high volume production option. For example:

- Has in-house fermentation expertise
- Provide bench scale development capabilities
- Can access large scale fermentation equipment

Consulting Services

Litigation Support

Providing expert testimony for over 10 years such as:

- Preparation of technical briefs
- Perform supporting analytical testing
- Provide expert witness testimony

Raw Material Selection

Using our vast knowledge of natural compounds ChromaDex is uniquely positioned to help our clients get the right raw material at the right price. For example:

- Selecting the best source
- Verifying identity
- Analyzing active compounds
- Accessing a network of raw material suppliers

GMP Compliance

Complying with GMPs can be a daunting task. ChromaDex can assistance companies to insure they meet both the letter and intent of the law. ChromaDex can:

- Provide consultative audits
- Perform analytical testing from biomass to bottle
- Review documentation and procedures

QC/QA Program Development

Having a QC/QA program can be a costly but necessary component of a business. ChromaDex provides consulting services to help companies improve the effectiveness of the QC/QA function such as:

- Perform document review
- Create and review SOPs
- Provide independent QC/QA audits

ChromaDex Capabilities

GC (Gas Chromatography)

- HP 5890 Series II, with auto samplers, split/splitless, injector, FID and TCD
- Agilent 6890 GC with autosampler, split/splitless, FID, and Agilent 5973 Mass Selective Detector
- HP 5890 Series II, with auto samplers, Tekmar 7000 head space analyzer

- Agilent G6510 AA Q-TOF, dual spray ESI
- Agilent 1100 Series LC/MSD Trap (G2445D SL) with direct fusion, ESI and APCI capabilities
- Micromass Quattro Ultima Tandem MS/MS, ESI and APCI capabilities
- Finnigan LCQ Deca ion trap with APCI and ESI ion sources

HPLC (High Performance Liquid Chromatography)

- Agilent 1100 with quaternary pumps with diode array detectors (twelve), variable wavelength detectors (four), fluorescence detector (one) and ELSD (one) - all are equipped with autosamplers
- Waters Acquity (UPLC)
- Waters Alliance 2795 HPLC
- TSP/SP AS1000 (with autosampler, variable wavelength detector, SpectroFocus detector, forward optical scanning detector, UV detector)
- Dionex HPLC (with Autosampler, UV detector)

HP-TLC (High Performance-Thin Layer Chromatography)

- Dual CAMAG Automatic TLC Sampler 4
- Alpha Innotech FluorChem 8900 Imaging system with cooled CCD camera (-30 °C absolute) and dual epi-UV at 254 and 365 nm, white light and densitometry capabilities
- CAMAG TLC Scanner 3
- BioLuminizer Imaging system with cooled CCD camera and software

Prep Scale Chromatography

- Waters Prep LC 2000 with 490E programmable multi-wavelength detector and Gilson 206 fraction collector
- Septeck ST500 with variable wavelength monitor and GP-900 controller
- Merck Novaprep 5000 integrated prep scale HPLC

Microbiology

- Neogen Soleris 128 System (Incubator/ Detector)
- Neogen Genequence Reader/Washer

Miscellaneous

- Camile Clark Automated Glass Reactors with Sampletek automated sampling units (250 mL and 1L)

Introduction to ChromaDex Products

Tools

ChromaDex offers over 4000 phytochemical reference standards to the dietary supplements industry. Our capabilities have grown to offering accompanying botanical reference materials, contract analytical services, and bulk phytochemical supplies to a wide variety of markets such as food & beverage, pharmaceutical, research organizations and governmental groups. ChromaDex provides the tools necessary to ensure product quality as well as fuel research and innovation. We have the expertise necessary to put these tools to the best use.

Our product line includes:

- Phytochemical Reference Standards
- Botanical Reference Materials
- Reference Standard Kits
- HPLC Analysis Kits
- Discovery Libraries
- Bulk Phytochemicals

Phytochemical Reference Standards

Phytochemicals are chemical compounds that occur naturally in plants. Plant materials and their associated phytochemicals have been used to improve and support good health for millennia. For example, salicin was originally extracted from the white willow tree and later synthetically produced to become the staple over-the-counter drug called Aspirin. Similarly an important cancer drug, taxol, is a phytochemical initially extracted and purified from the Pacific yew tree.

At ChromaDex, our core competency is the isolation, development and characterization of phytochemical reference standards. These standards are used in laboratory settings all over the world to ensure the quality of raw materials and finished products such as dietary supplements, food and beverages, as well as cosmetics. The proper use of well characterized phytochemical reference standards directly affects the safety and quality of millions of consumer products on the market today.

As the importance of natural products continues to increase, so will the need for phytochemical reference standards. With over 3000 individual substances offered in our product catalog, ChromaDex is truly “setting the Standard”SM. We offer the largest selection of well characterized phytochemical reference standards in the industry and our catalog continues to grow. From Abscisic Acid to Zeaxanthin, ChromaDex has the reference standards that you need.

Understanding Product Grades

ChromaDex offers varying levels of characterization and product grades from fully characterized Primary standards suitable for quantitative testing to Reagent Grade materials for basic research. We offer four phytochemical product grades:

Grade	Chemical Formula and Structure	Adjusted Purity	HPLC or GC %	Water %	Solvent %	NMR	Mass Spec
Primary	✓	✓	✓	✓	✓	✓	✓
American Herbal Pharmacopoeia (AHP)	✓	✓	✓	✓	✓	✓	✓
Secondary (SH, SG)	✓		✓				
Reagent Grade (RG)	✓						

Choosing the correct Reference Standard is essential to the success of your research project or quality management program and we are happy to assist you in selecting the right product for your needs. Please contact your ChromaDex representative for more information.

Botanical Reference Materials

ChromaDex offers a growing product line of Botanical Reference Materials (BRM™) to provide users with the tools necessary to better evaluate botanical raw materials. These BRM™ are freeze dried and ground plant material whose certificates show an HP-TLC test method, profile image, and may also include macro and microscopic images. Our Botanical Reference Materials give users the tools necessary for plant identity confirmation testing as well as other basic research. Examples of available BRM™ include:

- Astragalus Root
- Gotu Kola Leaf
- Echinacea Purpurea Flower
- Panax Ginseng Root
- Star Anise Fruit

Reference Standards Kits and HPLC Analysis Kits

Our Reference Standards Kits make your standard selection quick and easy. They bundle the recommended standards for a given botanical together under one easy to order part number. Further customized HPLC Analysis Kits combine these Reference Standards Kits with the appropriate HPLC column and written test method to provide a complete solution to your testing needs. If you do not find the kit you desire listed in our catalog, please contact your ChromaDex representative and ask for a custom quote. Examples of available Kits include:

- Stevia HPLC Analysis Kit
- Ginsenosides HPLC Analysis Kit
- Citrus Bioflavonoid HPLC Analysis Kit
- Echinacea Angustifolia Standards Kit
- Green Tea Catechin Standards Kit

Bulk Phytochemicals

ChromaDex has developed proprietary manufacturing techniques to supply the wide range of phytochemicals in our catalog. In the process, we have developed the ability to supply many of these phytochemicals in gram and kilogram quantities. When you make bulk purchases with us, you can feel confident in the quality of the product you will be receiving. Both Research Grade (RG) and Food Grade (FG) materials are available. ChromaDex can also customize bulk quantities of Primary (P) or Secondary (SH) grade materials per your request. We offer a quickly growing variety of such bulk phytochemicals as:

- Resveratrol
- Pterostilbene
- Astragaloside IV
- Campesterol
- Brassicasterol
- Mitragynine

Natural Product Discovery Libraries

During the development of the phytochemical catalog, ChromaDex has compiled an extensive list of over 4000 chemicals related to natural products. Many of these compounds are unique to the ChromaDex catalog. We can provide both large and small custom libraries based on the phytochemicals in our catalog, which can be provided as sets of individually packaged vials or in pre-diluted 96 well plate formats. Examples of chemical families that can be customized into libraries include:

- Flavanoids
- Saponins
- Triterpenes
- Xanthenes
- Phytosterols
- Polyphenols
- Lignans

AHP-Verified™ Chemical Reference Standards

AHP-Verified™ Chemical Reference Standards (CRS) accurately disclose the level of purity of the compound, the means by which purity was assessed, or utilize accurate means for assessing purity. AHP-Verified™ Chemical Reference Standards have also been independently verified as to their identity and level of purity. Each standard is accompanied by a full documentation package with the level of purity and the method for determining purity clearly indicated.

AHP Monographs

The AHP develops qualitative and therapeutic monographs on botanicals, including many of the Ayurvedic, Chinese, and Western herbs most frequently used in the United States. These monographs represent the most comprehensive and critically reviewed body of information on herbal medicines in the English language and serve as a primary reference for academicians, health care providers, manufacturers, and regulators.

Botanical Reference Materials (BRM™)

BRMs

Botanical Reference Materials (BRM™) are well characterized reference materials for specific plants. ChromaDex offers a complete and growing product line of BRMs to provide users with the tools necessary to better evaluate the identity of botanical raw materials. A few examples currently offered by ChromaDex are:

- vBRM™ - A Botanical Reference Material traceable to a voucher specimen.
- BRM™ - A standard Botanical Reference Material without a voucher specimen.
- rBRM™ - A “representative” Botanical Reference Material without a voucher specimen.

All BRMs have a Certificate of Analysis containing an HP-TLC profile. Further data will be provided to verify product identity, which may include macroscopic and microscopic information. When available, a BRM can be traceable to a voucher specimen.

ChromaDex is the exclusive supplier of rBRMs (a trademark of Phyto-Technologies, Inc.). As a composite of multiple authenticated samples from indigenous and traditional sources grown in various locations, this BRM is truly representative of the plant.

About rBRMs™

Traditional Chinese medicines and foods have been developed over millennia by precisely documenting herb identities, growing regions, harvesting methods, processing and preparation methods, traditional properties, toxicities, indications and efficacy, etc. This diverse totality that makes up traditional Chinese medicine cannot be captured by a single standard voucher specimen, but it can be very closely represented by a rBRM™. For research on the traditional properties and other well-documented aspects of complex traditional Chinese medicines, rBRM™ are a prerequisite to obtaining reproducible and consistent results. While other reference materials based on voucher specimens from particular growing plots may be adequate for research on a known chemical or a targeted bioactivity, they aren't necessarily relevant in research on complex traditional Chinese medicines/foods because they are not representative of the diversity inherent in Chinese herbs and foods.

Product Selection Guide

Phytochemical and Botanical

Selection

Introduction

As the leading provider of high purity phytochemical and botanical reference materials to the pharmaceutical, dietary supplement, food and beverage, and cosmetic industries, ChromaDex has published a Product Selection Guide to better help you, the customer, find what you need in one simple search. We understand your time is a valuable commodity and ease of access to our products will help consolidate your research efforts. With the addition of several hundreds of phytochemicals and Botanical Reference Materials to our catalog each year, the list can be somewhat daunting. The ChromaDex Product Selection Guide is designed as an easy search tool for the botanicals and their related phytochemicals. With the publication of the current Good Manufacturing Practices for dietary supplements by the US FDA, identity testing is one of the major cornerstones for product safety, reliability and quality. The ChromaDex Product Selection Guide will be an important tool for companies in meeting the guidelines set forth by the FDA.

How to Use

The Product Selection Guide is set up to allow the user to search for a botanical by its Latin binomial or its common name. Under the botanical is a list of phytochemicals and products associated to the plant. An example would be Ginseng. Under Ginseng, the botanical is listed as *Panax ginseng*. Other names are provided as well as a list of the compounds, such as the ginsenosides, and the Panax Root Extract Reference Material (XRM). Only some of the products have a Botanical Reference Material (BRM), a XRM, and/or a kit associated with them at this time, but always contact your technical sales representative when something is not listed in the Product Selection Guide as the list is continually growing.

Reference Standards and HPLC Analysis

Solutions

Our Reference Standards Kits make your standard selection quick and easy. They bundle the recommended standards for a given botanical together under one easy to order part number. Further customized HPLC Analysis Kits combine these Reference Standards Kits with the appropriate HPLC column and written test method to provide a complete solution to your testing needs. Examples of available Kits include:

- Stevia HPLC Analysis Kit
- Ginsenosides HPLC Analysis Kit
- Citrus Bioflavonoid HPLC Analysis Kit
- Echinacea Angustifolia Standards Kit
- Green Tea Catechin Standards Kit

If you do not find the kit you desire listed in our catalog, please contact your ChromaDex representative and ask for a custom quote.

1) Phytochemicals - Phytochemicals, also referred to as plant constituents, which may or may not be active components. Commonly referred to as “marker” compounds.

2) XRMs - Extract Reference Materials - XRM's primarily aid in determining the scientific validity of the methods used to test botanical extracts. XRM's also assist in characterizing products and verifying processes. XRM's are quantitative method and process assessment tools for botanical products whether or not they are extracts.

3) BRMs - Botanical Reference Materials - BRM's are well-characterized reference materials for specific plants. The characterization of BRM's includes macro- and microscopic information for a specific genus and species of plant. Many BRM's come with Thin Layer Chromatogram (TLC) “fingerprints” of the botanical, along with certified identity and source to further assist in material evaluation.

4) CRMs - Certified Reference Materials - CRM's are reference materials, one or more of whose property values are certified by a technically valid procedure, accompanied by or traceable to a certificate or other documentation which is issued by a certifying body, and for which each certified value is accompanied by a stated level of confidence.

CRM's may be gases, liquids, or solids, or even manufactured objects. CRM's may be manufactured in batches as long as the batch is sufficiently homogeneous that any reasonably small part of it exhibits the property values established for the whole batch, within stated limits.

5) CRS's - Certified Reference Standards - CRS's are highly purified single compounds that are used to quantify a specific phytochemical present in either the plant or the extract you purchased. Reference standards are the tools necessary to ensure that your method works for the identification of a single chemical.

6) Primary Standards (P) - Primary standards are analytical reagents of generally high purity, with documentation confirming the results of four or five of the following tests: HPLC, NMR, GC, TLC, LCMS, Karl Fischer, and a Residual Solvent analysis. The parameters of the method of testing will be provided along with the results of testing.

Materials designated as Primary standards are excellent for use in a variety of analytical applications, including

instrument calibration, quality control, analyte identification, and method performance. These compounds are also suitable for all other general applications requiring high-purity materials.

7) Secondary Standards (SH or SG) - Secondary standards are generally of a lesser purity than Primary standards; however, the defining difference between the two is that secondary standards have only one or two test results, usually HPLC and one other. These standards are also provided with a method of testing.

Materials designated as Secondary standards are suitable for use in a variety of analytical applications, including instrument calibration, quality control, analyte identification, and method performance. These compounds are also suitable for other general applications requiring high-purity materials but are not ideal for use in all applications.

8) Reagent Grade Standards (RG) - Reagent Grade Standards are separated from primary and secondary reference standards due to a lack of characterization and documentation of the batch compound. There is a Certificate of Analysis provided with the compound; however, no guaranteed method of analysis will be provided. Methods may be available, but they may not necessarily refer to how that compound was produced or tested.

Materials designated as Reagent or Standard grade can be used for preparation of analytical standards for a variety of applications, including instrument calibration, quality control, analyte identification, and method performance. These compounds may also be suitable for other general applications requiring high-purity materials, but may not always provide consistent or homogenous results.

9) AHP - American Herbal Pharmacopoeia - Reference materials designated as AHP Verified show they have been subjected to independent identity and purity testing according to AHP standards.

10) USP - United States Pharmacopoeia-Chemicals which meet the requirements of the United States Pharmacopoeia.

Phytochemicals A-Z

At ChromaDex, our core competency is the isolation, development and characterization of phytochemical reference standards. These standards are used in laboratory settings all over the world to ensure the quality of raw materials and finished products such as dietary supplements, food and beverages, as well as cosmetics. The proper use of well characterized phytochemical reference standards directly affects the safety and quality of millions of consumer products on the market today.

As the importance of natural products continues to increase, so will the need for phytochemical reference standards. With over 4000 individual substances offered in our product catalog, ChromaDex is truly “setting the Standard”™. We offer the largest selection of well characterized phytochemical reference standards in the industry and our catalog continues to grow. ChromaDex has the reference standards you need from A to Z.

ORDERING FROM CHROMADEx

You can open an account and order immediately from ChromaDex, provided you have a credit card available to prepay for your first order. ChromaDex processes Visa, Master and American Express cards. The ChromaDex Service Representative will take all the necessary shipping and billing details along with your order. If you are placing a request for services, we normally ask for the payment up front, or we base the prepayment on your ChromaDex credit status. If you would like to pay by invoice on net 30 terms, then an appropriate account will need to be set up. Please contact us for the necessary forms. The information you provide is then validated, and your new account will be set up within ten working days. You will then start establishing your ChromaDex credit status.

USE OF CHROMADEx PRODUCTS

ChromaDex reference materials and other associated products are intended primarily for quality control, research, and development purposes. Unless otherwise stated on product labels, in the ChromaDex catalog, or in other literature furnished to the Customer by ChromaDex Inc, ChromaDex products should not be used for any other purposes. They should not be used for any commercial purpose, in foods, drugs, medical devices, or cosmetics for humans or animals. Chromadex products should also not be used for any in vitro diagnostic purposes.

ChromaDex does not test its products for safety and efficacy in food, drug, medical device, cosmetic, commercial or any other use, unless otherwise stated in ChromaDex literature furnished to Customer. Customer expressly represents and warrants ChromaDex that Customer will properly test, use, manufacture, and market any products purchased from ChromaDex and/or materials produced with products purchased from ChromaDex, in accordance with the practices of a reasonable person who is an expert in the field and in strict compliance with all applicable laws and regulations, now and herein after enacted. In accordance within the meaning of the Federal Food, Drug and Cosmetic Act, Customer further warrants to ChromaDex that any material produced with products from ChromaDex shall not be adulterated or misbranded, under Sections 404, 505, or 512 of the Act, or be introduced into interstate commerce.

Since ChromaDex's products are, unless otherwise stated, intended primarily for research purposes, Customer realizes they may not be on the Toxic Substances Control Act (TSCA) inventory. Customer assumes responsibility to ensure that he products purchased from ChromaDex are approved for use under TSCA, if applicable.

Customer has the responsibility to verify the hazards and to conduct and further research necessary to learn the hazards involved in using products purchased from ChromaDex. Customer also has the duty to warn it's clientele and any auxiliary personnel (such as freight handlers, etc.) of any risks involved in using or handling the products. Customer agrees to comply with instructions, if any, furnished by ChromaDex relating to the use of the products and not misuse the products in any manner. If the products purchased from ChromaDex are to be repackaged, relabeled or used as starting material or components of products, Customer will verify ChromaDex's assay of the products. No products purchased from ChromaDex shall, unless otherwise stated, be considered to be food, drugs, medical devices or cosmetics.

CHROMADEx PRICING

Prices shown are in U.S. dollars and are subject to change. Please visit us at www.chromadex.com for current prices. For products or services we guarantee written quotations for 90 days. When placing your order, please reference our quoted prices or our proforma number. If you place your order by phone, we will confirm our current price at that time.

Prices are subject to change with notice (usually on www.chromadex.com). However shipment will still be made promptly even if prices have been nominally increased. Any price reduction will be automatically applied to your invoice.

CHROMADEx RETURNS POLICY

Our Customer Service Department is available to assist you should a problem arise with your order. Please inspect your packages immediately upon receipt and notify us promptly of any damage or discrepancies. Should an item be shipped to you incorrectly, as the result of an error on our part, we will take quick and appropriate action to correct the problem.

Prior to returning any items, please contact the Customer Service Department to obtain a Return Authorization Number. Once the Return Authorization form is completed and approved, the Return Authorization Number will be issued by Customer Services along with shipping instructions. Use of the Return Authorization Form and Number will ensure the safe and proper handling of materials and enable us to expedite a resolution. Items returned without prior authorization may not be accepted. Shipment of authorized returns should be made within 30 days of the issuance of the Return Authorization Number.

We will do our best to fulfill requests to return material. However, in order to maintain the quality of our products and continue to provide competitive prices, certain items may not be returned for credit. These items include: refrigerated or frozen products; reagents or standards that have passed their expiration date; custom or special orders; products

missing labels, parts instruction manuals, books, computer software and equipment removed from their original packaging. Returns accepted for items ordered in error are subject to a 20% processing fee.

CHROMADEx DOMESTIC SHIPPING INFORMATION

All orders are shipped FOB shipping point. Transportation charges will vary with the destination, weight, and content of each shipment. Special packaging may be necessary for safe delivery of certain materials. All special packaging, administrative, and freight charges are available upon request with order entry and are indicated on our invoices. ChromaDex reserves the right to change a requested method of shipment if it does not comply with regulations or, in our judgment, will not deliver a product safely.

Any transportation and handling charges quoted or invoiced include charges in addition to actual freight costs. For collect shipments, please include your account number with your preferred carrier to ensure proper billing. For COD shipments, there is an additional charge. Back-ordered items are shipped and invoiced separately as they become available.

CHROMADEx INTERNATIONAL SHIPPING INFORMATION

The numerous regulations and restrictions that govern the international transport of chemical products make us strive to ship all orders without delay and to minimize delivery costs within these regulatory guidelines.

All orders prepared for shipment outside the USA are FOB shipping point. The volume of our international shipments results in very competitive rates from our couriers. For all orders shipped through our designated carriers, we pay the transportation and handling costs in advance. These costs are added to your invoice. You can choose other forwarders to handle your orders; however, such orders are delivered on a collect basis. Please note we will only ship our products through approved couriers such as UPS, FED Ex, DHL, or TNT.

Hazardous items and items that require dry ice for shipment incur additional charges. They are commonly shipped via air freight. Whenever possible, ChromaDex consolidates air freight to minimize shipping costs. In some instances, customs and other regulations may prevent us from doing this in your country.

Back-ordered items are shipped FOB shipping point when they become available, unless alternative instructions are provided when the original order is placed. To minimize freight costs, back-orders can be consolidated with future shipments.

You can help us process your orders quickly and efficiently in a variety of ways:

- Include a contact name, telephone number, and a fax number on your purchase order. If you use a broker/shipping agent to clear your shipments through customs, include the broker's name, telephone number, and fax number as well.
- Consolidate your orders. Minimize the number of shipments by consolidating the products that require air freight shipment.
- Consolidate orders from different departments within your institution. We can bill individual departments separately, if necessary. Please instruct us accordingly when placing your order.
- Confirm your acceptance of air freight costs on your order.
- For collect shipments, include your account number with your designated carrier.
- Submit orders once to avoid duplication. If you place orders by mail, fax or email, it is unnecessary to send a confirmation copy. Our Service Representatives are always happy to help you with the status of your order.

CHROMADEx WET ICE/DRY ICE SHIPPING INFORMATION

Recommended long-term storage of ChromaDex refrigerated products is via one of three ways:

- 2-8°C Refrigerator/cooler
- 20°C Freezer
- 70°C Ultracold freezer at or below -70°C

Not all items requiring long-term cold storage need to be shipped in ice. Shipping conditions may differ from our recommended storage temperatures. We will ship under conditions that ensure the quality of the product. We try to estimate the amount of wet or dry ice needed, but we cannot predict time lost in Customs or on route. The customer is responsible for prompt Customs clearance. If you cannot ensure prompt Customs clearance, be sure to specify additional ice. To help prevent delays in Customs, please include name and telephone number or fax number of persons to contact upon the product's arrival.

STANDARD TERMS AND CONDITIONS FOR THE PURCHASE AND SALE OF CHROMADEx, INC. PRODUCTS AND/OR SERVICES

1. Definitions. As used in these Terms and Conditions ("Agreement"), (a) "Seller" means ChromaDex, Inc., its affiliates and their respective successors and assigns, (b) "Buyer" means the party executing this Agreement to purchase the Products or Services and/or the party accepting delivery of the Products or Services under this Agreement, (c) "Products" mean, but are not limited to, the standards, kits reference materials and other equipment and goods provided by Seller under this Agreement, and (d) "Services" means all lab work and other services provided by Seller in connection with the sale, use or installation of the Products

2. Acceptance, Merger and Integration. Buyer will be deemed to have accepted this Agreement when Seller returns to Buyer an executed copy of this Agreement, by confirming this Agreement by its purchase agreement or confirmation, or by acceptance of delivery of the Products or Services under this Agreement. Seller will be deemed to have accepted this Agreement when Buyer returns to Seller an executed copy of this Agreement, or, at Seller's option, when Seller begins substantial performance under this Agreement. Seller reserves the right to accept or reject any purchase agreement or confirmation. Buyer has no right to cancel or defer shipment, delivery or installation unless agreed to in writing by Seller. Notwithstanding the manner in which Buyer accepts this Agreement, Buyer's acceptance of this Agreement is limited exclusively to the acceptance of all of Seller's terms and conditions set forth in this Agreement. Buyer may acknowledge this Agreement by its purchase agreement, confirmation or acknowledgment form, but any and all terms and conditions contained in such purchase agreement, confirmation or acknowledgment form or other communications with respect to the transaction contemplated by this Agreement, or subsequent to the date hereof, shall be without any force and effect. This Agreement, and all exhibits, riders or limited warranties attached hereto, is intended to be the exclusive and final statement of the terms and understandings relative to the subject matter hereof, merging herein and superseding all negotiations and prior written or oral agreements between the parties as to the subject matter of the purchase of the Products or Services

3. Payment. Payment shall be net thirty (30) days from the date of shipment; provided, however, Seller reserves the right to modify such credit terms in its sole and absolute discretion. Failure to make prompt and full payment hereunder constitutes a material breach of this Agreement and affords Seller the right to suspend its performance without liability to Buyer and cancel this Agreement and any purchase orders. Buyer has no right of setoff. If full payment is not made when due, Seller shall be entitled to interest on any amount unpaid at the rate of 1.5% per month until Seller receives payment in full. In addition, if any amount payable to Seller is not received by Seller within 10 days of the due date, a late payment processing charge equal to 6% of such delinquent amount will be paid by Buyer to Seller to defray the expense incident to the processing, administration and collection of delinquent payments. Buyer agrees to reimburse Seller for any and all expenses Seller may incur, including collection agency fees and/or reasonable attorneys' fees, in taking any action contemplated by this Paragraph

4. Taxes and Import Duties. The price of the Products or Services specified does not include federal taxes, state or local sales taxes, use taxes, occupational taxes or import duties. Unless prohibited by law, Buyer is responsible for and shall pay all applicable sales, use, occupational, excise, value added or other similar taxes or import duties applicable to the manufacture, sale, price, delivery or use of the Products or Services provided by Seller, or in lieu thereof, Buyer shall provide Seller with a tax-exemption certificate acceptable to and considered valid by the applicable taxing authorities

5. Delivery and Risk of Loss. All sales are FOB/CA Seller's U.S. dock. Risk of loss, destruction of or damage to the Products shall be Seller's until delivery of the Products to a common carrier at Seller's U.S. dock. Thereafter, title shall pass to Buyer and Buyer shall be fully responsible, and shall hold Seller harmless, for and assume all risk of loss, destruction of or damage to the Products. Loss or damage to the Products after risk of loss has passed to Buyer will not release or excuse Buyer from its obligations under this Agreement to Seller, including the obligation to make full payment of the purchase price. Seller reserves the right to pack or ship orders in the most economical manner. However, where Buyer requests special packaging or shipping, any additional cost will be billed to and be the responsibility of Buyer

6. Delivery Delays. Seller shall use reasonable efforts to make prompt deliveries in a commercially reasonable manner. Delivery dates and estimates are, however, not guaranteed. Seller disclaims any liability or responsibility, and Buyer shall hold Seller harmless, for the late or non-delivery of Products or Services. Buyer has no right to delay or defer delivery or acceptance

7. Rejection and Revocation of Acceptance. Any rejection or revocation of acceptance of Products or Services by Buyer must be made within thirty (30) days of delivery of such Products and Services and any attempted rejection or revocation of acceptance of such Products and Services made thereafter shall be null and void unless agreed to in writing by Seller. Failure to make a claim within such period shall be conclusive evidence that the Products and Services were satisfactory in all respects and supplied in accordance with ordered specifications

8. LIMITED WARRANTY AND DISCLAIMER OF ALL OTHER WARRANTIES. (a) SELLER WARRANTS FOR A PERIOD OF 30 DAYS COMMENCING ON THE DATE OF DELIVERY THAT THE PRODUCTS AND SERVICES (i) MEET OR EXCEED THE WRITTEN SPECIFICATIONS SET FORTH ON SELLER'S ORDER ACKNOWLEDGEMENT, AND (ii) ARE FREE OF MATERIAL DEFECTS IN DESIGN OR WORKMANSHIP. BUYER'S EXCLUSIVE REMEDY IN CONNECTION WITH THESE EXPRESS WARRANTIES IS THE REPAIR OR REPLACEMENT OF THE PRODUCTS OR SERVICES OR, AT SELLER'S OPTION, A REFUND OF THE PURCHASE PRICE, IF ANY, ACTUALLY PAID BY SELLER FOR THE NONCONFORMING PRODUCTS OR SERVICES. IF BUYER OBTAINS A REFUND OF THE PURCHASE PRICE, BUYER SHALL FIRST SHIP THE PRODUCTS SUBJECT TO THE REFUND TO SELLER AND TRANSFER TITLE TO SAID PRODUCTS TO SELLER AS SOON AS PRACTICABLE

(b) EXCEPT FOR THE EXPRESS LIMITED WARRANTY SET FORTH IN THIS SECTION 8, SELLER MAKES NO EXPRESS OR IMPLIED WARRANTIES IN THIS AGREEMENT OR OTHERWISE TO THE FULLEST EXTENT PERMITTED BY LAW, SELLER DISCLAIMS ALL WARRANTIES, WRITTEN, EXPRESS OR IMPLIED, INCLUDING ALL WARRANTIES OF MERCHANTABILITY AND/OR FITNESS FOR A PARTICULAR PURPOSE

(c) ANALYSES ARE CARRIED OUT IN THE BEST CONDITIONS AVAILABLE TO SELLER IN ACCORDANCE WITH TECHNOLOGY DEVELOPED BY SELLER. INTERPRETATIONS ARE BASED UPON ANALYSIS RESULTS AND ON INFORMATION PROVIDED BY BUYER. INTERPRETATIONS, ASSESSMENTS AND CONCLUSIONS ARE PREPARED WITH A REASONABLE DEGREE OF CARE BUT BUYER ACKNOWLEDGES THAT IN ANY EVENT THEY CAN ONLY BE CONSIDERED AS BEING THE SIGNATORY'S OPINION. SELLER CANNOT GUARANTEE THAT THESE WILL ALWAYS BE CORRECT OR ABSOLUTE, PARTICULARLY IN VIEW OF THE CONSTANT EVOLUTION AND RE-EVALUATION OF SCIENTIFIC KNOWLEDGE AND REGULATIONS. IN ALL CASES BUYER MUST VERIFY THE VALIDITY OF ANY INTERPRETATIONS, ASSESSMENTS AND CONCLUSIONS SUPPLIED BY SELLER IF IT WISES TO RELY ON THE SAME IN RESPECT OF MATTER OF IMPORTANCE AND SHALL DO SO AT ITS OWN RISK

(d) ANALYSIS RESULTS ARE PREPARED AND SUPPLIED EXCLUSIVELY FOR THE USE OF BUYER AND MAY NOT BE DIVULGED TO A THIRD PARTY WITHOUT THE PRIOR WRITTEN AGREEMENT OF SELLER, WHICH CONSENT MAY BE WITHHELD BY SELLER IN ITS SOLE AND ABSOLUTE DISCRETION IF SUCH WRITTEN CONSENT IS GIVEN BY SELLER. BUYER SHALL INDEMNIFY, DEFEND AND HOLD SELLER HARMLESS FOR ANY DAMAGES ARISING OUT OF, IN CONNECTION WITH OR RELATED TO THE DIVULGENCE OF SUCH RESULTS TO A THIRD PARTY

(e) EACH ANALYTICAL REPORT RELATES EXCLUSIVELY TO THE PRODUCT RECEIVED BY SELLER AS SPECIFIED IN THE WRITTEN ACCEPTANCE OF ORDER BY SELLER. SELLER ACCEPTS NO RESPONSIBILITY, AND BUYER SHALL HOLD SELLER HARMLESS, FOR THE WAY THE SAMPLE WAS COLLECTED, STORED OR DELIVERED TO SELLER UNLESS SELLER HAS SPECIFICALLY AGREED IN WRITING TO UNDERTAKE SUCH TASKS ITSELF

(f) SELLER ACCEPTS NO RESPONSIBILITY, AND BUYER SHALL HOLD SELLER HARMLESS, FOR ANY LOSS OR DAMAGE THAT MAY OCCUR TO ANY SAMPLE IN TRANSIT. BUYER WILL AT ALL TIMES BE LIABLE FOR THE SECURITY, PACKAGING, AND INSURANCE OF THE SAMPLE FROM ITS DISPATCH UNTIL IT IS DELIVERED TO THE OFFICE OR LABORATORIES OF SELLER. SELLER WILL

USE COMMERCIALY REASONABLE CARE IN HANDLING AND STORING SAMPLES, BUT SELLER SHALL NOT BE HELD RESPONSIBLE, AND BUYER SHALL HOLD SELLER HARMLESS, FOR ANY LOSS OR DESTRUCTION OF SAMPLES EVEN AFTER THEIR RECEIPT AT ITS LABORATORIES

(g) BUYER WARRANTS AND REPRESENTS TO SELLER THAT ALL SAMPLES TO BE SENT TO SELLER FOR ANALYSIS SHALL BE IN A SAFE AND STABLE CONDITION AND BUYER SHALL INDEMNIFY, DEFEND AND HOLD SELLER HARMLESS FOR ANY AND ALL DAMAGES WHICH SELLER MAY SUFFER AS A RESULT OF ANY SAMPLE NOT BEING IN A SAFE OR STABLE CONDITION, NOTWITHSTANDING THAT BUYER MAY HAVE GIVEN AN INDICATION ON THE SAMPLE OR ANY ORDER FORM OF ANY PERCEIVED PROBLEM WITH THE SAMPLE

9. Sample Storage. Samples will be destroyed by Seller 30 days after the analysis has been completed by Seller. If Buyer desires a sample to be retained by Seller, Buyer must so request in writing, in which case the terms on which the sample will be retained must be agreed in writing between Seller and Buyer. In the absence of such mutual agreement, Seller shall have no obligation to retain the sample

10. LIMITATION OF LIABILITY. TO THE FULLEST EXTENT PERMITTED BY LAW, THE PARTIES WAIVE AND RELINQUISH ANY CLAIMS, DEMANDS, AND CAUSES OF ACTION OR RECOVERIES FOR PUNITIVE DAMAGES, EXEMPLARY DAMAGES, OR STATUTORY DAMAGES. IN NO EVENT WILL SELLER BE LIABLE FOR INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING UNDER THIS AGREEMENT OR OTHERWISE WITH RESPECT TO THE SALE OF THE PRODUCTS OR PROVISION OF SERVICES, INCLUDING ANY LOST REVENUES OR PROFITS, CONSEQUENTIAL AND/OR INCIDENTAL DAMAGES, BUSINESS INTERRUPTION OR DAMAGE TO BUSINESS REPUTATION, REGARDLESS OF THE THEORY UPON WHICH ANY CLAIM MAY BE BASED, INCLUDING ANY TORT OR STATUTORY CAUSES OF ACTION. NOTWITHSTANDING THE TERMS OF ANY LIMITED WARRANTY, AND/OR IN THE EVENT ANY LIMITED WARRANTY PROVIDED TO BUYER FAILS OF ITS ESSENTIAL PURPOSE, IN NO EVENT WILL SELLER'S ENTIRE LIABILITY TO BUYER (IN TORT, CONTRACT, FOR INTELLECTUAL PROPERTY INFRINGEMENT, OR OTHERWISE) EXCEED THE PURCHASE PRICE ACTUALLY PAID BY BUYER FOR THE PRODUCTS AND/OR SERVICES SUBJECT TO THE CONTRACT OR AGREEMENT IN DISPUTE, OR ANY DEFECTIVE OR NONCONFORMING PORTION THEREOF, WHICHEVER IS THE LESSER AMOUNT. BOTH PARTIES UNDERSTAND AND AGREE THAT THIS LIMITATION OF LIABILITY ALLOCATES RISK OF NONCONFORMING GOODS BETWEEN THE PARTIES AS AUTHORIZED BY THE UNIFORM COMMERCIAL CODE AND OTHER APPLICABLE LAW. THE PRICE OF THE PRODUCTS AND SERVICES REFLECTS THIS ALLOCATION OF RISK AND THE LIMITATIONS OF LIABILITY, INCLUDING THE EXCLUSION OF SPECIAL, INDIRECT, CONSEQUENTIAL AND INCIDENTAL DAMAGES, IN THIS AGREEMENT

11. Default. The failure of Buyer to perform any obligation hereunder, the failure to materially perform any other agreements between Buyer and Seller, or Buyer's bankruptcy, insolvency, fraud or inability to pay its debts as they mature, shall constitute a default under this Agreement and shall, in addition to any other remedies at law or in equity, afford Seller, among other remedies, all of the remedies of a secured party under the applicable Uniform Commercial Code. In the event of such default, Seller may, in addition to pursuing any of the remedies provided by law, equity or as set forth in this Agreement, refuse to provide warranty, repair and/or maintenance Service and/or deliver Products under this or any Service or maintenance agreement relating to the Products, and may also cancel this Agreement and any pending orders without liability to Buyer. In the event of default, Seller may also, without limiting its other remedies, terminate this Agreement and apply any and all payments received hereunder or otherwise from Buyer to any damages that Seller may have as a result of the breach of this Agreement or otherwise. To the fullest extent permitted by law, all of Seller's rights and remedies under this Agreement shall be cumulative and not exclusive

12. Reservation of Rights: The sale of Products and Services covered by this Agreement shall not confer upon Buyer any license or right under any patents, trade secrets or other proprietary information owned or controlled by Seller, or the right to otherwise utilize such proprietary information, it being specifically understood and agreed that all such rights are reserved to Seller

13. Waiver and Severability. No claim or right arising out of a breach of this Agreement can be discharged in whole or in part by a waiver or renunciation of the claim or right unless the waiver or renunciation is supported by consideration and is in writing signed by the aggrieved party. If any term, covenant, warranty, remedy or condition of this Agreement, or the application thereof to any person or circumstance shall, to any extent, be held or deemed invalid or unenforceable, the remainder of this Agreement or the application of such term, covenant or provision, to persons or circumstances other than those to which it is held invalid or unenforceable, shall not be affected thereby, and each remaining term, covenant or provision of this Agreement shall be deemed valid and enforced to the fullest extent permitted by law

14. Force Majeure. Seller shall have no liability or obligation to Buyer of any kind, including, but not limited to, any obligation to deliver Products or provide Services, arising from any delay or failure to perform all or any part of this Agreement as a result of causes, conduct or occurrences beyond Seller's reasonable control, including, but not limited to, commercial impracticability, fire, flood, earthquake, lightning, storm, accidents, act of war, terrorism, civil disorder or disobedience, act of public enemies, problems associated with transportation (including car or truck shortages), shortages of energy or raw materials, acts or failure to act of any state, federal or foreign governmental or regulatory authorities, labor disputes, strikes, or failure of suppliers to make timely deliveries of materials, goods or services to Seller

15. Indemnification. To the fullest extent permitted by law, Buyer shall defend, indemnify and hold Seller harmless from any and all claims, demands, subrogation claims by third parties, including Buyer's insurers, causes of action, controversy, liabilities, fines, regulatory actions, seizures of Product, losses, costs, expenses (including, but not limited to attorneys' fees, expert witness expenses and litigation expenses) (hereinafter "Claim"), arising from or in connection with any Claim asserted against Seller for any damage, environmental liability, patent or intellectual property infringement caused by Buyer's use, modification or alteration of the Products, injury, death, loss, property damage, delay or failure in delivery of Seller's Products or any other Claim, whether in tort, contract, breach of warranty or otherwise, relating to this Agreement, the business relationship between the parties, the Products or Services provided hereunder, or Buyer's breach of this Agreement. Notwithstanding the foregoing, Buyer has no indemnity obligation to Seller to the extent that any Claims result from the gross negligence of Seller. Buyer, for itself and its insurers, expressly waives any and all limitations or liability caps, if any, on Buyer's contribution liability to Seller, and any and all statutory or common law lien rights or Claims against Seller arising from any applicable workers compensation or disability acts, which Buyer might or could assert against Seller or Seller's insurers in the event of the personal injury or death of Buyer's employees, representatives or servants. Without limiting the foregoing, Buyer, for itself and its insurers, also waives any liens, Claims or other rights it may have as a result of being subrogated to any rights of its employees, representatives or servants

16. Relationship. The relationship between Seller and Buyer shall be that of independent contractors and neither party, its agents and employees, shall under no circumstances be deemed the employees, distributors, franchisees, agents or representatives of the other party

17. Assignment and Modification. The rights and obligations of Buyer under this Agreement shall not be assignable with the prior written consent of Seller. This Agreement shall not be modified, altered or amended in any respect except by a writing signed by the parties. Any variation, modification or addition to the terms set forth in this Agreement shall be considered a material modification and shall not be considered part of this Agreement

18. Governing Law. This Agreement and all claims and causes of action shall be governed by and subject to the internal laws (exclusive of the conflicts of law provisions) and decisions of the courts of the State of California. The sole and exclusive venue for all claims and causes of action between the parties shall be the state or federal court located in Orange County, California
