# Crompton Instruments Power Measurement, Control and Protection Solutions

Tyco Electronics offers one of the largest product ranges of power measurement, control and protection instrumentation for switchgear and generator set manufacturers, panel builders and OEMs. Crompton Instruments branded products offer proven reliability across a diverse array of industries including power generation, process control, test and measurement, utility, marine, defence and energy management applications.

This combined catalogue and price list presents a small selection of our complete product portfolio and is in no way exhaustive.

# Instrumentation, power measurement and control

Crompton Instruments products have been synonymous with innovation for over a century. Beginning with a variant of the Serrin arc lamp, this heritage continues with the Integra digital metering systems, demonstrating a continuing commitment to putting new technology to work in the marketplace.

The focus on measuring energy began with Colonel Crompton's patented concept for a revolving energy counter and his support for a combined circuit measuring voltage and current. Starting with analogue instruments, the product range had widened by the 1970s to include transducers, protector trip relays and current transformers. During the 1990s, this portfolio was strengthened with a progressive upgrade to micro-based integrated technology from discrete circuitry.

Crompton Instruments products take a dual-track approach: providing both cost efficient and user-friendly technology.

Crompton measuring and control solutions provide a cost effective upgrades to existing analogue equipment and efficient alternatives to multi-function relays. Products like the Integra digital metering systems provide sophisticated, yet user-friendly innovation, combining microprocessor technology with button-driven menus. The extensive use of remote communication protocols allow individual instruments to be fully integrated into comprehensive energy management systems.

Crompton Instruments products: applied innovation for the entire electrical energy circle, from power generation to final consumers.

Over the past years, Tyco Electronics has rapidly grown to become one of the world's largest passive component manufacturer. Leading product brands such as Raychem, AMP, Elcon, P&B and many others, offers customers a large portfolio of connectors, relays, circuit breakers, fibre optic and wireless products, motors and other power components in 25 product segments.

## Energy Division – Connecting the world of power

The Energy Division, a global operating unit of Tyco Electronics, provides products and systems for a wide range of industries including power utilities, equipment manufacturers, and transportation. Each business unit within the Division comes with specialised products or systems and focused set of application skills. In addition to Crompton Instruments, other product brands include AMP, Axicom, Dorman Smith, Dulmison, Raychem and Simel.

By globally synchronising product development and manufacturing capacities, the Energy Division is

able to bring innovative and technology driven products quickly to market. The Division's significant position in individual segments and its combined size and expertise allow it to provide customers with a high level of engineering assistance and continuous after-sales support.

Tyco Electronics Energy Division is a leading supplier of:

- Cable accessories
- Connectors and fittings
- Insulators and insulation
- Surge arresters
- Switching, protection and lightning
- Power measurement and control

## complete product range

### Integra Multi-function Metering Systems

Integra range of multi-function metering systems measure, display and communicate over 100 parameters. Integra systems can be integrated into energy management and SCADA systems. Options include pulsed, analogue and RS485 communication protocols, a choice of DIN, DIN-rail and ANSI case-styles and LED or LCD displays.

[www.crompton-instruments.com/integra.html](http://www.crompton-instruments.com/integra.html)

### Integra and Paladin Transducers

Extensive range of transducers providing measurement, isolation and conversion of electrical parameters into industry standard DC output signals, offering single or multiple analogue outputs within a single case housing.

[www.crompton-instruments.com/transducer.html](http://www.crompton-instruments.com/transducer.html)

### kWh Meters

DIN-rail mounted or self-contained panel meters measure combined kWh or kVArh with pulsed or analogue output options and selectable CT and VT ratios. Microprocessor controlled circuitry provides up to Class 1.0 accuracy with outputs displayed directly on the instrument monitor or a remote PC.

[www.crompton-instruments.com/kwh.html](http://www.crompton-instruments.com/kwh.html)

### Protector Trip Relays

Trip relays continuously monitor and protect any electrical parameter within a set point limit. The range offers single and multi parameter units, earth leakage protection, ground fault relays, vector shift and ROCOF.

[www.crompton-instruments.com/protector.html](http://www.crompton-instruments.com/protector.html)

### Analogue Instruments

Traditional range of analogue instruments includes ANSI switchboard meters, panel indicators, sealed and ruggedized instruments, and complementary selector switches for line-to-line and line-to-neutral readings. All instruments are available in a range of styles, sizes and performance specifications.

[www.crompton-instruments.com/analogue.html](http://www.crompton-instruments.com/analogue.html)

### Current Transformers

Extensive range of current transformers for reducing high primary currents down to a consistent 5 or 1 Amp secondary current. Options include moulded case width, busbar and aperture sizes, tape wound, 3-in-1, balanced and split cores, current ratings and various mounting options.

[www.crompton-instruments.com/ct.html](http://www.crompton-instruments.com/ct.html)

### Meter Relays and Digital Indicators

Meter relays and digital indicators are ideal for monitoring, process control and load shedding applications. This range includes digital and analogue meter relays, digital bargraph indicators and controllers.

### Shunts

Shunts provide an accurate dc millivolt signal, exactly proportional to the system current, to drive ammeter indicators, overload protection and control devices. This range includes industrial, switchboard, DEF 66-13, DIN, base mounted, tag end, lightweight and panel meter shunts in a variety of formats and configurations.

# Integra Ci1 Energy Meter

The Integra Ci1 energy meter is specially designed and developed as a cost effective Watt hour and VAr hour meter to complement the current Integra Ci series. The Integra Ci1 self-contained 96mm DIN panel mounted Watt hour, VAr hour meter measures the real consumption of active and reactive energy to Class 1.0 accuracy.

The backlit LCD screen displays 8 character counter indicating Watt hour or VAr hour units. The optional modules enables transfer of energy measurements to building management systems (BMS) via pulsed or digital communication options.

## Programmable Functions

Integra Ci1 provides simple programming to suit single phase 2-wire, three-phase three wire and three-phase four-wire un-balanced system configurations, CT ratio settings and configuration of selected communication options. To prevent unauthorised access to the product configuration settings, all set-up screens offer password protection.

## Display

Direct access to display the programmed set CT ratio, Watt hours import and export, VAr hours import and export and the phase sequence test routine for both voltage and current phases. During the accumulation of the Wh or VArh the running icon will flash at a rate dependant on the displayed parameter.

## Plug-in Modules

Plug-in modules allow to fit either maximum of two isolated pulsed output relays or a RS485 communication module and one isolated pulsed output relay. The communication output module can be programmed internally to respond either to Modbus® RTU or Johnson Controls.

## Panel Mounting

Integral retention clips allow fast, safe and secure panel mounting in various material thicknesses without the need for external screws or clips.

# Integra Ci3 Digital Metering System

The Integra Ci3 digital metering system (dms) represents the first model of a new generation of digital metering systems designed to complement the current Crompton Instruments Integra series.

The Integra Ci3 meter is an accurate and cost effective solution for measurement and display of all major electrical and power quality parameters.

Designed, developed and manufactured in the UK, the Integra Ci3 dms builds on Crompton Instruments' long established reputation for metering product quality.

The product features a DIN 96 panel mounted enclosure, backlit LCD screen and user programmable CT ratios, all accessible via an intuitive user interface. Integra Ci3 dms measures 17 electrical parameters including total harmonic distortion (THD) up to the 31st harmonic.

## Programmable Functions

Integra Ci3 dms is programmable to suit single-phase two-wire, three-phase three-wire and three-phase four-wire system configurations. Programmable CT ratios enable to display any current range.

## Display

The parameters can be viewed on a backlit LCD screen. The 15 screens are accessible via four buttons on the front panel allowing to scroll between various screens making the navigation very user-friendly, intuitive and above all - simple.

## Plug-in Modules

Integra Ci3 offers two output ports at the rear of the product, to allow the fitting of either two isolated pulsed output relays or a RS485 communication module such as Modbus® or Johnson Controls communication output. These are configurable via internal settings.

## Panel Mounting

Integral retention clips allow fast, safe and secure panel mounting in various material thicknesses without the need for external screws or clips.

## Integra 1630 Digital Metering System

Multi-function Integra 1630 digital metering system provides high accuracy 0.2% measurement, display and communication of all major electrical and power quality parameters including total harmonic distortion (THD) up to the 31st harmonic. To suit user requirements, the range includes single-phase, three-phase three-wire and three-phase four-wire capability, all selectable at the point of installation.

### Features

- Auxiliaries: 100/250V ac/dc (12/48V dc optional)
- Options: Profibus™, Modbus® TCP, Bacnet IP, RS485, Pulsed output

### RS485 Modbus® RTU

Integra 1630 digital metering systems offer an RS485 communication port for direct connection to SCADA systems using the Modbus® RTU protocol or the Johnson Controls Metasys N2 protocol. Remote monitoring enables the user to record systems parameters in real time, using high resolution numbers. The Integra 1630 dms establishes the format for the master's query automatically, and responds with the correct protocol using IEEE floating point values. The Modbus® protocol option also offers user programmable word order and support for function 8 subfunction 0, return query data diagnostic.

## 3-in-1 Current Transformers

A range of 3-in-1 current transformers combining three traditional current transformers in one moulded case. 3-in-1 current transformers can be directly installed next to a three-phase moulded case circuit breaker, thus saving installation time where fitting three standard individual current transformers would be required. The M3N1 range of current transformers offers primary currents between 60-630A with 5A secondaries with up to class 0.5 accuracy performance.

Plug-in metal feet, DIN-rail clips and busbar mounting options are supplied as standard.

# Moulded Case Current Transformers

## Ebony Series

The range of Crompton Instruments Ebony current transformers offers wide system current ratings, apertures and case sizes to suit every application. Manufactured to meet IEC 60044-1:2003 the range benefits include ratio rating from 5/5 to 4000/5, accuracy up to class 0.5, integral terminal cover for safety and multiple mounting options.

### MA5Y Range

Case Size: 77mm wide x 50mm deep x 116mm high

3" wide x 2" deep x 4.5" high

Fixing: M8 stud primary bar

Weight: 0.45Kg

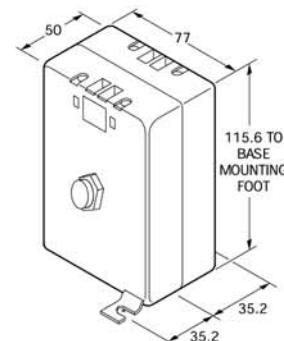

Model type	Ratio range	VA at Class 3	VA at Class 1
MA5Y	5/5	7.5	5
MA5Y	10/5	7.5	5
MA5Y	15/5	7.5	5

## Ring Current Transformers

Tyco Electronics under its Crompton Instruments brand offers an extensive portfolio of current transformers that provide comprehensive measuring accuracy. MR transformers accurately measure high primary currents, converting the primary current into a proportional 5 Amp secondary current.

# Earth Leakage Relays

Residual current devices are used to detect potentially dangerous earth fault currents before damage is caused. The 373-ELR earth leakage protection relay allows the fault current to be continuously monitored and compared with the user selectable leakage level. Should the leakage exceed this level, the relay will trip to indicate a fault condition. With a very fast response time of under 40ms, the supply can be disconnected before serious damage can occur.

## Earth Leakage Relay - Standard (DPCO)

Description	Cat. no.
24-48 volts ac and dc	373-ELRW-CBC5-A2-ST
100-250 volts ac and dc	373-ELRW-CBC5-A3-ST

## Earth Leakage Relays - Pre-Alarm Option (SPCO)

Description	Cat. no.
24-48 volts ac and dc	373-ELRW-CBC5-A2-PA
100-250 volts ac and dc	373-ELRW-CBC5-A3-PA

- Monitors and detects potentially dangerous earth leakage currents
- Used in conjunction with core balanced CTs
- Precision digital settings
  - 10 x current trip levels 30mA-10A
  - 16 x time delays 0-10 seconds
- LED Bar-graph display
- 0/1mA analogue output
- User selectable energise or de-energise on trip link
- Double-pole change over relay (standard)
- Single-pole pre-alarm option

# Core Balance CTs

The CBT-94F series of core balanced current transformers are exclusively for use with our 373-ELR earth leakage protection relay. The extremely sensitive toroidal core and secondary winding are encapsulated by a self extinguishing case designed to provide excellent mechanical strength, protection from damage and electrical insulation.

# Analogue Instruments

High quality analogue instruments designed to measure an extensive range of electrical and electronic parameters. This comprehensive range offers DIN instruments, ANSI switchboard meters, panel indicators, sealed and ruggedised instruments and complementary selector switches for line-to-line and line-to-neutral readings. Instruments are precision engineered and robust in design, ensuring accurate measurement and display in the most demanding of environments. All instruments are available in a range of styles, sizes and specifications to meet the exacting needs of your industry.

## Hours Run Meters

### M Series Elapsed Time or Hours Run Meters

Elapsed time meters (ETM) or hours run meters monitor ON/RUN time allowing the user to effectively control production efficiency, cost estimation and service period monitoring for preventative maintenance. Time is measured in increments of 0.01h up to 99999.99 hours after which the meter automatically resets to zero. Meters are non resettable before this time to prevent accidental resetting.

### Specifications

#### AC

Display	99999.99
Voltage	100-125V ac
	200-250V ac
	380-440V ac
Frequency	50 or 60Hz
Operating temperature	-25C to +80C
Burden	1VA (100-25V ac)
	2VA (200-250V ac)
	3.5VA (380-440V ac)

#### DC

Display	99999.99
Voltage	12-30V dc
	10-80V dc
	110V dc
Operating temperature	-20C to +70C
Burden	0.5VA (6-30V dc)
	1VA (10-80V dc)
	1.5VA (110V dc)

## Selector Switches

A high quality range of panel mounted selector switches. This allows for voltage or current switching of three phases allowing the use of common metering,

The rugged construction and integral fascia is ideal for switchgear and control applications.
