# Danfoss Industrial Automation core products

## Fluid controls

Solenoid valves: Direct, servo, assisted lift and proportional operated valves for water, air, oil and steam application. Differential pressure from 0 to 40 bar and connections from G1/8 to 4" flange. Thermostatic valves for cooling applications, biomass boilers, fireplaces and solar systems. Regulation ranges from 0-90°C and connections from G3/8 to 4" flange.

Angle seat valves for demanding industrial applications. Differential pressure from 0 to 16 bar and connections from G3/8 to G2.

Direct operated valve  
for closed and drain  
systems

Assisted lift operated  
valve for closed and  
drain systems

Servo operated valve  
for open systems

Valve for steam  
applications

Thermostatic valve

Angle seat valve  
for demanding  
applications

## Pressure transmitters

Pressure transmitters for industrial and marine applications. Design in cartridge, block and box with measuring range up to 600 bar. Output signal 4-20 mA, 0-10 V, ratiometric etc. with an accuracy from 0,1% FS. Versions with marine and ATEX approvals.

Pressure transmitter in  
cartridge design  
for industrial applications

Pressure transmitter with flush  
diaphragm for demanding  
industrial applications

Pressure transmitter in  
block design for industrial  
and marine applications

Pressure transmitter in  
box design for marine  
applications

# Temperature sensors

Temperature transmitters for industrial and marine applications with measuring range from -50°C to 800°C. Sensor type Pt100, Pt1000, PTC, NTC, integrated transmitter etc in different designs for example DIN 43650, DIN B, cable etc. Versions with marine and ATEX approvals.

Temperature transmitter  
in a cable version

Flexible temperature transmitter  
with different sensing elements  
and electrical connections

Temperature transmitter  
equipped with a DIN 43650 for  
industrial applications

Temperature transmitter  
equipped with a DIN B (B-head)  
for industrial and marine  
applications

# Switches

Pressure and temperature switches (on-off) for industrial and marine applications from -60°C to 300°C or -1 to 400 bar.  
Degree of enclosure from IP33-67 in different designs, versions with marine, TÜV and ATEX approvals.

Pressure switch for  
industrial applications  
(enclosure degree from  
IP 33 to IP 55)

Pressure switch for  
boiler control

Temperature switch for  
industrial applications  
(enclosure degree  
from IP 54 to IP 65)

Pressure switch for  
industrial and marine  
applications in block  
design

Temperature switch  
for marine applications  
(enclosure degree IP 67)

The main industries for these products are

Marine

Mobile hydraulics

Air compressors

Wind turbines

Industrial hydraulics

Heating equipment

Industrial water

# Fluid control

With Danfoss valves you gain high quality, balanced with cost efficiency, making them the first choice in a many industrial applications.

Our valves are virtually maintenance free and designed to provide reliable service, year after year.

## Three ways of efficiently controlling fluids:

**Solenoid valves** are an easy way to control and regulate fluids and gasses. Our programme consists of direct-operated, servo-operated and assisted lift versions. Solenoid valves are the right choice when you have media with limited dirt content and small to high flow volume.

Our solenoid valve programme consists of two ranges:

- The compact A range
  - offering small physical dimensions for control of flow where space is limited.
- The high performance B range
  - a sturdy and universal broad programme for control of flow in industrial applications and within heating and sanitary systems.

**Pneumatically activated angle seat valves** are designed for specialised and demanding applications. These robust valves are the right choice for media with high dirt content, high viscosity, high ambient and media temperatures and large flow volumes. They are also suitable for humid environments, explosion hazard environments and for applications with low or unknown pressure conditions.

**Thermostatic self-acting valves** are a simple and reliable way to control the temperature of cooling equipment. They do not require electricity and they are insensitive to dirt and media pressure, making them a highly robust choice.

# Example: waterbooster systems

An EV250B solenoid valve, a great all-round valve, is the preferred choice for many manufacturers in applications with low differential pressures, such as heating systems. Its design not only allows for a wide pressure range, it also reduces noise and increases the lifetime of the system through avoidance of water hammer.

## Other applications

- Booster pump units
- Membrane filtration units
- Fire-fighting pumping stations and equipment
- Biomass boilers
- Irrigation system
- Ultra and high purity water
- Catering water
- Desalination of saline water
- Water leak protection
- Car wash
- Dentist equipment
- Wind turbines
- Steam boilers
- Steam generators
- Laundry system
- Burners
- Cleaning units
- Dishwashing
- Degassing system
- Sterilizers and autoclaves
- Lubricated screw compressors
- Oil free compressors
- Drainage
- Pool control
- Solar
- Showers
- Saunas
- Sprinklers
- Petrol dispensers
- Heavy duty application (EEx approvals)

# Use the icons to find the right valve

Use the icons to help select the right solenoid valve for your application. Displayed on the top right corner of the following pages, the icons symbolise values and applications for each solenoid valve type.

**Application:** Select the right valve based on the differential pressure of the system.

Closed or drain systems

In a closed-circuit system, there is no significant pressure difference between the inlets and outlets. For example, central heating systems are closed-circuit systems – as are tank systems where the drain is located at a low level in the tank.

Closed system

Drain system

Open systems

In an open-circuit system, one side of the valve is connected at a relatively high pressure, while the other side is connected to lower fluid or air pressure - for example a tap.

Open system

**Value:** The following icons indicate values for the different solenoid valves - select according to your needs.

Insensitive to dirt

A dirt-resistant valve is fitted with a coaxial, self-cleaning filter which protects the valve pilot. Valves controlled by a blue coil have a square armature which allows dirt particles to pass through easily.

Long lifetime and high performance

A specially shaped and strengthened diaphragm reduces stress on the rubber, and prolongs valve lifetime. Coil lifetime is also extended, depending on the shape and IP class.

Effective water hammer damping / soft closing

The valve design helps control damping in the very late closing stage. To minimise water hammer, some valves have an optimised diaphragm assembly and equalising orifice. By changing the equalising orifice on the EV220B 15-50, you can also increase the closing time.

Results are based on comparisons between Danfoss valves only.

Complete valve or valve and coil separately

A complete solenoid valve consists of: Valve + coil + plug.

The valves can be delivered as separate parts - valve housing, coil and plug or as complete valves:

Valve housing

Coil

Plug

Complete valve

# EV310A direct-operated 3/2-way compact solenoid valves

EV310A covers a wide range of small competitive, direct-operated 3/2-way solenoid valves for use within industrial applications, for example pilot valve applications.

- 3/2-way
- Direct-operated

- DN 1.2 - DN2
- G 1/8" to G 1/4"
- Ambient temperature: +50°C
- Brass or stainless steel valve body
- NC (normally closed) and NO (normally open) versions

## Dimensions and weight:

# EV210A direct-operated 2/2-way compact solenoid valves

EV210A covers a wide range of small, direct-operated 2/2-way solenoid valves for use in industrial machinery.

The compact design together with the broad range of coils means that EV210A covers a broad variety of industrial applications.

- 2/2-way
- Compact dimensions
- Direct-operated
- DN 1.2 - DN 3.5
- G 1/8 to G 1/4
- Ambient temperature: +50°C
- Brass or stainless steel valve body

# EV220A servo-operated 2/2-way solenoid valves

EV220A is a compact servo-operated 2/2-way solenoid valve program, especially designed for use in machines and equipment with limited space.

- 2/2-way
- Servo-operated
- DN 6 - DN50
- G 1/4" to G 2"
- Ambient temperature: +50°C
- Brass valve body
- NC (normally closed) and NO (normally open) versions
- ISO 228/1 or NPT thread connection

Example for water:  
Capacity for EV220A at differential  
pressure of 3 bar: Approx.  $7 \text{ m}^3/\text{h}$

# EV310B direct-operated 3/2-way solenoid valves

EV310B covers a wide range of direct-operated 3/2-way solenoid valves for universal use.

EV310B is a real robust valve program with high performance and can be used in all kind of tough working conditions.

Clip-on coils can not be used on EV310B.

- 3/2-way
- Direct-operated

- DN 1.5 - DN 3.5
- Ambient temperature: +40°C
- Brass valve body
- Thread (G 1/8" to G 3/8") or flange (32x32 mm) connections
- NC (normally closed) and NO (normally open) versions
- Manual override versions

## Dimensions and weight:

Weight without coil: 0.220 kg

All dimensions in millimetres

Approvals: GL

# The EV210B solenoid valve for tough working conditions

The EV210B is designed to control the flow of water, oil or air in a wide range of applications.

## 1 Increased performance without increasing coil power

The EV210B's non-fixed valve plate doubles performance without increasing the coil power or reducing the valve's lifetime. When the coil is energised, the armature moves and accumulates energy, and when it hits the valve plate, the impact lifts the plate to increase performance.

## 2 Modular design for customised solutions

EV210B with direct actuator is extremely durable at high temperature and pressure. The valve has a modular design which is perfect for customised solutions.

## 3 Long life

Designed to last, the EV210B has a high wall thickness, a unique square-shaped armature and a specially designed spring. And because the spring movements are very close, wear is significantly reduced.

## 4 Insensitive to dirt

Due to the armature's unique design, there is a low risk of particles sticking to the armature. If particles become lodged between the armature and the armature tube or top, they will be displaced by the fluid when the armature moves.

## 5 Optimum Kv-values for many connections

The optimum shape and diameter of the valve plate, as well as the valve plate lift ensure that the EV210B has high Kv-values (capacity).

### Secure opening and closing

To prevent particles lodging in the armature, an isolating diaphragm is available for valves up to 4.5 mm.

# EV210B direct-operated 2/2-way solenoid valves

EV210B covers a wide range of direct-operated 2/2-way solenoid valves for universal use. EV210B is a real robust valve program with high performance and can be used in all kind of tough working conditions.

- 2/2-way
- High Performance series

- Direct-operated
- DN 1.5 - DN 25
- Brass or stainless steel valve body
- NC (normally closed) and NO (normally open) versions
- ISO 228/1 G 1/8" to G 1"
- UL listed version with NPT. for North America (EVI)

# The EV220B 6-22 for medium to large flow

The EV220B 6-22 is a high performance, robust valve programme.

## 1 Low water hammer

The softest closing valve on the market, the EV220B 6-22 has an optimised diaphragm shape, added reinforcement for internal damping, and a special damping cone to ensure viscous damping in the critical late closing stage.

## 2 Insensitive to dirt

The square armature design enables the armature to move freely and reduces the risk of dirt particles lodging in the armature. If particles do lodge between the armature and the armature tube walls, they are quickly displaced by the fluid when the valve is activated.

## 3 Broad range of body and sealing materials

The EV220B 6-22 is available in two body materials. The brass version is ideal for applications with a limited risk of corrosion. Tougher applications should use versions with dezincification resistant brass (DZR brass) bodies and stainless steel inserts.

The EV220B 6-22 is also available with two seal materials. Both the EPDM and FKM seals can cope with all common media and a wide temperature range, while the EPDM versions have water approvals.

## 4 Long lifetime

The moulded rubber diaphragm has a special profile that greatly reduces the effects of stress and maximises valve lifetime.

## 5 Wide coil range

The valves use the standard B-range of coils from IP00 to IP67, including the clip-on system and specialty coils, making it easy to select a coil with the right features. And the special ATEX coil programme is ideal for hazardous environments.

## 6 High capacity across the entire pressure range

The optimised diaphragm shape gives a very high lift height, providing excellent capacity and tightness at any pressure.

# EV220B 6-22 servo-operated 2/2-way solenoid valves

EV220B 6-22 is a direct servo-operated 2/2-way solenoid valve program with connections from 1/4" to 1". This program is especially for OEM applications demanding a robust solution and moderate flow rates.

- 2/2-way
- Servo-operated
- DN 6 - DN 22
- Brass or DZR (de-zincification resistant) brass valve body
- NC (normally closed) and NO (normally open) versions
- ISO 228/1 or NPT thread connection (EVSI and EVSI-U)

## Electronic timers for coils for pulse start, only IP 65

Type	Description	Control voltage 50/60 Hz	Power cons. Max W	Ambient temp. °C	Code number
ET 20 M	External adjustable timing from 1 to 45 minutes with 1 to 15 seconds drain open. With manual override (test button) Electrical connection DIN 43650 A / EN 175 301-803-A	24 - 240	20.0	-10 → 50	<b>042N0185</b>

## Capacity diagram for EV220B 6-22:

Example, water: EV220B 10 NC,  
at 4 bar diff. pressure: Approx: 3 m³/h

# The EV220B 15-50 for large capacities and damping water hammer

A universal indirect servo-operated 2/2 way solenoid valve range, the EV220B 15-50 is ideal for a wide variety of applications.

## 1 Effective against water hammer

To minimise water hammer, the valve's moulded diaphragm reinforces internal damping, and a special damping cone provides viscous damping in the very late closing stage. The closing speed can be adjusted by changing the equalising orifice.

## 2 Insensitive to dirt

A self-cleaning coaxial filter in the main valve flow prevents dirt entering the pilot system. However, if the equalising orifice does become blocked, the dirt can easily be removed with compressed air.

## 3 Broad temperature and material range

With a range of materials, there is an EV220B 15-50 valve suited to your application. The EV220B 15-50 is available in brass, as well as dezincification resistant brass (DZR) and stainless steel versions for aggressive steam applications.

The EPDM seals remain soft even at -30°C, and can handle temperatures up to 140°C.

## 4 Wide coil range up to IP67

The EV220B range uses the standard B-range of coils from IP00 to IP67. Coils subject to water splash and temperatures up to 80°C should use the more powerful and robust clip-on coils.

## 5 High capacity across the entire pressure range

The valve body has a smooth internal shape, and the specially designed diaphragm increases the lift height capacity. In indirect servo-operated valves, the kv-value is determined by the diameter of the orifice and the diaphragm lift height.

## 6 Good external tightness even at high differential pressures

Pressure in the valve increases the distance between the valve cover and body, so the moulded diaphragm has a built-in O-ring to avoid leakage. This provides an excellent seal between the valve cover and body even at high pressures, ensuring excellent external tightness.

# EV220B 15-50 servo-operated 2/2-way solenoid valves

EV220B 15-50 is a universal indirect servo-operated 2/2-way solenoid valve program. Valve body in brass, dezincification resistant brass and stainless steel ensures that a broad variety of application can be covered.

Built-in pilot filter as standard, adjustable closing time and enclosures up to IP67 ensures optimal performance even under critical working conditions.

- 2/2-way
- Servo-operated
- DN 15 - DN 50
- Valve body available in brass, DZR brass, gun metal or stainless steel
- NC and NO versions
- ISO 228/1 or NPT thread connection (EVSI and EVSI-U)
- Built in filter for protection of pilot system
- Water hammer damped
- Adjustable closing time available

## Capacity diagram for EV220B 15-50:

Example, water:

Capacity for EV220B 15B at differential pressure of 3 bar. Approx. 7 m<sup>3</sup>/h

Example, air:

Capacity for EV220B 15B at inlet pressure ( $p_1$ ) of 5 bar and outlet pressure ( $p_2$ ) of 3.5 bar: Approx. 245 Nm<sup>3</sup>/h

Flow information on other media types: Please contact Danfoss.

# EV220B 65-100 servo-operated 2/2-way solenoid valves

EV220B 65-100 is a 2/2-way solenoid valve program for use in robust industrial applications, demanding high flow rates. The valve is designed with cast iron valve bodies and flanged connection.

Water-hammer damped design and built-in pilot filter ensures a reliable operational period.

- 2/2-way
- Servo-operated
- DN 65 - DN 100
- Cast iron valve body
- Flange connection
- Working pressure up to 10 bar
- Max. medium temperature: 90° C

## The EV250B for low and unspecified pressure conditions

Designed for closed circuits, the EV250B 2/2-way assisted-lift solenoid valve range damps water hammer at low differential pressure and moderate flow rates.

### **1 Clip-on coil systems**

Suitable for clip-on coil systems, the EV250B ensures faultless mounting so that both assembly and dismantling is simple and safe. And when needed, a hermetic seal against moisture penetration gives a tighter seal and a safer and more stable fastening.

### **2 High lift at zero or low differential pressures**

High armature lift secures a high opening degree from zero differential pressure.

### **3 For aggressive low-pressure steam**

Made from dezincification resistant brass (DZR), the EV250B valve body is suitable for aggressive technical water and steam.

### **4 Good external tightness even at high differential pressures**

The thick valve cover and moulded diaphragm with built-in o-ring secures an excellent seal between valve cover and body even at high pressure.

### **Extra features**

The EV250B is available with a range of water approvals, including the British WRAS approval. It is also available with hum-free coils, American NPT threads and UL approval, IP 67 protection, EEx coils, and DNV ship approval.

# EV250B assisted lift 2/2-way solenoid valves

EV250B with assisted lift can operate from zero and up to 10 bar differential pressure.

This 2/2-way valve program is especially to use in closed circuits with low differential pressure, but demanding moderate flow rates. Valve body in dezincification resistant brass for ensuring a long life even in connection with aggressive steam media.

EV250B is compatible with the broad Danfoss coil program with enclosures from IP00 up to IP67. Medium temperatures up to 140 °C (low pressure steam).

- 2/2-way
- Assisted lift
- DN 10 - DN 22
- DZR brass valve body
- NC (normally closed) or NO (normally open)
- From zero differential pressure
- Especially suitable for closed circuits and for emptying tanks
- Available with WRAS, VA and UL approvals
- ISO or NPT thread connections

# EV224B servo-operated 2/2-way solenoid valves for high pressure air

EV224B is a high pressure indirect servo-operated 2/2-way solenoid valve with working pressure up to 40 bar, medium temperature up to 60 °C and available in NC and NO versions. Built-in pilot filter as standard, adjustable closing time, enclosures up to IP67 (depending on coil) ensure a reliable and satisfactory function.

- For high pressure air applications up to 40 bar
- 2/2-way
- Servo-operated
- DN 15 - DN 25
- Ambient temperature: +80°C
- NC and NO versions
- Brass valve body
- Built in filter for protection of pilot system
- Based on proven EV220B technology

# EV225B servo-operated 2/2-way solenoid valves for steam

EV225B is a servo-operated 2/2-way solenoid valve for use in steam application.

The design is based on a PTFE diaphragm concept, ensuring high reliable function even in connection with contaminated steam.

Valve body in dezincification resistant brass and valve seats made in stainless steel for ensuring a long life even in connection with aggressive steam media.

Coil type BR can be used on EV225B.

- 2/2-way
- Specifically designed for steam applications
- Servo-operated
- DN 6 - DN 25
- Ambient temperature: +40°C
- G 1/4" to G 1"
- DZR brass valve body
- NC (normally closed)
- ISO 228/1 or UL listed version with NPT for North America (EVSI)

Capacity for EV225B

at differential pressure of 1 bar:

Approx. 100 kg/h / 80kW

# EV260B servo-operated 2-way proportional solenoid valves

EV260B is a proportional (modulating) servo-operated 2-way solenoid valve program with connections from 1/4" to 3/4". Through stepless regulation of the coil current, the armature can be placed in any position in the armature tube, thus setting the valve to any position between completely closed and completely open.

The valve is fully open when the coil current has reached its maximum value.

- Proportional (modulating)
- For stepless flow regulation
- 2-way
- Servo-operated
- DN 6 - DN 20
- Ambient temperature: +50°C
- Short reaction time
- Linear characteristic throughout the regulation range
- Closes on power failure (fail-safe function)
- IP 67 coil enclosure
- 24 V dc supply voltage

## Dimensions and weight:

Type / orifice size	L mm	L <sub>1</sub> mm	L <sub>2</sub> mm	H <sub>1</sub> mm	H <sub>2</sub> mm	B mm	Weight without signal converter kg	Weight with signal converter kg

## Signal flow characteristics for EV260B

Flow %

Coil type BK. Without signal converter

The basic version consists of a valve with a coil for pulsating direct current. The supply voltage of 24 V DC can be established with full-wave rectified alternating current. The valve begins to open at a coil current of approx. 300 mA and is fully open at a coil current of approx. 600 mA. The ratio between coil current and flow between the two outer points is directly proportional.

Flow %

Coil type BM. With signal converter and 0-10 V pilot signal.

The ratio between pilot signal and flow is directly proportional throughout the regulation range.

Flow %

Coil type BL. With signal converter and 4-20 mA pilot signal.

The ratio between pilot signal and flow is directly proportional throughout the regulation range.

## Capacity diagram for EV260B

For water at fully opened valve

Example: Differential pressure of 3 bar:

EV260B 6 B: Appr. 1.4 m<sup>3</sup>/h

EV260B 10 B: Appr. 2.2 m<sup>3</sup>/h

EV260B 15 B: Appr. 3.6 m<sup>3</sup>/h

EV260B 20 B: Appr. 8.7 m<sup>3</sup>/h

# The 'fit and forget' AVTA thermostatic valve

A self-acting thermostatic valve, the AVTA controls the temperature in cooling water applications. Often referred to as the 'fit and forget' valve due to its proven reliability, the AVTA is easy to install and functions without electrical power.

## Self-acting - no electricity required

The AVTA does not require electricity to function because a temperature-dependent pressurised charge or vapour charge provides accurate flow control based on the sensor temperature. And because it needs no power supply, it keeps working as long as the coolant is pressurised.

## Exact temperature control

Designed for low hysteresis, the hermetically-sealed thermostatic element consists of a cylindrical sensor connected to a bellow with a capillary tube.

## Dirt resistant

The force-balanced design prevents particles from adhering to the large valve opening. But if dirt does become lodged in the valve, the sensor simply detects that more cooling water is needed and the valve opens wider to allow more water to pass and dislodge the particles.

## Insensitive to pressure

Pressure equalising diaphragms ensure reliable function across the entire pressure range – from zero to ten bar pressure – by balancing the forces on the bellows and setting sections. And with reinforced EPDM diaphragms, the valve can take up to 25 bar pressure.

# AVTA thermostatic valves for industrial cooling applications

AVTA thermostatic valves are widely used for temperature control in many different sorts of equipment and installations where cooling is required.

- Self-acting thermostatic valves for accurate cooling flow control based on sensor temperature
- Capillary sensor with adsorption charge, mass charge or universal charge, depending on application
- Open on rising temperature
- Brass or stainless steel valve body
- For extremely aggressive media, also available in titanium (please contact Danfoss)

For all types: Media temperature range: -25 → 130°C.

For higher Kv values (larger capacities) and other requirements please contact Danfoss.

## Charges

### Adsorption charge

The charge consists of active carbon and CO<sup>2</sup> which is adsorbed on falling sensor temperature and thereby produce pressure changes in the element.

The sensor can be installed in any position as far as orientation and temperature are concerned.

### Universal charge

The charge is a mix of liquid and gas where the liquid surface (sensing point) is always inside the sensor.

The sensor can be installed colder or warmer than the valve, and oriented as shown.

### Mass charge

The charge is a mix of liquid and gas.

Due to the volumetric conditions the sensor must be installed warmer than the valve, since the liquid surface (sensing point) must be in the sensor. Orientation as shown.

## AVTA thermostatic valve - sizing

Heating or cooling with water.

Example: Necessary cooling output 10 kW with  $\Delta t = 10^\circ\text{C}$ .  
Required flow 0.85  $\text{m}^3/\text{h}$ .

Relation between water quantity and pressure drop across valve.

Example: Flow 0.85  $\text{m}^3/\text{h}$  with a pressure drop of 1.5 bar.  
The  $k_v$  value becomes 0.7  $\text{m}^3/\text{h}$ .

Nomogram showing the valve  $k_v$  range.  
 $k_v$  values are always given for water flow in  $\text{m}^3/\text{h}$  with a pressure drop  $\Delta p$  of 1 bar.  
The valve should be selected so that the necessary  $k_v$  value lies in the middle of the regulation range.  
Example: AVTA 10 and 15 are the most suitable for a  $k_v$  value of 0.7.

Valve flow quantity in fully open position, as a function of pressure drop  $\Delta p$ .

With fully open valve the differential pressure should be around 50% of the total pressure drop across the cooling system.

# BVTS thermostatic valve for bio-mass boilers

The BVTS valve is designed for protection of bio-mass boilers, stoves and solar systems. The valve has two functions:

**Overheat protection:** If the water temperature exceeds 95° C the valve opens and hot water is discharged from the boiler or the built-in heat exchanger.

**Protection against backburning:** If the temperature in the fuel feed system rises above 95° C the valve will dispense water to extinguish fire.

- Needs no auxiliary power supply – self acting
- Opens on rising sensor temperature
- Can be mounted on cold water inlet or hot water outlet of the boiler
- Can be mounted in any position
- Brass and other wetted materials suitable for drinking water
- Integrated sensor systems and valve body to eliminate risk of setting change
- Double sensor to ensure fail-safe operation
- Capillary tube protected by steel sheath
- Space saving compact design

Approvals: CE marked according to PED 97/23/EC, category IV, safety equipment, EN 14597 (DIN 3440)

# AV210 angle-seat valve for high capacity applications

The AV210 can operate at very high medium temperatures and viscosities, and can withstand dirt particles in the medium.

## Wide temperature range

Known as the 'trouble-shooter', the AV210 is made from FKM, PTFE, and gun metal (RG5/bronze) or stainless steel (AISI 316), so it can withstand temperatures as low as -30°C and as high as 180°C.

## Dirt resistant

Mounted on a spindle, the resilient internal valve seat is made of AISI 316, a high grade corrosion-resistant stainless steel. And the PTFE valve plate gives excellent resistance to dirt particles in the medium.

## In insensitive to media pressure and viscosity

Made for air, neutral gases and fresh water applications, the valve is designed to operate with media viscosities up to 400cSt and 10 bar pressure – and it is not affected by low flow rates or pressure loss across the opening.

## Tight fit even at high differential pressures

As the valve seat is pressurised at the valve opening, the standard AV210 valve closes against the flow. When closed the spindle is not exposed to the medium, significantly reducing water hammer. The AV210 can also close with the flow if required.

## High capacity

For optimum capacity, the special control head design and high closing spring allows the valve plate to lift higher than the usual 25 percent of the valve diameter.

## Modular design

Available in five sizes, it is easy to find an AV210 to suit your size and pressure range requirements.

## Accessories

For even higher performance and versatility, the AV210 can be fitted with the following accessories:

- Manual override
- Flow limiters
- Valve position indicators

# AV210 angle seat valves

AV210 is an externally operated angle seat valve for use in demanding industrial applications. The valve can operate at very high medium temperatures and viscosities, and is insensitive to dirt particles in the medium; thus, it is often called a "trouble-shooter" valve. The valve is available in gun metal (RG5/bronze) and stainless steel (AISI316).

- High capacity basic program
- 2/2-way
- Angle-seated piston
- NC version: Both closing against and withflow direction
- NO version: Closing against the flow direction
- Bronze or stainless steel valve body

#### Safety application - tilt control - mobile hydraulic

An MBS 3050 pressure transmitter controls the pressure circuit. Its integrated pulse-snubber ensures reliable operation despite cavitation, liquid hammer or pressure peaks

# Pressure transmitters

## Industries

Transportation

### **Marine, Mobile Hydraulics and Railways**

The increasing global focus on environmental and safety legislations calls for more control and automation. Danfoss accommodate this by optimising product functions and specifications, allowing you to comply with the new demands. Our wide transmitter range comprises solutions for:

- Marine equipment
- Mobile hydraulic equipment
- Railway equipment

Heating and sanitation

### **Sterilisers, Autoclaves,**

### **Boiler and Boiler Room Equipment**

Energy efficiency and safety are frequent challenges in heating and sanitation applications. The answer is highly reliable and accurate measurements, which is achieved by unique process control.

Machine and equipment

### **Industrial Hydraulics, Air Compressors, Water Pumps and**

### **Industrial Engines**

Within machine and equipment the transmitter specifications depend on the specific application. Close cooperation with customers has allowed us to develop dedicated transmitter solutions for:

- Water pumps and air compressors
- Engines
- Industrial hydraulics

Energy

### **Wind Turbines and Electric Power**

One of the most distinct global challenges now and in the future is how to produce energy in a both efficient and environmentally friendly way. In cooperation with some of the leading manufacturers, Danfoss has developed – and is continuously refining – solutions for:

- Wind turbines
- Gen sets

# Sensor packages designed for customer needs

The extent of automation in both mobile and stationary applications has over the past decade increased dramatically and the demand for sensors and controls has increased accordingly.

Danfoss has followed this development closely, and as a result we now have a programme of products perfectly aligned to our customer's needs.

Box transmitter

Often used in applications requiring robust performance and enclosures. The Danfoss Box solution has been on the market for more than 30 years. It is still widely used within the marine sector

Block transmitter

Used in applications where space has become an issue. The Danfoss "Block" design is more compact compared to the traditional "Box" design. Where a combination of Sensor and valve is needed, Danfoss also offers the "Block" valve - MBV.

Cartridge transmitter

The cartridge transmitter can be mounted directly to the customer's system at the point of measurement, even where there is very little space. This eliminates the need for extra piping and joints.

Cartridge transmitter with flush diaphragm

Often used in applications where measurements have to be made on highly viscous or slurry media. The front mounted diaphragm prevents blocking of the pressure port.

Front mounted diaphragm

Pulse-snubber

In applications where there is a risk of liquid hammering and cavitation it is recommended to select a transmitter with an integral pulse-snubber. The Danfoss pressure transmitters with a pulse-snubber are indicated with a "5" in the third type digit (example. MBS 1750).

# MBS transmitter made from expert know-how

A typical pressure transmitter has three general functional elements:

- The electronics
- The sensing element
- The packaging

It is the solution of each of these elements and the combination that determines the performance of the products. All Danfoss pressure transmitters are certified according to ISO 9001 and ISO 14001.

*A variety of electrical connections available*

## 1 Electronics

Danfoss MBS pressure transmitters are available with analogue electronic solutions and offer unique specifications in terms of:

- Accuracy
- Temperature range coverage
- EMI/RFI protection

## 2 Sensing element

• Piezoresistive semi-conductor technology covering pressure ranges from 0 to 600 bar.

This technology is available in absolute or gauge versions.

## 3 Packaging

The transmitter design offers long-life stability through:

- High shock and vibration stability
- High enclosure grade IP67
- Pulse restriction solution which prevents liquid hammering and cavitation. (pulse-snubber) A
- Wetted parts that are all made from stainless steel (AISI 316L) B

*A variety of process connections available*

# MBS 3000 compact pressure transmitter

The compact pressure transmitter MBS 3000 is designed for use in almost all industrial applications, and offers a reliable pressure measurement, even under harsh environmental conditions. The flexible pressure transmitter programme covers a 4-20 mA output signal, absolute and gauge (relative) versions, measuring ranges from 0-1 to 0-600 bar and a wide range of pressure- and electrical connections.

Excellent vibration stability, robust construction, and a high degree of EMC/EMI protection equip the pressure transmitter to meet the most stringent industrial requirements.

- 4 - 20 mA output signal
- Operating temperature -40 to 85°C
- Measuring range 0 - 600 bar
- Standard pressure connection G 1/4A ISO 228/1
- For use in severe industrial environments such as pumps, compressors, pneumatics and water treatment

# MBS 3050 compact pressure transmitters with pulse snubber

Design

Temperature

The compact heavy duty pressure transmitter MBS 3050 is designed for use in hydraulic applications with severe medium influences like cavitation, liquid hammer or pressure peaks and offers a reliable pressure measurement, even under harsh environmental conditions.

The flexible pressure transmitter programme covers a 4-20 mA output signal, absolute and gauge (relative) versions, measuring ranges from 0-1 to 0-600 bar and a wide range of pressure- and electrical connections.

Excellent vibration stability, robust construction, and a high

degree of EMC/EMI protection equip the pressure transmitter to meet the most stringent industrial requirements.

- 4 - 20 mA output signal
- Operating temperature -40 to 85° C
- Measuring range 0 - 600 bar
- Standard pressure connection DIN 3852 - G 1/4A
- With integrated pulse-snubber to protect against cavitation, liquid hammer or pressure peaks
- Especially suited for hydraulic applications

# MBS 3150 compact pressure transmitter with pulse-snubber

Design

Temperature

The compact ship approved pressure transmitter MBS 3150 is designed for use in marine applications with severe medium influences like cavitation, liquid hammer or pressure peaks and offers a reliable pressure measurement, even under harsh environmental conditions.

The flexible pressure transmitter programme covers a 4-20 mA output signal, absolute and gauge (relative) versions, measuring ranges from 0-1 to 0-600 bar, plug and cable connections and a wide range of pressure connections.

Excellent vibration stability, uniquely robust construction, and a high degree of EMC/EMI protection equip the pressure transmitt-

er to meet the most stringent marine requirements.

- 4 - 20 mA output signal
- Operating temperature - 40 to 85° C
- Measuring range 0 - 600 bar
- Standard pressure connection G 1/4A, O-ring DIN 3852, G 1/2A DIN 16288
- With integrated pulse-snubber
- Available with all relevant marine approvals and designed to meet the strict demands on marine equipment

## Dimensions and weight:

All dimensions in millimetres

Approvals: CE, UL, UL Hazloc, Ex-N, Gost, LR, DNV, GL, RINA, ABS, BV, NKK, PRS, MRS, CSS

# MBS 1900, OEM pressure transmitter for compressed air and water pump applications

Design

Temperature °C

Pressure transmitter, type MBS 1900 is designed for use in air and water applications like booster pumps and air compressors. The pressure transmitter programme covers different output sig-

nals, absolute and gauge (relative) versions, measuring ranges from 0-4 bar to 0-25 bar and a range of pressure and electrical connections.

## Dimensions and weight:

Weight: 0.15 to 0.3 kg, depending on pressure / electrical connection

All dimensions in millimetres

Approvals: CE, UL

## MBS 1900 pressure transmitter

# MBS 1200/1250 OEM pressure transmitters for use in severe hydraulic applications

**Design**

**Temperature**

The OEM pressure transmitter, types MBS 1200 & MBS 1250 are based on a thin-film technology ensuring an excellent vibration stability and an exceptional robustness as well as a high degree of EMI protection which enable them to meet the most severe hydraulic applications.

A wide choice of electrical outputs as well as pressure connections mean that the transmitters are suitable for most applications within the mobile hydraulic segment.

And the compact designs make them ideal for installations where space is at a premium.

- Measuring range: 0 - 20 bar to 0 - 2200 bar
- Accuracy: +/- 0.5% FS
- Pressure reference: Gauge (relative)
- Output signal: mA, voltage and ratiometric

## Dimensions and weight:

All dimensions in millimetres

MBS 1250 has an integrated pulse-snubber offering a high degree of protection against cavitations and liquid hammer. Cavitation, liquid hammer and pressure peaks may occur in liquid filled hydraulic systems with changes in flow velocity, e.g. fast closing of a valve or pump starts and stops. The problem may occur on the inlet and outlet side, even at rather low operating pressures.

For ordering please contact your nearest Danfoss dealer.

# MBS 1300/1350 OEM electronic pressure switch with dual output for severe hydraulic applications

Design

Temperature

The OEM pressure switch and transmitter, types MBS 1300 and MBS 1350 are based on thin-film technology providing excellent vibration stability, robust construction and a high degree of EMI protection. These features among others ensure that the transmitters meet the most stringent industrial standards.

## Two products in one:

The range is a compact dual-output product dedicated for hydraulic applications, where a combination of pressure signal output and/or pressure switch function is requested.

Pressure ranges (system):	20-2,200 bar
Pressure set point (typical):	10-110% calibrated range - switch point set at factory
DC switch current limit:	350mA (at 125 Centigrade)
Switch Options:	PNP (switch to Battery) or NPN (Open Collector format, switch to ground)
Mobile Hydraulic Certifications:	Designs compliant with ISO7637 standards
Supply voltage:	Compatible with 12V or 24V regulated supplies

## Dimensions and weight:

*Weight 0.1 to 0.15, depending on pressure / electrical connection*

*All dimensions in millimetres*

MBS 1350 has an integrated pulse-snubber offering a high degree of protection against cavitations and liquid hammer.

Cavitation, liquid hammer and pressure peaks may occur in liquid filled hydraulic systems with changes in flow velocity, e.g. fast closing of a valve or pump starts and stops. The problem may occur on the inlet and outlet side, even at rather low operating pressures.

# MBS 4510 flush diaphragm pressure transmitter

Design

Temperature

The high accuracy flush diaphragm pressure transmitter MBS 4510 is designed for use in non-uniform, high viscous or crystallizing media within industry, food and beverage, and offers a reliable pressure measurement, even under harsh environmental conditions.

The pressure transmitter programme covers a 4-20 mA output signal, absolute and gauge (relative) versions, measuring ranges from 0-250 mbar til 0-25 bar, zero point and span adjustment, plug connection and a G1A conic pressure connection with a flush mounted diaphragm.

Excellent vibration stability, robust construction, and a high

degree of EMC/EMI protection equip the pressure transmitter to meet the most stringent industrial requirements.

- 4 - 20 mA output signal
- Operating temperature -40 to 85° C
- Measuring ranges 0 - 250 mbar to 0 - 25 bar
- Available with many different pressure connections
- With zero point and span adjustment
- With flush diaphragm
- For use in food and beverage industry as well as industrial applications with aggressive, heterogeneous and highly viscous media

## Dimensions and weight:

Weight: 0.4 kg

# Temperature sensors

## Transportation

### **Marine, Mobile Hydraulics and Railways**

The increasing global focus on environmental and safety legislations calls for more control and automation. Danfoss accommodate this by optimising product functions and specifications allowing you to comply with the new demands. Our wide sensor range comprises solutions for:

- Marine equipment
- Mobile hydraulic equipment
- Railway equipment

## Heating and sanitation

### **Sterilisers, Autoclaves, Boiler and Boiler Room Equipment**

Energy efficiency and safety are frequent challenges in heating and sanitation applications. The answer is highly reliable and accurate measurements, which is achieved by using specialised sensors. Bearing the above equipment in mind we have developed dedicated temperature sensors for:

- Sterilisers and autoclaves
- Boiler and boiler room equipment

## Machine and equipment

### **Industrial Hydraulics, Air Compressors, Water Pumps and Industrial Engines**

Within machine and equipment the temperature sensor specifications depend on the specific application. Close cooperation with customers has allowed us to develop dedicated sensor solutions for:

- Water pumps and air compressors
- Industrial engines
- Industrial hydraulics

## Energy

### **Wind Turbines and Electric Power**

One of the most distinct global challenges now and in the future is how to produce energy in a both efficient and environmentally friendly way. In cooperation with some of the leading manufacturers of process and energy equipment, Danfoss has developed – and is continuously refining – solutions for:

- Wind turbines
- Gen sets

## Examples

Onboard complex, new ships, the MBT temperature sensor control that vital parts of the propulsion system all run perfectly, within the parameters of safe operation.

On wind turbines, helping to increase the amount of wind-produced power worldwide, the MBT temperature sensor gives reliable readings of hydraulic oil temperatures.

# Temperature sensors that can take the heat

An outstanding temperature sensor performance is characterised by:

- The element
- The ability to react fast and precise
- The packaging

## 1 Elements

- RTD (Pt100/Pt1000) – for standardised signals and high accuracy the RTD's are a perfect choice
- Changeable measuring insert

## 2 The ability to react fast and precise

Special care has been put into the design of the sensor in relation to the reaction time. A specially developed sensor element fixture ensures contact between the element and the housing material in order to secure a fast heat transfer from the media to the sensor element. On top of this the sensor construction ensures minimum radiation of heat, which results in a measurement very close to the actual temperature of the media.

## 3 Packaging

The sensor design offers long-life stability through:

- High shock and vibration stability
- High enclosure grade IP65

Sensor material:

- Stainless steel (AISI 316)
- Gold plated contacts to secure flawless signal

# MBT 3260 temperature sensors with fixed insert

The MBT 3260 is a temperature sensor that can be used for measuring and regulation in piping and ventilation systems and other light industrial applications.

Due to the fact that the protection tube is made of copper the MBT 3260 has a very short response time of down to  $t_{0,5} = 2$  sec. in water. This temperature sensor is based on a standardized Pt100 or Pt1000 element, which gives a reliable and accurate measurement. Parts in contact with the media are made of copper or brass.

The MBT 3260 is delivered with a EN 175301-803-A, Pg9 plug as standard.

- Pt100 or Pt1000 resistance element
- Temperature range -50 to 120° C
- Copper tube
- Short response times
- G $\frac{1}{2}$ A brass process connection
- Gold plated connectors
- Fixed measuring insert
- Multiple insertion lengths: 50, 100 or 250 mm

## Dimensions and weight:

Weight: 0.120 kg to 0.150 kg depending on insertion length.

All dimensions in millimetres

# MBT 3270 temperature sensors

The flexible temperature sensor MBT 3270 can be used in many industrial applications such as: Air Compressors, Mobile Hydraulics and Exhaust gas return systems.

In other words application where robustness, size and performance are essentials.

The sensor can be equipped with different sensing element (RTD, NTC and PTC) and is available with different electrical connections (Cable, Delphi Metri Pack, AMP junior power Timer, Deutch DT04).

- Robust, high protection against moisture
- Fixed measuring insert
- Brass or stainless steel
- Very low response times
- Temperature range up to 300°C

## Dimensions and weight:

Weight: 0.085 kg

# MBT 3560 temperature sensors with built-in transmitter

With MBT 3560 we have combined the technology of our standard temperature sensors and the electrical connections from the MBS pressure transmitters with a new developed electronics which has resulted in a compact temperature sensor with a built-in transmitter. The MBT 3560 is designed for use in harsh industrial environments where reliable, robust and accurate equipment is required. Available with a wide selection of process and electrical connections. Can be delivered with a 33 mm extension length which makes it possible to measure temperatures up to 200°C without damaging the built-in electronics.

- Ultra compact design
- Acid-resistant stainless steel enclosure (AISI 316L)
- Temperature range -50 °C - +200°C
- Pt 1000 resistance element
- Output signals: 4 - 20 mA or Ratiometric
- Protection tube: ø 8 mm
- Multiple insertion lengths: 50 mm- 250 mm

## Dimensions and weight:

Weight: 0.15 kg to 0.22 kg  
depending on insertion length

## MBT 153 cable-type temperature sensors

The MBT 153 is a heavy-duty temperature sensor that can be used for controlling cooling water and ventilation systems within general industry and marine applications.

This temperature sensor is based on a standardized Pt100 or Pt1000 element, which gives a reliable and accurate measurement. On request the MBT 153 can also be delivered with NTC/PTC elements. The sensor is based on a stainless steel housing with a cable, which makes the sensor extremely flexible.

The MBT 153 can be combined with a sensor pocket to protect the silicone cable from the media. The MBT 153 has a PVC or silicone cable as standard but it can be delivered with teflon cable on request.

- Temperature range -50 to +200°C
- Short response times
- Pt100 or Pt1000 resistance element
- 2- or 4-wire connection

### Dimensions and weight:

Weight: 0.120 kg to 0.425 kg  
depending on cable length

All dimensions in millimetres

Approvals: CE, LR, DNV, ClassNK

# MBT 5250 temperature sensor

The MBT 5250 is a heavy-duty temperature sensor that can be used for controlling cooling water, lubrication oil, hydraulic oil and refrigeration plants within general industry and marine applications.

This temperature sensor is based on a standardized Pt100 or Pt1000 element, which gives a reliable and accurate measurement. The MBT 5250 can be delivered with NTC/PTC elements on request. The measuring insert is based on a silicone cable, which makes the sensor very resistant towards vibrations. All parts in contact with the media are made of stainless steel AISI 316 Ti. The MBT 5250 is equipped with a EN 175301-803-A, Pg 9 plug as standard, but can be delivered with M12 or DIN 72585 Bayonet on request.

- For gaseous or liquid media, e.g. air, gas, vapour, water or oil
- Up to +200°C media temperatures
- Pt100 or Pt1000 resistance element
- Can be used with 2- or 3-wire connections
- Gold plated male and female connector
- Interchangeable measuring insert
- Available with all relevant marine approvals

## Dimensions and weight:

Weight: 0.145 kg to  
0.220 kg depending

# MBT 5252 temperature sensors

The MBT 5252 is a heavy-duty temperature sensor that can be used for controlling cooling water, lubrication oil, hydraulic oil and refrigeration plants within general industry and marine applications.

This temperature sensor is based on a standardized Pt100 or Pt1000 element, which gives a reliable and accurate measurement. NTC/PTC elements available on request.

MBT 5252 can also be delivered with transmitter insert for 4 - 20 mA output. In the low temperature version (-50 °C to +200 °C) the measuring insert is based on a silicone cable, which makes the sensor very resistant towards vibrations.

All parts in contact with the media are made of stainless steel AISI 316 Ti. The MBT 5252 is equipped with a B-head as standard, but can be delivered with B-mini or B-head with screw cap on request.

- For gaseous or liquid media, e.g. air, gas, vapour, water or oil
- Up to +400° C media temperatures
- Available with built-in transmitter
- Available with all relevant marine approvals

## Dimensions and weight:

Weight: 0.37 kg to 0.45 kg  
depending on insertion length

All dimensions in millimetres

Approvals: CE, LR, BV, DNV, ClassNK, RINA, ABS, KRS, CCS

# MBT5113 Temperature sensor

The MBT 5113 is a heavy-duty temperature sensor that can be used for measuring and regulating exhaust gas from diesel engines, turbines and compressors within stationary and marine applications. This temperature sensor is based on a type K thermo couple, which measures temperatures up to 800 °C. The measuring insert can be changed even while operating the application.

All parts in contact with the media are made of stainless steel AISI 316 Ti. The sensor is delivered with B-head as standard and, if needed, a transmitter (MBT 9110) can be ordered as an integrated part of the sensor.

- With thermocouple up to 800° C media temperature
- Available with built-in transmitter - with or without Eex ia IIC T4/T6 approval
- Available with all relevant marine approvals

New picture to be taken -  
Irene Madsen

## Dimensions and weight:

# MBT5116 Temperature sensors

The MBT 5116 is a heavy-duty temperature sensor that can be used for measuring and regulating exhaust gas from diesel engines, turbines and compressors within stationary and marine applications. This temperature sensor is based on a standardized Pt100 element, which gives a reliable and accurate measurement. The Pt100 element is a thin film element specially designed for heavy-duty applications up to 600 °C.

The measuring insert can be changed even while operating the application. All parts in contact with the media are made of stainless steel AISI 316 Ti. The sensor is constructed to fit where there is limited space.

- Up to 600°C media temperature
- Can be used with 2- or 3-wire connections
- Robust and compact construction with extremely high resistance to shock and vibration according to IEC 68-2-6
- Easy exchange of measuring insert
- Pt 100 thin film technology specially developed for heavy duty applications
- Can be mounted in all positions
- Solid drilled protection tube
- Available with all relevant marine approvals

# Pressure and temperature switches

When it comes to demanding applications, Danfoss' know-how and expertise is unsurpassed. Our robust switches offer flawless performance day after day and are trusted in the most challenging situations in a variety of industries and applications, of which some are mentioned in the following.

## Marine and railway equipment

Break down of essential functions in trains and ships due to failures in the controls and safety equipment can be dangerous, very costly and time consuming. These customers therefore choose partners who have a good reputation and superior products to offer, among others:

- Temperature and pressure control and alarm functions in lubrication oil systems – type KPS, CAS and MBC.
- Pressure control for air compressors – type MBC, KP and RT.
- Essential safety control on trains – type RT and CAS.

## Industrial boilers and boiler room equipment

For boilers and in boiler rooms, accurate monitoring of steam/hot water installations, heat exchangers and water treatment equipment for feed water is vital. Danfoss' programme for steam and high-pressure hot water boilers and burners includes:

- Safety approved pressure controls – type BCP and RT.
- Reliable alarm and safety functions – type BCP, RT and KP.

## Water pumps and air compressors

In water pumps and air compressors it is important to keep a constant pressure and a continuous flow. To ensure this Danfoss offers a range of switches for:

- Monitoring and direct start/stop of single or three phase motors – type RT, MBC, CS, CAS and KP/KPI.
- Dry run protection of pumps – type KP/KPI and RT.

## Hydraulic equipment and windmills

Danfoss switches are intended for flawless alarm indication, shut down, control and diagnostics in a variety of demanding applications:

- Cooling and lubrication systems for generators and gear boxes – type MBC, KPS, KPI, KP, CAS and RT.
- Hydraulic units such as disk brakes and pitch cylinders – type MBC, KPS and RT.
- Power packs – type MBC and KP.

## Autoclaves and sterilisers

High control and safety are essential within the autoclave process.

Temperatures and pressures must be controlled within narrow limits over time by products with high repeatability and trustworthy performance:

- Check of door sealing – type KP, BCP and RT.
- Pressure controls of steam supply – type KP, RT and BCP.
- Control and alarm of pressure in the process chamber – type BCP, KP and RT.

## Examples

The BCP pressure switch packs all our expertise into a sleek, modern design. The advanced technology built into this durable boiler control sets new standards for reliability - and ensures a long life with a minimum of maintenance.

Marine applications where space and reliability are the most important features are the natural habitat of the MBC 5100 block-type pressure switch. With their high vibration resistance and all common marine approvals, they are trusted at high seas.

On wind turbines, helping to increase the amount of wind-produced power worldwide, the KPS temperature switch provides on-off limits when critical temperatures are reached.

# Discover a variety of built-in benefits

Ongoing development of new technology and new features is at the very heart of Danfoss. We want our switches to be among the very best on the market – living up to your expectations.

#### **1 Adjustable differential switching**

Pressure and temperature controls have either fixed or adjustable differential settings, good readability, and high accuracy of range setting with use of the scale.

#### **2 Bellows technology**

The lifetime of a pressure and temperature switch is determined by the quality of the bellows. Using advanced technology, and being world leader, Danfoss' bellows are manufactured without any welding points, which makes them stress free and completely tight.

#### **3 Designed for various applications**

Danfoss offers a very broad range of purpose-specific enclosures and connections.

#### **4 Snap action contacts**

All contacts are "snap-action" types, maintaining the contact force until the moment of contact break. Units with gold-plated contacts are ideal for low electrical loads while the silver-cadmium contacts are developed for high loads.

#### **15 international approvals**

Danfoss offers a wide range of approvals suited for different industries and geographical markets.

#### **High vibration stability**

Outstanding vibration stability in switches ensures flawless operation even in heavy-duty applications.

#### **Wide pressure ranges**

The programme covers working ranges from -1 bar up to 400 bar.

#### **High reliability**

All switches feature high accuracy, repeatability and stability over time.

#### **Different temperature sensing elements**

As experts in charging technologies Danfoss offers temperature switches that operate in a wide temperature range.

# RT pressure switches

RT switches are used in general industrial, heating and marine sectors. The RT single pressure switches series consist of a variety of controls including neutral zone pressure switches and safety pressure switches for steam boiler plant.

RT switches have been in service for more than 70 years.

- Pressure ranges: -1 to 30 bar
- Replaceable contact system
- Also available with gold plated contact systems
- Fail-safe design
- Adjustable differential
- Adjustable neutral zone
- Enclosure IP66
- Available with TÜV approvals
- Available with min. and max. reset function (IP54)
- Also available as differential switch
- Available with all relevant marine approvals

## Dimensions and weight:

Weight: Appr. 1 kg

All dimensions in millimetres

Approvals: CE marked in accordance with EN60947-4/-5. Relevant marine approvals.

## RT pressure switches

Contact type: SPDT

Contact material: Silver cadmium oxide (other contact types - see accessories)

Loads:  
AC-1 ohmic 10A 400V  
AC-3 (motor) 4A 400V  
AC-15 (inductive) 3A 400V

Ambient temperature: -50 to 70°C

## RT pressure switches

Pressure connection: G 3/8 A

## Spareparts and accessories for RT pressure switches

Type	Version	Description	
Contact system	Standard	Snap action single-pole changeover switch (SPDT) with silver cadmium oxide contact. Fitted in all standard versions of type RT	<b>017-403066</b>
Contact system	Standard	Snap action single-pole changeover switch (SPDT) with gold plated (oxide free) contact surfaces. Increases cut-in reliability on alarm and monitoring systems etc.	<b>017-424066</b>
Contact system	Max reset	Snap action single-pole changeover switch (SPDT) with silver cadmium oxide contact. Designed for RT units performing max reset function.	<b>017-404266</b>
Contact system	Min reset	Snap action single-pole changeover switch (SPDT) with silver cadmium oxide contact. Designed for RT units performing min reset function.	<b>017-404166</b>

Type	Description	
Setting knob	Replacement. Pale grey Ral 7035	<b>017-436366</b>
Seal cap	Seal cap to replace setting knob so that setting can only be altered with tools (tamper proof seal cap). Black	<b>017-436066</b>
Screws	Seal screws for cover and seal cap	<b>017-425166</b>
Solder nipple	Pipe thread ISO 228/1, G 3/8 connector, nipple and AL washer (10 mm ext. / 8 mm int. diam). for soldering onto steel or copper tubing. Steel span of jaws: 22	<b>017-436866</b>
Reducer	Pipe thread ISO 228/1, G 1/2 A x G 3/8, steel, span of jaws 22	<b>017-421966</b>
Reducer	Pipe thread ISO 228/1, G 3/8 x 7/16 - 20 UNF reducer, washer, brass, span of jaws 22	<b>017-420566</b>
Adaptor	Pipe thread ISO 228/1, G 3/8 A x R 3/8 (ISO 7/1) brass, span of jaws 17	<b>060-324166</b>

Type	Description	
Damping coil	1 m. damping coil with 7/16 - 20 UNF connectors. REducer code no 017-420566 is necessary if the damping coil is to be used with RT units with pipe thread: ISO 228/1, G 3/8 connection.	<b>060-019166</b>
Damping coil	Pipe thread ISO 228/1, damping coil with G 3/8 connector and 1.5 m copper capillary tube. Standard washers are supplied	<b>060-104766</b>
Armoured damping coil	Pipe thread ISO 228/1, damping coil with G 3/8 connector and 1 m. copper capillary tube. Standard washers are supplied	<b>060-333366</b>
Air bell for liquid level control	Air bell for liquid level control RT113. 62 mm diam. ext x 204 mm length. Pipe thread ISO 228/1, G 3/8 connector and nipple (10 mm o.d./6.5 mm i.d.) for welding or brazing on to steel or copper tubing. Brass.	<b>017-401366</b>

# The BCP pressure switch for reliable boiler control

A series of dedicated pressure switches, BCPs control, monitor and limit the pressure in steam and hot water boilers. Simple to install and operate, BCP pressure switches combine advanced technology, durability and design to provide failsafe boiler operation.

## Fluid temperature

The BCP can cope with fluid temperatures up to 120° C. For temperatures above 120°C, a water-filled loop must be installed.

## Pressure range from 0 to 40 bar

The BCP is designed to handle a wide pressure range from low pressure BCP1 with a narrow differential, to high pressure BCP7.

## Plug and play (DIN 43650)

A DIN 43650 plug and an external reset – operated by a screwdriver – makes electrical installation and operation easy.

## Manual reset with a standard screwdriver

All BCP pressure switches are available with an automatic reset for boiler operations, or a manual reset to be used as a safety limit switch.

## Failsafe versions

For added safety, dual bellows enable an off function (safety cut-out) if a fault occurs.

## Approvals

The BCP range is CE-marked in accordance with EN 60730-1, VdTÜV-Merkblatt Druck 100 TÜV. SDWFS/SDBFS. 08 – 335 and PED 97/23/ED, category IV, safety equipment. It is tested according to EN12952-11 and EN12953-9.

## Bracket for wall and DIN rail mounting

The BCP can be directly mounted on the pressure connection or wall mounted with a bracket.

## User friendly

- Easy external adjustment of the pressure setting and pressure differential
- Separate scales for pressure setting and differential setting

# BCP pressure controller / pressure limiter

The BCP type is a series of dedicated pressure switches for control, monitoring and safety of steam and hot water boilers. The BCP incorporates a single-pole changeover microswitch where the contact position depends on the pressure in the connection port and the range set value. For installations, in which operation is particularly critical for safety reason, the use of fail-safe control is recommended.

- Available as high and low pressure limiters as well as pressure controllers
- Wide pressure range: from low pressure BCP1 with narrow differential to high pressure BCP7
- The fail-safe dual bellows enable premature cut-out when fault occurs
- DIN plug mounted on the top of control for easy electrical wiring
- Single-pole changeover switch (SPDT), switch + alarm
- Direct mounting on pressure connection or wall mounting by means of a bracket
- Versions with automatic and manual resets available
- Screw adjustments made on top of housing
- Manual reset for pressure limiters possible only by means of tools
- Version with gold plated contact for electronic devices

## Dimensions and weight:

Weight: 0.5 kg

Dimensions in millimetres

Approvals: CE marked in accordance with EN60730-1 and PED 97/23.

## BCP pressure controller/ pressure limiter

Contact type: SPDT  
 Contact material: Gold plated silver. (On request silver cadmium oxide is available for higher loads)  
 Loads: AC-1 (ohmic) 6A 250V  
 AC-15 (inductive) 1 A 250V  
 Pressure connection: G $\frac{1}{2}$ A  
 Enclosure: IP 65  
 Ambient temperature: -20 to 70 °C

## KPS heavy-duty pressure switches

In the KPS series, special attention has been given to meeting important demands for a high level of enclosure, a robust, compact construction and resistance to shock and vibration.

The KPS range covers most outdoor as well as indoor application requirements, and are suitable for use in alarm and regulation systems in factories, diesel plant, compressors, powerstation and on board ships.

- Pressure ranges: 0 to 60 bar
  - Gold plated contact systems
  - Adjustable or fixed differential
  - Robust and compact construction
  - Resistance to shock and vibrations
  - Diaphragm version for applications with: Pulsations/pressure peaks
  - Also sea water as media
  - Enclosure IP67. Sturdy and sea water resistant.
  - Available with all relevant marine approvals

## Dimensions and weight:

*Weight:*

KPS 31-39: 1.0 kg

KPS 43 - 47 1.3 kg

*Dimensions in millimetres*

*Approvals: CE marked in accordance with EN60947-4/-5. UL E73170. All relevant marine approvals*

# The KPI pressure switch for liquid and gaseous media

Designed to control and monitor industrial application systems, the KPI is a compact and robust solution that offers safety and longevity.

## Wide setting range

Available in pressure ranges from -0.2 to 28 bar, there is a KPI with the pressure setting you require.

## Pressure control for most industrial applications

Easy and stable setting values make it easy to control liquid and gaseous media in most industrial applications, e.g. pumps and compressors

## Easy to install

The small dimensions of the KPI saves space and makes it easy to install.

## Shock and impact resistant

Vibration-proof from 0 to 1000 Hz, 4g (1g = 9.81m/s<sup>2</sup>), the KPI is ideal for mobile applications where shock and strokes occur.

## Ultra-short bounce times

The perfect Single Pole Double Throw (SPDT) snap-function minimises wear during each operation and extends contact life.

## Cable entry for 6-14 mm diameter cables

Two cable entries on the front of the pressure switch provide a number of possible electrical cable connections.

## High contact load

The SPDT's silver contacts can cope with loads up to 16A, 400V AC3. And gold contacts are also available to ensure perfect function with low electrical loads.

## Longevity

On average, the KPI can perform more than 400,000 electrical operations during its lifetime, which is four times more than approval requirements.

# KPI pressure switches for light industry

Danfoss KPI pressure switches are used for control, monitoring and alarm systems in industrial applications.

The KPI series are suitable for plant in connection with liquid and gaseous media. They are fitted with a single-pole switch changeover (SPDT).

- Pressure ranges: -0.2 to 28 bar
- High contact load
- Ultra short bounce-time
- Available with gold plated contact systems
- Adjustable differential
- Scale for setting of range and differential
- Enclosure IP44 when mounted with top cover and back plate
- Snap action contact system with omega spring

**Dimensions and weight:**

*Weight: 0.3 kg*

*All dimensions in millimetres*

**Approvals:** CE marked in accordance with EN60947-4/-5. Electrical safety certificate - FM. UL E31024.

# The CS pressure switch for excellent pressure control

Designed for air compressors and water pump applications, the CS pressure switch has a built-in, pressure-operated three-pole contact system. Made for the direct start of pumps and as on/off functions in control circuits, the CS switch is robust and reliable.

## Adjustable range and differential

The CS switch can be adjusted to suit a variety of working conditions and pressures, ranging from 2 to 20 bar.

## Special compressor application accessory

To prevent air compressors starting under load, a pressure relief valve can be used with the CS switch to relieve pressure on the compressor piston.

## Robust and tight

Enclosed in heavy-duty plastic, the CS switch is available in IP 43 or IP55 versions to ensure high performance in wet or dusty environments.

## Safe and reliable

For added safety in the event of system failure or maintenance purposes, the CS is fitted with a manual switch to lock the contact system in the open position, independent of the pressure in the system.

# CS pressure switches for air and water

CS pressure switches have a three-pole switch and adjustable differential.

The pressure switches are fitted with a manual switch that will lock the contact system in the open position independently of the pressure in the system.

- For automatic start and stop of air compressors and water pumps
- Pressure ranges: 2 to 20 bar
- Contact system: 3-pole (standard) and 1-pole (accessory)
- Adjustable differential from 0.7 to 7 bar
- Manual switch to lock the contact system
- Relief valve (accessory)
- Enclosure IP43 or IP55
- Versions for drinking water

# MBC 5100 block-type compact pressure switches

MBC pressure switches are used in industry and marine applications where space and reliability are the most important features. MBCs are compact pressure switches, designed according to our new block design to survive in the harsh conditions known from machine rooms onboard ships.

MBCs have high vibration resistance and feature all commonly marine approvals. The fixed, but low differential guarantees accurate monitoring of critical pressures. MBV test valves can be delivered as standard option for MBC pressure switches.

- All relevant marine approvals
- Pressure ranges: -0.2 to 400 bar
- Low differential (fixed) micro switch
- Resistant to shock and vibrations
- Enclosure IP65
- Diaphragm version for applications with pulsations/pressure peaks
- Compact design
- Low installations costs
- Fast and easy to operate
- Easy to mount on block test valve
- Available as differential pressure switch

## Dimensions and weight:

Weight: 0.4 kg.

# MBV 5000 pressure test valve

The MBV 5000 is a part of a block concept covering block pressure switches, block pressure transmitters, block test valves and accessories.

The block concept has been developed to save space, weight, and costs and meet the strict demands on marine equipment, including EU stipulations on such products.

MBV 5000 is designed in many different configurations for use in many different marine applications, for example: Monitoring, alarm indication, shut-down, diagnosing on equipment such as motors, gears, thrusters, pumps, filters, compressors, etc.

The block valve meets demands for fast installation, simple isolation, and easy test pressure connection.

- The MBV block valves designed in many configurations are for use with the MBC pressure switch or the MBS block pressure transmitter within the marine industry
- The valve meets demands for fast installation, simple isolation and easy test pressure connection

# RT temperature switches for temperature regulation

Suitable for a wide range of demanding industrial applications, RT temperature switches are designed to maintain a specific temperature difference between two media.

## **Wide regulating range**

The RT has a wide temperature regulating range from -60°C to 300°C. Precise scales make it easy to set the temperature range and differential.

## **Variety of sensors and functions**

An IP 66 enclosure and a range of sensor types – such as capillary tube sensors , room sensors and duct sensors – enable neutral zone adjustment and manual reset functions.

## **Contact systems**

RT temperature switches are available with standard contact systems for 3A, 400V AC15 loads and 4A, 400V AC3. Special contact versions are also available as spare parts.

## **Ultra-short bounce times**

The perfect Single Pole Double Throw (SPDT) snap function minimises wear during each operation and extends the contact life.

## **Cable entry for 6-14 mm diameter cables**

Two cable entries provide a number of possible electrical cable connections.

## **Longevity**

The RT has a mechanical lifetime of one million cycles over the full temperature range, and an electrical lifetime of 100,000 cycles at maximum load.

# RT temperature switches

RT controls are used in general industrial and marine sectors. The RT temperature switch series consist of a variety of room temperature switches and remote sensor temperature switches including neutral zone temperature switches. RT temperature switches are generally recommended for applications where safety or economical consequences are critical factors.

RT controls have been in service for more than 70 years.

- Temperature range: - 60°C to 300°C
- Replaceable contact system
- Also available with gold plated contact systems
- Adjustable differential
- Enclosure IP66
- Available with external max. reset function (IP54)
- Available with dead zone
- Available with all relevant marine approvals

# KPS temperature switches

In the KPS thermostats series, special attention has been given to meeting important demands for a high level of enclosure, a robust, compact construction and resistance to shock and vibration.

The KPS range covers most outdoor as well as indoor application requirements, and are suitable for use in monitoring, alarm and regulation systems in factories, diesel plant, compressors, powerstation and on board ships.

- Temperature setting ranges: -10 to +200 °C
  - Gold plated contact systems
  - Adjustable or fixed differential
  - Robust and compact construction
  - Resistance to shock and vibrations
  - Enclosure IP67. Sturdy and sea water resistant.
  - Available with all relevant marine approvals

Description	Code number
For KPS thermostats without armoured capillary tube	060L327366
For KPS thermostats with armoured capillary tube	060L036666

### Heat conductive compound

Description	Code number
For KPS thermostats with sensor fitted in a sensor pocket. Compound for filling sensor pocket pocket to improve heat transfer between pocket and sensor. Application temperature range: -20 to 150°C, momentarily up to 220°C	041E0114

# KP temperature switches

Danfoss KP thermostats are used for control, monitoring and alarm systems in industry. The KP thermostat series are temperature activated electric switches fitted with a single-pole double throw switch (SPDT), which can control single-phase ac motors of up to 2 kW directly.

- Temperature ranges: -30° C to 150° C
- High contact load - Ultra short bounce-time
- Also available with gold plated contact systems
- Enclosure IP44 when mounted with top cover and back plate
- Also available with enclosure IP55 for OEM customers
- Small dimensions - space saving - easy to install

## Dimensions and weight:

Weight: Appr. 0.4 kg

KP 62

KP 75: Sensor tinned copper Cu/Sn 5

KP 61, 62, 68, 75, KP 78, KP 79, KP 81

KP 78, 79, 81: Sensor tinned copper Cu/Sn 5

All dimensions in millimetres

Approvals: CE marked in accordance with EN60947-4/-5. Electrical Safety Certificate - FM. UL E31024. Relevant marine approvals

## KP temperature switches

Contact system:	SPDT
Contact material:	Silver cadmium oxide
Load:	AC-1 (ohmic): 16A 400V AC-3 (motor): 16A 400V AC-15 (inductive): 10A 400V
Enclosure:	IP 30
Ambient temperature:	-40 to 65°C
Reset:	Automatic

### Remote sensor with capillary tube

## Spareparts and accessories for KP temperature switch

Type	Description	Code numbers
Wall bracket	Mounting screw and washers included	<b>060-105566</b>
Angle bracket	Mounting screw and washers included	<b>060-105666</b>
Screwed cable entry	Pg 13.5 with special nut. For 6-14 mm diameter cables	<b>060-105966</b>
Top cover	For single control. If a wall or angle bracket is mounted on the backplate of the housing, the KP will have an IP 44 grade of enclosure by means of this cover	<b>060-109766</b>
IP 55 enclosure	For single control. Specially designed IP 55 enclosure , not transparent	<b>060-033066</b>
Sensor pocket	Application: KP 77, 78, 79, 81. Brass. Pocket dimension: L 110 x Ø 15 mm. With stuffing box	<b>060L333066</b>
Sensor pocket	Application: KP 77, 78, 79, 81. Stainless steel. Pocket dimension: L 110 x Ø 15 mm. With stuffing box	<b>060L333166</b>
Heat conductive compound	For sensor pockets. Tube with 3.5cm <sup>3</sup> compound to be filled in the sensor pocket to improve heat transfer between pocket and sensor. Application range for compound: -20 to 150°C, momentarily up to 220°C.	<b>041E0114</b>

Brackets

IP 55 enclosure

# The MBC 8100 compact temperature switches

MBC 8100 temperature switches are suitable for use in monitoring and alarm systems in factories, diesel plants, compressors and power stations, as well as in marine applications.

## Alarm and monitoring

As part of alarm and control circuits, the switches give signals within narrow non-drifting limits, typically in lubrication and cooling oil applications, including diesel engines and gear boxes.

## Compact space-saving solution

The block design allows packed mounting, providing a high degree of integrity for your machinery.

## Excellent vibration and shock resistance

Ideal for heavy-duty applications, the MBC 8100's high vibration resistance increases the reliability of the entire system.

## Adjustable range with fixed differential

The MBC 8100 comes pre-set from the factory, but it also has an adjustable range and low fixed differential for accurate monitoring of critical temperatures.

## Resistance to media

The sensor pocket is available in brass or stainless steel.

# MBC 8100 block-type compact temperature switches for marine applications

MBC 8100 thermostats are used in marine applications where space and reliability are the most important features. MBCs are compact thermostats, designed according to our new block design to survive in the harsh conditions known from machine rooms onboard ships. MBCs have high vibration resistance and feature all commonly marine approvals. The fixed, but low differential guarantees accurate monitoring of critical temperatures. Also available without marine approvals (MBC 8000; please contact Danfoss for information)

- Block design
- Fully electromechanical
- -10 to +200 °C temperature range
- Available with all relevant marine approvals
- Designed to meet the strict demands in the marine equipment

## Dimensions and weight:

All dimensions in millimetres

Approvals: CE marked in accordance with EN60947-5. All relevant marine approvals.

## MBC 8100 block-type compact temperature switches

Contact function: SPDT

Loads: AC-1 (ohmic) 10A, 250V

AC-3 (motor) 3A, 250V

AC-15 (inductive) 0.5A, 250V

Ambient temperature: -40 - 85°C

Enclosure: IP 65

Electrical connection: Plug Pg 11. Other connections available on request.

## Here **today**. Here **tomorrow**.

Danfoss is a leading global player within the development and production of mechanical and electronic products and controls. Since 1933, our extensive know-how has made modern life easier and we continue to break new ground within our core business areas.

Every day, more than 250,000 items are produced at 70 factories in 25 countries. Impressive as these figures are, we are most proud of the way our dedicated employees apply the high-quality components in customer solutions, adding value to the end products. Building strong partnerships is of great importance to us, because it is purely by understanding our customers' needs that we can meet the expectations of tomorrow.

This is also true in Industrial Automation, a Danfoss entity dedicated to focusing on the industrial world of today. Through us, you gain access to the entire Danfoss pool of technologies, with special emphasis on sensors and controls. We offer safer, more reliable and more efficient solutions in a close cooperation based on firm values.
