DATALOGIC AUTOMATION FOR FACTORY AUTOMATION

Datalogic Automation is one of the worldwide leading producers of automatic identification, detection and marking solutions for industrial automation. The ideal partner for companies that aim at developing a real competitive advantage through product traceability and automation of manufacturing processes in industrial and logistics fields. Its portfolio includes:

- IDENTIFICATION (LASER, IMAGERS)
- SENSORS (PHOTOELECTRIC SENSORS, PROXIMITY SWITCHES, MEASUREMENT DEVICES)
- SAFETY
- VISION
- LASER MARKING (FIBER, CO2, DPSSL)

that guarantee product focalization aimed at satisfying specific customer applications as well as offering a very wide and complete product range for Factory Automation, particularly in the following sectors:

- AUTOMOTIVE
- HEALTHCARE - PHARMACEUTICAL
- FOOD - BEVERAGE - TOBACCO
- ELECTRONICS & SOLAR
- GENERAL MANUFACTURING
- TRANSPORTATION & LOGISTICS

Identification

The automatic identification products have been developed in order to supply compact and extremely functional solutions. Datalogic Automation offers all the technologies available today: state-of-the-art laser scanners and imagers for bar code reading (traditional and 2D). The wide range of accessories available together with the particular attention placed on connectivity in industrial environments (Fieldbus), increases the ease and flexibility of use of the Bar Code readers.

Sensor

Datalogic Automation is specialized in the development and manufacturing of photoelectric, luminescence and contrast sensors, slot sensors for label detection, fiber optic amplifiers, area sensors, inductive sensors and temperature controllers. Datalogic Automation also supplies a wide range of measurement sensors, commonly used in level and position control, as well as in the precise and accurate detection of the material dimensions during working.

Safety

Datalogic Automation offers a complete range of safety light curtains. Extremely reliable and flexible, these light curtains protect operators that pass, stay near or operate directly with dangerous automatic machines.

Vision

The Vision Product Group includes vision sensors for inspection and 2D readers for identification based on the state-of-the-art technology, that however remain easy to use.

Laser Marking

Datalogic Automation supplies a wide array of solutions able to suit all marking needs: CO2, Fiber and DPSS laser technology. The DPSS technology is available in two different versions (infra-red laser), with harmonic duplication (green laser) and harmonic triplication (UV laser). The complete range of technologies available satisfy all laser marking applications on a wide spectrum of materials: metal alloys – such as steel, titanium and aluminum – plastic materials, as well as organic materials such as paper, cardboard or fabric, leather, wood, glass, silicon and rare earth elements.

S5 SERIES

The **S5** series offers a range of plastic tubular M18 photoelectric sensors. The most varied optic functions can be chosen amongst the fixed focus or diffuse proximity models with short, medium or long operating distances reaching 60 cm; the 4 m retroreflex, 3 m polarised retroreflex and 1 m for detection of transparent materials; the 12 m through beam and models with fibre-optic connection. Different versions with either axial or radial optics are available. The series offers connector or cable connection, 3 wire Vac versions or 4 wire Vdc versions with complete configuration of the NPN/ PNP output and dark/light mode. A red LED indicating the output status is visible on the bottom side of the sensor. The versions with trimmer adjustment present also a green LED signalling the switching stability according to the received signal's intensity. The rugged ABS housing always guarantees IP67 protection.

HIGHLIGHTS

- Wide versatility of optic functions and connections
- High operating distances for all functions
- Models with trimmer adjustment and stability LED
- Rugged and impermeable plastic housing

APPLICATIONS

Ceramics

Transportation lines

Beverage & Bottling

Packaging lines

TECHNICAL DATA

Power supply:	10 ... 30 VDC (D.C. VERS.), REVERSE POLARITY PROTECTION 15 ... 264 Vac (a.c. vers.)
Consumption:	30 mA max. (d.c. vers.) 10 mA max. (a.c. vers.)
Light emission:	infrared LED 880 nm red LED 660 nm (B, E1 vers.)
Diffuse proximity operating distance:	1 ... 10 cm (C10 vers.), 1 ... 8 cm (C8 vers.) 1 ... 35 cm (C35 vers.), 1 ... 30 cm (C30 vers.) 1 ... 60 cm (C60 vers.)
Fixed focus operating distance:	15 mm with 1 mm spot (D15 vers.) 50 mm with 2 mm spot (D50 vers.)
Retroreflex operating distance:	0.1 ... 4 m (on R2)
Polarised retroreflex operating distance:	0.1 ... 3 m (on R2)
Retroreflex for transparents op. distance:	0.1 ... 0.8 m (on R2)
Through beam operating distance:	0 ... 12 m (F/G12 vers.), 0 ... 8 cm (F/G8 vers.)
Operating distance with fibre-optics:	22 mm proximity (with OF-18-ST) 85 mm through beam (with OF-19-ST) refer to OF series for other fibres
Setting:	sensitivity trimmer (A4, C8, C10, D15, D50, G vers. excluded)
Indicators:	red OUTPUT LED green STABILITY LED (d.c. vers.) red POWER LED (G vers.)
Output type:	NPN or PNP configurable (d.c. vers.) SCR + bridge rectifier (a.c. vers.)
Saturation voltage:	2.5 V max. (vers. d.c.)
Output current:	150 mA max.(vers. d.c.), short-circuit prot. 100 mA max.(vers. a.c.)
Response time:	500 µs (D50 vers.) 1 ms max. 2 ms (F vers. in d.c.) 20 ms max. (a.c. vers.)
Switching frequency:	1KHz (D50 vers.) 500 Hz max. 250 Hz max. (F vers. in d.c.) 25 Hz max. (a.c. vers.)
Operating mode:	dark/light (configurable in 4 wires d.c. vers.)
Auxiliary functions:	'test +' and 'test -' inputs (G vers. in d.c.)
Connection:	4-pole M12 connector or 2 m Ø 5 mm cable
Electrical protection:	class 1 (a.c. vers.); class 2 (d.c. vers.)
Mechanical protection:	IP67
Housing material:	ABS
Lens material:	PMMA plastic
Weight:	25 g max. (connector vers.); 100 g max. (cable vers.)
Operating temperature:	-25 ... +55°C
Storage temperature:	-25 ... +70°C

S10 SERIES

The **S10** series, in a practical and sturdy tubular M18 metal housing, suits the more difficult applications in the mechanical or food industries.

The IP69K mechanical protection guarantees resistance to washdown with water jets at high temperatures reaching 80°C and pressure reaching 100 bar.

Moreover, AISI-316L stainless steel versions are available for a major resistance towards chemical agents and aggressive detergents as well as to acid corrosion.

The lens in PMMA plastic offers the possibility of mounting a glass MEK-proof protection. A reflector with IP69K mechanical protection is available for the retroreflex versions.

The **S10** series includes adjustable proximity versions reaching 10, 35 or 60 cm and 14 mm fixed focus proximity, 4 m retroreflex and 3 m polarised retroreflex, 0.8 m retroreflex for transparents as well as 18 m through beam models.

The M12 connection requires only 3 wires for power supply and NPN or PNP output.

HIGHLIGHTS

- High excess-gain and operating distances
- IP69K mechanical protection
- AISI-316L stainless steel versions
- Standard 3 wire configuration output

APPLICATIONS

Ceramics

Transportation lines

Beverage & Bottling

Packaging lines for Food & Pharma

S15 SERIES

The main characteristic of the M18 tubular **S15** sensors is the housing length of only 40 mm, especially suitable for applications with reduced space.

The **S15** series is available with cable output, in order to maximise the concept of 'reduced dimensions' as well as to offer contemporaneously the best installation flexibility.

The **S15** series is supplied without the sensitivity adjustment trimmer to ease and speedup installation. This feature drastically reduces the possibility of allowing the operator to modify the sensor's performances and so guaranteeing major reliability and productivity.

The main optic functions used in the industrial market are available, polarised retroreflex, non-polarised retroreflex, diffuse proximity and through beam.

These sensors are ideal for the most critical applications with harsh environmental conditions thanks to the IP69K mechanical protection.

HIGHLIGHTS

- Small housing of only 40 mm
- Cable or pig-tail versions
- No sensitivity adjustment trimmer
- IP69K mechanical protection

APPLICATIONS

Ceramics

Transportation lines

Beverage & Bottling

Packaging lines

INSTALLATION

The sensor can be fixed by means of the M18x1 threaded body using CH.24 nuts (1.5 Nm maximum tightening torque) or low-profile flared nut provided specifically supplied for. Various orientable fixing brackets are available to ease sensor positioning (please refer to the accessories listed in the general catalogue). The operating distance is measured from the front surface of the sensor lens. C models: the object has to be moved closer or further away from the front surface of the sensor lens to improve detection. In case of lateral translation, the object must move as indicated in the figure.

S50 SERIES

The **S50** series offers all optical functions within a M18 housing. With the universal sensing functions of proximity, polarised retroreflex and through beam, which are also available with class 1 laser emission, as well as the more advanced functions of background suppression, contrast and luminescence, the S50 really is one housing for all applications. The S50 setting is carried out by either by potentiometer, which is sealed to IP67, or using the patented EASYtouch™ push-button teach system, which gives rapid and precise automatic setting of the switching points. The S50 series is available both in flat plastic format ideal for M18 nut or screw mounting through the sensor body, as well as a cylindrical metal housing. Axial or radial optics are available in both housings with integral cable or M12 connection conforming to EN 60947-5-2, the European wiring standard. The performance, versatility and extensive optical sensing options, positions the S50 series as the new benchmark for customers focused on the evolution of technology and development of standards.

HIGHLIGHTS

- Complete range of optic functions, universal, application and laser class 1
- Flat plastic tubular housing for improved versatility or metal cylindrical housing
- Versions with axial or radial optics, with fixed, trimmer or EASYtouch™ teach-in adjustment
- Cable or M12 connection with EN standard NPN or PNP NO-NC configuration

APPLICATIONS

Ceramics

G/F INFRARED EMISSION

Longer operating distances can be obtained utilising separate emitter and receiver units. The infrared emission is modulated to avoid interference with other light sources and the emitter is fitted with test inputs for remote system interrogation.

DETECTION DIAGRAMS

G/F INFRARED EMISSION

Longer operating distances can be obtained utilising separate emitter and receiver units. The infrared emission is modulated to avoid interference with other light sources and the emitter is fitted with test inputs for remote system interrogation.

DETECTION DIAGRAMS

G/F LASER RED EMISSION

The high operating distance typical of emitter and receiver pairs is notably increased thanks to the use of visible red laser emission. The laser beam can be easily aligned and offers excellent detection resolution of even small objects. The class 1 laser emission guarantees maximum safety for the operators in all applications.

RADIAL OPTICS

A INFRARED EMISSION

With retroreflex sensors the object is detected when it interrupts the light beam generated between the sensor and its associated prismatic reflector. This retroreflex system, created between the sensor and the reflector, offers the advantage of electrically connecting one single unit instead of two, as in the emitter-receiver system.

DETECTION DIAGRAMS

■ Operating distance

Excess gain

Detection area

B INFRARED EMISSION

With retroreflex sensors the object is detected when it interrupts the light beam generated between the sensor and its associated prismatic reflector. Highpolarisation optic filters also allow reliable detection of very reflective objects, such as mirrored surfaces that, differently from the prismatic reflector, reflect the light beam without rotating the polarisation plane.

- Recommended operating distance
- Maximum operating distance

High efficiency reflectors can be used to obtain larger operating distances. Refer to **Reflectors (A.01)** of the **General Catalogue**.

B LASER RED EMISSION

The visible red laser emission increases the operating distance and resolution of the polarised retroreflex sensor. Specific R7 or R8 reflectors with 0.8 mm microprisms are available for high-resolution detection of small objects. The class 1 laser emission guarantees maximum safety for the operators in all applications.

T RED EMISSION

With high sensitivity and reduced hysteresis this retroreflex sensor allows the detection of even a small variation of the light emission received by the sensor, typically created by the presence of transparent objects such as glass or PET containers or plastic film sheets for packaging. The presence of polarising filters avoids false switching on shiny surfaces.

axial on R5	1.4	1.7
axial on R2	1	1.3
radial on R5	1.4	1.7
radial on R2	1	1.3

- Recommended operating distance
- Maximum operating distance

High efficiency reflectors can be used to obtain larger operating distances. Refer to **Reflectors** of the **General Catalogue**.

C SHORT INFRARED EMISSION

This diffuse proximity sensor represents a reliable, simple and cost-effective solution for the direct detection of any object inside the fixed operating distance. Its particularly compact dimensions permit the installation in very small spaces.

D RED EMISSION

The fixed focus proximity sensor offers a simple fixed background suppression distance beyond which no object is detected. The fixed triangulation of the optics greatly reduces the detection distance of reflective objects. The visible red emission facilitates sensor installation.

C LASER RED EMISSION

The visible red laser emission allows the accurate detection of very small objects. The sensors operate as a proximity device up to 35 cm and can be used as a contrast sensor for high contrast mark detection. The class 1 laser emission guarantees maximum safety for the operators in all applications.

M AXIAL RED EMISSION

Background suppression proximity allows to precisely adjust the distance over which the object is not detected, with the minimum difference between reflective objects. The EASYtouch™ setting procedure fixes automatically the best detection conditions, simply pressing once the teach-in push-button, in presence of the reference to detect.

DETECTION DIAGRAMS

■ Operating distance

E RED EMISSION

The amplifier is built to accept any standard 2.2 mm Ø fibre-optic which can be for either diffused or through beam operation. A locking ring when tightened holds the fibres firmly in position. The sensitivity is adjusted by an IP67 rated trimmer. The proximity or through beam fibres are mainly used in applications where space is of a premium and for detection of small objects. Special fibres are also available for high temperature and high wear applications. For further information on the extensive range of fibre-optic accessories please see the OF datasheet.

DIMENSIONS

INDICATORS AND SETTINGS

W WHITE EMISSION

The white light LED emission is designed for the detection of a large number of coloured or grey-scale contrasts, in order to detect print registration marks or similar. The EASYtouch™ setting procedures automatically selects the best detection conditions, simply by pressing the teach-in push-button once, in the presence of a reference mark. By pressing the teach-in push-button and holding it down until the green light on the rear of the sensor flashes, in the presence of the reference mark and then pressing the button again in the presence of the contrast you wish to ignore, a higher level of accuracy is obtained.

DETECTION DIAGRAMS

Operating distance

U UV EMISSION

The UV light LED emission detects any luminescent reference, even on very reflective surfaces, such as ceramics, metal or mirrored glass. The EASYtouch™ setting procedures fixes automatically the best detection conditions, simply by pressing the teach-in push-button once, with the luminescent object present. By pressing the teach-in push-button and holding it down until the green light on the rear of the sensor flashes, with the luminescent object present and then pressing the button again in the presence of a luminescent reference you wish to ignore, a higher level of accuracy is obtained.

■ Operating distance

TECHNOLOGY

- 1 Multi-layer fine-line PCB
- 2 Chip-size components, integrated circuits in 8 bumps flip-chip
- 3 Analogue digital ASIC
- 4 Power ASIC for antivalent outputs
- 5 M12 custom connector compatible with quick connection systems. The four terminals are cone-shaped to facilitate the direct insertion in the cable conductors (4 x 0,5 mm²)

- 6 Housing and fixing nuts in indeformable plastic providing excellent resistance against hostile environments. Indelible laser marking
- 7 A modular product developed for the automation of the assembling and testing process necessary to guarantee intrinsic quality, repeatability and reliability. One-piece-flow management for improved service

EASYtouch™ is a Datasensor patent-covered technology that allows a rapid and safe setting of micro-controlled sensors equipped with a teach-in push-button. A pressure longer than two seconds of the push-button allows a good adjustment of the sensitivity threshold. EASYtouch™ is the easiest and fastest calibration procedure available on the market. The instructions on how to best use EASYtouch™ are given in the product's instruction manual.

ACCESSORIES

The series is compatible with all the **Datalogic Automation** accessories already developed for tubular sensors. In the **General Catalogue** refer to:

- **CS** connectors
- **R** reflectors
- **OF** fibre-optics
- **ST** fixing brackets

New accessories dedicated to the **S50** series have been developed to cover all the fixing requirements and to improve the functioning. In particular **EASYin™** is an innovative fixing system that can be used only for the plastic flat version, that allows a fast and safe positioning of the sensor, facilitating the adjustment as well as the locking and unlocking.

S51 SERIES

The **S51** series offers the most cost-effective solution in M18 photoelectric sensors which is today improved thanks to the increase of the operating distances. The range includes the tubular metal housing as well as a brand news flat plastic housing which make installation. The tubular plastic and metal models are both available with either axial or radial optics; in both cases the optic head and lenses do not protrude beyond the external 18 mm diameter of the sensor housing. The diffuse proximity model presents a 10 cm fixed operating distance with wide emission spectrum and the another model with 1 - 40 cm trimmer-adjustable operating distance. Standard retroreflective models have an operating distance up to 4 m whilst the polarised retroreflective models used for reliable detection of reflective objects are fitted with sensitivity adjustment and have a 3.5 m operating distance. The emitter and receiver models, used for longer operating distances, reach 18 meters. The sensors of the **S51** series, with cable or M12 connector and PNP or NPN output, provide a 3 wire connection configuration in compliance with the EN60947-5-2 standard.

HIGHLIGHTS

- Flat plastic or cylindrical metal housing
- Versions with axial or radial optics
- Cable or M12 connection with NPN or PNP output
- Standard 3 wire connection configuration
- Selectable dark or light output

APPLICATIONS

Ceramics

Transportation lines

Beverage & Bottling

Packaging lines

- D** Cable connection

Trimmer for sensitivity adjustment. Rotate in a clockwise direction to increase the operating distance.

TECHNICAL DATA

Long diffuse proximity operating dist.:	1 ... 40 cm (radial version 30 cm)
Short diffuse proximity operating dist.:	0 ... 10 cm (radial version 8 cm)
Narrow beam proximity operating dist.:	0.2...10 cm
Retroreflex operating distance:	0.1...4 m (radial version 3 m) on R5
Polarised retroreflex operating distance:	0.1...3 m (radial version 2.5 m) on R5
Through beam operating distance:	0...20 m (radial version 18 m)
Power supply:	10 ... 30 Vdc ¹
Ripple:	≤2 Vpp
Consumption:	≤35 mA
Light emission² :	infrared LED 880 nm red LED 650 nm (B01 mod.)
Setting:	sensitivity trimmer (B01, C01 mod.) ³
Indicators:	yellow OUTPUT LED (excl. G00 mod.) green POWER LED (G00 mod.)
Output type:	NPN vers. or PNP vers.
Output current:	≤100 mA
Saturation voltage:	≤2 V
Response time:	1 ms 4 ms (F00 mod.)
Switching frequency:	≤500 Hz ≤120 Hz (F00 mod.)
Operating mode:	dark/light selectable ⁴
Auxiliary functions:	Test + and Test - (G00 mod.) ⁵
Connection:	2 m Ø 4 mm cable ⁶ M12 4-pole connector ⁷
Electrical protection:	class 2
Mechanical protection:	IP67
Protection devices:	A, B ⁸
Housing material:	PBT (S51-P vers.) nickel-plated brass (S51-M vers.)
Lens material:	PMMA
Weight:	25 g max. (S51-PA/PR-5 vers.) 75 g max. (S51-PA-/PR-2 vers.) 60 g max. (S51-MA/MR-5 vers.) 100 g max. (S51-MA/MR-2 vers.)
Operating temperature:	-25 ... +55°C
Storage temperature:	-25 ... +70°C
Reference standard:	EN 60947-5-2, UL 508

TECHNICAL NOTES

- ¹Limit values
- ²Average life of 100.000 h with TA = +25 °C
- ³270° single-turn trimmer
- ⁴With L/D input not connected the proximity models function in the light mode and the retroreflex and through beam models in the dark mode; the light mode can be selected connecting the L/D input to +Vdc, the dark mode connecting it to 0Vdc
- ⁵Emitter off with Test+ connected to +Vdc and Test- to 0 Vdc
- ⁶PVC, 4 x 0.14 mm²
- ⁷M12 connector compatible with quick connection systems
- ⁸A - reverse polarity protection
B - overload and short-circuit protection

■ Recommended operating distance
■ Maximum operating distance

DETECTION DIAGRAMS

Note: the diagrams indicate the detection area typical of the axial optic versions; the maximum operating distance of the radial optic versions decreases as indicated in the tables given below

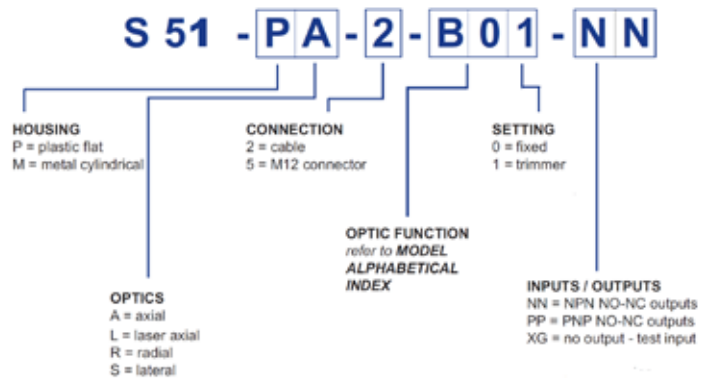

*Only on axial optic models

For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

SDS SERIES

The M18 tubular sensors of the **SDS** series, thanks to the background suppression proximity optic system, precisely detect all objects inside the set operating distance, independently from colour and rear fixed or moving objects. The photoemitter is a red light LED that generates a visible circular spot; the receiver is a PSD (Position Sensitive Device) photoelement sensitive to the incident light's position. A good vibration immunity and a low detection difference between lighter or darker objects are obtained as there are no moving parts for the optic triangulation. The background suppression distance setting is precisely obtained by means of a multi-turn trimmer. Normally open and normally closed outputs are both present with standard configuration.

HIGHLIGHTS

- Adjustable background suppression reaching 12 cm
- Axial or radial optics
- Plastic or metal M18x1 housing
- Double NO-NC standard output

APPLICATIONS

Ceramics

Transportation lines

Beverage & Bottling

Packaging lines

TECHNICAL DATA

Power supply:	10 ... 30 Vdc, reverse polarity protection
Consumption:	30 mA max.
Light emission:	red LED 660 nm
Spot dimension:	Ø 10 mm at 100 mm Ø 15 mm at 100 mm (SDS5 radial vers.)
Background suppression operating distance:	2 ... 10 cm (SDS5 vers.) 4 ... 12 cm (SDS10 vers.)

SL5 SERIES

The **SL5** sensors, thanks to the laser emission concentrated in a thin light beam, represent the ideal solution for the detection of very small objects or to reach very long operating distances. Precise detections with decimillimetre resolutions can be obtained with the proximity model at an operating distance ranging from 0 to 35 cm. High operating distances can be reached with the 12 m polarised retroreflex model, or with the 60 m through beam model; high-resolution detections at shorter distances can be effected also.

The visible red emission is generated by a Class 1 laser according to the EN 60825-1, guaranteeing the maximum safety in all applications.

The sensitivity adjustment trimmer and the LEDs indicating the output status and switching stability are positioned on the sturdy ABS tubular M18 housing with IP67 protection.

HIGHLIGHTS

- Visible red class 1 laser emission
- Proximity models for high-resolution detections
- Retroreflex and through beam versions for long operating distances
- Trimmer sensitivity adjustment and stability LED

APPLICATIONS

Ceramics

Transportation lines

Beverage & Bottling

Packaging lines

TECHNICAL DATA

Power supply:	10 ... 30 Vdc, reverse polarity protection
Consumption:	35 mA max.
Light emission:	red laser 650 nm
	safety class 1 according to EN 60825-1
Diffuse proximity operating distance:	0 ... 35 cm
Diffuse proximity resolution:	0.2 mm at a distance of 5 cm
	1 mm at a distance of 10 cm
	3 mm at a distance of 20 cm
	5 mm at distances over 30 cm
Polarised retroreflex operating distance:	0.03 ... 12 m (on R2)
	0.3 ... 7 m (on R7)
Polarised retroreflex resolution:	1 mm at a distance of 1 m (on R7/r8)
	2 mm at a distance of 3 m (on R7/r8)
	4 mm at a distance of 5 m (on R7)
	5 mm at distances over 7 m (on R2)
Through beam operating distance:	0 ... 60 m
Through beam resolution:	2.5 mm at a distance of 5 m
	5 mm at a distance of 10 m
	10 mm at distances over 20 m
Setting:	sensitivity trimmer
Indicators:	yellow OUTPUT LED

SM123 SERIES

The new **SM123** series offers a complete line of subminiature amplified photoelectric sensors, ideal for mounting in reduced spaces or in presence of particular mechanical obstacles. The extremely compact dimensions do not limit the detection performances, that suit most of the applications on automatic machinery for packaging, assembling, printing and so on, such as in automatic distribution and vending machines. The **SM1** models are 20 mm fixed focus proximity that, thanks to the thin housing with side optics, represent a valid alternative to fibre-optic systems. The **SM2** models present instead an ultra-flat format with a thickness inferior to 5 mm and offer a 170 mm diffuse proximity, as well as a through beam with an operating distance reaching 1.2 m. The **SM3** models also present a thin housing with lateral optics, but offer a 50 cm coaxial polarised retroreflex or a 1.2 m through beam optic function. All the subminiature sensors of the **SM123** series have visible red emission and are available in the NPN or PNP versions, both with 3 wires 2 m cable connection. The plastic ABS housing guarantees an IP67 protection degree.

HIGHLIGHTS

- 20 and 170 mm proximity, 50 cm polarised retroreflex and 1.2 m through beam
- Thin housing with side optics or ultra-flat format
- Visible red emission on all models for easy alignment
- Amplified NPN or PNP output with 3-wire connection

APPLICATIONS

Automotive

Beverage & Bottling

Packaging lines

SM1: a complete sensor with fibre-optic dimensions

SM2: a complete sensor with stamp dimensions

SM3: coaxial polarised retroreflex and through beam sensors in a subminiature format for high-resolution detection

SM3-PR-2-B00-ND	NPN - dark	95B000350

TECHNICAL NOTES

1. On white 90 % target
2. Limit value
3. Micro-prismatic reflectors have to be used with the polarised retroreflex with coaxial optics; the operating distance is reduced to 30 cm using R7 and R8 reflectors. The coaxial optics eliminates the 'blind' area at a close distance
4. A - reverse polarity protection
B - overload and short-circuit protection

SMALL SERIES

The new **SMall** series offers a complete line of subminiature amplified photoelectric sensors, ideal for mounting in reduced spaces or in presence of particular mechanical obstacles.

The extremely compact dimensions and wide detection field of all modes suit most of the applications on automatic machinery for packaging, assembling, printing as well as in automatic distribution and vending machines.

The series offers many different optic functions including 1.5 m retroreflex, 1 m polarised retroreflex, and 2 m through beam. The 15 mm, 20 mm, 30 mm and 50 mm fixed focus proximity models represent a valid alternative to fibre-optic systems and can be used to detect objects with small profiles and poorly reflective materials.

All models of the subminiature **SMall** series have visible red emission facilitating alignment, cable connection and are available in the NPN or PNP versions with NO-NC double output. The plastic housing guarantees an IP67 protection degree.

HIGHLIGHTS

- 15 mm, 20 mm, 30 mm and 50 mm fixed focus proximity
- 1.5 m retroreflex and 1 m polarised retroreflex
- 2 m through beam models
- Amplified NPN or PNP output with NO-NC double output

APPLICATIONS

Automotive

Beverage & Bottling

Packaging lines

The range offers versions with PNP or NPN output and each are available with a normally open and normally closed output. The sensor functions in the light mode if the normally open output is used and is activated, like the output LED, in presence of light. The opposite effect is obtained when the sensor functions in dark mode and the normally closed output is used. In presence of short-circuit output, the green LED blinks signalling the fault.

S3Z SERIES

The high operating distances and cost-effective price, makes the S3Z series in the miniature format with dimensions and standard fixing affirmed in the market, in particular in Far-East. Different models are available: 15m through beam, 4m polarised retroreflex, 2m polarized for transparent, 70 cm diffuse proximity, narrow beam from 50 to 150mm and 5 to 30cm background suppression model with multi-turn mechanical trimmer setting. Also available LASER models class I: 30m through beam, 10m polarised retroreflex and 40 to 300mm background suppression. Versions with NPN or PNP output, with dark or light operating mode and with cable or M8 connection are available. The plastic housing is completely overprinted, guaranteeing maximum mechanical protection also in presence of frequent washing.

HIGHLIGHTS

- Complete range of optic function LED or LASER emission
- 2m polarized for transparent detection
- 40-300 mm background suppression with both LASER or LED technology emission
- 1m long diffused, 15 cm diffused narrow beam
- 4 m polarised retroreflex or 10m LASER model
- 15 m through beam or 30m Laser model
- Standard 3 wire output configuration
- IP67 mechanical protection
- Interference prevention allows two units to be mounted side by side

DIMENSIONS

SLIT

Two different slit models, with rectangular or circular slot, can be easily mounted on the front side of the through beam sensors to reduce the emission beam. The resolution and the minimum object detectable can be improved with the slit positioned on the receiver (S3Z...F01). The installation of the two aligned sensor couples is eased by mounting the slit also on the emitter (S3Z...G00), avoiding reciprocal interference. The slit reduces the operating distance as shown in the following table.

Slit		Operating distance		Minimum object detectable (mm)	
Model	Width (mm)	Used on F01	Used on F01 and G00	Used on F01	Used on F01 and G00
S3Z-SLIT1	∅ 0.5	0.8	0.08	5	0.3
S3Z-SLIT2	∅ 1	1.5	0.3	5	0.6
S3Z-SLIT3	∅ 2	2.5	1.2	5	1.5
S3Z-SLIT4	0.5x18	2.5	1	7	0.5
S3Z-SLIT5	1x18	3.5	1.5	7	1
S3Z-SLIT6	2x18	6	3.5	7	2

INSTALLATION

- Do not apply excessive impact on the sensor during the installation process, so as to prevent damage or deterioration in the degree of protection.
- To install the sensor, tighten the mounting screws to a torque of 0.5 Nm or less.
- Install the Background suppression type sensor head perpendicular to the object transfer as shown below to minimize sensing errors.

S40 SERIES

The photoelectric sensors of the **S40** series, in the innovative miniature housing, offer all the main optic functions with the advantages of microprocessor control and automatic Teach-in and Remote setting with EASYtouch™ procedure.

The series includes different models: 30 cm diffuse proximity and 10 cm background suppression, 4 m retroreflex, 3 m polarised retroreflex, or 0.7 m version for the detection of transparent glass or PET objects, 6 m through beam models, all with visible red emission.

The laser emission is available for retroreflex, proximity and background suppression, offering very high resolution detection.

The sensitivity and operating distance setting are obtained by simply pressing the button, or by cable to allow remote control and the mounting in small or difficult to reach areas.

HIGHLIGHTS

- EASYtouch™ microprocessor Teach-in and Remote setting
- Laser retroreflex, proximity and background suppression
- Cable or M8 connection, NPN or PNP
- ABS housing with IP67 protection

APPLICATIONS

Automotive

Beverage & Bottling

Packaging lines

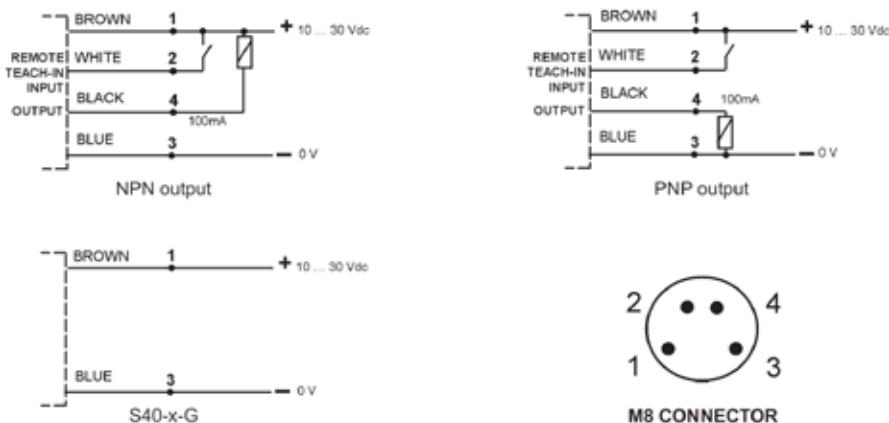

TECHNICAL DATA

Power supply:	10 ... 30 Vdc, reverse polarity protection
Consumption:	35 mA max.
Light emission:	red LED 660 nm, red laser 650 nm
Diffuse proximity operating distance:	0.5 ... 30 cm
Laser diffuse proximity op. distance:	4 ... 15 cm
Laser proximity resolution:	0.2 mm (on focus point)
Background suppression op. distance:	15 ... 100 mm
Laser background suppr. op. distance:	20 ... 60 mm
Laser background suppr. resolution:	0.2 mm (on focus point)
Background suppr. white/grey diff.:	7%
Polarised retroreflex operating distance:	0.1 ... 2.5 m (on R2)
Laser polarised retroreflex op. distance:	0.1 ... 6 m (on R2)
Laser retroreflex resolution:	1 mm (on focus point)
Retroreflex transparents op. distance:	0.1 ... 0.7 m (on R2)
Setting:	SET push-button Remote by cable
Indicators:	yellow OUTPUT LED green POWER LED (G vers.) green READY/ERROR LED
Output type:	NPN or PNP, Rpull-down/up 22 kW
Saturation voltage:	2.4 V max.
Output current:	100 mA max, short-circuit protection
Response time:	0.5 ms 125 µs (laser B03 and C03 versions)
Switching frequency:	1 kHz max. 4 kHz (laser B03 and C03 versions)
Operating mode:	dark/light programmable
Connection:	4-pole M8 connector 2 m Ø 3.5 mm cable
Laser safety class:	class II
Electrical protection:	class 2
Mechanical protection:	IP67
Housing material:	ABS
Lens material:	PMMA plastic
Weight:	10 g max. (connector vers.) 40 g max. (cable vers.)
Operating temperature:	-20 ... +60°C
Storage temperature:	-20 ... +80°C
Reference standard:	EN 60947-5-2, EN 60825-1
Certifications:	CE

The company endeavours to continuously improve and renew its products; for this reason the technical data and contents of this catalogue may undergo variations without prior notice. For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

S41 SERIES

The **S41** series offers a basic line of photoelectric sensors in a miniature housing, ideal for applications that require reduced dimensions and costs. The optic functions include a diffuse proximity adjustable from 0 to 35 cm and a 11 cm fixed focus proximity suitable for background suppression; 2.5 m polarised retroreflex, 1 m retroreflex for transparents and 6 m through beam are available for longer operating distances; the latter is also available in a narrow beam emitter version that allows to place sensors side by side without interferences. The LED emission is red for the fixed focus proximity and infrared for the other models. Two LED indicators are visible on the sensors: a yellow output LED and a green switching stability LED; the diffuse proximity models and a polarised retroreflex version also present a sensitivity adjustment trimmer. The normally open and normally closed outputs are both present on different poles; cable or M8 connection is offered according to the model chosen.

HIGHLIGHTS

- Diffuse or fixed focus proximity for background suppression
- Polarised retroreflex and emitter-receiver with narrow beam
- Models with trimmer setting
- Double NO-NC NPN or PNP output

S3 SERIES

The photoelectric sensors of the **S3** series are characterised by particularly compact dimensions still offering excellent performances and a wide variety of models.

The wide range of optic functions include diffuse proximity with distance adjustable up to 10 cm or 50 cm, or 12 mm fixed focus proximity. The retroreflex versions reach 3 m and are also available in the polarised version suitable for detecting shiny objects, or low hysteresis models to detect transparent objects. The 5 m through beam models complete the series, together with versions for the different fibre-optics available as accessories. All models offer trimmer sensitivity adjustment and LED stability indicator; the axial and lateral optics guarantee the same performances. Maximum installation versatility and use are obtained thanks to the configurable output and miniature housing.

HIGHLIGHTS

- Miniature housing with axial or lateral optics
- Wide range of optic functions including fibre versions
- Sensitivity adjustment and stability LED
- NPN/PNP and dark/light configurable output

APPLICATIONS

Ceramics

Transportation lines

Beverage & Bottling

Packaging lines

TECHNICAL DATA

Power supply:	10 ... 30 Vdc, reverse polarity protection
Consumption:	30 mA max.
Light emission:	infrared 880 nm LED red 660 nm LED (B2, D12, E1 vers.)
Diffuse proximity operating distance:	0 ... 10 cm (C10 vers.) 0 ... 50 cm (C50 vers.)
Fixed focus operating distance:	12 mm with 1 mm spot (D12 vers.)
Retroreflex operating distance:	0.1 ... 2.5 m (on R2)
Polarised retroreflex operating distance:	0.1 ... 2 m (on R2)
Retroreflex for transparents op. distance:	0.2 ... 0.8 m (on R2)
Through beam operating distance:	0 ... 5 m
Operating distance with fibre-optics:	33 mm proximity (with OF-18-ST) 110 mm through beam (with OF-19-ST) refer to OF series for other fibres
Setting:	sensitivity trimmer
Indicators:	red OUTPUT LED green STABILITY LED red POWER LED (G5 vers.)
Output type:	PNP (connector vers.) NPN/PNP configurable (cable vers.)
Saturation voltage:	1.5 V max.
Output current:	100 mA max., short-circuit protection
Response time:	1 ms max. 2 ms (F vers.)
Switching frequency:	500 Hz max. 250 Hz max. (F vers.)
Operating mode:	dark/light configurable
Auxiliary functions:	'test +' and 'test -' inputs (G vers.)
Connection:	M8 4-pole connector 2 m Ø 5 mm cable
Electrical protection:	class 2
Mechanical protection:	IP66
Housing material:	ABS
Lens material:	PMMA plastic
Weight:	20 g max. (connector vers.) 90 g max. (cable vers.)
Operating temperature:	-25 ... +55°C
Storage temperature:	-25 ... +70°C
Reference standard:	EN 60947-5-2
Certifications:	CE

S8 SERIES

The new **S8** series of compact sensors offers excellent detection performances, usually associated with sensors that have larger dimensions and a higher price. The **S8** series is able to solve the most critical sensor applications. A solution for packaging lines, food and beverage industries, automotive, test and assembling machines and electronic plants. Laser models with coaxial polarized retroreflex and background suppression are available. Base models with LED emission are also offered featuring polarized retroreflex, diffuse proximity, background suppression, coaxial polarized retroreflex for transparents and contrast sensors. The Laser versions present extremely focused spot lower than to 1 mm and switching frequencies that are amongst the highest on the market reaching 10 kHz. The contrast sensor is the most compact sensor available today with RGB emission and coaxial optics. Connector M8 or M12 'pig-tail' versions are available.

HIGHLIGHTS

- Compact dimensions (14x42x25 mm)
- Up to 10 kHz switching frequency
- Extremely focussed spot, under 1 mm (Laser vers.)
- Very high resolutions
- Coaxial versions

APPLICATIONS

Automotive

Beverage & Bottling

Packaging lines

The Laser versions present extremely focused spot inferior to 1 mm and switching frequencies that are amongst the highest on the market reaching 10 kHz. Offering excellent reading repeatability, and the object can be 'detected' always in the same position! The coaxial retroreflex version with LED emission guaranteeing an excellent resolution in detecting transparent objects that, associated to a 2 kHz frequency and ALARM output for dirty lenses, offer great reliability and plant productivity. The contrast sensor is the most compact sensor with RGB emission and coaxial optics available today on the market, offering excellent detection resolution and field of depth typical of sensors with a higher price/dimension ratio. The retroreflex modes offer an additional alarm signal for received signal problems or dirty lenses.

S8 SHINY

The NEW S8 sensor known as the SHINY has a new patented technology which means it is able to detect transparent objects using a form of laser based background suppression. Glass or clear plastic objects such as bottles, vials, packaging films, etc. can be easily detected directly even in the presence of shiny or reflective backgrounds.

This breakthrough technology offers many improvements with respect to previous systems based on polarized retro-reflex photoelectric or even ultrasonic sensors:

- No prismatic reflector: there is no need to have the clear object passing between sensor and reflector so reducing installation time and cost.
- Less mechanical constraints: the detection can be made from either the side or from the above with no need to screen or modify any metal parts of the machine.
- Highest depth of field: the clear object can move or float in any position between its background and the sensor without any need to adjust the detection threshold.

HIGHLIGHTS

- 50 to 150mm operating range with fine mechanical adjustment
- High resolution
- Bright visible red Laser light emission with 5mm spot at maximum distance
- Fast response time: 1ms with a switching frequency of 500Hz.

APPLICATIONS

Food & Pharma

Beverage & Bottling

Packaging lines

DIMENSION

mm

SETTING

SUPPRESSION DISTANCE AND BACKGROUND ACQUISITION SETTING

The S8-PH...M53 sensor which provides background suppression for shiny objects, enables the detection of clear objects without false or multiple triggering typical of other background suppression sensors. To function correctly it is necessary to perform the Background Acquisition Setting procedure described below.

1. Start Setting and Background Acquisition

Rotate the TEACH-IN trimmer fully counter-clockwise. If the trimmer is already in the counter-clockwise position, rotate it to the clockwise position and then back to the counter-clockwise position. The N.O. Output signal (black wire) is set to OFF and the yellow LED indicates the status in the same way as a standard background suppression sensor.

2. Background Exclusion

Position the sensor in front of the background. Rotate the DISTANCE ADJUSTMENT trimmer clockwise until the yellow LED turns ON: condition where background is detected. Rotate counter-clockwise the trimmer until the yellow LED turns OFF: condition where background is out of the field of view.

3. Background Acquisition

Rotate the TEACH-IN trimmer fully clockwise. The sensor acquires the background characteristics and is ready to detect any object that passes in the Detection Area. If the yellow LED blinks, the background acquisition procedure has failed. Rotate the TEACH-IN trimmer fully counter-clockwise and repeat the procedure from step 2.

BACKGROUND AUTO-ADJUSTMENT FUNCTION

The sensor provides a background auto-adjustment function. If the background deteriorates and the received signal changes, after one minute the sensor automatically adjusts the background to compensate for this change therefore avoiding the need to continually acquire the background through manual setting.

S8 STAINLESS STEEL

Datalogic's latest **SENSORS** for Contrast and transparent object detection now come for the first time in a stainless steel housing continuing the ONE for ALL concept of the S8 series. The sensors have been designed for frequent wash downs with a corrosion-resistant AISI316L stainless steel case which is IP69K rated. The contrast version is the ideal solution to discriminate fine contrast differences known as print registration marks at very high speeds whilst the clear object polarized retro has been designed to resist typical detection difficulties associated with accurately detecting the position of extremely transparent objects typically seen in the FOOD and BEVERAGE and PHARMACEUTICAL industries.

One for ALL concept means one shape with standard fixing holes with models suitable for solving virtually any application, allowing both the OEM and END USER to reduce and standardize the components used giving a real advantage in the development of their automated machines and production lines.

Diversey **ECOLAB**

HIGHLIGHTS

W model

- Discriminates fine contrast differences with RGB emission
- High speed detection at 50µs
- Coaxial optical system design provides stable detection of moving objects to eliminate false detections
- IP69K degree of protection with AISI316L stainless steel housing resists the effects of detergents, disinfectants and high-temperature, high-pressure wash down

T model

- Detects extremely transparent materials like fine plastic films, glass or PET bottles
- Coaxial optical system design provides stable detection of moving objects to eliminate false detections
- Auto-adaptive function to improve the reliability the detection even when the sensor face or reflector is contaminated
- IP69K degree of protection with AISI316L stainless steel housing resists the effects of detergents, disinfectants and high-temperature, high-pressure wash down

APPLICATIONS

Food & Pharma

Beverage & Bottling

Packaging lines

T53 MODEL

KEYLOCK FUNCTION

The KEYLOCK function (keyboard lock) enables the operator to deactivate the keyboard avoiding accidental changes in the sensor setting. If at sensor powering the REMOTE wire is connected to +DC for at least 1 second the keyboard lock function is activated and the pushbuttons are no longer active. To deactivate the keyboard lock, the sensor must be turned off and repowered with the REMOTE wire not connected or connected to GROUND.

THRESHOLD AUTO-ADJUSTMENT FUNCTION

The sensor provides threshold auto-adjustment function. If received signal decreases due to a dirty optical lens or reflector, the sensor adjusts automatically the commutation threshold to avoid continuous cleaning of optical parts (after 1 minute of low signal). If the received signal is too low to be adjusted from the sensor the output stays turned on meaning it is necessary to clean the sensor lens and reflector.

CONNECTIONS AND INSTALLATION

The sensor can be positioned by means of the two mounting holes using two screws (M3x18 or longer, 0.8Nm maximum tightening torque) with washers. Various adjustable fixing brackets are available to ease the mounting of the S8 (please refer to the accessories listed in the general catalogue). The operating distance is measured from the front surface of the sensor optics. S8W - Mark detection on reflective surfaces is improved by adjusting the angle of the beam direction to between 5° and 20° from the surface axis.

S7 SERIES

The **S7** series is the first fibre optic amplifier to be manufactured in Europe that is equipped with a full 4 digit display, confirming Datasensor's technological leadership. With its slim 10mm body width, the S7 represents the ideal solution for all applications requiring high accuracy sensing combined with very compact dimensions.

The high resolution 12 bit amplifier has a response time of 50 µs for a switching frequency of 10 KHz; 4096 resolution steps make the **S7** series perfect for ultra high precision detection of small objects and low colour contrasts.

This is made easier by the integral 4 digit display, which clearly indicates the received signal, selected time delay and the adjustable set point values. Moreover, the white light LED emission possibility enhances the contrast detection. Installing and setting the **S7** is easy and rapid, thanks to the patent-covered CLEARLOCK™ fibre fixing and EASYtouch™ adjustment system that offers remote setting, keylock and activation of the output OFF delay function. Furthermore new versions of the **S7** series are available with multiturn mechanical trimmer threshold adjustment for cost-oriented applications.

HIGHLIGHTS

- 10 bit resolution models with 500 µs response for high operating distances
- 12 bit resolution models with 50 µs response and 4 digit display for high speed
- Cost-effective models with multiturn trimmer adjustment
- EASYtouch™ push-button setting with remote control, keylock and output delay
- Ultra-thin housing with CLEARLOCK™ patented fibre fixing system

APPLICATIONS

Automotive

Beverage & Bottling

Packaging lines

The ultra-thin housing is specifically designed for side-by-side mounting on DIN rail where space is limited or mounting through two M3 clearance holes onto the side of a machine. The CLEARLOCK™ fibre-optic fixing system assists reliable insertion of standard and high performance 2.2mm Ø fibre-optics. The EASYtouch™ one touch setting procedure automatically selects the best detection conditions. For critical applications a two touch setting is provided for fine tuning. S7 benefits from remote teach, keypad lock and delay off timing functions. For further information on our extensive range accessories please see our OF and OFA fibre optic datasheet.

S6 SERIES

The **S6** series, thanks to the excellent detection performances and the variety of power supply and connection possibilities, offers the most complete universal sensor range in the compact 50x50 mm housing.

The operating distance can be set to the optimal value in each model: 2 m diffuse proximity, 25 or 50 cm background suppression, 5 m polarised retroreflex, 1 m retroreflex versions for transparent objects and 20 m through beam.

Proximity models with 12 to 110 cm background suppression are available.

The free voltage versions have a relay output and cable connection.

The versions with 10-30 Vdc power supply present cable connection and NPN/PNP output or M12 connector, with either PNP output with dark/light configuration and PNP double NO-NC output complying to the EN 60947-5-2 standard.

HIGHLIGHTS

- Background suppression models
- Free voltage versions with relay output
- 10-30 Vdc version with transistor output
- Standard cable or M12 connection

The company endeavours to continuously improve and renew its products; for this reason the technical data and contents of this catalogue may undergo variations without prior notice. For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

S60 SERIES

The **S60** series, standard 50x50x15 mm compact housing, offers all the most advanced optic functions, as well as the universal, available with safety class 1 laser emission. The series presents a complete range of models, including retroreflex with coaxial optics and polarisation filters for the detection of shiny and/or transparent objects, background suppression, contrast sensors with white light emission for the detection of coloured marks, the sensor with UV emission for the detection of luminescence references and the distance sensor with analogue output. The basic models for presence detection present trimmer sensitivity adjustment, while the models with the advanced optics are microprocessor controlled and have the patent-covered EASYtouch™ setting, which gives rapid and precise setting of the switching threshold, with the possibility of remote control, keyboard block and selection of the output delay function. The **S60** series offers versions with cable or M12 connection that can be rotated for either straight or right-angle positions. All versions have NPN or PNP output and standard configuration conforming to the EN 60947-5-2 standard.

HIGHLIGHTS

- Complete range of optic functions, basic, advanced and laser class 1
- Models with coaxial optics for polarised retroreflex, contrast and luminescence sensors
- Trimmer or EASYtouch™ setting with Remote, Keylock and Delay functions
- Standard cable or M12 connection with standard NPN or PNP configuration

APPLICATIONS

Ceramics

Transportation lines

Beverage & Bottling

Packaging lines

G/F INFRARED EMISSION

The detection system with two separate emitter and receiver units allows the user to reach larger operating distances. The trimmer, present on the receiver, allows to adjust sensitivity and to detect objects that obscure, even partially, the light emission. The IR emission is modulated to avoid interference with other light sources and can be turned off to test the functioning even without the object to detect.

DETECTION DIAGRAMS

Recommended operating distance
 Maximum operating distance

L-G/F RED EMISSION

The high operating distance, typical of the emitter and receiver system, is notably increased thanks to the use of visible red laser emission. The laser beam can be easily aligned and offers excellent detection resolution of even small objects. The class 1 laser emission, according to EN 60825-1, guarantees maximum safety for the operators in all applications.

DETECTION DIAGRAMS

■ Operating distance

B RED EMISSION

With retroreflex sensors the object is detected when it interrupts the light beam generated between the sensor and its associated prismatic reflector. High-polarisation optic filters also allow reliable detection of very reflective objects, such as mirrored surfaces that, differently from the prismatic reflector, reflect the light beam without rotating the polarisation plane.

DETECTION DIAGRAMS

■ Operating distance

Detection area

Resolution on R7 reflector

High efficiency reflectors can be used to obtain larger operating distances. Refer to **Reflectors (A.01)** of the **General Catalogue**.

B RED EMISSION

The polarised retroreflex sensor with a coaxial optics offers the best resolution of the detection point as the optic emitting axis coincides with the optic receiving axis. The coaxial system also allows to reduce drastically the sensor's blind zone and consents the detection of objects very close to the sensor's frontal lens.

DETECTION DIAGRAMS

■ Recommended operating distance
■ Maximum operating distance

High efficiency reflectors can be used to obtain larger operating distances. Refer to **Reflectors (A.01)** of the **General Catalogue**.

T RETROREFLEX

The high sensitivity and reduced hysteresis of this retroreflex sensor allow to detect even the slightest attenuation of the received light emission, caused by the presence of transparent objects, such as glass or PET bottles or plastic film sheets for packaging. The presence of polarisation filters avoids false switching on shiny surfaces and the coaxial optics improves the detection precision on the entire operating range.

C DIFFUSE PROXIMITY

This diffuse proximity sensor represents a reliable, simple and cost-effective solution for the direct detection of any object within the operating distance, that can be set using the sensitivity adjustment trimmer. The visible red emission facilitates the alignment of the sensor or of the object to detect and in particular in short operating distances.

DETECTION DIAGRAMS

■ Recommended operating distance
 ■ Maximum operating distance

C LONG DIFFUSE PROXIMITY

This version of diffuse proximity sensor offers the maximum operating distance for the direct detection of objects, without the use of separate reflectors or receivers. The detection distance can be set using the sensitivity adjustment trimmer. The green stability LED indicates that the received signal is higher than the minimum signal for stable output switching.

DIMENSIONS

INDICATORS AND SETTINGS

- A** Output status and stability LED
- B** Adjustment trimmer
- C** M12 connector output
- D** Cable output

Single-turn trimmer for sensitivity adjustment. Rotate clockwise direction to increase the operating distance.

L-C RED EMISSION

The visible red laser emission allows the accurate detection of very small objects. The sensors operate as a proximity device up to 60 cm and can be used as a contrast sensor for high contrast mark detection. The class 1 laser emission, according to EN 60825-1, guarantees maximum safety for the operators in all applications.

TECHNOLOGY ADVANTAGES

The S60 series establishes the new market standard in the compact 50 x 50 mm photoelectric sensors, offering a complete family of optic functions with only 15 mm housing width.

The standard dimensions, reduced housing width and the multi-hole fixing system make the **S60** series compatible with the majority of compact sensors present on the market.

STANDARD 50 x 50 x 15 mm

COMPACT PHOTOELECTRIC SENSORS

All the models are available in cable or M12 connector versions, with NPN or PNP type static output, conforming to the EN 60947-5-2 European standard.

The M12 connector can be easily rotated to 90° and can be blocked in the straight or right-angle positions respect to the optic axis, the cable emerges at 45° and thanks to its flexibility can rotate practically 360°. Thanks to these characteristics the sensor can be easily fixed on all sides and at all angles.

All the basic optic functions such as the through beam, polarised retroreflex, diffuse proximity and background suppression are available also in the version with visible red laser emission, with all the safety characteristics for the user in class 1 conforming to the EN 60825-1 European standard and in class II according to CDRH21 CFR Part 1040 USA standard.

Besides the evident advantages for the alignment of sensors and of the object to detect, thanks to the high spot visibility and concentration, the laser emissions offer an improved detection resolution, millimetric for the through beam and polarised retroreflex versions, or decimillimetric for the diffuse proximity and background suppression.

The polarised retroreflex model is available also in the coaxial optic version that, with the emitter optic axis coinciding with the receiver one, offers a better detection axis precision and the elimination of the blind zone near to the sensor.

TECHNOLOGY ADVANTAGES

The coaxial optics is present also in the polarised retroreflex model for the detection of transparent objects, notably increasing the performances of this optic function and its immunity to object movements inside the detection area.

The contrast sensor with white LED emission has an operating distance ranging from 17 to 21 mm and detects coloured or grey-scale marks, with a minimum dimension of 0.5 mm and an operating frequency reaching 5 kHz.

The luminescence sensor with UV LED emission has an operating distance ranging from 0 to 40 mm and detects fluorescent or luminescent targets, with a minimum dimension of 0.5 mm and an operating frequency reaching 2 kHz.

The setting of these sensors is extremely rapid and easy, thanks to the patent-covered **EASYtouch™** system that allows to automatically fix the object detection threshold, with a single pressure of the teach-in push-button.

It is possible to set the sensor to detect more critical differences between the mark and the background, or invert the dark or light operating mode, by pressing twice the push-button.

The EASYtouch™ system allows to select the 'Remote' function for the remote sensor setting through the cable or connector, the 'Keylock' function to block the keyboard, 'Delay OFF' function for the 20 ms timing of the output deactivation.

The sensor technology with background and/or foreground suppression of the **S60** series has allowed to develop also a cost-effective distance sensor with a double output: a 0 - 10 V analogue output and a digital NPN or PNP switching output.

The measurement range and the switching threshold output can be selected in the 50 - 150 mm range, with a ± 1 mm precision; the direct or inverse proportionality and the light or dark operating mode can be selected.

For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

S62 SERIES

The **S62** series, developed in the 50 x 50 x 18 mm compact plastic housing, offers the maximum performances in the main optic detection functions for industrial automation.

The background suppression proximity models reach a 3-30 cm range with visible red LED emission, or 6-60, 6-120 and 20-200 cm with infrared emission.

The operating distance can be adjusted through a precise multiturn mechanical regulation of the optic triangulation, to obtain the maximum immunity against colour differences of the objects to detect or of the backgrounds to suppress, even if very reflective.

The polarised retroreflex models with visible red LED emission present a very long operating distance reaching 10 m with high excess gain and immunity against reflection received from objects different from a prismatic reflector, such as shiny mirror surfaces.

Furthermore, versions with visible red Laser emission are available with both 3-15 or 5-35 cm background suppression proximity and polarised retroreflex reaching more than 22 m.

These Laser sensors are characterised by a very small light spot, as well as a low response time that guarantee excellent detection repeatability, even of very small objects or movements.

HIGHLIGHTS

- High-resolution sensors with LED or Laser emission
- Background suppression models ranging from 30 cm to 2 m
- Polarised retroreflex with operating distance reaching 20 m
- Sturdy ABS housing with compact 50 x 50 x 18 mm dimensions
- NPN or PNP double output with standard NO-NC configuration

APPLICATIONS

Ceramics

Transportation lines

Beverage & Bottling

Packaging lines

The background suppression proximity can set very precisely the limit over which the object is not detected, with minimum differences also between objects with material or colour differences. The threshold switching adjustment is easier and more precise thanks to the multiturn mechanical trimmer and the gear numeric scale. The polarised retroreflex, thanks to high-polarisation optic filters, detects also very reflective objects also with mirror surfaces, that however do not rotate the polarisation plane of the reflected light, like the prismatic reflector.

CONNECTIONS

EMISSION TYPE

The very low black/white difference of background suppression sensors allows to detect a dark-coloured target presence, or absence, even onto a light-coloured very reflective background. However, if the target is much smaller than the light spot and smaller than the background area, the detection can be critical either for the low resolution and for the 'cross-eyed effect' (excessive light reflected by the background).

The narrow collimated light beam of the **S62** LASER background suppression sensor is the right solution able to offer the requested resolution and avoid the cross-eyed effect, thus permitting the detection of the smallest objects or their minimal movements, even in presence of large and reflective background area. The LASER polarised retroreflex sensor of the **S62** series, as well as increasing the maximum operating distance, offers the improvement of the detection resolution thanks to the smaller dimensions of the light beam respect to the LED emission beam.

Basically, the minimum detectable dimension corresponds to the emission beam diameter at the detection distance. The maximum resolution can be obtained only with microprismatic reflectors (0.8 mm microcubes), such as the small **R8** suitable for short distances up to 2 m, or the **R7** and **R20** models for distance up to 22 m.

S90 SERIES

The **S90** series, in a compact 41x49x15 mm metal housing, offers all the application and universal optic functions also with safety class 1 laser emission. The series includes polarised retroreflex models with coaxial optics for the detection of reflective and transparent objects, background and foreground suppression versions, contrast sensor with white light emission for colour mark detection, ultraviolet sensor for luminescent object detection. Basic models are available with class 1 laser emission for high-resolution detection. The **S90** models with universal proximity, retroreflex and through beam optic functions have trimmer sensitivity adjustment. More sophisticated models are microprocessor controlled and offer the patent-covered EASYtouch™ setting procedure for rapid and precise automatic setting of the switching threshold, with remote control, keyboard lock and output delay activation functions. NPN or PNP versions are available with standard M12 connector that can be rotated in 4 different positions.

HIGHLIGHTS

- Sturdy metal housing in a compact 41x49x15 mm format
- Complete range of universal, application and laser optic functions
- Trimmer or push-button setting with EASYtouch™ function
- NPN and PNP versions standard M12 rotatable connector

APPLICATIONS

Ceramics

Beverage & Bottling

Transportation lines

Packaging lines

The polarised retroreflex model and the version for transparent object detection are available also with coaxial optics guaranteeing a more accurate axis detection as well as the elimination of the blank zone near to the sensor. The coaxial optics is also present in the contrast sensor with white light LED emission and in the luminescence sensor with ultraviolet light LED emission, improving the precision and depth of field. The biaxial optics which is present in the background suppression models, including laser versions, allows the triangulation for a precise detection.

S2 SERIES

The photoelectric sensors of the **S2** series are enclosed in sturdy plastic housings, developed to guarantee the complete protection of the control panel and connection terminals.

The free voltage versions present a relay output, while the 10-30 Vdc versions have a double NPN and PNP output, both available with 1 or 2 m proximity, 5 m polarised retroreflex, 3 m polarised retroreflex and 10 or 50 m through beam optic functions.

The red output LED and the green stability LED are visible through the IP66 hermetically-sealed cover, that also protects the terminal block and commands, such as the sensitivity adjustment trimmer and dark/light operating mode selector.

The versions with output timing present a trimmer to regulate the time up to 16 s. and a selector to set 5 different functions.

HIGHLIGHTS

- Sensitivity adjustment and Stability LED
- Free voltage power supply and relay output
- 10-30 Vdc power supply with NPN and PNP outputs
- Versions with 5 timing functions

S20 SERIES

The **S20** series offers all the basic optic functions at the highest operating distances. The series presents models with 50 cm background suppression with microprocessor-based Teach-in setting or, with trimmer adjustment, 10 m polarised retroreflex, 2 m diffuse proximity and 50 m emitter-receiver optic functions.

Even with particular compact dimensions, these sensors guarantee optimal performances, thanks to special aspherical lenses that take full advantage of the high-power LED emission, visible red in the background suppression and polarised retroreflex versions and infrared in all the other models.

Both NO and NC outputs are present in the NPN or PNP versions. M12 connector is available.

The connection block can be adjusted either in a straight or right angle position, in order to offer improved mounting versatility.

SENSORS

HIGHLIGHTS

- Enhanced emission and special lenses ideal for long operating distances
- μ P Teach-in setting for background suppression
- Orientable M12 connector
- Impermeable, compact and resistance plastic housing

S300 SERIES

The **S300** series of advanced **MAXI** photoelectric sensors represents the most suitable solution for critical applications thanks to excellent performances and resistance in harsh working conditions. The new series offers a wide range of models and functions in order to guarantee easy use and installation. The new series presents **4** different models with **through beam** optical function up to **60m**, **polarized retroreflex** at **22m**, **diffused proximity** at **5m** and **background suppression** at **2.5m**. All the models are available both **Vdc** from **10 to 30V** and **Vac/Vdc** free-voltage from **24 to 240V** versions. A timing function version and with both the **SPDT** relay or the bipolar transistor **NPN/PNP** open collector outputs is offered. The **terminal block connection** simplifies and speeds-up the installation procedure, whereas the **heavy-duty plastic housing** guarantees excellent resistance under harsh use conditions.

HIGHLIGHTS

- Excellent optical performances
- Sturdy plastic housing with **IP67** mechanical protection
- Defogging system function
- Wide range of operating temperatures ranging from **-40 to 55°C**
- Double independent timing with double time scale from 0-2s and from **0-10s**, **ON-delay**, **OFF delay** **ONE SHOT** timing functions
- **M12 4-pole** rotatable connector for Vdc version and terminal block for Vac/Vdc free-voltage version
- Distance trimmer clutch for mechanical background suppression models

APPLICATIONS

DIMENSIONS

SETTINGS

The **M** model presents a **multiturn adjustment screw** for the adjustment of the background suppression distance using a mechanical variation of the optic triangulation angle. The **other models have a mono-turn electronic trimmer** that adjusts the sensitivity and the sensor operating distance. The operating distance can be increased by rotating the screws clockwise. Trimmers can be used to adjust the **output activation and deactivation delay time** as well as to select the functioning mode.

SR21 SERIES

The slot sensors of the **SR21** series, with 2 mm slot width, are characterised by a high 12 bit (4096 steps) resolution, a low 20 ms response time and a switching frequency reaching 25 kHz. The setting of the switching threshold is carried-out automatically by simply pressing a push-button, or dynamically during label (or other reference) movement.

The **SR21-IR** model with infrared emission is ideal for label or hole detection on continuous surfaces, while the **SR21-RG** model with double red or green emission suits colour print register mark detection on transparent films for automatic packaging.

HIGHLIGHTS

- High 25 kHz switching frequency
- IR or red/green light models
- Detection of semi-transparent labels
- Detection of register marks on transparents
- 4 wire antivalent NPN and PNP output

APPLICATIONS

Labelling machines

Packaging lines

SR22 SERIES

The new **SR22** series of 2 mm slot sensors has been developed as the most cost-effective solution for label detection on reels.

The infrared LED emission allows to detect over even darker or thicker supports, while the low response time of only 100 μ s allows to reach a 10 kHz switching frequency in the faster labelling processes.

The label detection sensitivity is trimmer adjustable.

The compact metal housing with 40 mm slot depth fits even the most limited spaces.

The M8 4-pole connector offers simple and fast connection.

The power supply is 24 Vdc and versions with light or dark mode, both with double NPN and PNP outputs, are available.

HIGHLIGHTS

- Fast switching frequency up to 10 kHz
- Infrared LED light emission
- Trimmer for sensibility adjustment
- 4 wire antivalent NPN and PNP outputs
- Compact metal housing with glass lenses

APPLICATIONS

SR31 SERIES

The **SR31** series is composed of slot sensors with infrared LED emission, distinguished by an elevated 10 kHz switching frequency and by a sturdy and compact metal housing.

The detection sensitivity is adjusted by means of a trimmer. The dark/light operating mode is configured according to the connection.

The series includes M8 connector versions with NPN output, or PNP output; cable versions present both NPN/PNP outputs.

The **SR31** sensors have a 30 mm wide and 42 mm deep slot. These sensors are suitable for detecting opaque labels on a transparent support, to control material presence and continuity, to detect synchronism pulses on toothed or holed wheels, or as on-off edge guide.

HIGHLIGHTS

- Infrared LED emission
- Sensitivity trimmer adjustment
- Elevated switching frequency
- Metal housing with wide slot

SRF SERIES

The slot sensors of the **SRF** series are photoelectric devices characterised by an excellent precision thanks to the red LED emission which offers resolutions reaching 0.3 mm or class II LASER emission for resolutions down to 0.03 mm. High precision and reading repeatability are obtained thanks to the Laser emission combined with high switching frequency.

The particular 'U' shape with opposite receiver and emitter units, together with the high resistance of the metal housing, make monitoring extremely simple and rapid, guaranteeing reliable functioning as well as shock and vibration resistance. The **SRF** series presents versions with 30, 50, 80 and 120 mm slots allowing the best adaptation to the many different applications, including opaque label detection on transparent supports, monitoring of the correct material position and dimension or object counting on conveyor belts. Sensitivity adjustment is easily accomplished thanks to the trimmer positioned on the back side of the sensor. The range offers versions with PNP or NPN output. The light/dark mode can be selected in all models.

HIGHLIGHTS

- Visible red LED emission versions
- High resolution LASER versions
- Versions with 30, 50, 80 and 120 mm slots
- Sensitivity adjustment and dark/light selectors
- Sturdy metal housing with glass lenses

APPLICATIONS

Automotive

Labelling machines

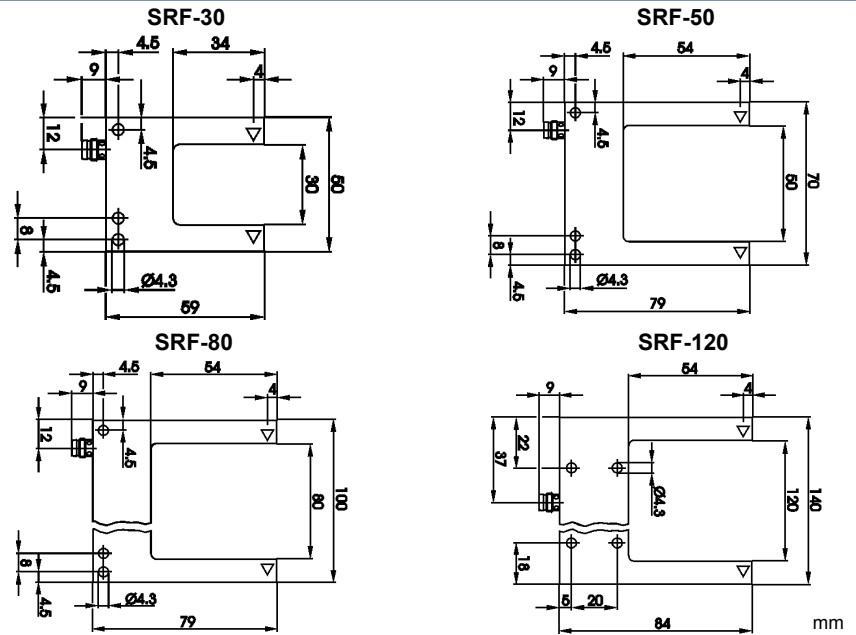

Packaging lines

The best resolution, in terms of minimum detectable object, can be obtained rotating completely the sensitivity trimmer in a clockwise direction. The normally closed output is selected by turning clockwise the output trimmer. The sensor, in this manner, functions in the light mode where the connector LED ON signals the absence of an object to detect. The opposite effect is obtained rotating the trimmer in an anti-clockwise direction and the sensor functions in the dark mode with the LED ON in presence of an object.

LD μ SERIES

The **LD μ** luminescence sensors emit ultraviolet light and detect only visible light converted and reflected from fluorescent objects or marks, independent from the background's colour and surface.

A microprocessor controls and synchronises the emission, reception and output circuits offering a completely automatic setting. The **LD μ** sensors can reach a 75 mm operating distance and a 2 kHz switching frequency, thanks to the UV High-Power emission. Focusing lenses and special fibre-optics able to replace the lens are available as accessories.

The **LD μ** sensors are used in the pharmaceutical and cosmetic industries to identify labels on glass phials or bottles; in the wood and ceramic selection lines; in automatic packaging to detect paper and fluorescent glues; in the textile industry to identify cutting guides; in the mechanical industry to verify the presence of paints or fluorescent lubricants.

HIGHLIGHTS

- High-Power UV LED emission
- Microprocessor-based Teach-in setting
- High switching frequency at 2 kHz
- Fibre-optic accessories and high-resolution lenses

Light emission:	LED HP-UV 370 nm
Spot dimension:	circular Ø 5 mm max. on focal point
Diffuse proximity operating distance:	9 ... 18 mm (LDµ-415)
	20 ... 40 mm (LDµ-455)
	40 ... 75 mm (LDµ-425)
Operating distance with fibre-optics:	0 ... 30 mm
Setting:	Teach-in with 2 push-buttons
	Remote by cable
Indicators:	red OUTPUT LED
	green READY LED
Output type:	NPN or PNP, Rpull-down/up 10 kΩ
Saturation voltage:	1 V max. with NPN
	2 V max. with PNP
Output current:	200 mA max., short-circuit protection
Response time:	250 µs max.
Switching frequency:	2 kHz max.
Timing function:	20 ms minimum output ON
Analog output range:	0 ... 7 Vdc, 2.2 kΩ output resistance
Auxiliary functions:	deviator for setting block
Connection:	M12 4-pole connector
	3 m Ø 6.1 mm shielded cable
Electrical protection:	class 1
Mechanical protection:	IP67
Housing material:	ZAMA
Lens material:	glass
Weight:	310 g (connector vers.)
	450 g (cable vers.)
Operating temperature:	-10 ... +55°C
Storage temperature:	-20 ... +70°C
Reference standard:	EN 60947-5-2
Certifications:	CE
OF-50 fibre-optic data:	fibre in saline solution with PET sheath, operating temperature: -5 ... +60°C

LD46 SERIES

The luminescence sensors emit ultraviolet (UV) light and receive visible light reflected from luminescent surfaces. This technology allows the detection of fluorescent marks (even invisible to the human eye) on any object independently from its material, colour or distance inside the operating range. Moreover, it avoids light interferences or reflections from non-luminescent surfaces, like glass, mirrors, shiny metal surfaces, etc. Luminescence sensors can satisfy many different applications, as for example in pharmaceutical and cosmetic industries to detect labels on glass phials or bottles, or correct medicine packaging, in woodworking and ceramic tiles production to check fluorescent selection marks; in automatic packaging to detect whitened paper or fluorescent glues, in textile industry to identify fluorescent cutting guides or labels; in mechanical industry to verify fluorescent paints, lubricants, gaskets or fittings; in vending machines or cash dispensers to check banknotes and credit cards. The high power and definition of the **LD46** sensor light spot enable the detection of critical targets with a very poor or non-homogeneous or discontinued luminescent level, as for example on raw wood, corrugated carton, fabric, ceramic tiles.

HIGHLIGHTS

- The best solution for luminescent mark detection
- High-power UV emission for improved sensitivity
- Fast switching frequency and response time
- Easy setting and clear bargraph indicator

APPLICATION

Wood

Ceramics

Packaging lines

SETTING

The switching threshold setting can be easily made pressing the '+' and '-' push-buttons that increase or decrease the sensitivity level which is visualised on the bargraph indicator. The sensor has a KEYLOCK function that deactivates the keyboard avoiding accidental sensor setting.

The keyboard is locked at the sensor powering and can be activated by pressing the SET push-button for 5 seconds until the keylock LED turns on.

The keyboard is locked again automatically if not used for 2 minutes.

TL μ SERIES

The **TL μ** series offers the most reliable and innovative solutions for all detection applications of register marks and other neutral or coloured references.

The microprocessor-based setting can be either 'Teach-in' using two push-buttons or 'Remote' by cable with the possibility of rapidly memorising and recalling 4 different formats. The setting can also be dynamic and completely automatic in the models with the 'Auto-Set' function.

The LED emission can be red/green with automatic selection, or white offering the possibility of operating on all contrasts, also amongst same-coloured objects and backgrounds, presenting different surface treatments or workings. Models with interchangeable 9 mm or 18 mm lenses are available; 22, 28 and 50 mm lenses are supplied as accessories. Moreover many different fibre-optic models are available. The output is NPN or PNP according to the model, but is always selectable by means of an internal switch; an analog output proportional to the received light is also present.

HIGHLIGHTS

- 'Teach-in', 'Remote' setting and models with 'Auto-Set'
- Red/green or white LED emission
- Various interchangeable lenses and fibre-optic versions
- Metal housing with orientable optics and connector

TL46 SERIES

The new digital contrast sensor line of the **TL46** series is characterised by excellent performances in terms of resolution, definition and precision of the light spot emitted by RGB LEDs, low response time and high switching speed. The sensor, developed in a sturdy metal housing with standard fixing, is available in 3 different versions able to better satisfy all applications offering avantgarde technology at the best price/performance ratio. The **TL46-W** basic version has only one set push-button, 2 LEDs indicating respectively the output status and sensor acquisition condition. The performances and use ease have been optimised and offered at a competitive price. The **TL46-WL** standard version has set 3 push-buttons, 4 LEDs signalling the output status, sensor acquisition condition, delay output activation and push-button activation. A bargraph is also available for manual setting of the threshold to detect particularly difficult contrasts. The standard version supplies excellent performances in general at a 20 kHz switching frequency. The **TL46-WLF** enhanced version presents a 4-digit display for the setting of the most advanced functions, such as dynamic acquisition of the contrast mark. The sensor reaches the maximum market performances at 30 kHz switching frequency. Accessory lenses with 9 - 40 mm focal distance are available for all versions, as well as a high-resolution focussing lens and a PMMA plastic patent-covered lens particularly suitable to food applications with standard 9 mm focal distance.

HIGHLIGHTS

- Wide-spectrum RGB LED emission
- 3 different versions: basic, standard and enhanced
- Automatic, manual and dynamic setting
- 15, 20 or 30 kHz switching frequency
- NPN/PNP and analogue outputs
- Standard fixing, M12 connector rotatable on 5 positions

APPLICATIONS

Ceramics

Beverage & Bottling

Packaging lines

SETTING

The switching threshold is set pressing twice the SET push-button; the first for the mark the second for the background.

The threshold level can be set manually, in the TL46-WL/WLF version, pressing the '+' and '-' push-buttons which increase or reduce the threshold as visualised on the bargraph or display.

The dynamic setting, present in the TL46-WLF version, detects the moving mark by simply keeping the SET push-button pressed, or activating the Remote/Dyn input.

TL50 SERIES

The **TL50** contrast sensor line offers the best solution for all the applications where cost reduction is requested, without compromising the excellent detection performances. The optimised optics of these sensors, the RGB LED emission with automatic colour selection and the very fine resolution, allow the detection of the weakest contrast of colours or grayscale between mark and background, or between different objects or surfaces. The high resolution is not a limit for the detection speed, reaching 33 ms response time and 15 kHz switching frequency. Thanks to the compact dimensions and multiple fixing holes with metallic inserts present in standard positions, the sturdy ABS plastic housing is fully compatible and can replace the most traditional contrast sensors, as well as offering an interesting cost reduction. The special PMMA plastic lens, that can be fixed either in an axial or lateral position, is suitable for sensor use in the food industry, where the presence of glass parts must be avoided.

HIGHLIGHTS

- High resolution and RGB LED emission with automatic colour selection
- Very fast switching frequency and low response time
- Easy sensor setting by means of two pushbuttons Mark/Bkgd
- Sturdy plastic housing with standard dimensions and fixing holes

APPLICATIONS

Packaging lines

Contrast reading

The acquisition of the mark and background signals is made by pressing the MARK and BKGD push-buttons.

The switching threshold level is set automatically between the mark and background values. The Dark/Light operating mode is selected by the sensor on the ground of the lower or higher mark reflectivity with respect to the background. When the green LED turns on the setting has been successfully completed and the sensor is ready, whereas the LED blinking indicates a setting failure or an insufficient contrast between mark and background.

S65-W SERIES

The **S65-W** series offers, in a sturdy standard compact 50x50 mm ABS housing with IP67 mechanical protection, an advanced contrast sensor for the detection of register marks and other neutral or coloured targets.

The control panel presents three push-buttons for easy and immediate setting and a 4-digit display that indicates the configuration parameters and the level of received signal without the need of connecting external devices.

Different operating modes, automatic EASYtouch™ and fine, manual and dynamic, allow extremely easy and precise object detection.

Models with only one NPN or PNP switching output are available, or with RS485 serial interface for data transmission as well as an analogue monitoring output proportional to the received light intensity. Electric connection is made by means of a standard 5 or 8-pole connector according to the model.

HIGHLIGHTS

- High 12 bit resolution and 30 kHz switching speed
- 3 push-button setting with 4-digit display indication
- All setting modes: automatic, manual or dynamic
- PNP or NPN output with RS485 serial interface for data transmission

APPLICATIONS

Packaging lines

Contrast reading

DIMENSIONS

Sensor setting can be made in four different modes; **EASYtouch™** with one SET push-button pressure for a quicker setting, **fine** pressing twice the SET push-button for better precision, **manual** for rapid setting correction using the +/- push-buttons and **dynamic** for the detection of moving targets.

The timing function allows to set a delay of the output activation or deactivation, to avoid the detection of temporarily rapid changes, improve interfacing with slower systems or synchronise activator activation without needing external timers.

S65-V SERIES

The **S65-V** colour sensors offer the best performances for colour detection in a standard 50x50x25 mm compact housing. The **S65-V0** model, thanks to a good response time of only 340 µs, results to be particularly suitable for automatic packaging applications where high speed and colour mark detection are necessary. The **S65-V1** model increases the chromatic sensitivity of S65-V0 towards dark colours. The sensors can memorise and recognise 3 colours on 3 independent channels. The C (chromaticity) or C+I (chromaticity and intensity) detection algorithm and the tolerance level can be chosen for each colour. The auxiliary functions include keylock and synchronisation with external events through a specific input. The control panel presents two setting push-buttons, outputs LEDs and a 4-digit display for functioning messages and sensor configuration. Complete remote control is possible for the version with the RS485 serial interface, which in the **S65-V1** sensor can also receive RGB chromatic information.

SENSOR

HIGHLIGHTS

- 3 channel colour sensor with C or C+I functions and 10 tolerance levels
- Wide spectrum white light LED emission and RGB photoreceiver
- 3 independent NPN or PNP outputs and RS485 serial interface
- 2 push-button easy setting and 4 digit display

APPLICATIONS

Automatic machines

Automotive

Packaging lines

The colour sensor can be configured in a 'C' or 'C+' detection mode. The 'C' type algorithm is used to obtain a larger depth of field, or to detect colours on different opaque, shiny or reflecting surfaces. The 'C+' type algorithm offers a higher sensitivity towards tone variations, and is recommended for the detection of different colours on the same type of material. It will also distinguish grey tones.

DIMENSIONS

AS1

The photoelectric light grids of the **AS1** series are **crossed-beam area sensors** able to detect all objects, with even 0.2mm thickness, inside a 100mm height, over operating distances reaching 3m between emitter and receiver.

The **AS1** area sensors represent the ideal solution for the detection of very small objects, even when passing in different positions inside the controlled height and width.

Version with **trimmer adjustment and optic synchronism** between emitter and receiver unit are available.

The distance between emitter and receiver can range from 0.3 up to 2.1 m for the **AS1-LD** models and from 0.8 up to 3 m for the **AS1-HD** models.

HIGHLIGHTS

- Crossed beam area sensors
- 100mm controlled height
- Operating distance reaching 3m
- Adjustment trimmer
- PNP output
- Optic synchronism (trimmer models)
- Scan Mode input (HR models)

APPLICATIONS

- Object presence/absence control
- Object counting
- Object passage control on conveyor lines

Two different models are available: **high resolution (AS1-HR)** or **standard resolution (AS1-SR)**. In the first case the light array has 16 beams, while in the second case the beams are reduced to 6. In the AS1-HR model, the selection inputs of the SCAN MODE, can configure 4 different crossed-beam scanning modes. These different modes allow to vary the detection performances, in particular the resolution can be increased to 0.2mm thickness, or the response time up to less than 3ms.

DIMENSIONS

INDICATORS AND SETTING (TRIMMER VERSIONS)

Emitter is equipped with a manual regulation which lets the user change the emission power by means of a screwdriver. The emission power reduction can be particularly useful to lower passive reflections when maximum operating distance it is not required.

R SERIES

A wide range of prismatic reflectors is available as accessories for retroreflex sensors in order to guarantee excellent operation with infrared, visible red light and polarised emission. Reflectors of the R series satisfy the most varied application requirements, thanks to the different dimensions, shape, mounting possibilities or operating distances. The R2 and R5 reflectors are standard reflectors, respectively with 48 mm and 75 mm diameters, whereas the R4 and R6 high-efficiency reflectors can be used for longer operating distances. The R10 and R11 are suitable for specific applications requiring broad surfaces. The R7, R8 and R20 microprism reflectors, suitable for high resolution detection, are available for sensors with laser emission. The R9 reflector is a miniature reflector with a self-adhesive housing fixing system. The self-adhesive reflective tape can be cut according to the required shape and dimensions, and a version for polarised light is available.

HIGHLIGHTS

- Prismatic reflectors for retroreflex sensors
- High efficiency models for long operating distances
- Microprism reflectors for sensors with laser emission
- Self-adhesive reflectors and reflective tape

OF SERIES

The **OF series** offers a complete range of universal plastic fibreoptics, either for through-beam or diffuse and coaxial proximity detection, with free terminals that can be cut and connected to all the sensors with standard holes of 2.2 mm diameter.

Together with the standard models, suited to the most diffused applications, other versions for particular requirements are available: high temperature fibres resistant up to 125°C, ultra-flexible fibres with only 2 mm bending radius, highefficiency fibres with enhanced core, fibres with extending coiled cable, thin fibres with only 1 mm external diameter.

The OF series accessories include various additional lenses for focusing, collimating, or deviating the beam; as well as protecting metal sheaths, diameter adapters for thin.

HIGHLIGHTS

- Extra-flexible versions
- High-temperature versions
- High-efficiency versions
- Focusing, collimating and deviating lenses

thin cable	-TN-	35%

Table 1: NORMALISED EFFICIENCY *

The operating distance is obtained multiplying the normalised efficiency value by the distance indicated for each sensor with standard fibre-optics.

ACCESSORIES

AF-1
2 pcs 90° deviating lenses
Gain: distance x 0.7

Suitable fibres: OF-43-xx

AF-2
2 pcs collimating lenses
Gain: distance x 4

Suitable fibres: OF-43-xx

AF-3
1 pc focusing lenses
with 4 mm resolution
Operating distance: 19 ± 2 mm

Suitable fibres: OF-44-xx

AF-4
1 pc focusing lenses
with 0.4 mm resolution
Operating distance: 7 ± 1 mm

Suitable fibres: OF-44-xx

AF-5
2 pcs adapters Ø2.2mm for thin fibres Ø1mm
Material: plastic

Suitable fibres: OF-xx-TN

AF-9
1 pc metal sheath for M4 x 0.7 fibres
Material: stainless steel

Suitable fibres: OF-43-xx

AF-7
1 pc metal sheath for M6 x 0.75 fibres
Material: stainless steel

Suitable fibres: OF-42-xx

AF-11
Fibre-cutting tool with Ø 2.2 mm and Ø 1.1 mm holes
Material: plastic with stainless steel blade

Suitable fibres: all

OFA SERIES

The **OFA series** offers advanced fibre optics able to effectively solve critical fibre applications. The fibre array version with parallel beams increases the detection area avoiding vibrations or target position changes. One single fibre array is able to solve applications previously requiring more aligned fibres, such as the detection of small falling objects or casually varying positions. The fixed focus proximity version can be used as background suppression as it ignores objects outside the focusing distance, even if more reflective than target. Typical applications include small object detection, such as electronic components or mechanical parts. The proximity version with 90° optics is the ideal solution for applications with reduced space where the installation of standard emission fibres results impossible. All the fibres of the **OFA series** have terminals that can be cut to reduce length and are recommended for use with high-resolution sensors of the S7 series.

HIGHLIGHTS

- Fibre array with parallel beams for proximity or through beam detection
- Fixed focus proximity with axial, radial or lateral optics
- Proximity with 90° optics, self-contained in the 3.8 mm diameter
- Recommended fibres for S7 sensors

CS SERIES

The **CS** series offers high-quality connectors, developed to guarantee maximum reliability with particularly compact dimensions in the standard M8x1 and M12x1 formats, can be used to connect photoelectric sensors as well as inductive or capacitive proximity sensors. The M8 and M12 connectors offer either an axial or radial shape; wired with a 4-pole normalised configuration, with 3, 5, 7 or 10 metre cable. Moreover, the M12 connectors are available in other versions with a 3-pole normalised configuration for a normally open output, or with a yellow PNP output LED and a green power LED. The connector body is in PUR plastic and the cable in PVC with CEI 20-22 flammability class.

HIGHLIGHTS

- M8 and M12, axial or radial connectors
- Pre-cabled with cable of various standard lengths
- Configuration normalised to 4-poles and NO 3-poles
- Versions with LED for power and output signalling

ST SERIES

The **ST** series includes all the fixing brackets and supports available for the fixing of photoelectric sensors.

The 'L' shaped fixing brackets are in metal and present dimensions that guarantee the best sensor fixing, offering the maximum resistance against shocks and vibrations that can alter the positioning.

The holes are multiple or slotted in order to offer the best fixing versatility, even in place of other sensors.

Plastic supports are available for tubular sensors: a fixed and an adjustable support with which the inclination of the sensor's optic axis can be regulated right up to a 15° angle in every direction for a 360° arch.

HIGHLIGHTS

- Fixing brackets for universal sensors
- Fixed supports for tubular M18 sensors
- Supports with optic axis regulation
- Good shock and vibration resistance

PSCU SERIES

The control units of the **PSCU** series can be used to supply low voltage photoelectric sensors, as well as inductive or capacitive proximity, with the possibility to process the outputs with logic and timing functions.

The input can be configured for 1 or 2 sensors, with NPN or PNP, with relay, or with 0-10 Vdc analog output, which can be controlled with different logic functions: NOT, AND, OR, NAND, NOR.

The signal resulting from the logic operations drives the controller output, which can be processed with timing functions: ON and/or OFF delay, monostable or bistable commutation.

On the **PSCU** control panel, protected by a transparent cover, are present the LEDs for power, inputs and output status indication, as well as the trimmer for the inputs sensitivity and the timer adjustment.

The input selection, the logic and the timing functions are easily configured using the dip-switches on the controller side, where the extractable terminal blocks for the connection are also present.

The **PSCU** series is suitable for DIN rail mounting and is available with a 100-240 Vac or 24 Vac/Vdc power supply input and relay SPDT or transistor NO-NC controller output.

HIGHLIGHTS

- 100-240 Vac or 24 Vac/Vdc power supply
- Single or double input for NPN/PNP, relay or 0-10V analogue sensors
- Boolean logic functions: NOT, AND, OR, NAND, NOR
- Timing functions: ON and/or OFF delay, monostable, bistable

THE SERIES

The wide range of auxiliary functions available completes the excellent performances offered by the microprocessor-based controllers of the THE series, with standard 48x96 mm format and single and double display versions.

The main PID control action adjusts itself automatically to the optimum parameters with the AT initial autotuning, or with the ADT permanent autoadaptive function; while the auxiliary outputs can be programmed on 16 different alarm functions or fixed points.

The LFA diagnostic function is able to detect failures along the entire regulation loop, from the sensor to the actuator; moreover the regulation can be either automatic (closed loop) or manual (open loop), setting the output percentual value.

The complete programming of the controllers is made through the front panel, with the possibility of including a 3 level software safety lock.

SENSOR

HIGHLIGHTS

- Main control output with 1 or 2 auxiliary outputs
- PID action with AT autotuning and ADT autoadaptive functions
- Complete diagnostic of the regulation loop
- Automatic or manual regulation of the output

TECHNICAL DATA

Power Supply	12-24 Vac/Vdc $\pm 10\%$ version or 80-240 Vac $\pm 10\%$ version
Consumption	5 VA max.
Sensor input	selectable between E, J, K, L, R, S, T thermocouples and Pt100W/0°C RTDs
Measurement scale	selectable in °C or °F scales with lower and upper limits, refer to table 1
Precision	thermocouple measurement $\pm 0,4\%$ f.s.
	RTD measurement $\pm 0,3\%$ f.s.
	temperature drift 0,01% f.s. / °C of ambient
	temperature setting and indication ± 1 digit
Data updating	input, output and indication every 500 ms
Data retention	non volatile eeprom memory
Keyboard correction indication	from -99,9 to +99,9 °C/°F
1st point control action	on/off or PID automatic or manual selection, maximum or minimum, with AT initial autotuning and ADT permanent autoadaptive function
Proportional band	20°C (sel. from 1 to 999 °C/°F)
Integral time	120 sec. (sel. from 0 to 960 sec.)
Derivative time	30 sec. (sel. from 0 to 240 sec.)
Cycle time	12 sec. (sel. from 1 to 120 sec.)
On/off hysteresis	± 1 °C (sel. from $\pm 0,1$ o $\pm 99,9$ °C/°F)
1st point output type	relay SPDT 250 Vac, 5 A version
	trans. PNP 15 Vdc $\pm 20\%$ version
	20 mA short-circuit protection
2nd/3rd point alarm action	selectable alarm setting from -999 to +999 °C/°F respect to 1st point, or fixed point setting on selected scale, refer to table 2
2nd point output type	relay SPDT 250 Vac, 5 A
3rd point output type	relay SPST 250 Vac, 5 A
Auxiliary functions	LFA Loop Failure Alert diagnostic function, digital filter with an average of 10 measures, SW program LOCK with 3 levels
Setting	PROG, SET, UP, DOWN, AUTO/MAN push-buttons
Indicators	4 digit red display (10mm height), 4 digit green display (7mm height) for ED or 5 LED movement bar (ES), yellow ON1 LED, red ON2 LED, red AUX LED, green LOCK, green MAN LED, green AT LED
Connection	terminal block with 15 screw contacts, electronic block extractable from front panel
Electric protection	class 1
Mechanical protection	IP54 - front panel
	IP20 - housing
	IP10 - contacts
Housing material	ABS
Weight	400 g max.
Operating temperature	-10 ... +55°C
Storage temperature	-20 ... +65°C
Reference standard	EN 61010-1
Certifications

THQ SERIES

The microprocessor-based controllers of the THQ series are characterised by remarkable regulation precision, in particular in heat-sealing and thermoforming operations typical of the automatic packaging.

The AT initial autotuning and the ADT permanent autoadaptive functions can both be activated through the PID control action, responding excellently to frequent or fast system variations, as for example in process start and stop.

The panel with single or double display allows the setting of all the controller's values and configurations, such as sensor input, control action and alarm functions, with the possibility to lock the programming on three different safety levels.

The exclusive LFA diagnostic function is able to detect failures along the entire regulation loop, for example thermocouples short-circuit or heating resistance breaking.

HIGHLIGHTS

- Excellent measurement precision and regulation stability
- 9 sensors, 4 control actions, 16 alarms all keyboard configurable
- PID action with AT autotuning and ADT autoadaptive functions
- LFA diagnostic function of the regulation loop

TH-T SERIES

The **TH-T** temperature controller series offers a complete range of solutions able to satisfy many varied industrial automation needs, including basic models suitable for more simple and cost-effective applications and advanced models created specifically for the more evolved control and interface systems.

Programming of the temperature controllers is quick and easy as the most frequently-used configurations can be set with few keyboard operations. Models with a RS485 serial interface can send the parameter configuration and receive the controlled values through an industrial PC that can control different units.

Versions with a current transformer input, available as an accessory for measurements reaching 25 or 100 A, can detect even a partial load failure, as for example due to a broken heating element.

The series includes models with opto-isolated relay and transistor outputs to control static relays, as well as models with 4-20 mA or 0-10 V normalised proportional analogue outputs.

HIGHLIGHTS

- Complete range including basic and advanced control functions
- Relay output, static output for SSR, 4-20 mA and 0-10 V analogue outputs
- Models with current transformer input and HBA function
- Models with RS485 serial interface for MODBUS-RTU protocol

APPLICATION

Packaging lines

Process control

The temperature controllers are easily programmed by the 4 push-buttons and display indicators present on the front panel, or via the RS485 serial interface. Additionally the accessory device, as compact as a car key, copies the same configuration onto different temperature controllers. The 'T' push-button rapidly activates the Auto-Tuning function when the temperature increases and reaches the set value, alongside the continuous Self-Tuning of the PID control parameters.

TC/TR SERIES

The TC/TR series offers thermocouple and RTD temperature sensors for measurements ranging from -100 to +450 °C, or up to 600 °C for the T101-J model.

The J type (Iron/Constantan) or K type (Chromel/Alumel) thermocouples present a tubular stainless steel housing or with brass ring; the measurement junction is grounded in order to obtain the best response speed.

The resistance temperature detectors are made with a Pt100Ω/0°C type platinum sensitive element and are available in different tubular housings, with chamfer point for penetration measurements, or holed for detection in open air; in stainless steel in all cases, with an insulated sensitive element.

The thermocouples and the resistance temperature detectors of the TC/TR series are suitable for applications in automatic packaging, food sector, plastic material printing and wood working.

HIGHLIGHTS

- J and K type thermocouples
- Pt100 type RTDs
- Wide range of operating temperatures
- Housing in AISI 304 stainless steel

APPLICATIONS

Process control

DS1 SERIES

The **DS1 AREAscan™** series are compact multibeam light grids suitable for the detection and measurement of objects with different shapes and dimensions.

Different models are available with **100, 150 and 300 mm controlled height**, 4 mm resolution and operating distance reaching 4 m.

Versions with trimmer adjustment. The electronics is fully integrated and so no external drivers are required.

MEASUREMENT

HIGHLIGHTS

- Measurement of object dimensions or position
- 4mm resolution and 1ms response time
- Controlled heights ranging from 100 to 300mm
- Operating distance reaching 4m
- PNP and 0-10V analogue output
- Adjustment trimmer
- Fully embedded electronics

APPLICATIONS

- Object dimension measurement
- Shape or profile detection
- Positioning, spacing, centering, stacking
- Edge guiding
- Object counting

The measurement of the object's position or dimensions, placed inside the sensitive area, is obtained thanks to the 0 - 10V analogue output, which supplies a signal proportional to the number of interrupted beams. The PNP digital output is activated each time that a beam is intercepted by an object; in this case, the yellow OUT LED on the receiving unit panel turns on. The green POWER ON LED, always on this panel, signals also the wrong alignment between the emitting and receiving units as well as the functioning outside or near the maximum operating distance.

DIMENSIONS

MODEL	L1	L2	L3
DS1-xx-010-xx	150,1	107	129,1
DS1-xx-015-xx	200,1	157	179,1
DS1-xx-030-xx	350,1	307	329,1

INDICATORS AND SETTING (TRIMMER VERSIONS)

Emitter is equipped with a manual regulation which lets the user change the emission power by means of a screwdriver. The emission power reduction can be particularly useful to lower passive reflections when maximum operating distance is not required.

DS2 SERIES

The **AREAscan™** family of the **DS2** series covers controlled heights ranging from 150 to 2500mm, with 5m operating distances for high resolution versions, or 10m for low resolution versions. Digital resolution is 12mm or 25mm while relative measurement precision is $\pm 6\text{mm}$ or $\pm 22.5\text{mm}$. Models with RS485 serial port or ETHERNET host interface are available; ETHERNET models are only high resolution versions. The device configuration can be set manually thanks to internal dip-switches, or using graphic interface from remote PC for serial models. ETHERNET models can be programmed only from user interface. Once loaded the program on the flash memory, the device functions in the stand-alone mode. The serial or ETHERNET interface transmits the measurement in a binary or ASCII code, the operating status control as well as the setting of the different baud-rate versions. The **DS2** light arrays suits different height or dimensional measurement applications in general, in automatic material handling.

MEASUREMENT

HIGHLIGHTS

- Measurement in automatic material handling
- Versions with 6 or 25mm digital resolution
- Relative measurement precision $\pm 6\text{mm}$ or $\pm 22.5\text{mm}$.
- 150 - 2500 mm controlled height
- Operating distance up to 5m or 10m
- Digital PNP output
- 0-10 V analogue output
- Serial RS485 protocol or ETHERNET host interface

APPLICATIONS

Automotive

Material Handling

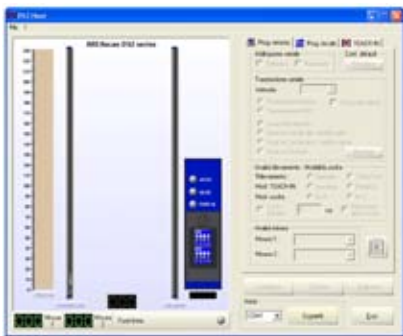

Automatic Warehouse

The different configuration parameters of the light grid can be visualised and modified using the extremely easy and intuitive user interface. In particular, the interface allows the access to many different advanced operating modes:

- complete beam status array, where serial output transmits a string of information relative to the status of each single optic;
- top beam, which provides information relative to the last interrupted or free optic;
- bottom beam, which provides information relative to the first interrupted or free optic;
- middle beam, which provides information relative to the central interrupted or free optic;
- total beam, which provides information on the total number of obscured or free optics;
- total contiguous beam, which provides information on the maximum number of adjacent obscured beams;
- number of transitions, provides information on the number of transitions from free to obscured optics or vice versa.

FUNCTIONING MODE EXAMPLES

And more applications:

- Object height measurement (vertical mounting);
- Object width measurement (horizontal mounting);
- Object distance measurement (horizontal mounting);
- Object volume measurement (vertical and horizontal combination);
- Single or multiple object presence and/or position detection in a given area;
- Missing label detection on multiple lanes;
- Vertical warehouse drawers positioning;
- Box or other objects profiling on conveyors;
- Web edges or center guiding;
- Cartoners, stackers and palletizers.

DS3 SERIES

The **AREAscan™** light arrays of the **DS3** series are optoelectronic multibeam devices that can be used to detect, measure and control the position of objects, also transparent and small. Models with 150, 300, 450 or 600 mm detection field height are available, as well as presenting 0.2 - 0.6 m or 0.6 - 1.5 m operating distances.

Internal dip-switches for configuration are available on all models, together with the Teach-in setting button with Remote and self-calibration function, LED indicators for the signalling of the device operating and auto-diagnostic status.

The synchronisation via cable of the emitter and receiver units guarantees high optic and electromagnetic interference immunity. The integrated electronics eliminates the need for an external control unit.

The compact dimensions (35 x 40 mm), easy installation and excellent performances make the **DS3** light grids particularly suitable to the many different applications of automatic packaging and industrial automation in general.

HIGHLIGHTS

- Operating distance reaching 1.5 m and up to 600 mm controlled height
- Digital PNP and 0 - 10 V analogue outputs
- Simple configuration obtained using the internal dip-switches
- Teach-in setting with Remote and self-calibration function

APPLICATIONS

- Control of the correct material positioning (opaque and transparent) during functioning (plastic, metal, paper etc)
- Detection of objects with different shapes in the food industry
- Loop control and positioning (also transparent material)
- Detection of objects with different shapes in the food industry

The following operating modes can be selected via internal dip-switches on the receiver unit and the SET and calibration button:

- Scanning with parallel or crossed beams
- Manual calibration or at powering on
- Absolute¹ or relative² measurement
- Absolute³ or relative⁴ detection
- Precise detection or with a tolerance channel
- Light or dark output
- Sensitivity level

Notes:

1. In this mode, the analogue output is proportional to the last obscured optic
2. In this mode, the analogue output is proportional to the total number of obscured optics
3. In this mode, a certain object in a certain position in the sensitive area can be detected through Teach-in. The digital output switches every time the object is in this position
4. In this mode, a certain object can be detected through Teach-in. The digital output switches each time the object is inside the sensitive area in any position

S65-Z SERIES

The **S65-Z** series offers a retroreflex line sensor for accurate measurements of the centre or edge position and width of objects. The detection is made on a reflecting tape, supplied with the sensor, positioned behind the object, with a 150 mm maximum measurement field width and a 200 mm operating distance. The 4-20 mA analogue output is proportional to the measurement, while the digital output, PNP or NPN according to the model, is activated when the measured value is included inside the interval fixed by the operator via teach-in. An alarm signal is activated when the luminous intensity received is weak. The setting is accomplished through three push-buttons present on the control panel, together with the output status LED, two LEDs signalling the operating mode, an alarm LED and a 4-digit display for the visualisation of the measurement and sensor configuration messages. Models with the RS485 serial interface offer the remote setting of all the programmable functions as well as the transmission of the measurements to an industrial PC are available.

MEASUREMENT

HIGHLIGHTS

- Line sensors with RS485 serial interface
- PNP or NPN digital output and 4 - 20 mA analogue output
- Teach-in of the measurement limit values for digital output activation
- 3 setting push-buttons and a 4-digit display

APPLICATIONS

Automatic machines

Pharmaceuticals

Packaging lines

The object to measure is illuminated by the infrared emission cone. The light reflected by the reflector is detected by a photodiode array and analysed according to 3 operating modes:

- Edge position: detects the position of the right or left edge of an object or of the first edge beginning from the right or left side in presence of more objects;
- Centre position: detects the centre independently from the object's dimensions;
- Width measurement: in presence of one object it provides the distance between two edges; in presence of different objects it provides the sum of the respective widths;

The analogue output generates a signal proportional to the distance from the reference edge or to the object width; the digital output switches when the detected position or measurement is inside the interval acquired via teach-in.

S80 SERIES

The **S80** series, in the compact sturdy metal housing, offers innovative class 2 laser distance sensors with time of flight measurement. This technology, based on the measurement of the time between the emission and receipt of the laser light pulses, effects accurate distance detection.

The **S80-Y0** and **S80-YL0** sensors function as proximity on respectively a 0.3 - 4 m distance, or from 0.3 to 7 m with scalable range, in object positioning or detection applications.

The **S80-Y1** and **S80-Y2** sensors, with operating distances reaching 20 or 100 m, function as retroflex measuring the distance from a reflector mounted on the object to detect. All models have two switching outputs, available in both the NPN and PNP models, that can be set at different distances, while the measurement value is supplied on the 4-20 mA analogue output and RS485 serial interface; the latter can be also used to set all the parameters.

Moreover the **S80-YL0** version offers the possibility to scale the 4-20 mA analogue output. This feature allows to set the minimum and maximum values of the operating distance and link the minimum and maximum current.

A 4-digit display visualises the distance, as well as all the parameters that can be set with the three push-buttons.

HIGHLIGHTS

- High precision and speed
- Proximity measurement range scalable from 0 to 7 m
- Retroreflex measurement range reaching 20 or 100 m on reflector
- 4 digit display and RS485 serial interface

APPLICATIONS

Automatic warehouse

Automotive

Wood

The laser distance sensors with time of flight measurement are suitable for long distance measurements offering constant performances on the entire range.

The linearity indicates the maximum deviation of the analogue output respect to the ideal value and is expressed in percentage of full range.

Whereas the temperature drift indicates the maximum deviation in relation to the sensor temperature variation and is expressed in mm/°C.

Lastly, the repeatability represents the variation interval of the measurement made different times on the target at the same distance. The product is not suitable to be used for OUTDOOR application.

S81 SERIES

S81 distance sensor line offers the best solution for all the applications where cost reduction is requested, without compromising the detection or measurement performances. The class 2 Laser emission and the exclusive time of flight measurement of light technology assure extreme precision in the distance measurement, with range up to 4 meters. The high resolution is not a limit for the sensing speed, reaching 5 ms response time and 80 Hz switching frequency. Thanks to only two push-buttons for different distance threshold setting, the automatic sensor setting is very easy and accurate for the two independent NPN or PNP outputs. The sensor is available in two different versions: **S81-...Y** for distance measurement with an additional 0-10 V analogue output, or **S81-...M** as long distance background suppression proximity with an additional alarm output for received signal problems or dirty lens condition. Moreover the **S81-...Y** version offers the possibility to scale the 0-10V analogue output. This feature allows to set the minimum and maximum values of the operating distance and link the minimum and maximum voltage.

MEASUREMENT

HIGHLIGHTS

- Proximity measurement up to 4m
- Easy setting via push-buttons
- 2 PNP or NPN digital outputs
- 0-10V analogue output or alarm output

APPLICATIONS

Automatic warehouse

Automotive

Wood

Easy setting:
the switching thresholds are defined separately for each channel, by means of the following procedure:

- Set the target object in front of the sensor at the expected distance
- In order to set the switching threshold for the output 1, press the button until the LED1 starts blinking
- In order to set the switching threshold for the output 2, press the button until the LED2 starts blinking

DIMENSIONS

INDICATORS AND SETTINGS

US18 SERIES

The range of measurement devices is enriched by M18x1 ABS tubular ultrasonic sensors of the **US18** series. Models with axial or radial acoustic emission and with discrete bipolar output (1 NPN and 1 PNP) or with 4-20 mA or 0-10 V analogue output are available. The extremely reduced blind zone and the unequalled 5 ms response speed are only two of the many features that are worth highlighting. The sensors are easily configured through the Teach-in function, while the operating status is visibly signalled by 2 bi-coloured LEDs.

The temperature compensation function corrects the sound speed changes due to temperature variations, so the sensor precision remains unchanged in all situations and a 0.5 mm resolution is guaranteed. The electrical connection is accomplished through standard M12 5-pole connectors. The **US18** ultrasonic sensors detect all objects independent from the non sound-absorbent material, reflectivity, transparency and colour, thus perfectly suiting applications.

HIGHLIGHTS

- High precision and switching frequency
- Colour independence and transparent object detection
- Easy Teach-in setting and 2 bi-coloured signalling LEDs
- Models with digital NPN - PNP and 0 - 10 V or 4- 20 mA analogue outputs
- Temperature compensation function

APPLICATIONS

Ceramics

Transportation lines

Beverage & Bottling

Packaging lines

Models with discrete output are excellent foreground and/or background suppressors. The Teach-in procedure allows to fix a switching window with 10 mm width and to detect minimum and maximum values.

The models with analogue output are conceived as distance sensors: the analogue output can be scaled on windows of any width inside the operating range, or positioned at the centre of a detection window with a fixed width of 100 mm.

US30 SERIES

The range of measurement and inspection devices is enriched thanks to the introduction of tubular standard M30x1 sensors of the **US30** series. Models with operating distances reaching 200 cm are available either with bipolar digital output (NPN/PNP NO/NC) or with 4-20 mA or 0-10 V analogue output. The sensors can be easily configured using the Teach-in function, while the operating status is visibly signalled by 3 LEDs. The temperature compensation function corrects the sound speed changes due to temperature variations, so the sensor precision remains unchanged in all situations and guarantees a resolution reaching 0.5 mm. The electrical connection is accomplished through standard M12 4-pole connectors. The **US30** ultrasonic sensors detect all objects independent from the non sound-absorbent material, reflectivity, transparency and colour, thus perfectly suiting applications in the automotive, packaging, machine tool fields and material transformation processes.

US50 SERIES

Datalogic Automation **US50** is the new series of ultrasonic sensors with M50 plastic tubular housing. All models are provided with a radial emitting head and offer the following versions:

- Digital bipolar **PNP/NPN NO/NC** configurable output;
- Analogue **0-10V / 4-20mA** configurable output.

Operating distance from **200mm to 8m** makes US50 ideal solution for all industrial applications where the target must be detected or measured really far away from the sensor.

The sensor functions are set using DIP-switches located on the rear side. Electrical connection is obtained through a standard **M12 5-pole** connector Euro Style.

These new sensors can be easily configurable thanks to the **TEACH-IN procedure**, performed through two PUSH-BUTTONS located on the rear side of the device or through the connector's **REMOTE input**.

New Datalogic Automation US50 ultrasonic sensors can detect all objects independently from the material, transparency and/or colour.

MEASUREMENT

HIGHLIGHTS

- Digital bipolar PNP/NPN NO/NC configurable output model
- Digital and 0-10V / 4-20mA configurable analogue output model
- Operating range of 200mm...8m
- Minimum resolution: 1mm
- Analogue output Linearity: +/- 0.2% of span from 200 to 8000 mm; +/- 0.1% of span from 500 to 8000 mm (1 mm minimum)
- Minimum window size : 20mm
- Repeatability: 1mm
- Hysteresis: 5mm
- Response Time: 100ms to 1600ms
- DIP SWITCH selectable
- Access to bank of 8 DIP switches through sealed cover for superior user functionality
- Fast, easy-to-use REMOTE TEACH-Mode programming; no potentiometer adjustments
- Wide operating range of -20° to +70°C with compensation function
- Rugged encapsulated design for harsh environments
- Unique housing design allows for multiple mounting configurations
- Euro-style quick-disconnect fitting

DATAVS1 SERIES

The **DATAVS1** series is the easiest solution for machine vision applications. The setup is very quick and intuitive thanks to the VSC unit, the external configurator with 3.5" colour display. The sensor setting is carried-out through three simple steps: region of interest definition, control type selection, parameter adjusting. **DATAVS1** is a fully embedded vision sensor able to acquire images, control them and activate digital outputs according to the result. The VSC unit can provide a real time monitoring of the images, but it is not required during the functioning of the sensor and so it can be disconnected and used to setup multiple sensors. **DATAVS1** is able to carry-out 8 different controls: Brightness, Contrast, Position, Width, Edge counting, Pattern match, Pattern match counting, OCV. Its flexibility together with the VSC configurator make the sensor ideal for plants with frequent format changes (packaging, food, cosmetic, bottling, labelling,...).

DataVS1

VISION

HIGHLIGHTS

- Quick setup without PC
- Fully embedded vision sensor
- 3.5" colour display, 8 push-buttons, 8 LEDs
- 8 different controls
- Memorisation of 20 different inspections

APPLICATIONS

DATAVS1 is ideal for the control of text presence in overprinting and logo position on food packages, product completeness before packaging, logo position on cosmetic bottles, correct stamp on post envelopes, liquid level inside a plastic bottle, correct product orientation on a conveyor belt, expiry date or lot number integrity.

Surface control

Part orientation

Expiring date integrity

Level control

Product conformity

Bottling check

The extremely compact size of the DATAVS1 sensors is not an obstacle for the full integration of all the elements for a reliable image-based control.

- Compact housing
- 640 x 480 image sensor
- VSC configurator with 3.5" colour display, 8 push-buttons, 8 LEDs
- Red light LED illuminator
- Selectable lenses
- Standard M12 connectors
- Configurator preset for DIN rail or panel mounting
- 3 PNP outputs
- 4 signalling LEDs: output1, output2, power supply, communication

DIMENSIONS

DATAVS1 CONFIGURATOR

The configuration of DATAVS1 sensors is obtained exclusively via VSC unit. No PC is necessary and thus sensor setting is easy and quick. Once the configuration has been completed, the VSC display can be used to visualise inspection results in real time or to configure a new sensor.

The interface available on the configurator, composed of 8 signalling LEDs and 8 push-buttons, allows the operator to quickly and intuitively set the sensor functioning parameters.

PUSH-BUTTONS

Push-button label	Main functions
Status	Go to next configuration step
Teach	Setting memorisation Acquisition of a new reference image
Set	Confirmation of option selected Confirmation of parameter value
Esc	Exit without saving Return to previous panel Return to previous configuration step
Arrows	Change of option selected Movement/resizing of ROI Parameter change

Step 1: Image adjustment and control definition

In the first configuration step, the user has to set the sensor parameters in order to obtain a good image quality in terms of focus, brightness and contrast. The control type and the part to inspect have to be then defined.

Step 2: Parameter setting

The second configuration step consists in setting the functioning parameters of the control previously selected and the acceptance thresholds.

Step 3: Inspection check and memorisation

The third step consists in the control of the correct inspection functioning and the saving on the sensor memory. Once completed, the sensor can operate in a stand-alone mode.

EXCELLENT FLEXIBILITY

Password

A Password that prevents the access to the configuration parameters to unauthorised personnel can be defined.

Fail inspector

The latest 8 inspected parts that have caused a control failure can be recalled by the Fail Inspector. This tool provides an immediate control of the production non-conformities.

Inspection selection

Each inspection is composed of a template and parameters. A specific inspection can be thus referred to different products in progress on the same production line. The different inspections can be recalled using digital pulses. Different inspection selection protocols with or without acknowledge are available.

The inspection change can be carried-out also directly by the operator using the bankset manager panel.

MONITORING USE OF THE VSC

Standard mode

Camera mode

Zoom mode

Fail mode

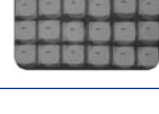

Production statistics

Besides the four monitoring modes, indicated above, the VSC configurator can visualise some production statistics, such as the number of inspected items and percentage of non-conformities.

Object Recognition

Eight different controls able to cover the most varied applications.

DATAVS2

The **DataVS2** vision sensor series presents all the characteristics to solve artificial machine vision applications in a flexible and intuitive way.

DataVS2 is a completely embedded device: the optic, the red LED illuminator and the electronics are included in an extremely compact housing. The sensor is configured via PC through Ethernet communication. The configuration software is included in the product and it has been developed in order to lead the customer through the configuration process step by step.

DataVS2 is available in four different versions according to the installed control tools: Object Recognition (OBJ), Advanced Object Recognition (AOR), Identification (ID) and Professional (PRO).

Many different control typologies are available: brightness, contrast, position, width, count, pattern match, contour match, 360° pattern match, barcode and datamatrix reader, OCV, 360° contour match & counter, 360° defect finder.

VISION

HIGHLIGHTS

- Flexible and intuitive setup via PC through Ethernet
- Memorisation of 20 inspections
- 14 different controls
- 360° pattern match for Advanced models
- Logical operators: AND, OR, NOT, NAND, NOR, ecc.
- TURBO mode to double elaboration speed
- VSM compatibility
- Inspection & Identification functionalities together available on Professional models

APPLICATIONS

DataVS2 is ideal for the control of text presence in overprinting and logo position on food packages, product completeness before packaging, logo position on cosmetic bottles, correct stamp on post envelopes, liquid level inside a plastic bottle, correct product orientation on a conveyor belt, barcode and datamatrix reading.

Help online

Status bar

Step 1: Image Setup

The first step consists in connecting the sensor and configuring the image quality parameters. When the desired results are obtained, the user can memorise the image that will be used as a template during sensor functioning.

Step 2: Teach

The second step establishes the acceptance criteria to distinguish objects from wastes. One or more controls can be selected according to the task to carry-out.

Step 3: Run

The third step configures the sensor digital outputs, simulates sensor functioning on the PC to verify the controls chosen and activates the operating phase on the sensor using the PC only to control the diagnostics.

MAXIMUM SIMPLICITY

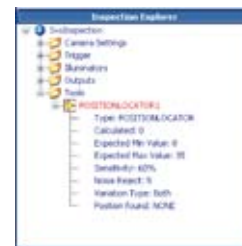

Discovery

The Discovery function finds all the sensors connected to the network.

Help

A Help is available for each step, supplying useful suggestions on the options available.

Inspection explorer

All the parameters connected to the inspection are grouped together and can be easily reached by the user.

Statistics

Show: Data Graphs Reset Statistics

Graphs inputs: NONE NONE NONE NONE NONE

The statistics panel displays all the information about inspection results and execution time. Data can be shown also in a graph.

Image saving

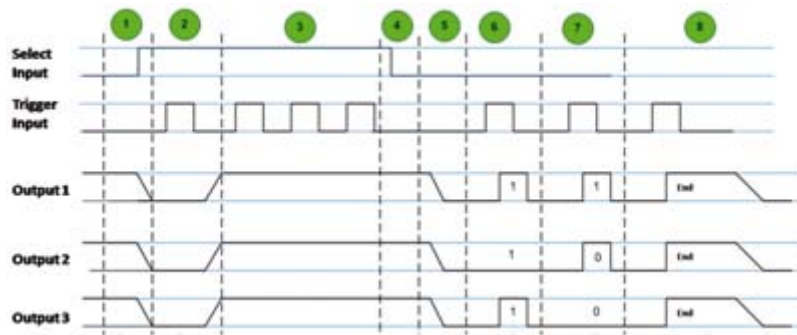

The image saving panel allows to set a folder where the acquired pictures are stored. An image saving condition can be also specified through a dedicated panel.

EXCELENT FLEXIBILITY

Inspection selection

Each inspection is composed of a template and parameters. The user can store up to 20 different inspections on the sensor memory in order to manage different items on the same production line.

The different inspections can be recalled in several different ways:

- (1) using digital pulses on OBJ and AOR models
- (2) through an Ethernet command on AOR, ID and PRO models
- (3) through a Serial command on ID and PRO models

VSM COMPATIBILITY

All DataVS2 models (i.e. OBJ, AOR, ID and PRO) are compatible with VSM, the monitoring device that allows to display elaborated images together with inspection results. The unit also offers the possibility to change the running inspection as well as to fine-tune the vision sensor functioning parameters on-the-fly.

The device integrates a 3.5" LCD color display and 8 push buttons. It features a standard TCP/IP Ethernet interface thus it can be connected either directly to a specific vision sensor or to a Local Area Network (LAN) where more DataVS2 have been previously installed.

CONTROL TABLE

Object Recognition

Seven different controls able to cover the most varied applications.			
Control	Functioning	Applications	Image
Pattern Match	Searches a sample inside a specific area	<ul style="list-style-type: none"> • Packaging: logo check • Assembling: product orientation • Post automation: stamp check

ADVANCED MODELS (AOR)

The Advanced Object Recognition (AOR) models integrate new important functionalities, including:

360° Pattern Match Locator
Object detection independent from rototranslations.

Logical tools
Possibility to combine the results of the single tools through boolean operator (AND, OR, NOT, etc.)

Advanced Ethernet
Current inspection results available also on Ethernet communication.

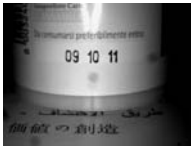

Speed-up
High execution speed thanks to the management of reduced resolution and TURBO mode.

360° Pattern match

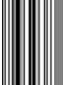

The Advanced Object Recognition (AOR) models include all the controls and locators available on Object Recognition models as well as the new 360° Geometric Pattern Match Locator.

IDENTIFICATION MODELS (ID)

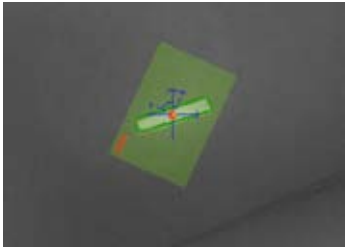

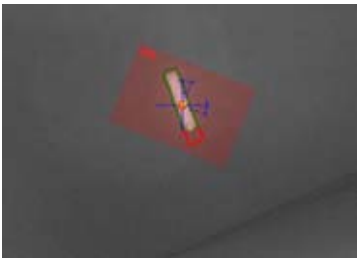

Control	Functioning	Image
Barcode reader	<p>Decode: read and decode one (or more) barcode in the Region Of Interest.</p> <p>String match: read and decode one (or more) barcode and compare it with a set of reference strings.</p> <p>Counter: count the number of barcodes in the Region Of Interest.</p>	
Datamatrix reader	<p>Decode: read and decode one (or more) datamatrix in the Region Of Interest.</p> <p>String match: read and decode one (or more) datamatrix and compare it with a set of reference strings.</p> <p>Counter: count the number of datamatrix in the Region Of Interest.</p>

DATAVS2 - VSM

VSM is a monitoring device compatible with all DataVS2 vision sensor models. The device integrates a 3.5" LCD color display and 8 push buttons. It also embeds a standard TCP/IP Ethernet interface thus it can be connected either directly to a specific vision sensor or to a LAN where more sensors have been previously installed.

VSM allows to display images and results as well as to change the running inspection or also to adjust the vision sensor functioning parameters.

Thanks to this wide range of functionalities, the device represents an excellent and complete HMI interface ideal for automated production lines attended by operators.

DataVS2 - VSM

MAIN FEATURES

Monitoring

VSM displays the pictures acquired by the connected DataVS2. The results of each tool are shown in a graphical way (GREEN = OK, RED = FAILURE). Several different monitoring options are available (e.g. standard, display on condition, zoom mode).

Inspection switching

VSM allows to change the running inspection in a quick and easy way. Moreover, the unit has 20 additional memory slots that extend the DataVS2 capability to manage different items on the same production line.

Parameter fine-tuning

All the vision sensor functioning parameters can be adjusted directly with the VSM. There is no need to use the PC to change the configuration of the camera any more since all the settings and the thresholds can be adjusted on-the-fly.

Account management

VSM is able to manage up to three different user accounts. This allows to protect the device configuration and to assign different rights to different groups of users.

TECHNICAL DATA

Power supply:	24 Vcc ± 10%
Ripple:	2 Vpp max
Consumption:	140 mA @ 24 Vcc
Dimensions:	96 x 96 x 39 mm
Indicators:	8 LEDs + 3.5" LCD color display
Setup:	DataVS2 GUI
Data retention:	Non-volatile FLASH memory
Operating temperature:	-10 °C ... +55 °C
Storage temperature:	-25 °C ... +70 °C
Vibration:	0.5 mm amplitude, 10 ... 55 Hz frequency, for every axis (EN60068-2-6)
Shock resistance:	11 ms (30 G) 6 shocks for every axis (EN60068-2-27)
Housing material:	ABS
Mechanical protection:	IP40
Connections:	2 x M12 4 poles
Weight:	170 g

TYPE 4

Selection guide

Note: The reference Standard is the **EN 999 / ISO 13855** 'Safety of machinery - the positioning of protective equipment in respect of approach speeds of parts of the human body'. The given information is indicative and synthetic; it is compulsory to refer to the complete **EN 999 / ISO 13855** standard for a correct safety distance calculation.

The minimum distance S in mm between the hazardous area and the detection point is expressed by the formula:

$$S = (K \times T) + C$$

K is a parameter (mm/sec) linked to the approach speed of the human body or parts

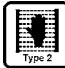

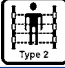

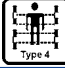

T is the total time (sec) necessary to stop the machine, where $T = t_1 + t_2$

t_1 = max. time between the detection actuation and the change of the device switching status

t_2 = max. machine response time

C is an additional distance (mm) based on the device typology used in terms of resolution, where the resolution is the minimum dimension of an opaque object able to obscure at least one of the beams of the sensitive detection area.

$R \leq 40$ mm	Finger or hand protection				R=resolution
$R > 70$ mm	Body protection				
$R < 116$ mm	Presence detection				

NORMAL APPROACH TO THE DETECTION AREA

Safety light curtains with 40 mm maximum resolution

$$S = (K \times T) + C$$

where $K = 2000$ mm/sec, $C = 8(d - 14)$ mm but not smaller than 0,
 $d =$ device resolution (mm)

This formula is valid for safety distances S up to 500 mm.

If the result of the formula gives S higher than 500 mm, $K = 1600$ mm/sec
 and $S = (1600 \text{ mm/sec} \times T) + 8(d - 14)$ mm

Safety light curtains with 40 to 70 mm resolution

$$S = (K \times T) + C$$

where $K = 1600$ mm/sec, $C = 850$ mm

In all cases, the highest beam height is $\varnothing 900$ mm and the lowest beam is ≤ 300 mm.

Safety light grid with separate multiple beams

$$S = (K \times T) + C$$

where $K = 1600$ mm/sec, $C = 850$ mm

A light grid with 2, 3, 4 separate beams is often used to detect the intrusion of the human body or parts in a specific area; the number of beams and the distance between them depends on the risk estimation made and by specific machine applications. Risks such as slipping under the lower beam, passing over the higher beam, passing through two beams have to be considered. The following table provides the heights from the ground or from reference plane for different beams.

Number of beams	Heights of single beams from the plane (mm)
4	300, 600, 900, 1200
3	300, 700, 1100
2	400, 900

In case of use of a single beam, in an industrial environment, a height of 750 mm is considered appropriate, with the device positioned at a machine distance, where $S = (1600 \text{ mm/sec} \times T) + 1200 \text{ mm}$.

PARALLEL APPROACH TO THE DETECTION AREA

$$S = (K \times T) + C$$

where $K = 1600 \text{ mm/sec}$, $C = (1200 \text{ mm} - 0,4 H)$, not less than 850 mm
 $H_{\text{max}} = 1000 \text{ mm}$, $H_{\text{min}} = 15 (d - 50 \text{ mm})$, where $d = \text{resolution of the sensor}$

ANGLED APPROACH RESPECT TO THE DETECTION AREA

For foreseeable approach angles bigger than 30°, follow the normal approach procedure, while for angles inferior to 30° follow the parallel approach procedure.

Note: The reference Standard is the **EN 999 / ISO 13855** 'Safety of machinery - the positioning of protective equipment in respect of approach speeds of parts of the human body'. The given information is indicative and synthetic; it is compulsory to refer to the complete **EN 999 / ISO 13855** standard for a correct safety distance calculation.

SF2-HAND SERIES

The **SAFEasy™** light curtains of the SF2 series, according to the IEC 61496-1 and IEC 61496-2 standards, are very suitable for hand protection of operators exposed to risks.

Different models are available with ten standard heights ranging from 150 to 1500 mm, 30 mm resolution and an operating distance reaching 15 m.

The emitter and receiver units are optically synchronised and contain all the control circuits, test input and two safety outputs inside the housing.

The connection with the machine stopping circuits are guaranteed by unshielded M12 4-pole connectors for the emitter and M12 5-pole connectors for the receiver.

The **SAFEasy™** light curtains of the SF 2 series have also integrated the test function, automatically activated every 0.5 seconds, without stopping the machine's working cycle.

A wide range of industrial applications, requiring operator safety, can be solved by the **SAFEasy™** light curtains, thanks to the extremely compact dimensions (31x32 mm), easy installation and excellent performances.

HIGHLIGHTS

- Integrated light curtains for **HAND PROTECTION**
- 30 mm resolution and operating distance up to 15 m
- 31 x 32 mm compact profile
- Versions with automatic or manual **RESTART**

APPLICATIONS

- Automatic machines;
- Machines for packaging, material handling, storing;
- Weaving machines, wood working machines, ceramic working machines;
- Automatic and semi-automatic assembly lines;
- Automatic warehouses.

The LED panel present on the extremely compact receiving unit guarantees an easy and immediate indication of the operating status of the safety light curtain.

These LED indicators supply also information relative to the device's effective alignment and diagnostics.

SF2-PRESENCE CONTROL SERIES

The **SAFEasy™** light curtains of the **SF2** series, according to the IEC 61496-1 and IEC 61496-2 standards, are very suitable for presence detection of operators exposed to risks.

Different models are available with nine standard heights ranging from 300 to 1500 mm, with 50 or 90 mm resolution and an operating distance reaching 15 m. The emitter and receiver units are optically synchronised and contain all the control circuits, test input and two safety outputs inside the housing.

The connection with the machine stopping circuits are guaranteed by unshielded M12 4-pole connectors for the emitter and M12 5-pole connectors for the receiver.

The **SAFEasy™** light curtains of the SF2 series have also integrated the test function, automatically activated every 0.5 seconds, without stopping the machine's working cycle.

A wide range of industrial applications, requiring operator safety, can be solved by the **SAFEasy™** light curtains, thanks to the extremely compact dimensions (31x32 mm), easy installation and excellent performances.

HIGHLIGHTS

- Integrated light curtains for PRESENCE CONTROL PROTECTION
- 50 and 90 mm resolution and operating distance up to 15 m
- 31 x 32 mm compact profile
- Versions with automatic or manual RESTART

APPLICATIONS

- Automatic machines;
- Packaging, material handling and storage machines;
- Textile, wood-working and ceramic machines;
- Automatic and semi-automatic assembling lines;
- Automatic warehouses.

Presence control is obtained positioning horizontally the safety light curtain. This installation allows to continuously control the presence of an obstacle inside a specific area. This is a particularly useful solution when dangerous area, not visible from the machine control points, has to be protected.

SG2-HAND SERIES

The **SAFEasy™ SG2** light curtains represent the natural evolution of the SF2 series.

The SG2 series offers two models, **SG2-B “Base”** and **SG2-E “Extended”**, thus guaranteeing compatibility with the SF2 series (**SG2-B**), as well as offering advanced functions for a Type 2 safety light curtain, such as EDM and Anti-Interference (**SG2-E**). Models with controlled heights ranging from 150 to 1800 mm are available, all with an operating distance reaching 19 m. The response times ranging from 8 to 24 msec result to be amongst the lowest on the market, consenting the installation of the product nearer to the dangerous area. As well as offering the base functions present in the **SG2-B** model, the **SG2-E** series integrates advanced functions for a Type 2 device such as manual/automatic Restart, EDM function, Anti-interference system (obtained thanks to the reduction to 9 m of the maximum operating distance). All selectable functions.

The profile and rotating fixing brackets ease installation and the alignment of the emitting and receiving units, even at long distances and in applications with deviating mirrors.

The **SG2** series represents the ideal solution for all the typical applications of a Type 2 safety light curtain.

HIGHLIGHTS

- Integrated light curtain for HAND PROTECTION
- Maximum operating distance reaching 19 m
- Controlled heights ranging from 150 to 1800 mm
- New sturdy profile and rotating brackets
- Selectable Manual/Automatic Restart, EDM and Anti-Interference

APPLICATIONS

- Automatic machines;
- Machines for packaging, material handling, storing;
- Weaving machines, wood working machines, ceramic working machines;
- Automatic and semi-automatic assembly lines;
- Automatic warehouses.

The characteristics introduced by the SG2 safety light curtains are:

- Operating distance reaching 19 m
- Wider controlled height range (reaching 1800 mm)
- Reduced response times, 25% less than SF2
- New sturdy and more functional profile
- Easier and quicker installation thanks to the new rotating fixing brackets that ease alignment even in the harshest conditions
- Compatibility with the entire SE accessory range
- SG2-E with selectable "Function" such as: Manual/Automatic Restart, EDM and Anti-Interference thanks to the reduction of the maximum operating distance from 19 to 9 m

NOTE: For MANUAL RESTART CONNECT TOGETHER Pin8 with Pin6.
For Automatic Restart connect together Pin8 with Pin5

SG2-E: FUNCTIONS

EDM

The **EDM** function allows to connect the light barrier to a couple of simple forced-guided safety relays instead to a Type 2 safety relay and thus guaranteeing an enormous economical advantage.

Connection with EDM function

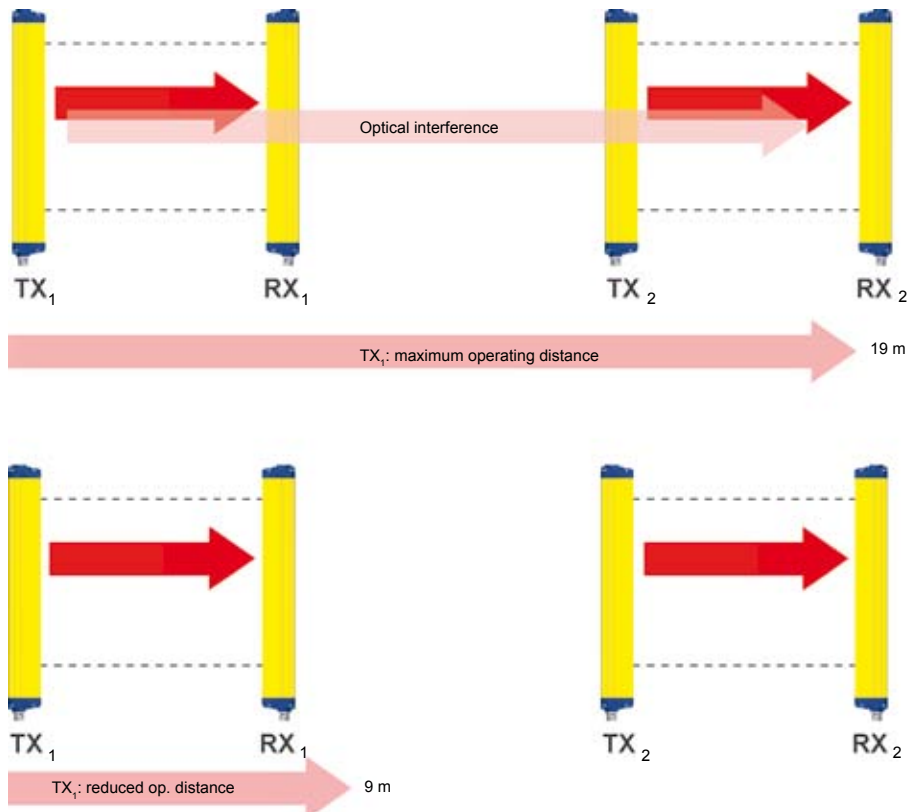

Connection without EDM function

Anti-Interference system

The Anti-Interference system consents the installation of different light curtains aligned one next to the other avoiding mutual optical interference, without the need to install separating shields.

For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

SG2-PRESENCE CONTROL SERIES

The **SAFEasy™ SG2** light curtains represent the natural evolution of the SF2 series.

The **SG2** series offers two models, **SG2-B “Base”** and **SG2-E “Extended”**, thus guaranteeing compatibility with the SF2 series (**SG2-B**), as well as offering advanced functions for a Type 2 safety light curtain, such as EDM and Anti-Interference (**SG2-E**). Models with controlled heights ranging from 300 to 1800 mm are available, all with an operating distance reaching 19 m. The response times ranging from 9 to 20 msec result to be amongst the lowest on the market, consenting the installation of the product nearer to the dangerous area. As well as offering the base functions present in the **SG2-B** model, the **SG2-E** series integrates advanced functions for a Type 2 device such as manual/automatic Restart, EDM function, Anti-interference system (obtained thanks to the reduction to 9 m of the maximum operating distance). All selectable functions.

The profile and rotating fixing brackets ease installation and the alignment of the emitting and receiving units, even at long distances and in applications with deviating mirrors.

The **SG2** series represents the ideal solution for all the typical applications of a Type 2 safety light curtain.

SAFETY

HIGHLIGHTS

- Integrated light curtain for PRESENCE CONTROL
- Maximum operating distance reaching 19 m
- Controlled heights ranging from 300 to 1800mm
- New sturdy profile and rotating brackets
- Selectable Manual/Automatic Restart, EDM and Anti-Interference

APPLICATIONS

- Automatic machines;
- Packaging, material handling and storage machines;
- Textile, wood-working and ceramic machines;
- Automatic and semi-automatic assembling lines;
- Automatic warehouses.

The characteristics introduced by the SG2 safety light curtains are:

- Operating distance reaching 19 m
- Wider controlled height range (reaching 1800 mm)
- Reduced response times, 30% less than SF2
- New sturdy and more functional profile
- Easier and quicker installation thanks to the new rotating fixing brackets that ease alignment even in the harshest conditions
- Compatibility with the entire SE accessory range
- SG2-E with selectable functions, such as Manual/Automatic Restart, EDM and Anti-Interference thanks to the reduction of the maximum operating distance from 19 to 9 m

INDICATORS AND SETTINGS

SG2-B

SG2-E RECEIVER (RX)

CONNECTIONS

SG2-B

RX: M12 5-POLE CONNECTOR

- 1 = brown = +24 Vdc
- 2 = white = OSSD1
- 3 = blue = 0 V
- 4 = black = OSSD2
- 5 = grey = TEST/RESET

TX: M12 4-POLE CONNECTOR

- 1 = brown = +24 Vdc
- 2 = white = NOT USED
- 3 = blue = 0 V
- 4 = black = NOT USED

SG2-E

RX: M12 8-POLE CONNECTOR

- 1 = white = RESET (*)
- 2 = brown = +24 Vdc
- 3 = green = EDM ACTIVATION
- 4 = yellow = EDM
- 5 = grey = OSSD1
- 6 = pink = OSSD2
- 7 = blue = 0 V
- 8 = red = SEL. MAN. / AUTO RESTART

TX: M12 4-POLE CONNECTOR

- 1 = brown = +24 Vdc
- 2 = white = TEST
- 3 = blue = 0 V
- 4 = black = SEL. OPERATING DISTANCE

NOTE: For MANUAL RESTART CONNECT TOGETHER Pin8 with Pin6.
 For Automatic Restart connect together Pin8 with Pin5

SG2-E: FUNCTIONS

EDM

The **EDM** function allows to connect the light barrier to a couple of simple forced-guided safety relays instead to a Type 2 safety relay and thus guaranteeing an enormous economical advantage.

Connection with EDM function

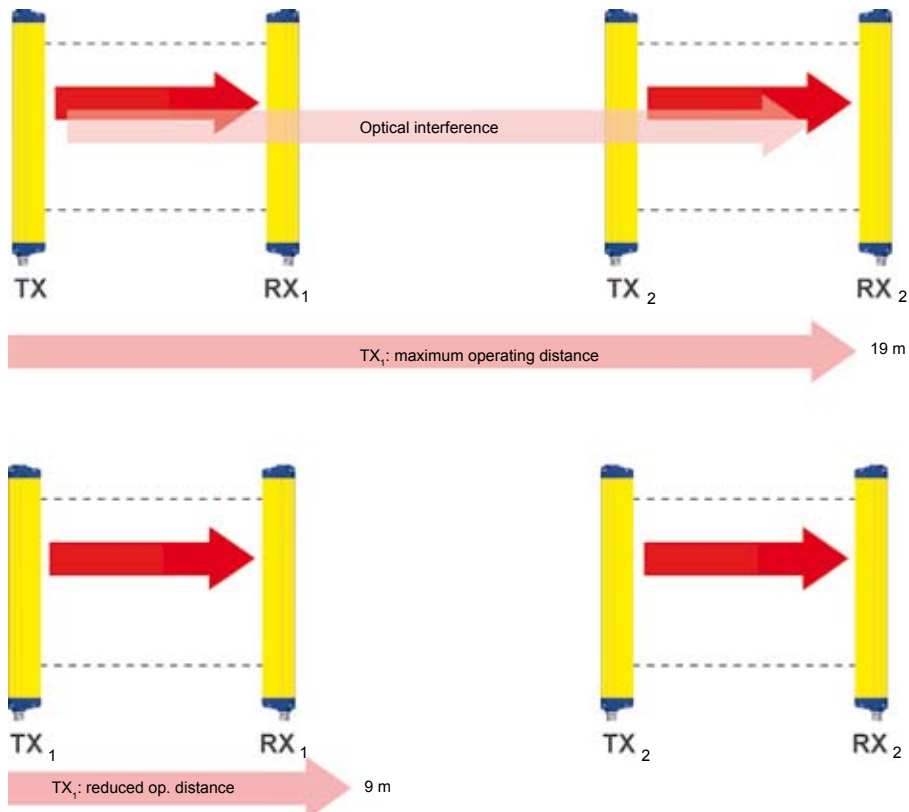

Connection without EDM function

Anti-Interference system

The Anti-Interference system consents the installation of different light curtains aligned one next to the other avoiding mutual optical interference, without the need to install separating shields.

TECHNICAL DATA

Electrical Data	
Power supply (Vdd):	24 Vdc ± 20%
Consumption (emitter):	2 W max
Consumption (receiver):	3.5 W max (without load)
OSSD outputs:	2 PNP
Short-circuit protection:	1.4 A max
Output current:	0.5 A max on each output

SG4-FINGER SERIES

The series of **SAFEasy™ SG4-B FINGER** safety light curtains widens the existing **SG** range, whilst representing an evolution of the **SE4-PLUS** line, offering a Type 4 safety light device for finger protection with base functions. Ideal for applications that do not require complementary functions such as Muting, Cascade and blanking.

The **SG4-B** series has been especially developed to simplify:

- installation (new rotating TOP-BOTTOM fixing brackets to ease alignment);
- connection (use of standard connectors, no connection between emitter and receiver necessary);
- configuration (no external control units and / or supplementary cables necessary);
- use (alignment guided by a 7 segment double display on both units).

Improved response time and operating distance, respect to the **SE4-PLUS** series distinguish this series and make it one of the best performing light curtains available today on the market.

HIGHLIGHTS

- Integrated light curtain for FINGER PROTECTION (14 mm resolution)
- Maximum operating distance reaching 6 m
- Controlled heights ranging from 150 to 1800 mm
- Compact 32x37 mm profile
- Selectable EDM and Manual/ Automatic Restart

APPLICATIONS

- Automatic machines;
- Packaging and cutting machines;
- Textile, wood-working and ceramic machines;
- Automatic assembling lines;
- Milling, lathe and shearing machines;
- Bending and metal-working machines.

The main characteristics of the SG4-B FINGER are:

- Operating distance reaching 6 m
- Response time from 11 to 50 msec
- Controlled heights ranging from 150 to 1800 mm
- New sturdy and more functional profile
- Compatibility with the entire SE accessory range
- Selectable EDM and Manual/Automatic Restart
- User interface equipped with a 7 segment display on both TX and RX units
- Alignment aid function

SE2-HAND SERIES

The **SAFEasy™** light curtains, according to the IEC 61496-1 e IEC 61496-2 standards, are suitable for hand protection of operators exposed to risks.

Different models with eleven standard heights ranging from 150 to 1650 mm, 35 mm resolution and an operating distance reaching 15 m are available. Specific dip-switches, that can be reached through a slot present on the front of the receiver protected by a lid and opened with a simple screwdriver, guarantee rapid and safe device setting. The operator is thus able to configure, according to the specific needs, the manual or automatic Restart, as well as the Muting and partial Muting functions. The emitter-receiver units are optically synchronised and contain all the control circuits, inputs and outputs inside the housing.

The **SAFEasy™** light curtains have also integrated the test function, automatically activated every second, without stopping the machine's working cycle.

A wide range of industrial applications, requiring operator safety, can be solved by the **SAFEasy™** light curtains, thanks to the extremely compact dimensions (35x40 mm) and easy connection and installation.

HIGHLIGHTS

- Integrated light curtains for HAND PROTECTION
- Version with 35 mm resolution
- Special slot for device setting
- 35 x 40 mm compact profile

APPLICATIONS

- Automatic machines
- Packaging machines, handling machines, storing machines
- Wood working machines, glass working machines, ceramics working machines.
- Automatic and semi-automatic assembly lines
- Automatic warehouses
- Presses, punching machines, benders and cutters

TECHNICAL DATA

Power supply:	24 Vdc ± 20% (SELV/PELV)
Consumption:	70 mA max. / 2.1 W (emitter) 100 mA max. / 3 W (receiver without load)
Light emission:	infrared LED 880 nm
Optic diameter:	Ø 16 mm
Number of controlled beams:	refer to table 1
Optic interaxis:	refer to table 2
Resolution:	refer to table 2
1st beam installation height:	refer to table 3
Through beam operating distance:	0.5 ... 25 m (Q vers.) 4 ... 50 m (P vers.)
Receiver inputs:	external switches for Muting, Test, Restart and Override
Receiver indicators:	green / red SAFE / BREAK LED 2 yellow ALIGNMENT LEDs green POWER ON LED
Emitter indicators:	yellow blinking FAILURE LED green POWER ON LED
Output type:	2 PNP
Output current:	0.7 A max. 0.25 A max. (45°C - 55°C) short-circuit signalling and protection
Response time:	14 ms
Selectable functions:	Total / partial Muting Manual / Automatic Restart refer to table 4
Time-out period:	Muting: 10 minutes Override: 2 minutes
Muting signalling lamp:	24 V 3 W min. (125 mA), 7 W max. (300 mA)
Receiver connection:	8-pole M12 connector
Emitter connection:	4-pole M12 connector
Cable length:	50 m max. (with 50 nF capacitive load)
Safety category:	type 4
Electrical protection:	class 1
Mechanical protection:	IP65 IP67 (connector part)
Housing material:	aluminium with PC Makrolon plastic caps
Weight:	1.2 Kg max. / m of total height
Operating temperature:	-10 ... +55 °C
Storage temperature:	-25 ... +70 °C
Reference standards:	EN 954-1, IEC 61496-1, IEC 61496-2

SE2-BODY SERIES

The **SAFEasy™** light curtains, according to the IEC 61496-1 e IEC 61496-2 standards, are suitable for detecting the human body when approaching dangerous areas. Models with different standard heights (500, 800, 900, 1200 mm), with 2, 3, 4 beams and operating distance reaching 50 m are available. Specific dip-switches, that can be reached through a slot present on the front of the receiver protected by a lid and opened with a simple screwdriver, guarantee rapid and safe device setting. The operator is thus able to configure, according to the specific needs, the manual or automatic Restart, as well as the Muting and partial Muting functions. The emitter-receiver units are optically synchronised and contain all the control circuits, inputs and outputs inside the housing.

The **SAFEasy™** light curtains have also integrated the test function, automatically activated every second, without stopping the machine's working cycle.

A wide range of industrial applications, requiring operator safety, can be solved by the **SAFEasy™** light curtains, thanks to the extremely compact dimensions (35x40 mm) and easy connection and installation.

SE4-BODY SERIES

The **SAFEasy™** light curtains, according to the IEC 61496-1 e IEC 61496-2 standards, are suitable for detecting the human body when approaching dangerous areas. Models with different standard heights (500, 800, 900, 1200 mm), with 2, 3, 4 beams and operating distance reaching 50 m are available. Specific dip-switches, that can be reached through a slot present on the front of the receiver protected by a lid and opened with a simple screwdriver, guarantee rapid and safe device setting. The operator is thus able to configure, according to the specific needs, the manual or automatic Restart, as well as the Muting and partial Muting functions. The emitter-receiver units are optically synchronised and contain all the control circuits, inputs and outputs inside the housing. A wide range of industrial applications, requiring operator safety, can be solved by the **SAFEasy™** light curtains, thanks to the extremely compact dimensions (35x40 mm) and easy connection and installation.

HIGHLIGHTS

- Integrated light curtains for BODY PROTECTION
- Versions with 2 / 3 / 4 beams
- Special slot for device setting
- 35 x 40 mm compact profile

APPLICATIONS

- Automatic machines
- Packaging machines, handling machines, storing machines
- Wood working machines, glass working machines, ceramics working machines, etc.
- Automatic and semi-automatic assembly lines
- Automatic warehouses
- Presses, punching machines, benders and cutters

Conveyors

Automatic warehouse

Automotive

TECHNICAL DATA

Power supply:	24 Vdc ± 20% (SELV/PELV)
Consumption:	70 mA max. / 2.1 W (emitter) 100 mA max. / 3 W (receiver without load)
Light emission:	infrared LED 880 nm
Optic diameter:	Ø 16 mm
Number of controlled beams:	refer to table 1
Optic interaxis:	refer to table 2
Resolution:	refer to table 2
1st beam installation height:	refer to table 3
Through beam operating distance:	0.5 ... 25 m (Q vers.) 4 ... 50 m (P vers.)
Receiver inputs:	external switches for Muting, Test, Restart and Override
Receiver indicators:	green / red SAFE / BREAK LED 2 yellow ALIGNMENT LEDs green POWER ON LED
Emitter indicators:	yellow blinking FAILURE LED green POWER ON LED
Output type:	2 PNP
Output current:	0.7 A max. 0.25 A max. (45°C - 55°C) short-circuit signalling and protection
Response time:	14 ms
Selectable functions:	Total / partial Muting Manual / Automatic Restart refer to table 4
Time-out period:	Muting: 10 minutes Override: 2 minutes
Muting signalling lamp:	24 V 3 W min. (125 mA), 7 W max. (300 mA)
Receiver connection:	8-pole M12 connector
Emitter connection:	4-pole M12 connector
Cable length:	50 m max. (with 50 nF capacitive load)
Safety category:	type 4
Electrical protection:	class 1
Mechanical protection:	IP65 IP67 (connector part)
Housing material:	aluminium with PC Makrolon plastic caps
Weight:	1.2 Kg max. / m of total height
Operating temperature:	-10 ... +55 °C
Storage temperature:	-25 ... +70 °C
Reference standards:	EN 954-1, IEC 61496-1, IEC 61496-2

SE4-PLUS FINGER SERIES

The SAFEasy™ light curtains, according to the IEC 61496-1 and IEC 61496-2, are particularly suitable for finger protection of operators exposed to risks.

Different models are available with heights ranging from 150 to 1200 mm, 14 mm resolution and operating distance reaching 6 m. Each model has one or more advanced functions: EDM, Blanking and Cascade. The light curtains are able to verify the integrity of external monitoring devices thanks to the EDM (External Device Monitoring) function. The Blanking function allows to deactivate a part of the detection area during functioning, allowing material passage or mechanical obstacle presence without causing machine interruption. Fixed Blanking and Floating Blanking can be selected. The Cascade configuration allows to combine the functioning of a couple of light curtains positioned in different areas.

Specific dip-switches, that can be reached through a slot present on the front of the active unit protected by a lid and opened with a simple screwdriver, guarantee a rapid and safe configuration.

The compact dimensions (35 x 40 mm), easy installation and excellent performances make the SAFEasy™ light curtains suitable to industrial applications requiring operator safety.

HIGHLIGHTS

- Integrated light curtains for FINGER PROTECTION (14 mm resolution)
- EDM and Blanking functions
- Cascade configuration
- 35 x 40 mm compact profile

APPLICATIONS

Wood working machines

Packaging lines

Automatic machines

The features introduced by the safety light curtains of the SE4-PLUS FINGER series are given below:

- EDM function: allows to verify the status of the external monitoring devices (typically safety relays), avoiding external malfunctions jeopardising correct device functioning.
- Fixed Blanking: allows the operator to exclude the control of beams in a pre-set position.
- Floating Blanking: allows the operator to exclude the control of a pre-set number of beams in any position within the detection area.
- Cascade configuration: a couple of light curtains can function connected to each other in accordance to a Master-Slave protocol and combining the safety information relative to the two different sections of the controlled machine. The Master unit has a Blanking function and can be used without the Slave unit.

Models with the Muting function are not available in the SE4-PLUS FINGER series.

SG2-M & SG4-E SERIES

The new **SG EXTENDED** safety light curtain series represents the ultimate innovation step of SG family. SG EXTENDED are FULLY INTEGRATED safety light curtains that perfectly combine the SAFEasy concept with applicative flexibility, reliability and performance.

TOTALLY ZERO DEAD ZONE is the distinctive characteristic of all the models from 300 mm to 1800 mm of controlled and overall height. SG EXTENDED series guarantees full application coverage thanks to the following versions :

- **SG2-M 'Muting'** : Type 2 30 mm resolution with integrated Muting function for all packaging and material handling applications
- **SG4-E 'Programmable'** : Type 4 14 and 30 mm resolution with integrated and configurable Cascade, Muting and Blanking functions all in the same part number.

Integrated functions are selectable and configurable in 2 different ways :

- **Basic Configuration Mode (BCM)** : push buttons located on both TX and RX allow the user to configure the device in a very easy and quick way;
- **Advanced Configuration Mode (ACM)** : a GUI interface on PC communicate to the barrier through Ethernet and lead the customer through the configuration process step by step.

SG EXTENDED

SAFETY

HIGHLIGHTS

- Type 2 And Type 4
- 14 And 30Mm Resolution
- Zero Dead Zone
- Up To 20 M Operating Distance
- 300...1800 Mm Controlled Height
- Basic Configuration Mode (Bcm) Through Push-Buttons
- Advanced Configuration Mode (Acm) Through Gui
- CASCADE (No Differentiation Between Master And Slave Models)
- Integrated MUTING Function
- Integrated BLANKING Function
- Accessory Dongle For:
 - Configuration Cloning
 - Ethernet (Tcp/Ip connection)
 - Remote Monitoring
 - Remote Programming

APPLICATIONS

Extreme flexibility together with high performances make **SG EXTENDED** ideal solution for the following applications :

Automotive

Packaging

Metalworking

Woodworking

Electronics

The extremely compact size of SG EXTENDED together with the TOTALLY ZERO DEAD ZONE are distinctive characteristic in automation shopfloor for a safety light curtains

- Compact housing
- Standard M12 connectors
- Ethernet communication
- 2 PNP/NPN configurable OSSD outputs
- 8 signalling LEDs
- Alignment level bar-graph on both TX and RX unit
- 3 push-buttons on TX and RX unit for programming

DIMENSIONS

Model	Lt [mm]	L [mm]
SGy-xx-030-OO-#	150	306,3
SGy-xx-045-OO-#	300	456,3
SGy-xx-060-OO-#	450	606,3
SGy-xx-075-OO-#	600	756,3
SGy-xx-090-OO-#	750	906,3
SGy-xx-105-OO-#	900	1056,3
SGy-xx-120-OO-#	1050	1206,3
SGy-xx-135-OO-#	1200	1356,3
SGy-xx-150-OO-#	1350	1506,3
SGy-xx-165-OO-#	1500	1656,3
SGy-xx-180-OO-#	1650	1806,3

y = 2 for SG2-M and 4 for SG4-E
 xx = 30 mm for SG2-M
 14 and 30 mm SG4-E
 # = W for SG2-M and P for SG4-E

INDICATORS

In the left side of user control panel (on both units of light curtains) an 8 leds user interface helps customer to control and check the state of the light curtain, for alignment mode, normal operation and for troubleshooting activity. User interface allows the user to understand which is the configuration set with the push buttons.

CONNECTIONS

SG4-30-180-OO-P	1800	96	22	38	30	957901450

SG4-E CASCADE RESPONSE TIME

With the following formulas (and referring to the response time reported in the following tables) the user can calculate the response time of every cascade configuration:

- no code: $T_{\text{CASCADE}} [\text{msec}] = T_{\text{MASTER}} + T_{\text{SLAVE 1}} [+ T_{\text{SLAVE 2}}] + 7,5$
- with code: $T_{\text{CASCADE}} [\text{msec}] = T_{\text{MASTER AIC}} + T_{\text{SLAVE 1 AIC}} [+ T_{\text{SLAVE 2 AIC}}] + 7,5$

Description	Master response time without code (msec) T_{MASTER}	Slave response time without code (msec) T_{SLAVE}	Master response time with code (msec) $T_{\text{MASTER AIC}}$	Slave response time with code (msec) $T_{\text{SLAVE AIC}}$
SG4-14-030-OO-P	13,7	13,7	19,1	19,1
SG4-14-045-OO-P	15,4	15,4	23,6	23,6
SG4-14-060-OO-P	17,2	17,2	28,1	28,1
SG4-14-075-OO-P	18,9	18,9	32,6	32,6
SG4-14-090-OO-P	20,7	20,7	37,1	37,1
SG4-14-105-OO-P	22,4	22,4	41,6	41,6
SG4-14-120-OO-P	24,2	24,2	46,0	46,0

SOFTWARE PC

- A Home
- B Toolbar
- C Task selection area
- D Help online
- E Status Bar

Step 1: Configuration

Configuration step allows the user to edit the functions parameters of the safety light curtain. This step will be selected, by default, when you first access the Configuration window.

Note

The Step 1 Configuration button will be active only if the current logged user is a Systems Integrator. A Maintainer or a Machine User cannot modify the safety configuration parameters.

Step 2: Programming

Programming step is aimed to view and accept the new configuration report before saving it to the safety light curtain.

This Step is enabled only when connected to a SG Dongle or a SG4-E Safety System.

Step 3: Monitoring

Monitoring step is to check the final behavior of the safety system after configuration. The Step 3 Monitoring enables you monitor a safety system to test a new configuration.

MAXIMUM SIMPLICITY

Scan for Devices

This function finds all the devices connected to the network.

Help

A Help is available for each step, supplying useful suggestions on the options available.

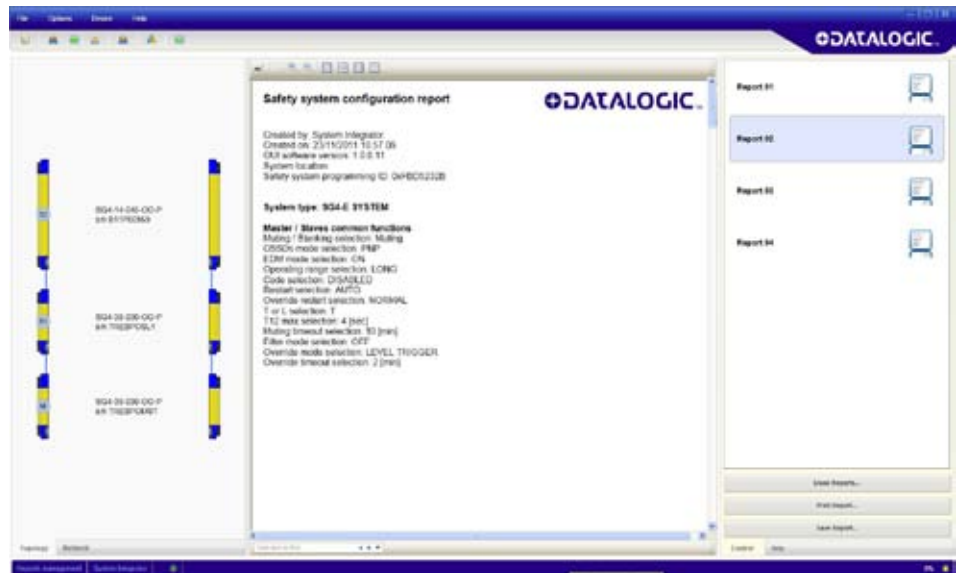

Topology

The Topology area, selected by default, displays the graphical representation of the configuration of the Safety Light Curtain in the current configuration operation. The System can be a real or virtual Safety System composed in the Selection screen.

REPORT MANAGEMENT

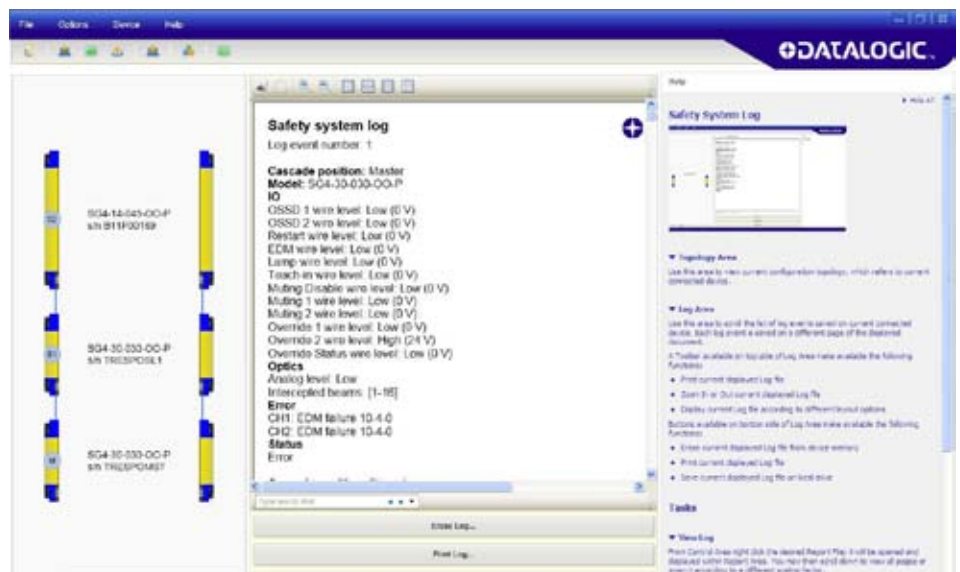

Use this option to connect to a Cloner device and view, print, save, or erase the Safety System configuration reports stored on the Cloner itself. A report is a list of parameters that represent a configuration that is generally saved on a safety system.

LOG MANAGEMENT

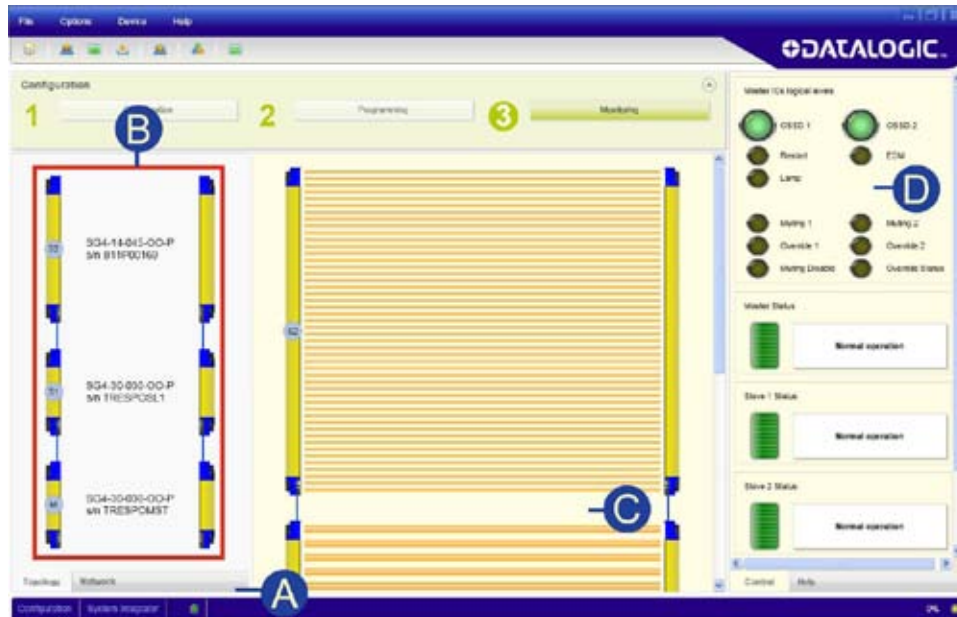

Use this option to connect to a logger device and view, print, save or erase the Safety System log stored on the logger.

Note: A logger is a Safety Device or a Cloner, e.g. SG Dongle, which can store the Safety System log. It is a collection of Safety System states. The log stores the state each device when particular events occur during the Safety System operation.

EXCELLENT FLEXIBILITY

Monitoring

Connect to the remote Safety Systems or Cloner through the Ethernet connection and monitor their present or working status.

A Network Area: Displays the list of Safety devices present on the Local Area Network. It is a read only area.

B Topology Area: Displays the structure of the current connected SG4E light curtains cascade if SG Dongle is connected to a cascade, or the SG Dongle when only SG Dongle is connected.

C Protected Area: Displays the current status of the protected area by listing light curtain beams. You may check current status by verifying all beams are displayed.

D Control Area: Displays the level of the OSSDs and current status of the inputs and the outputs on the M12 connectors of the SG Dongle; it also gives information about the operation status of master, slaves and SG Dongle.

The bottom part displays the status of each component of the cascade connection. That is the status of the master and one or more slaves.

SG4 DONGLE ETHERNET ADAPTOR

The SG4 DONGLE makes the system flexible and addressable allowing remote monitoring and remote programming: product assistance becomes much easier.

- CONFIGURATION CLONING
- ETHERNET (TCP/IP) CONNECTION
- REMOTE MONITORING
- REMOTE PROGRAMMING

FUNCTIONS

Operation functions and parameters configuration can be performed in two different ways:

Basic Configuration Mode (BCM):

Let the user select among basic functions / basic parameters with the help of push buttons and led user interface (**available on both SG2-M and SG4-E**)

Advanced Configuration Mode (ACM):

Let the user select among advanced functions / advanced parameters with the help of a PC Software GUI interface (**available only for SG4-E**)

BCM

A user interface of 8 leds and 3 protected push buttons lets the user operate basic configuration.

The user must use the provided special tool (see below) to activate push buttons thus accidental access to safety configuration is avoided.

Basic configuration steps:

In the right side of user control panel (on both units of the light curtain) a setting interface composed by 3 push buttons is present; the purpose of the interface is to let the user set light curtain locally and without use of PC graphic user interface.

Setting interface is composed by a CONFIRM push button used to enter in BCM and to confirm the selected configuration, a SELECT push button used to roll by different functions and an ENABLE push button to activate/deactivate the current function.

Please refer to the quick installation guide for necessary BCM configuration steps.

When an Advanced Configuration is already set on ESPE (configuration by SG4-GUI PC User Interface) ACM LED on RX unit's ON. Then a button pressure on Step 2 causes ESPE configuration failure lockout to prevent unauthorized advanced configuration changes.

FUNCTIONS

SG4-E RX ACM

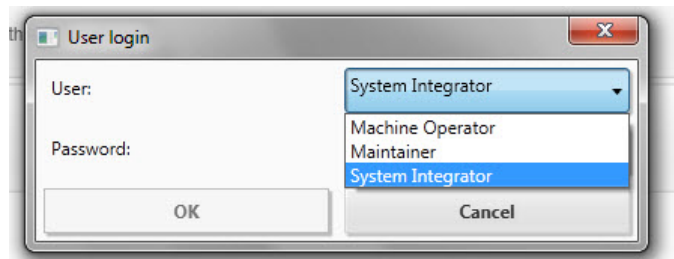

COMMON FUNCTIONS

Control	Functioning	ACM Configuration
Muting / Blanking mode	This function allows the user to define the light curtain mode.	
Restart	The restart mode allows the user to define how the light curtain returns in a Normal Operation condition.	
EDM	The External Device Monitoring (EDM) function controls external relays or contactors by verifying the OSSDs status.	
Reduction range	This function allows the user to select the maximum operating distance at which the curtains can be mounted.	
Anti-Interference Coding	The coding function allows the ESPE to remain in normal operation also when an interference condition with another ESPE occurs, and in particular when the TX of the first light curtain radiates in the direction of the RX of the second light curtain.	
PNP / NPN OSSD output	The PNP/NPN function allows the user to inform the light curtain on how the OSSDs are connected.	

RIGHTS MANAGEMENT

There are 3 different kinds of operator that can use the GUI with 3 different levels of authorizations.

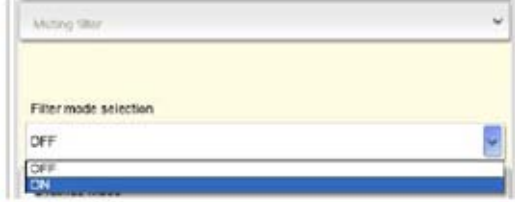

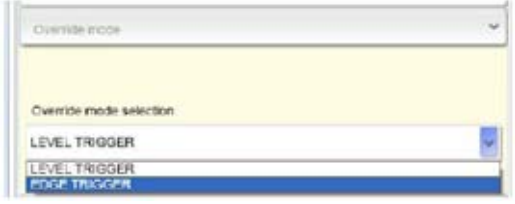

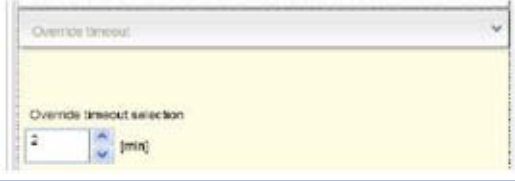

- **System Integrator:** has all the possible authorizations and can set every configuration on the GUI
- **Maintainer:** can upload the configurations (saved on the GUI) on the light curtain and use the GUI for monitoring the system, but he can't create new configurations
- **Machine Operator:** uses the GUI only for monitoring the system

PASSWORDS: each product has FACTORY passwords for each user that are reported on Instruction Manual. After the first access, each user's PASSWORD can be changed and personalized.

FUNCTIONS - MUTING

In this section are listed all the functionalities related with MUTING that can be selected through SG4-E GUI. For detailed explanation of each function and corresponding Time Diagrams please refer to Instruction manual and GUI software HELP.

Control	Functioning	ACM Configuration
Muting direction	The DEVICE can be used with both bidirectional 'T' or unidirectional 'L' type muting.	
Muting Activation Time T12	Time T12 needed from Muting 1 and Muting 2 signals activation for starting the Muting. Values: from 1 to 16 secs	
L Muting Deactivation Time TMoff	When Muting 1 signal becomes OFF the device starts a countdown before stopping the muting. This countdown lasts a time related to the Muting Activation Time T12 by a multiplier. Values: from 1 to 16	
Muting duration (Muting TimeOut)	Muting timeout is a time that defines the maximum duration of muting function; after the timeout the muting ends. Values: from 10 to 1080 min infinitive (∞)	
Muting Filter	The muting filter is a filter on muting inputs; low-high or high-low transitions of MUTING signals are considered valid only if maintained for a time (Tf) greater than 100 msec. Values: ON (100 msec) or OFF	
Override Mode	It's possible to configure the trigger of override inputs: Level or Edge. Values: LEVEL or EDGE	
Override Timeout	Override timeout is the maximum duration of override. Values: from 1 to 256 min	
Override Restart	This kind of selection can be achieved only if the light curtain is in Manual Restart; the user can select the type of Override Restart. Values: Normal or Auto	

FUNCTIONS - PARTIAL MUTING

It's possible to configure the type of muting: total or partial. Partial muting can be useful in those applications in which the user wants to limit the muting function effects to selected zones only.

In ACM Configuration the user can select a maximum of **5 muting zones**, each defined with the following parameters:

- **Position:** first beam of muting zone (starting from user display cap)
- **Dimension:** number of beams of muting zone

Check "Partial Muting" to enable function

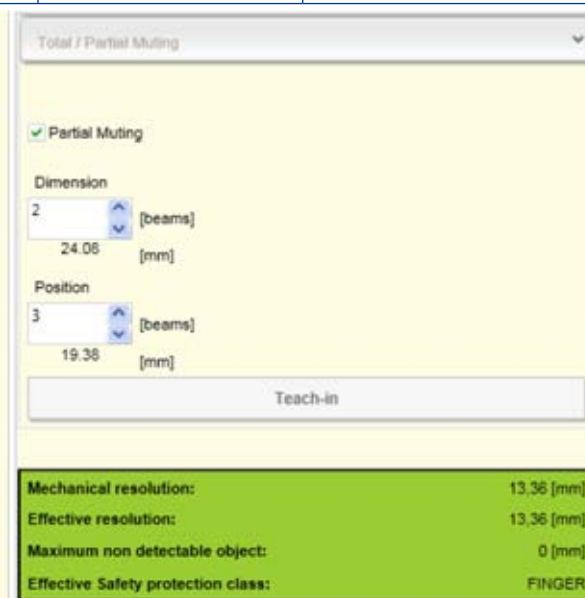

Click "+" button to add a new muting zone, X to remove a selected one

Click "Teach-In" button to acquire an object positioned inside the controlled area as a new muting zone

Choose correct parameters for selected zone. Both Dimension and Position are set in beams unit, equivalent measures in mm are exposed by GUI.

FUNCTIONS - BLANKING

In this section are listed all the functionalities related with BLANKING that can be selected through SG4-E GUI. For detailed explanation of each function and corresponding Time Diagrams please refer to Instruction manual and GUI software HELP. Operator can add up to **5 zones** of different **BLANKING TYPES**.

Click “+” button to add a new muting zone, X to remove a selected one

Click “Teach-In” button to acquire an object positioned inside the controlled area as a new muting zone

Fixed Blanking

Fixed Blanking allows a fixed portion of the controlled area (i.e. a fixed set of beams) to be occupied, while all the other beams operate normally.

Reduced resolution / Blanking

FLOATING BLANKING WITH TOTAL SURVEILLANCE

Floating objects can move up or down intercepting different beams while moving; the objects can't overlap nor change relative positions.

FLOATING BLANKING WITH PARTIAL SURVEILLANCE

Floating objects can move up or down intercepting different beams while moving; they can even get out of the protected area or intercept a number of beams minor than the configured one.

Tolerance

There are 2 types of tolerance: position and dimension.

Dimension Tolerance
It indicates how many beams the object can be smaller than the number fixed by the value Dimension.

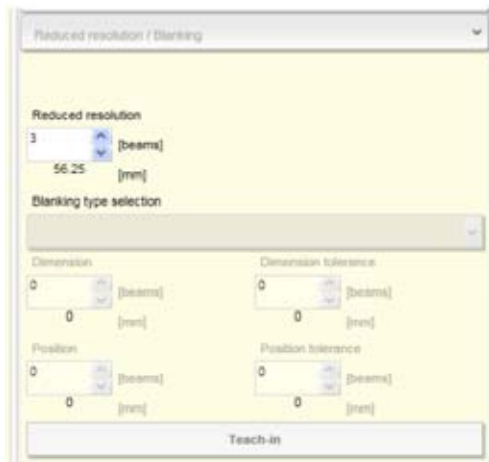

Position Tolerance
It indicates the number of beams in blanking zone that can be intercepted above and below the blanking zone without making the OSSDs switch off.

Reduced Resolution

Reduced Resolution is a particular kind of floating blanking in which more than one object can intercept each a defined number of beams with the device remaining in normal operation.

FUNCTIONS - CASCADE

SG4-E allows to connect in a cascade configuration up to 3 units (1 Master and 2 Slaves). It means a maximum of 160 beams for 30 mm resolution models and a maximum of 320 beams for 14mm resolution models. The maximum length of the master unit is 1800mm and the maximum length of each slave is 1200mm.

Response Time

Please Refer to SG4-E CASCADE RESPONSE TIME section of this document.

MASTER and SLAVE configuration

A safe auto-recognition procedure at startup is implemented; it automatically detects cascade topology and correctly address units.

In order to allow auto-recognition it's mandatory to connect the termination cap (supplied on kit) on the tail connector of last cascade unit, in both transmitter and receiver units.

RESET TO FACTORY SETTINGS

This feature can be achieved both through BCM and ACM.

- **BCM:** press and keep pressed CONFIRM button for at least 9 sec but less than 30 sec. otherwise the light curtain goes in lockout failure.
- **ACM:** press ERASE CONFIGURATION Button on Device Selection section of GUI after a connected device has been selected

Erase configuration...

NOTE: Factory reset will erase both BCM and ACM configurations.

TX PIG-TAIL

This is the Pig-Tail cable that must be always used for TX UNIT of both SG2-M and SG4-E. It has a 18 poles socket in one side and a M12 5 poles in the other

RX BLANKING PIG-TAIL

This is the Pig-Tail cable that must be used for RX UNIT of SG4-E when you configure it in BLANKING MODE and DON'T USE SG4 DONGLE. It has a 18 poles socket in one side and a M12 12 poles in the other

RX MUTING PIG-TAIL

This is the Pig-Tail cable that must be always used for RX UNIT of SG2-M and SG4-E when you configure it in MUTING MODE and DON'T USE SG4 DONGLE. It has a 18 poles socket in one side and a M12 5 poles plus M12 12 poles in the other.

The company endeavours to continuously improve and renew its products; for this reason the technical data and contents of this catalogue may undergo variations without prior notice. For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

SE4-PLUS HAND SERIES

The SAFEasy™ light curtains, according to the IEC 61496-1 and IEC 61496-2, are particularly suitable for hand protection of operators exposed to risks.

Different models are available with heights ranging from 150 to 1650 mm, 30 mm resolution and operating distance reaching 15 m. Each model has one or more advanced functions: EDM, Blanking and Cascade. The light curtains are able to verify the integrity of external monitoring devices thanks to the EDM (External Device Monitoring) function. The Blanking function allows to deactivate a part of the detection area during functioning, allowing material passage or mechanical obstacle presence without causing machine interruption. Fixed Blanking and Floating Blanking can be selected. The Cascade configuration allows to combine the functioning of a couple of light curtains positioned in different areas.

Specific dip-switches, that can be reached through a slot present on the front of the active unit protected by a lid and opened with a simple screwdriver, guarantee a rapid and safe configuration.

The compact dimensions (35 x 40 mm), easy installation and excellent performances make the SAFEasy™ light curtains suitable to industrial applications requiring operator safety.

HIGHLIGHTS

- Integrated light curtains for HAND PROTECTION (30 mm resolution)
- EDM and Blanking functions
- Cascade configuration
- 35 x 40 mm compact profile

APPLICATIONS

Wood working machines

Packaging lines

Automatic machines

The features introduced by the safety light curtains of the SE4-PLUS HAND series are given below:

- EDM function: allows to verify the status of the external monitoring devices (typically safety relays), avoiding external malfunctions jeopardising correct device functioning.
- Fixed Blanking: allows the operator to exclude the control of beams in a pre-set position.
- Floating Blanking: allows the operator to exclude the control of a pre-set number of beams in any position within the detection area.
- Cascade configuration: a couple of light curtains can function connected to each other in accordance to a Master-Slave protocol and combining the safety information relative to the two different sections of the controlled machine. The Master unit has a Blanking function and can be used without the Slave unit. Models with the Muting function are not available in the SE4-PLUS HAND series.

For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

SG-BODY "BIG" SERIES

The new **SG BODY "BIG"** safety light curtain series thanks to its new housing together with the innovative design optical-electronic platform ensures the performance of high-level safety light curtain required in the material handling market.

Classical TX-RX models with operating distance reaching up to **60m**, available in **2, 3 and 4 beams** models with controlled height of **500, 800, 900 and 1200mm** controlled height are now completed by a **LONG RANGE** version **40mm** resolution for hand protection with operating distance reaching up to 60m.

All SG BODY "BIG" models are then provided in 2 different versions :

- **BASE** version that represents the ideal product for all applications where Muting function is not required but EDM, MANUAL/AUTOMATIC restart are fundamental;
- **MUTING** version integrates the Muting function and completes it with all advanced features associated to like anti-interference coding, 'L' o 'T' configurations, edged or triggered OVERRIDE and external Muting enable.

Total absence of "DEAD ZONE", 7 segment displays **USER INTERFACE** for signaling and diagnostics, alignment AID function, both integrated and external muting lamp and 3 different types of mounting brackets (SWIVELLING SIDE for "THIN MOUNTING", TOP-BOTTOM ROTATING and REAR) complete the product and make it the ideal and most performing solution for all the industrial application.

HIGHLIGHTS

- New big sturdy profile for heavy duties;
- Up to 60mt operating distance;
- 2,3,4 beams with 500, 800, 900 and 1200mm controlled height;
- Two models : BASE and MUTING;
- No programming required : integrated safety functions DIP SWITCH selectable;
- Integrated Muting with all advanced features associated to like anti-interference coding, 'L' o 'T' configurations, edged or triggered OVERRIDE and external Muting enable.
- Type 2 models SIL 2 and PL d and Type 4 models SIL 3 PL e

APPLICATIONS

Extreme reliability and simplicity make the SG BODY safety light curtains the ideal solution for the following applications:

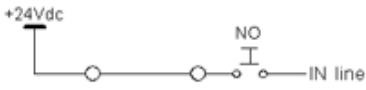

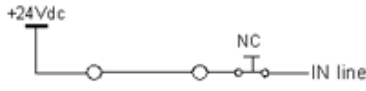

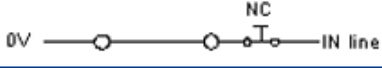

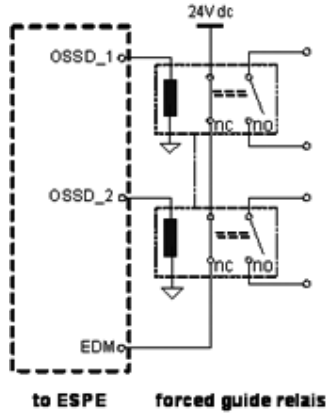

- Automatic machines
- Robots
- Automatic assembling lines
- Palletizers and Depalletizers
- Automatic warehouses

SETTINGS

BASE VERSION

In BASE versions integrated functions can be selected or enabled through dedicate wires on TX and RX M12 connectors

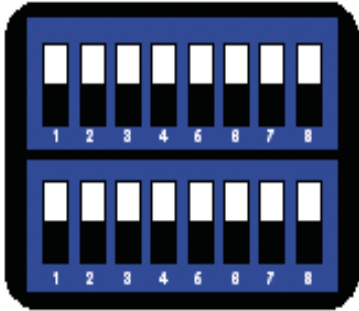

Line	Layout connection	Behaviour
TEST		Test not active
RESET/RESTART/RESTART MODE		Automatic restart
RESET/RESTART/RESTART MODE		Manual restart
EDM		(EDM ENABLE: active)
EDM ENABLE		EDM enabled
OSSDs		

MUTING VERSION

A closing cap coupled with the top cap of the RX and TX units can be unscrewed to access dip-switches slot. By means of internal dip-switches the user can set-up some functions.

RX closing cap contains LED integrated MUTING lamp

RX			TX		
					
	ON	OFF		ON	OFF

ON	OFF	Code 2	ON	OFF	Code 2
OFF	OFF	Not used	OFF	OFF	Not used

Wire configurations are the same reported in the table above for base versions

INDICATORS

A user interface aids the customer to control and check the state of the light curtain, for alignment mode, normal operation and for troubleshooting activity. User interface is composed by four LEDs on the receiver and two LEDs on the emitter and an one-digit display present on both receiver and emitter unit

The company endeavours to continuously improve and renew its products; for this reason the technical data and contents of this catalogue may undergo variations without prior notice. For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

SG BODY COMPACT SERIES

SG BODY COMPACT is the new family of Datalogic Automation Type 2 and Type 4 safety light curtains for body protection and access control able to rapidly and effectively solve all the industrial safety applications mainly in automotive field, packaging and material handling.

SG BODY COMPACT perfectly combines vanguard technology, extremely high performances and Datalogic distinctive **SAFEasy™** concept.

2, 3 and 4 beams models with controlled height of 500, 800, 900 and 1200mm all reaching 50m operating distance are available.

All SG BODY "COMPACT" models are then provided in 2 different versions:

- **BASE** version represents the ideal product for all applications where Muting function is not required but EDM and MANUAL/AUTOMATIC restart functions are basic requirements for very standard applications;
- **MUTING** version series satisfy all applications that require the Muting function, thanks to the use of preassembled, pre-cabled and pre-aligned Muting sensors. Polarized retroreflex or through beam models with 'T' integrated Muting sensors for two-way Muting, 'L' integrated Muting sensors for one-way and linear versions without integrated Muting sensors.

HIGHLIGHTS

- Up to 50mt operating distance
- 2,3,4 beams 500, 800, 900 and 1200mm controlled height
- Two versions : BASE and MUTING
- No programming required : integrated safety functions WIRE or DIP SWITCH selectable
- Integrated Muting with all advanced features associated to like 'L' or 'T' configurations, EDM, Manual/ Automatic RESTART selectable
- Integrated LED MUTING lamp;
- Same profile of SE series;
- Compatible with SE series;
- TOP-BOTTOM Rotating brackets for easier alignment
- Type 2 models SIL 2 and PL d and Type 4 models SIL 3 PL e

APPLICATIONS

Extreme reliability and simplicity make the SG BODY COMPACT safety light curtains the ideal solution for the following applications:

- Automatic machines
- Robots
- Automatic assembling lines
- Palletizers and Depalletizers

SETTINGS

A slot located in the front side of the RX unit, that can be easily opened using a screwdriver, simplifies the access to the internal dip-switches used for enabling/configuring integrated functions

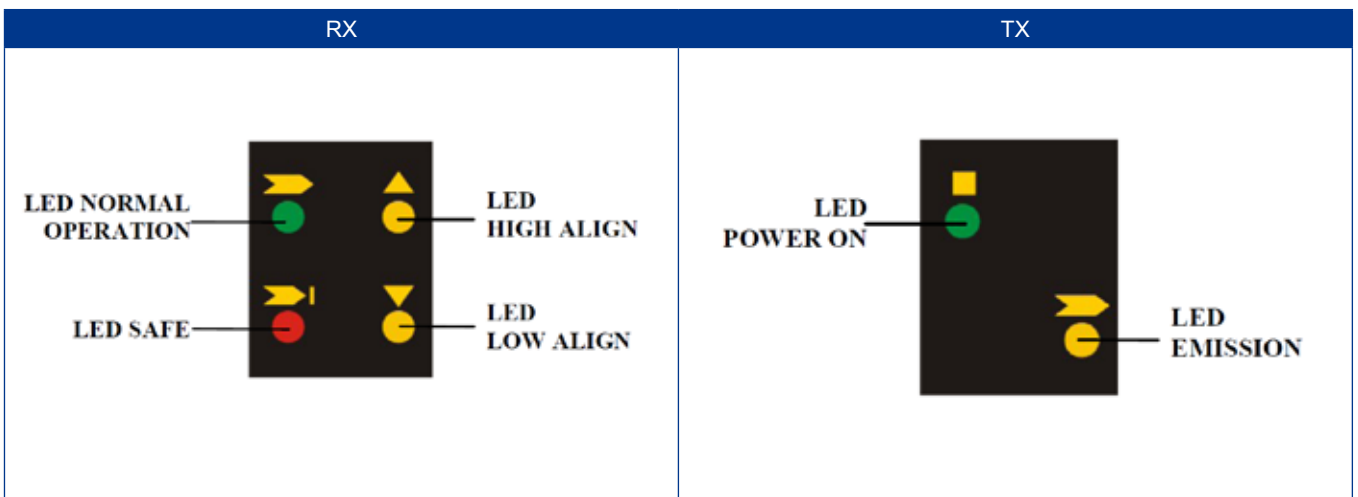

BASE VERSION			
Switch	Function	ON	OFF
1,5	-	-	-
2,6	-	-	-
3,7	EDM	Deactivated	Activated
4,8	Restart	Automatic	Manual

MUTING VERSION			
Switch	Function	ON	OFF
1,5	Muting time-out	10 min.	∞
2,6	Muting	T config. (4 beams)	L config. (2 beams)
3,7	EDM	Deactivated	Activated
4,8	Restart	Automatic	Manual

INDICATORS

The operator can check the operating condition of the light curtains through four LEDs positioned on the receiving unit and two LEDs on the emitting unit.

ACCESSORY SELECTION AND ORDER INFORMATION

ROTATIVE FIXING BRACKET MOUNTING

MUTING ARMS

SG BODY COMPACT series light curtains are available in T models for bidirectional Muting and L models for unidirectional Muting with Muting arms provided of retroreflex sensors; also linear models without integrated Muting sensors are available. These models can be converted in T models and L models by means of Muting arms accessories.

Muting arms are available in 2 versions: with retroreflex sensors and with emitter-receiver sensors. SG BODY COMPACT light curtains are designed, on both emitter and receiver, for mounting of both tipology of Muting arms.

The following figures show, respectively, the dimensions of single active arms, of single passive arms, and the corresponding fixing bracket stand alone.

note 1: With RRX Muting arms the overall operating distance is reduced to **3 meters**.

note 2: With F/G Muting arms the overall operating distance is reduced to **7 meters**. F/G Muting arms **can be mounted on TX and RX units by using secondary connectors**.

The company endeavours to continuously improve and renew its products; for this reason the technical data and contents of this catalogue may undergo variations without prior notice. For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

SG-BODY "BIG" REFLECTOR SERIES

The new **SG BODY "BIG"** safety light curtain series thanks to its new housing together with the innovative design optical-electronic platform ensures the performance of high-level safety light curtain required in the material handling market.

Classical TX-RX models are now completed by "**REFLECTOR**" models made by an active unit and a complete passive unit, with integrated moulded plastic mirrors, reaching up to **8m**, available in **2, 3 and 4 beams** with **500, 800, 900 and 1200mm** controlled height. REFLECTOR models are provided in 2 different versions :

- **BASE** version that represents the ideal product for all applications where Muting function is not required but EDM, MANUAL/AUTOMATIC restart are fundamental;
- **MUTING** version integrates the Muting function and completes it with all advanced features associated to like 'L' or 'T' configurations, edged or triggered **OVERRIDE** and external Muting enable.

Total absence of "DEAD ZONE", 7 segment displays **USER INTERFACE** for signaling and diagnostics, alignment **AID** function, both integrated and external muting lamp and 3 different types of mounting brackets (**SWIVELLING SIDE** for "**THIN MOUNTING**", **TOP-BOTTOM ROTATING** and **REAR**) complete the product and make it the ideal and most performing solution for all the industrial application.

HIGHLIGHTS

- Same big sturdy profile for both active and passive unit with same length;
- Up to 8mt operating distance;
- 2,3,4 beams with 500, 800, 900 and 1200mm controlled height;
- Two models : **BASE** and **MUTING**;
- No programming required : integrated safety functions **DIP SWITCH** selectable;
- Integrated muting Muting with all advanced features associated to like anti-interference coding, 'L' o 'T' configurations, edged or triggered **OVERRIDE** and external Muting enable.
- Same profile for active and passive unit
- Type 4 models **SIL 3** and **PL e**

APPLICATIONS

Extreme reliability and simplicity make the SG BODY safety light curtains the ideal solution for the following applications:

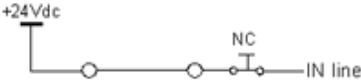

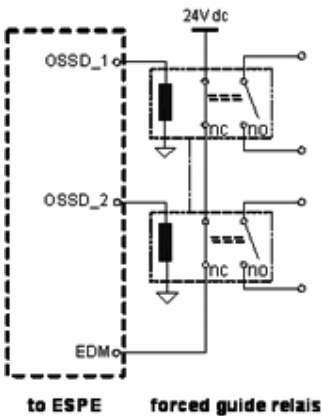

- Automatic machines
- Robots
- Automatic assembling lines
- Palletizers and Depalletizers

SETTINGS

BASE VERSION

In BASE versions integrated functions can be selected or enabled through dedicate wires on ACTIVE UNIT M12 connectors

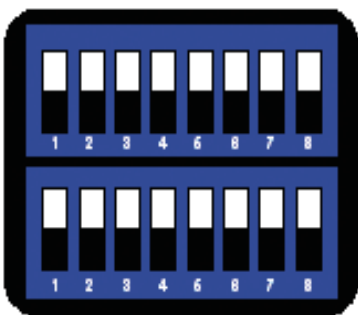

Line	Layout connection	Behaviour
RESET/RESTART/RESTART MODE		Automatic restart
RESET/RESTART/RESTART MODE		Manual restart
EDM		(EDM ENABLE: active)
EDM ENABLE		EDM enabled
OSSDs		

MUTING VERSION

A closing cap coupled with the top cap of the ACTIVE UNIT can be unscrewed to access dip-switches slot. By means of internal dip-switches the user can set-up some functions.

ACTIVE UNIT closing cap contains LED integrated MUTING lamp

		
	ON	OFF
Dip switch n°1: Muting timeout	10 min	∞
Dip switch n°2: Muting T/L	T	L
Dip switch n°3: Muting filter	Disabled	Enabled
Dip switch n°4: Override restart	Manual	Automatic
Dip switch n°5: Override mode	Edged	Triggered
Dip switch n°6: EDM enable	EDM on	EDM off
Dip switch n°7-8: not used		

INDICATORS

A user interface aids the customer to control and check the state of the light curtain, for alignment mode, normal operation and for troubleshooting activity. User interface is composed by four LEDs and an one-digit display on the ACTIVE UNIT.

note 1: With RRX Muting arms the overall operating distance is reduced to **3 meters**.

note 2: With F/G Muting arms the overall operating distance is reduced to **7 meters**. F/G Muting arms **can be mounted on a passive unite but requiring external power supply**

The company endeavours to continuously improve and renew its products; for this reason the technical data and contents of this catalogue may undergo variations without prior notice. For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

SG-BWS SERIES

The SG-BWS series presents two models:

- **SG-BWS-T4:** control unit with plastic housing for DIN/OMEGA rail mounting equipped with 16 clamps that can connect from 1 to 4 photocell couples of the S5-ST, SL5-ST, S300 series **with OSSD safety outputs**;
- **SG-BWS-T4-MT:** control unit with plastic housing for DIN/OMEGA rail mounting equipped with 48 clamps that can connect from 1 to 4 photocell couples of the S5-ST, SL5-ST, S300 series and contemporaneously up to 2 safety light curtains equipped with safety outputs activated with two 230V relay.

The SG-BWS-T4 model is **WITHOUT MUTING FUNCTION** but presents EDM and selectable MANUAL/AUTOMATIC RESTART. The SG-BWS-T4-MT model is provided with **DOUBLE MUTING FUNCTION**. The control unit fits some safety outputs controlled depending on the status of the safety photocells connected to the device. A danger condition detected by a photocell or light curtain opens the outputs.

HIGHLIGHTS

- Two models:
 - SG-BWS-T4 WITHOUT MUTING FUNCTION
 - SG-BWS-T4-MT WITH DOUBLE MUTING FUNCTION
- Factory automation standard housing with compact dimensions
- Possibility to connect 4 safety single-beam and 2 safety light curtains
- PLUS functions: Single/Double muting, Edged/triggered Override, Double Muting Lamp, External Muting Enable
- Configurable device through dip-switches
- Satisfies the requirements of key safety Standards, such as Category 4 of EN 954-1, SIL3 of IEC 61508, and performance levels PL e of EN ISO 13849-1.

APPLICATIONS

Extreme reliability and simplicity make the SG-BWS control units the ideal solution for the following applications:

- Automatic warehouses
- Machines for food packaging
- Robots
- Automatic assembling lines
- Machines for PCB production

SETTINGS

- User interface is present on the top of the SG-BWS-T4 for signalling and configuration.
- Two units made of 8 dip-switches are present on the top of the SG-BWS-T4-MT model. These switches activate/deactivate and configure additional functions integrated in the device.
- Signalling interface and dip-switches are protected from non-authorized access by transparent lids that can be opened using a specific tool.

DIP	PURPOSE	OFF (Default)	ON
1	ENABLE EDM	ENABLED	DISABLED
2	RESET MODE	AUTOMATIC	MANUAL
3	MUTING TIME-OUT	10 MINUTES	INFINITY
4	MUTING DIRECTION	T	L
2	OVERRIDE	EDGED	TRIGGERED
6	MUTING SELECTION	See specific table	
7	MUTING SELECTION		
8	MUTING SELECTION		

The EDM and MAN/AUTO Restart functions integrated in SG-BWS-T4 model can be selected through specific control unit lines (refer "CONNECTION" section of the present document).

INDICATORS

An user interface is present for viewing warnings and setup is present on the top of both SG-BWS-T4 and SG-BWS-T4-MT control units. Besides the 7-segment display (for diagnostics purposes), the warning components include 3 LEDs:

LED	INDICATION
● POWER	Device is powered correctly
● NORMAL	No danger: safety outputs closed
● SAFE	Danger or fault: safety outputs open
	The 7-segment display shows detailed information on control unit current status

DOUBLE MUTING FUNCTION SETTING

Thanks to its two separate muting channels, SG-BWS-T4-MT can accept the muting request output by sensors without interrupting the safety function on light curtain or safety sensors of both channels. The dip-switches 6-7-8 allow users to couple the single devices to the 2 muting channels available on the SG-BWS-T4-MT control unit. Following table reports all the available combinations.

DIP-SWITCH SETUP	PHOTOCELLS	LIGHT CURTAIN 1	LIGHT CURTAIN 2
000	A	A	A
001	A	A	B
010	A	B	B
011	-	A	B
100	A	B	-
101	-	A	A
110	A	-	-
111	-	-	-

0=OFF, 1=ON, A(B)=Device associated to channel A(B) Default setting: 000

MUTING WARNING DEVICES

To use the Muting function it is also required to connect the external Muting warning (lamp) since control unit would lock out if it is missing. One lamp shall be used per channel. If device is preset for use of just one channel, both warning devices are associated to it: in this way, failure of one of the lamps would not lock out system operation. SG-BWS-T4-MT allows installation of both incandescent lamps and LEDs. For the latter case, polarity shall be carefully complied with, as indicated aside.

Note: When only 1 muting lamp is used, please connect on the clamps of the other one a 150 ohm > 5W resistor!

Note: the Muting lamp is not supplied with the device. Please refer to "Accessory selection and order information table."

DIMENSIONS

SG-BWS-T4 CONNECTIONS

NOTE : As SG-BWS-T4 has OSSD Safety outputs in order to have relay outputs, the device must have EDM function connected to the CS-ME EDM relay box as represented below:

SIGNAL	CONTACT	CONNECTION
VCC	1	External 24Vdc
START/TEST/RESET	2	- Contact NC towards 24Vdc
EDM ENABLE	3	- 24Vdc > EDM DEACTIVATED - Not connected > EDM activated
EDM	4	- NC contact of external relays towards 24Vdc (with EDM activated) - Not connected > with EDM deactivated
0V	5	External 0Vdc
MAN/AUTO	6	- OSSD1 (7) > AUTOMATIC RESTART - OSSD2 (8) > MANUAL RESTART
OSSD1	7	Reel of external relay 1 (positive)
OSSD2	8	Reel of external relay 2 (positive)
RX1	9	PNP output of receiver photocell 1 (black)
RX2	10	PNP output of receiver photocell 2 (black)
RX3	11	PNP output of receiver photocell 3 (black)
RX4	12	PNP output of receiver photocell 4 (black)
TX1	13	TEST of emitter photocell 1 (black)
TX2	14	TEST of emitter photocell 2 (black)
TX3	15	TEST of emitter photocell 3 (black)
TX4	16	TEST of emitter photocell 4 (black)

SG-BWS-T4-MT CONNECTIONS

SIGNAL	CLAMP	CONNECTION	FUNCTION
VDC	1	External 24Vdc	Power supply
START	2	NO contact towards 24Vdc	Reset function
TEST/RESET	3	NC contact towards 24Vdc	Test/Reset function
EDM	4	- NC contact of external relays towards 24Vdc (with EDM activated) - NOT CONNECTED (with EDM deactivated)	Input EDM
0V	5	0Vdc external	Power supply
MUTEN A	6	NO contact towards 24Vdc	Muting activation

SX-F/G-SG-ST SERIES

The emitter-receiver photocells of the **Sx-F/G-SG-ST** series have been homologated to function with the control units of the SG-BWS series that together form a safety system respectively of **Type 2** and **Type 4** conforming with the **EN 954-1** and **EN ISO 13849-1** Standards.

The photocells are available in the **M18 tubular plastic** format with infrared emission of the **S5** series for distances reaching **8m**, M18 plastic tubular format with laser emission of the **SL5** series with operating range reaching **40m**, and MAXI format with infrared emission of the new **S300** series with operating range reaching a respectively 50m for Type 2 and 40m for Type 4 models. Together with S300 standard models **DEFOGGING MODELS** with heated front glass are available for applications where sudden changes of the temperature in the nearby of the sensor are causing condensation.

All models are equipped with **M12 4-pole connector**: no cable or terminal block models are available. LEDs signal both the operating status and correct alignment of the safety photocells.

HIGHLIGHTS

- Emitter-receiver photocells with test input
- Type 2 and Type 4 models
- Plastic tubular and MAXI
- Photocells with standard M12 connectors
- IR emission models for distances reaching 8m, 40m, 50m
- Class 1 laser emission models for distances reaching 40m

APPLICATIONS

Extreme reliability and simplicity make the SX-F/G-SG-ST together with SG-BWS control units the ideal solution for the following applications:

- Automatic warehouses
- Machines for food packaging
- Robots
- Automatic assembling lines
- Machines for PCB production

SAFEASY™ ACCESSORIES

The accessory range for the **SAFEasy™** SE and SF2 safety light curtain series includes a complete offer of complementary parts for the installation and use of safety devices in plants and machinery. The deviating mirrors of the **SE-DM** series, useful to protect different sides of a machine, are available in different heights ranging from 150 mm to 1800 mm. The column and floor stands of safety light curtains and deviating mirrors of the **SE-S** series are available with heights ranging from 800 mm to 1800 mm. The protective stands of the **SE-P** series, ideal to guarantee device protection against shocks, also available in different heights ranging from 273 mm to 1743 mm. The laser pointer of the **SE-LP** series represents a valid support for the alignment and installation of the SE safety light curtain series, in particular for applications with long operating distances and / or using deviating mirrors. The **SE-SR2** safety relay guarantees the correct connection of the **SAFEasy™** safety light curtain series to machine stopping circuits. The series also includes Muting accessories: Muting signalling lamps of the **LMS** series and **SE-SRT** Muting connection box. The shielded cables of the **CV** series are available both in the standard axial version as well as in the 90° version; the latter particularly useful in applications that have reduced space. The fixing brackets, orientable, anti-vibration and anti-scratch supports of the **ST-K** series and the **TP** test pieces complete the offer.

HIGHLIGHTS

- Complete range of accessories for **SAFEasy™** safety light curtains
- Deviating mirrors, fixing brackets and supports, protective stands
- Muting accessories: signalling lamps and Muting connection box
- Type 4 safety relays

APPLICATIONS

Safety accessories series are suitable for all the application where Datalogic Automation safety light curtains are used to protect dangerous part of automatic machine.

DEVIATING MIRRORS - SE-DM SERIES

The column and floor stands of the **SE-S** series, as well as being suitable for the **SAFEasy™** - SE safety light curtain series, can be used also with the SF2 safety light curtain series and deviating mirrors of the SE-DM series.

VERSION	L (mm)

 45 x 45 mm profile dimensions for 1500 and 1800 mm

SAFETY RELAYS - SE-SR2 SERIES

The drawings show the connection between SAFEasy™ safety light curtains and the type 4 safety relay of the SE-SR2 series operating in Automatic Start (left side) and Manual Start with monitoring (right side).

TEST PIECES - TP SERIES

The test pieces of the TP series allow to verify if the resolution of the SAFEasy™ safety light curtains is guaranteed inside the entire detection field. Models with Ø 14, 20, 30, 35, 40, 50 and 90 mm are available.

FIXING BRACKETS - ST-K SERIES

The **ST-KSTD** model represents the spare part kit composed of 4 standard fixing brackets for SE safety light curtains.

The **ST-K*OR** supports allow the orientation of the SE safety light curtains of $\pm 5^\circ$.

The **ST-K*AV** supports allow the absorption of the vibrations caused by the machinery where the SE safety light curtains are installed.

The **ST-KSF2STD** model represents the spare part kit composed of 12 standard fixing brackets for SF2 safety light curtains.

The **ST-KSF2** model represents the anti-scratch brackets (kit composed of 4 brackets) for SF2 safety light curtains.

The **ST-KP*MP** model represents the plastic fixing brackets for the SE safety light curtains.

CS ME SERIES

This **compact relay box** is the ideal solution able to guarantee a cost advantage respect to using a double-channel Type 2 or Type 4 safety relay. The box **can be used with all the safety light curtains of the SG and SE series that have the EDM function** (External Device Monitoring, i.e. the control of the external counter status). It represents an efficient alternative to using a couple of force-guided relays. The front terminal blocks and DIN rail mounting guarantee extremely fast installation and cabling ease.

HIGHLIGHTS

- Module for Type 2 and Type 4 electrical light curtains
- 2 inputs for OSSD
- Output contacts: 3 NO safety contact and 1 NC feedback/EDM contact
- Standard terminal block for channel cabling

CONNECTIONS

Example of connecting the EDM module to the SE and SG series of safety light curtains with EDM function.

TECHNICAL DATA

HOUSING	Material:	Polyamide PA 6.6 class V0 (UL94)
	Protection degree:	IP40 (housing) IP20 (terminal block)
	Dimensions (L x H x D):	111.5 x 99.0 x 22.5mm
	Cable cross section:	0.2 ... 2.5mm ² 24 ... 12AWG
	Terminal driving torque:	0.5 ... 0.6Nm
GENERAL FEATURES	Safety category:	up to category 4 according to EN 954-1 (dependent from the base module)
	Ambient temperature:	-25 ... + 55°C
	Mechanical endurance:	> 10 millions operations
	Electrical endurance:	> 100.000 operations
	Pollution degree:	outside 3, inside 2
	Pulse withstand voltage (U _{imp}):	2.5KV
	Rated insulation voltage:	250V
	Over-voltage category:	II
	Insulation type:	basic insulation
Weight:	0.2Kg	
POWER SUPPLY	Rated operating voltage (U _n):	24Vdc*
	Max residual ripple in DC:	10%
	Supply voltage tolerance:	±20% di U _n
	Rated power consumption DC:	< 2W*
	Start power consumption:	< 3W control circuit
CONTROL CIRCUIT	Operating time t _A :	40ms
	Releasing time on de-energisation t _{R1} :	15ms + output circuit
OUTPUT CIRCUIT	Output contacts:	3 NO safety contacts
		1 NC feedback contact
	Contact type:	forced guided contacts
	Contacts material:	Silver alloy, gold plated
	Max. switching voltage:	230 */240Vac; 300Vdc
	Max. switching current per contact:	6A*
	Simultaneous currents sum of 3 outputs:	≤ 12A
	Conventional free air thermal current:	6A
	Contacts resistance:	≤100mW
	Protection fuse outside:	6A*
	Max. switching capacity:	1380 A/W
Utilization category (EN 60947-5-1):	AC15, U _e = 230V, I _e = 3 A DC13, U _e = 24V, I _e = 6 A (6 operations/minute)	
Utilization category (UL508):	C300	
STANDARD CONFORMITY	Standard conformity:	EN 60204-1, EN 954, EN 999, EN 1037, EN ISO 12100-1, EN ISO 12100-2, EN 418, EN 60529, EN 61000-6-2, EN 61000-6-3, EN 62326-1, EN 60664-1, EN 60947-1, UL 508, CSA C22.2 n°14-95
	Directory conformity:	2006/95/EC, 2006/42/EC, 2004/108/EC
	Clearance and creepage distances:	according to EN 60947-1
	Approvals:	UL file n° E131787

* Data type approved by UL conforms to the standard UL 508 (file E131787)
Notes (data type approved by UL):
- Use 60° or 75 °C copper (Cu) conductor and wire size No. 30-12 AWG.
- The terminal tightening torque of 5-7 Lb-In.
- Only for 24 VAC/DC version, supply from remote class 2 source or limited voltage and limited energy.

The company endeavours to continuously improve and renew its products; for this reason the technical data and contents of this catalogue may undergo variations without prior notice. For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

SG-DM SERIES

Accessory deviating mirrors of SG-DM series can be used with all DATALOGIC AUTOMATION SF2, SE, SG2, SG4, SG BODY safety light curtain series and with Sx-F/G-SG-ST safety photocell series. Available in different lengths starting from **150mm (single mirrors for mono and multibeam applications) and reaching 1900mm**, making them ideal for classical perimeter protection. The **SG-DM** deviating mirrors can be mounted in a "stand alone" configuration directly on the machine or inside SG-PS protective stand series. Mirror mounting can be performed through dedicated accessory mounting kits: **ST-PS-DM** for protective stands mounting and **ST-DM** for "stand alone" mounting.

SAFETY

HIGHLIGHTS

- Suitable for all models SF2, SE, SG2, SG4, SG BODY safety light curtains series and Sx-F/G-SG-ST safety photocells series
- Suitable for stand alone mounting on the machines or inside protective stands SG-PS series
- Sturdy aluminum profile
- 80mm width

APPLICATIONS

Thanks to its extremely easy mounting, the SG-DM deviating mirrors are particularly suitable for all the applications that require the protection of more than one side of a machine.

DIMENSIONS

Overall dimensions of 150 model

Overall dimensions of models from 600 to 1900

Model	L1 [mm]	L2 (mm)	L3 (mm)
SG-DM 600	545	376	580
SG-DM 900	845	676	880
SG-DM 1200	1145	976	1180
SG-DM 1650	1595	1426	1630
SG-DM 1900	1845	1676	1880

Note: the SG-DM coupler with the Protective Stand overall dimensions are available in the dedicated user manual.

SG-IP69K SERIES

The **SG-IP69K** accessory, is a PMMA acrylic tube used to protect and seal the safety light curtains of **SG2**, **SG4** and **SG BODY COMPACT** series. Thanks to SGIP69K accessory the IP protection of the safety light curtain is increased from **IP65** to **IP67**, **IP68** and **IP69K**.

The **Gore-Tex membrane** on the caps prevents water or dirt entering as well as internal condensation. The connection cable for the light curtain is protected and kept in its place by a M16 metric chock that prevents the entry of water or dirt.

SAFETY

HIGHLIGHTS

- Guarantees IP67, IP68 and IP69K mechanical protection
- Acrylic tubular PMMA housing
- Available for all models of the different heights of the SG2, SG4 (150 – 1800 mm) and SG BODY Compact (2, 3 and 4 beams) series
- Does not compromise the performance of the light curtain in terms of alignment
- Do not change the EAA value

APPLICATIONS

The SG-IP69K accessory is particularly used where high levels of humidity and temperature are present and machines or equipments are frequently washed with hot water (up to 80°C) at high pressure (up to 100 bar s) and / or cleaned with detergents. SG-IP69K is particularly suitable for FOOD industry applications:

- beverage production
- meat slaughter
- sausage production
- milk / cheese industry

Two stainless steel rotating brackets, to be mounted on the product caps, are supplied and guarantee quick and easy installation. The PMMA Acrylic tube, thanks to its mechanical characteristics, avoids the deterioration of the light curtain's Effective Aperture Angle (EAA) guaranteeing the alignment ease.

SG-LS SERIES

The **LENS SHIELD** accessory for safety light curtains, composed of a PMMA Altuglas plate that can be mounted on the front glass of the safety light, ensures an effective protection against dust, chips and incandescent drops, deriving from material working near the safety light curtain.

Thanks to the unique profile, available in different lengths, the accessory **suits all the models of the SG2, SG4 and SE series.**

The accessory can be easily installed thanks to the fixing brackets supplied in the package that exploit the side groove of the safety light curtain. It can also be quickly replaced when the glass is damaged.

HIGHLIGHTS

- PMMA Altuglas 3mm plate
- Protects front glass of the light curtain from dust, chips and incandescent drops
- One profile available in different lengths ideal for all models of the SG2, SG4 and SE series (150–1800mm)
- Doesn't leave glue deposits or other residual material on the light curtain

APPLICATIONS

The SG-LS accessory is particularly suitable in working areas characterized by chips or incandescent drops deriving from material working or welding such as:

- Punching machines
- Milling machines
- Welding machines

Five plates are supplied in the package that supply adequate replacements even in presence of extremely high wear.

TECHNICAL DATA

Protected height*:	150..1800mm
	2, 3, 4 beams
Housing material:	PMMA Altuglas
Thickness	3 mm
Reduction factor of the op.distance*:	10 % for each Lens Shield installed

* technical data referred to safety light curtain where the accessory is mounted

SG-LP SERIES

Thanks to its completely new housing and fixing system **SG-LP laser pointer** can be installed in all safety light curtains profiles of **SE, SG2, SG4-B and SG Body series**. Exactly as the previous model SE-LP, the **installation is performed through one of two lateral grooves**; but, thanks to a specially designed CAMME fixing equipment the laser pointer can be inserted into the groove either from the top or from the side, depending on which kind of fixing brackets have been used to mount the safety light curtain (standard "L" or TOP-BOTTOM Rotating ones). One top and one lateral fixing brackets, together with two tightening knobs allow to adjust SG-LP laser pointer's position in both transversal and longitudinal directions and to have it constantly centred respect light curtain's optical axis, independently from housing width.

HIGHLIGHTS

- To be used to help the mechanical alignment of TX and RX unit of safety light curtain;
- Suitable for all SE, SG2, SG4-B and SG Body profiles;
- Installation performed through one of two lateral grooves of the safety light curtain housing;
- Insertion into the groove either from the top or from the side, depending on which kind of fixing brackets have been used;
- Double adjustment, transversal and longitudinal directions, thanks to one top and one lateral fixing brackets, together with two tightening knobs.

APPLICATIONS

SG-LP laser pointer is advised to be used to ease TX and RX mechanical alignment process in the following installation conditions:

- Multi-beam body/access protection safety light curtain;
- Multi-beam body/access protection safety light curtain installed with deviating mirrors to perform perimetric protections;
- Finger or hand protection safety light curtains installed with deviating mirrors to protect different sides of a machine.

SAFETY PRECAUTIONS

The SG-LP laser pointer uses a red laser light beam that can be potentially dangerous to the human eye.

LASER RADIATION	P = ≤ 1 mW
DO NOT STARE INTO BEAM	λ = 640...660 nm
CLASS 2 LASER PRODUCT

SG-PSB AND SG-PSM SERIES

The new **SG-PSB** and **SG-PSM** series are studied to improve the previous series SG-PS and to be used with all SG2, SG4, SG BODY BIG, SG BODY REFLECTOR and SG BODY COMPACT safety light curtains for finger, hand and body protection and access control.

Two complete new series are now available :

- **SG-PSB** version represents the natural replacement of SG-PS. SG – PSB is a protective aluminium profile mounted on a steel base made by two plates. Five different models with heights from 600mm to 1900mm are available.
- **SG-PSM** version is completely new and integrates into SG-PSB single mirrors for typical body or access perimeter protection. Four different models for 2, 3, 4 beams body protection 500, 800, 900 and 1200 mm controlled height whose mirrors are positioned according to EN-999 standard.

SG-PSB and **SG-PSM** series drastically reduce the overall plant costs thanks to their extremely installation easiness.

HIGHLIGHTS

- Safety light curtains protection against shocks and collisions
- Available for all SE, SG2, SG4-B, SG BODY and SG BODY REFLECTOR series
- Models for barriers and with integrated deviating single mirrors
- Suitable for mounting stand-alone full-length mirrors inside
- Single base with 2 disks for flatness regulation and angular adjustment
- Upper plate's grooves positioned at most common angles (30, 45, 60, 90 degrees)
- Spherical level ball
- Additional accessory kit of squared plate together with 3 load springs
- Double rear groove for mounting additional external muting sensor

TYPICAL APPLICATIONS

The combination of multiple light beam safety devices or safety light curtains with deflector mirrors is the right solution for perimeter protection. The adjustment of the deflector mirrors mounted in sturdy columns is thereby very straightforward. Here the unhindered access for loading as well as for changing tools and programs is a further advantage over mechanical fencing. The result is an increase in productivity.

TECHNICAL SPECIFICATIONS

SPECIAL FEATURES	SG-PSB	SP-PSM	SG-P
Easy installation, quick vertical and axial alignment in just a few steps	.	.	
Easy height adjustment of the installed devices	.		
Individual mirrors can be exchanged and separately aligned		.	
Mirror distance according to EN 999 standard		.	
Additional upper plate with grooves positioned at most common angles	.	.	
Flatness regulation through 3 grains and spheric level ball	.	.

SG-PSB AND SAFETY LIGHT CURTAIN CORRESPONDENCE

The following table lists safety light curtain models that can be mounted inside the SG-PSB corresponding ones for typical perimeter protection applications. Fixing brackets column specifies the bracket accessory kit required to install TX or RX unit inside the protective stand.

SG-PSB	CURTAIN	CONTROLLED HEIGHT	FIXING BRACKETS
SG-PSB 600	SE2-35	150÷450 mm	ST-PS4-SG-SE
	SE4-14/20/30/35	150÷450 mm	ST-PS4-SG-SE
	SG2-30/50/90	150÷450 mm	ST-PS4-SG-SE
	SG4-14/30	150÷450 mm	ST-PS4-SG-SE
SG-PSB 1000	SE2-35	600÷750 mm	ST-PS4-SG-SE
	SE4-14/20/30/35	600÷750 mm	ST-PS4-SG-SE
	SE2-P2-050#####	500 mm	ST-PS4-SG-SE
	SE4-P2-050#####	500 mm	ST-PS4-SG-SE
	SE4-Q2-050#####	500 mm	ST-PS4-SG-SE
	SG2-30/50/90	600÷750 mm	ST-PS4-SG-SE

MODEL SELECTION AND ORDER INFORMATION

MODEL	DESCRIPTION	ORDER N°
SG-PSB 600	SG-PSB 600 PROTECTIVE STAND H=600mm	95ASE2240
SG-PSB 1000	SG-PSB 1000 PROTECTIVE STAND H=1000mm	95ASE2250
SG-PSB 1200	SG-PSB 1200 PROTECTIVE STAND H=1200mm	95ASE2260
SG-PSB 1650	SG-PSB 1650 PROTECTIVE STAND H=1650mm	95ASE2270
SG-PSB 1900	SG-PSB 1900 PROTECTIVE STAND H=1900mm	95ASE2280
SG-PSM-2-500	SG-PSM-2-500 PROT STANDS 2 MIRRORS H500	95ASE2300
SG-PSM-3-800	SG-PSM-3-800 PROT STANDS 3 MIRRORS H800	95ASE2310
SG-PSM-4-900	SG-PSM-4-900 PROT STANDS 4 MIRRORS H900	95ASE2320
SG-PSM-4-1200	SG-PSM-4-1200 PROT STANDS 4 MIRRORS H1200	95ASE2330

NOTE: Each SG-PSB model contains what is necessary to protect a single unit (TX or RX). To protect both TX and RX, two pieces of the same part number are needed.

ACCESSORY SELECTION AND ORDER INFORMATION

MODEL	DESCRIPTION	ORDER N°
SG-P	SG-P PLATE KIT FOR PROTECTIVE STANDS	95ASE2290
ST-PS4-SG BODY	ST-PS4-SG BODY 4PCS PROTECTIVE STANDS MOUNTING KIT SG BODY BIG	95ASE1730
ST-PS6-SG BODY	ST-PS6-SG BODY 6PCS PROTECTIVE STANDS MOUNTING KIT SG BODY BIG	95ASE1740
ST-PS4-SG-SE	ST-PS4-SG-SE 4PCS PROTECTIVE STANDS MOUNTING KIT SG2/SG4/SE2/SE4	95ASE1750
ST-PS6-SG-SE	ST-PS6-SG-SE 6PCS PROTECTIVE STANDS MOUNTING KIT SG2/SG4/SE2/SE4	95ASE1760
ST-PS-DM	ST-PS-DM 4PCS PROTECTIVE STANDS MOUNTING KIT DEVIATING MIRRORS	95ASE1770

NOTE: Inside the SG-PSB profile many different safety light curtain models can be mounted; for that reason 5 different accessory fixing bracket kits are available. According to the barrier supposed to be installed into the SG-PSB customer has to order the corresponding kit.

The company endeavours to continuously improve and renew its products; for this reason the technical data and contents of this catalogue may undergo variations without prior notice. For correct installation and use, the company can guarantee only the data indicated in the instruction manual supplied with the products.

SG-SRT

The new **SG-SRT** evolves and improves SE-SRT connection box. Based on Datalogic CBX800 GATEWAY housing SG-SRT is developed to fit the advanced functionalities of new SG BODY BIG, SG BODY REFLECTOR and SG BODY COMPACT safety light curtains guaranteeing easy installation, connection, configuration and use. SG-SRT is then provided in 2 different models :

- **SG-SRT-1** version represents the natural replacement of SE-SRT.
- **SG-SRT-2** is especially designed to work together with new SG BODY BIG and SG BODY REFLECTOR series exploiting their full functionalities.

HIGHLIGHTS

- CBX800 housing
- TOTAL COMPATIBILITY WITH SE-SRT
- Two models: SG-SRT-1 and SG-SRT-2
- Fairlead for passage of cables towards the machine
- Two Integrated FORCE GUIDED SAFETY RELAYS : 2 NO contact available on each relay
- Configuration performed setting the various jumpers and connectors on the same PCB

FUNCTIONING

The SG-SRT connection boxes allow you to directly manage, without further action, the following functions according to the typical operation of the connected Safety Barrier model:

FUNCTION	THROUGH
TEST	TEST/START Push button
RESTART	TEST/START Push button
RESET	TEST/START Push button
EDM internal	Internal Selector
EDM external actuators	Internal Selector
OVERRIDE	Key Selector
MUTING STATE	Integrated Lamp (SG-SRT-2 only)

Please refer to the Safety Barrier Manuals for all information regarding connections, operations and options for the functions listed above.

OUTPUT RELAY BEHAVIOUR

The boxes use 2 safety guided relay contacts. These relays are specified by the manufacturer for higher voltages and currents as indicated by the technical data. However, to ensure correct isolation and prevent premature damage for age drift, you need to protect each output line using a delayed 6A fuse and verify that the load characteristics comply with the instructions below:

Max. switchable voltage: 250 Vac

Max. switchable current: 2 A
