

Disposable Cup System

BETTER FLUID FLOW FOR GREAT COLOR MATCH

The DeKups liner features high collapsibility, so all the paint is moved through the gun and onto the job. Save time and money, increase productivity, and waste less paint.

POSITIVE LOCKING LID

The reusable DeKups lid locks firmly into place and will not come detached from the gun while in use. No messy accidents.

REFILL WITHOUT OPENING THE CUP LID

Patented self-venting funnels allow a painter to refill without opening the cup lid. No mess on the bench during the refill process saves clean-up time, wasted paint, and money.

SELF-DISPENSING PACKAGING

The versatile dispensers mount conveniently on the wall so you can put them wherever you like. No space restrictions, no need to refill bins. Each cup and lid dispenses separately for less hassle. Save time and space.

LARGER VOLUMES

DeKups offers 9–50 percent more cup volume—which means less refills. With three different cup sizes, you can size the cup to the job, wasting less paint, saving more money.

A wide variety of gravity and siphon adapters available
