Eurotherm – Creating solutions that deliver measurable results

Eurotherm has a reputation for delivering process control and automation solutions that provide our customers with measurable financial advantages of saving time, money and resources. These savings are achieved by providing the solutions that can reduce energy costs, improve plant/process productivity while enhancing the quality of their products.

Started in 1965 by a group of enthusiastic and innovative engineers Eurotherm, now part of the Invensys group of companies, has grown and developed into a global business. We are the first choice supplier of proven innovative and scalable solutions to leading companies in the processing and manufacturing industries.

Eurotherm have established an effective global network of national Eurotherm group companies and approved business partners to provide worldwide customers with direct local access to our services.

With over 40 years of applications knowledge and experience designing, implementing and commissioning solutions for our customers, we have an

understanding of both the requirements and expectations of their own industries.

Eurotherm has earned a reputation for premium quality systems and solutions by offering an extensive and relevant range of integrated engineering capabilities, services and products.

These offerings are subjected to ongoing review and development in direct response to our customers' changing requirements and expectations.

The Eurotherm offering ranges from consultancy for requirement definition to solution and system design, project management and installation, commissioning and training. These services are supported by market leading products ranging from sensors, signal conditioning and indicators, through process and power controllers to graphical paperless data recorders, and integrated process automation equipment.

Our Aspirations

To continue to develop and strengthen our reputation for leadership in innovative solutions – precisely meeting customer requirements and exceeding their expectations in our chosen markets.

To form partnerships with industry leading customers to both sustain and enhance their competitive standing within their own industry.

To work together with our customers to drive cost out of their businesses.

To ensure our approach and outlook enables us to be agile and flexible in our response to the changing needs and demands of our customers.

To be an approachable and friendly team of people, who are open-minded and accessible, prepared to make that extra effort to provide the optimum solution to our customers' requirement.

Our Vision

“Eurotherm will be the leading supplier of automation solutions and services in our chosen markets, harnessing the passion that people feel for Eurotherm.

We will constantly search for competitive advantage and innovation to create value for our employees, customers and shareholders”
