A Tomkins Company

The World Runs on Gates.

Gates is the global leader in timing belt innovation. Gates global network of technical research and development centers work with virtually every Original Equipment Manufacturer worldwide to build timing belts for new vehicles as they're being designed. It is this strong Original Equipment (OE) relationship that enables us to develop timing system products for the Aftermarket that meet or exceed OE performance specifications.

Install the original. Install Gates.

OE Supplier To:

- Acura
- Alfa Romeo
- Audi
- BMW
- Buick
- Cadillac
- Chevrolet
- Chrysler
- Citroën
- Daewoo

- Volkswagen
- Volvo
- And More

UNITTA is Gates in Asia

Gates Unitta Asia Company conducts business throughout all Asian countries and is an OE parts supplier to vehicle manufacturers as well as the Automotive Aftermarket. This global network of design, development and manufacturing capabilities is unmatched by any competitor for both OE and Aftermarket products.

No One Comes Close to Gates.

CATALOG NO.	431-2020
EDITION	2010
SUPERSEDES	431-2020 (2008)

Today, Gates is the world's largest manufacturer of Timing Belts and Timing Component Kits (TCKs). Import or Domestic, if there is a car in the U.S. with a timing belt in it, we have the replacement part for it. As the OE or OES supplier for virtually every vehicle manufacturer worldwide, you can be confident every time you install Gates. Restore your customers' drive system to factory original condition with Gates Timing Belts and Timing Component Kits.

Timing Belts

Gates timing belts are OE-equivalent or better in service life and performance.

- Aramid reinforced nylon jackets and back side jackets for longer wear.
- High grade HNBR rubber for superior heat and contamination resistance.
- Premium high strength tensile members.
- Unlike some competitors, Gates does not substitute inferior belt constructions for premium constructions specified by the OEM on any application.
- Most extensive coverage in the industry. Import or Domestic.

Timing Component Kits

Why take a chance? With Gates TCKs, you can avoid warranties and comebacks by replacing all critical system components at the same time.

- Popular kits covering over 33 million import applications include actual Original Equipment Tensioners and Idlers.
- Total solution for any application, including Belts, Idler(s), Tensioniers and supporting hardware with detailed installation instruction.
- Great convenience. Ease of part sourcing. Reduced customer comebacks.

Timing Component Kits with Water Pump

Our Timing Component Kits with Water Pump offer the same OE components as our TCKs with the addition of a water pump. Timing belt driven water pumps should always be replaced when the timing belt is replaced.

- Includes a warranty equal to the OE replacement interval.
- Water Pumps are designed and built for long lasting, efficient cooling.
- Hydraulic tensioners included where available.
- Great convenience. Ease of part sourcing. Reduced customer comebacks.

Hydraulic Tensioners

For applications with high loads and/or angular vibrations, where a mechanical automatic tensioner can not provide sufficient damping or tensioner movement.

- 100% OE parts.
- Market-leading application coverage.
- Gates tensioner pin set tool (PN#91010) for securing piston.

PowerGrip® Individual Timing Components

Gates PowerGrip® timing components for those who want to replace individual parts.

- Components include automatic, manual and hydraulic tensioners and idler pulleys.
- Only "OE" components for the most popular and problematic applications.

Warning

Be safe! Do not use Gates belts, pulleys or sprockets on any aircraft propeller or rotor drive systems or in-flight accessory drives. Those Gates products are not designed or intended for aircraft use.

Caution

Use Gates products only on applications specified in Gates literature. Install and maintain products according to the vehicle manufacturers' recommended procedures and with recommended tools. Failure to follow these instructions could result in injury or property damage. Gates disclaims all liability due to failure to follow these instructions.

Limited Warranty for the Life of the Merchandise

Goods are warranted to be free from defects in material or workmanship for the life of the Goods (or the published recommended replacement interval specified by Gates). Gates will replace or repair, at its option, any Goods proved defective in material or workmanship during the warranty period. This is the sole remedy for breach of warranty. Color fade and color difference is not warranted. This warranty is void if the defect is caused by improper installation, use or maintenance of the Goods, or used for racing or competition. Goods are not warranted to comply with laws that may apply to uses of the Goods not stated in related materials, e.g., use in manned or unmanned aviation or life support applications. ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE EXPRESSLY DISCLAIMED. FAILURE TO REPLACE TIMING BELTS OR OTHER GATES PRODUCTS AS SPECIFIED MAY RESULT IN CATASTROPHIC ENGINE OR EQUIPMENT DAMAGE. FOR WHICH GATES DISCLAIMS ALL RESPONSIBILITY, TO THE EXTENT PERMITTED BY APPLICABLE LAW.

This publication contains the latest information available to our engineers. If you require additional application or part number information, contact the Automotive Product Application Tech Line at 303-744-5651.

Accessory Belt Drive System (ABDS)

ABDS System Interaction

The Accessory Belt Drive System (ABDS) is a critical system for both engine performance and passenger comfort. Installation of the Micro-V AT® belt insures peak performance and long life. Other features include:

- Optimum cooling from the fan and water pump
- Surface treatment eliminates belt noise
- Proper charging from the alternator
- Peak performance of the A/C system
- Smooth and dependable power steering
- Protection of component bearings
- Reduces possibility of false OBD error codes

Micro-V AT® belts deliver the longest life, the highest transmission of torque, and the best resistance to adverse engine conditions such as pulley misalignment, oil and grime, and high underhood heat.

There are many good reasons why the Micro-V belt is OE on more vehicle nameplates than any other. So Drive Your Performance — Give your customers what the automakers use: Micro-V AT® belts from Gates.

Components that make up the ABDS system:

- Micro-V AT® Serpentine Belt
- XL® V-Belts
- DriveAlign® Automatic Belt Tensioner
- DriveAlign® Idler Pulleys
- Alternator Decoupler Pulleys
- EuroGrip Drive Couplers

Adjacent Markets

PowerLink® Scooter Belt

Gates not only provides you with the best products for the automotive market but for other markets as well.

Recreational Market

Gates supplies products for the recreational market with brand names such as:

- Xtreme®, Xtreme Recreation® and TrailRunner® belts for all your Snowmobile belt needs.
 - PowerLink® belts for scooter, ATV and Go-Karts
- (See Gates PowerSports catalog for specific applications)

Gates Racing Micro-V® Belt

Racing Performance Products

Whether it's a Sport Compact or late model Muscle Car, Gates manufactures high performance products in the distinctive color blue to keep your performance car on the street.

Look for:

- Timing Belts – 300% stronger
- Micro-V® Belts – Three times the durability
- Hose Kits – Advanced construction hoses for high-temperature
- Silicone Tubing – Versatile high heat tubing

Go to www.gatesracing.com for additional information.

BladeRunner® Belt

Agricultural & Lawn and Garden Market

Replacement belts for agricultural and lawn & garden equipment that will keep your machinery up and running:

For applications see the Grounds Maintenance Catalog (431-2061).

1 out of 5 vehicles on the road needs a new belt.

Make sure you're the one who installs it.

Belt Wear Gauge

Unique tool designed to help inspect serpentine belts for wear. EPDM belts, installed by original equipment manufacturers on new equipment, typically do not show obvious signs of wear such as cracking. Like tires, EPDM belts wear out gradually, steadily losing rubber material. Contact your local Gates representative to receive your tool.

(Form No. 443-0375)

Belt Wear and the Accessory Belt Drive System (ABDS)

An important message on Belt Wear and its role in the ABDS!!

New belt vs Worn belt illustration

- Over time, belt ribs lose material, similar to a tire
- With material loss the space between the ribs increases
- The belt can "bottom out" on the pulley, resulting in:
 - accelerated belt wear
 - slip
 - noise
 - hydroplaning
- EPDM, Ethylene Propylene Diene Monomer, belts do NOT show cracks as quickly
- Neoprene belts exhibit cracks as they age. They have a life expectancy of 50-60K miles.

Until all belt manufacturers supply EPDM belts, you will continue to see cracks as a sign of wear on belts!

Neoprene belt with 100,000 miles

EPDM belt with 100,000 miles

**1 out of 5 vehicles on the road needs a new belt.
Make sure you're the one who installs it.**

Belt and Drive Systems

Micro-V AT® Belts

Replacement belt for accessory belt drive systems (ABDS) and other serpentine belt applications. Designed using advanced manufacturing technology and premium EPDM construction to provide customers with superior ABDS and new vehicle type performance.

- Belt of choice by professional technicians, lasting 50%-60% longer than retail belts
- Precision dimension control of rib profile transmits load efficiently throughout the ABDS allowing components to operate at optimum levels
- Able to operate and accept misalignment in the ABDS system far greater than other serpentine belts
- Flexible construction allows the belt to withstand billions of topside and backside bends resulting in long belt life
- Meets or exceeds SAE J1459
(Product Type 8552)

Dual-sided Micro-V® Belts

For replacing original equipment belts on serpentine drives that require a higher degree of efficiency when transmitting power. Designed for small diameter pulleys and for use with (or without) automatic tensioners.

- V-ribbed on both sides of the belt
- Specially designed to resist wear and cracking
- Broad coverage on unique applications
(Product Type 8550)

Micro-V® Stretch Fit® Belts

A replacement belt design using advanced TwistLock™ tensile cord technology produces self tensioning belt capabilities; does not require a tensioner on the drive.

- Found on unique 2-4 point pulley drive applications
- Highly engineered design and OEM technology
- Maintains proper tension throughout belt life
- Special tools may be required for installation on some applications
- www.gates.com/stretchfit

Micro-V® Stretch Fit® Belt Installation Tool

Installation tool for Gates' Micro-V® Stretch Fit® belts. If the right tools are not used, the belt can be damaged.

- Installation instructions printed on inside of each belt sleeve
(Part No. 91030)

Micro-V AT® EMD Belts

Electrical Mechanical Drive (EMD) belt engineered to meet the demands of Electric Assist models (Saturn Aura/Vue and Chevrolet Malibu)

- Enhanced undercord of synthetic fibers for extended belt life
- Manufactured using Gates TwistLock™ aramid cord technology for increased load capacity

XL® V-Belts

Replacement belt for today's most demanding engine drives. Due to thermal forces, this variable notched belt actually tightens on the drive as it gets hot. This results in improved belt performance by reducing tension decay and noise.

- Fiber-loaded rubber stock puts more flexibility along the length of the belt, yet gives the belt greater lateral stability in the pulley.
- Thermally active tensile cords for maintenance-free performance when properly installed and tensioned.
- Form ground to ensure precise top width and sidewall dimensional control for proper fit in pulley as well as a smoother, quieter running belt.
- Meets or exceeds SAE J636c specifications.

(Product Type 8701)

DriveAlign® Automatic Belt Tensioners

Designed for accessory belt drive systems that require an automatic belt tensioner.

- OE specification knowledge ensures proper belt tension, alignment and damping
- Precise machined surfaces and assembly tolerances means no customer returns due to belt noise or belts jumping off the drive
- Patented damping system increases tensioner, belt and accessory component life reducing customer returns due to vibration complaints
- High quality casting process means durability that meets or exceeds OE requirements even under extreme conditions
- Patented labyrinth seal protects internal components to meet or exceed OE life expectancy requirements
- Full line coverage for domestic, import and heavy-duty applications

(Product Type 7808)

DriveAlign® Idler Pulleys

Designed for use on automobiles and light trucks as a locked center tensioning pulley, an automatic belt tensioner pulley or an idler pulley.

- Steel or thermoplastic construction provides high durability for long life
- Bearing meets or exceeds OE and is designed for application specific speed and load requirements
- Reliable operation under severe conditions

Alternator Decoupler Pulleys (ADP)

Gates Alternator Decoupler Pulleys provide vibration isolation within the Accessory Belt Drive System resulting in smoother engine performance and efficiency and increased belt and component life. Line consists of overrunning alternator decoupler pulleys and one way clutches (not interchangeable).

- Exact OE replacement
- Patented design unmatched by any other supplier
- Torsion spring absorbs engine vibration for quieter, smoother ride
- www.gates.com/adp for in-depth information about Gates' ADP line

Belt and Drive Systems

Timing Belts

Gates timing belts are OE-equivalent or better in service life and performance.

- Aramid reinforced nylon jackets and back side jackets for longer wear.
- High grade HNBR rubber for superior heat and contamination resistance.
- Premium high strength tensile members.
- Unlike some competitors, Gates does not substitute inferior belt constructions for premium constructions specified by the OEM on any application.
- Most extensive coverage in the industry. Import or Domestic.
- Gates is the global leader in OE timing belts. "Gates is the OE" for Acura, Alfa Romeo, Audi, BMW, Chrysler, Citroien, Daewoo, Daihatsu, Fiat, Ford, GM, Honda, Hyundai, Infiniti, Isuzu, Jaguar, Kia, lancia, Land Rover, Lexus, Mazda, Mercedes-Benz, Mini, Nissan, Mitsubishi, Opel, Peugeot, Porsche, Range Rover, Renault, Saab, Scion, Skoda, Smart, Subaru, Suzuki, Toyota, Volkswagen, Volvo, and more.

Timing Component Kits

Why take a chance? With Gates TCKs, you can avoid warranties and comebacks by replacing all critical system components at the same time.

- Popular kits covering over 31 million import applications include actual Original Equipment Tensioners and Idlers.
- Total solution for any application, including Belts, Idler(s), Tensioniers and supporting hardware with detailed installation instruction.
- Great convenience. Ease of part sourcing. Reduced customer comebacks.

Timing Component Kits with Water Pump

Our Timing Component Kits with Water Pump offer the same OE components as our TCKs with the addition of a water pump. Timing belt driven water pumps should always be replaced when the timing belt is replaced.

- Includes a warranty equal to the OE replacement interval.
- Water Pumps are designed and built for long lasting, efficient cooling.
- Hydraulic tensioners included where available.
- Great convenience. Ease of part sourcing. Reduced customer comebacks.

Timing Component Kits Plus

The TCK+ kits offers increased confidence when performing timing system service through the addition of OE quality cam and crank seals along with the highest quality timing belt, idlers, and tensioners.

- All the convenience and features of Gates TCK's plus cam and crank shaft oil seals.
- Avoid warranties and comebacks by eliminating oil leaks, a leading cause of timing belt failures.
- Plus kits containing cam and crank shaft oil seals easily identified by the "P" at the end of the part number.

Hydraulic Tensioners

For applications with high loads and/or angular vibrations, where a mechanical automatic tensioner can not provide sufficient damping or tensioner movement.

- 100% OE parts.
- Market-leading application coverage.
- Gates tensioner pin set tool (PN#91010) for securing piston.

PowerGrip Individual Timing Components

Gates PowerGrip timing components for those who want to replace individual parts.

- Components include automatic, manual and hydraulic tensioners and idler pulleys.
- Only "OE" components for the most popular and problematic applications.

Timing Component Kit Oil Seals

Prevent potential timing belt damage by replacing the cam and crank oil seals at the same time as other timing belt components.

- Molded with precise tolerances to provide positive OD sealing.
- Constructed with leading edge sealing materials to perform for extended life.
- OEM equivalent or better.

Belt and Drive Systems

Professional-Grade Tools

Multi-Lock Tool

Multi-Lock tool “locks” twin camshafts in place during timing belt replacement or engine overhaul.

- Fits onto sprockets and extends to hold sprocket teeth. Incorporates “variable pitch” adjustable arms to fit various diameters and tooth pitches.
- Unique design is fully adjustable to fit numerous applications including diesel injector pump sprockets and sprockets that are positioned closely together like those on Mitsubishi or GM EcoTec engines.
- Ratchet locking handle provides compact, strong lever action for secure positioning.
- Also includes extension bar for wider spaced cams (\$25 value).

(Part No. 91009)

Timing Belt Tension Tester

Provides a precise method of testing timing belt tension on a variety of automotive applications.

- Gates tension tester will test any timing belt up to 30mm wide, thus replacing several expensive tools.
- Comes with adapters for varying belt thicknesses.
- Uses force deflection method to measure tension.
- Compact design works in tight engine compartments.
- Scale can be read in any position.

(Part No. 91000)

Hydraulic Tensioner Pin Set

A Gates exclusive that’s a must have for every technician. Hydraulic timing belt tensioners need to be compressed during service. Many technicians use a drill bit or allen wrench to hold tensioners in their compressed state, which can be dangerous and may bend or damage tools.

- Hardened spring steel to hold the strongest tensioners.
- Conveniently mounted on key chain with six different sizes to service a variety of applications.
- Holds certain serpentine belt tensioners and timing chain tensioners in place, during service.

(Part No. 91010)

Heavy-Duty Fleet, Off-Road Equipment and Marine Applications

(See 431-2030 for complete application information)

Green Stripe® Micro-V AT® Belts

Long wearing fiber-loaded stocks with greater load-carrying capacity designed for demanding, heavy-service drives. For replacing original belts on serpentine drives and other heavy-duty V-ribbed belt applications. Approved for Marine Applications.

- Special belt constructions eliminate belt noise, reduce tension loss and solve problem drive applications.
- Extra heavy-duty construction resists cracking and wear.
- Precision ground to assure optimum belt-to-pulley fit.
- Special formation process for precise dimensional control.
- Reinforced with stretch-resistant, thermally active polyester tensile members.
- Meets or exceeds SAE J1459 specifications.

(Product Type 8552)

FleetRunner® Micro-V® Belts

- Belt of choice by fleets, including 3/4 & 1 ton pickups
- Lowest cost per mile
- Consistently outperforms all competitors
- Outstanding crack resistance at extreme temperatures
- Problem solver
- Designed for toughest applications

(Product Type 8555)

FleetRunner® Heavy-Duty V-Belts

Patented EPDM construction with distinct green overcord built specifically for more durability and longer life on heavy duty drives.

- Outperforms the competition on the most troublesome drives
- Special compound provides un-matched flexibility, stability, load carrying capacity, and belt life
- Patented material provides peak performance at extreme prolonged operating temperatures
- Heavy-duty construction resists cracking and wear
- Oil and heat resistant
- Unique undercord notch pattern offers increased flexibility for smaller diameter pulleys
- Available in over 70 sizes

(Product Type 8711)

Belt and Drive Systems

DriveAlign™ Heavy-Duty Automatic Belt Tensioners

The longest lasting belt tensioners in the industry. Engineered to exceed demanding OEM requirements. In laboratory tests, under extreme peak-to-peak vibration and contamination tests, DriveAlign heavy-duty tensioners lasted up to three times longer than competitive aftermarket tensioners.

- Labyrinth Seal – prevents contamination of internal parts for maximum durability and service life
- Machined Steel Pulley – reduces surface wear while shielding internal bearing from outside contaminants
- Double Row Bearings – twin rows of bearings minimize friction for reduced bearing wear and noise
- Optimized Components – engineered for maximum strength and durability
- Patented Design – provides superior belt alignment and tension for improved drive efficiency and life
- Round Spring Wire – includes chrome-silicone torsion spring for less flex-fatigue than flat-wire designs
- Patented Damping Mechanism – provides maximum stability, reducing vibration and increasing the life of belt, tensioner and other accessory drive components.

DriveAlign® Heavy-Duty Idler Pulleys

Long-lasting pulleys built to endure the rigors of today's heavy-duty, fleet and off-road equipment.

- Superior bearings out perform OE Idler Pulleys.
- Robust and high quality pulley materials to withstand contaminants

Green Stripe® XL® V-Belts

Premium quality replacement belts for heavy-duty engines. Approved for Marine Applications.

- Fiber loaded rubber stock puts added flexibility along belt's length, yet affords greater lateral stability.
- Variable notch pattern causes belt to run cooler, quieter and with less bending stress.
- Precision V-forming process assures exact size and angle control.
- High tenacity tensile cords and special layer of reinforcement for long, maintenance-free performance when belt is properly installed and tensioned.
- Meets or exceeds SAE 636 specifications.
- Meets or exceeds RMA standards for static conductivity.

(Product Type 8701)

Green Stripe® Truck and Bus Series V-Belts

Specifically designed for heavy-duty truck, bus and off-road equipment applications. Absorbs normal shock loads without damage to belt.

- Special tensile cords give high stretch resistance.
- Special notch design resists cracking while providing tensile member support during operation.
- Oil and heat-resistant construction throughout.
- Meets SAE J636b and SAE J637 specifications.

(Product Type 8620)

Belt and Drive Systems

Green Stripe® PowerBand® Belts

Designed for problem, heavy-duty, heavily vibrating automotive applications requiring belt sets. Tie-band feature joining belts together ensures stability lacking in ordinary belt sets.

- Even load distribution between strands provides better shock load absorption.
- Belt can't turn over or slip off drive.
- Unique tensile cord design gives belt extra strength, added flexibility and shock-load resistance.
- Molded notches reduce bending stress, especially on small diameter pulleys. Also helps dissipate heat.
- Meets or exceeds SAE J1459 specifications.

(Product Type 8541)

Refrigeration Belts

Gates offers a unique line of heavy-duty construction V-belts ideal for use in truck and trailer refrigeration units. Fits most popular applications.

For application information, see Gates Catalog 31-2030.

Hi-Power® II Belts

Designed to give long, dependable service and superior performance on heavy-duty A, B, C, D and E Section single or multiple V-belt drives.

- Composite multi-purpose construction reduces flex fatigue.
- Superior resistance to oil, heat, ozone, sunlight, weather.
- Meet or exceed RMA standards for static conductivity and oil and heat resistance.
- Superior length stability means less tensioning and takeup during service.
- V80 Gates matching program guarantee.

(Product Type 9002 - 9006)

Tri-Power® Belts

Constructed to provide superior performance on the toughest heavy-duty A, B and C Section industrial drives. Ideal for drives with small diameter sheaves.

- Vextra construction
- Gates matching program guarantee.
- Special molded notch reduces bending stresses, especially on drives with smaller diameter sheaves.
- Tough tensile members for superior resistance to fatigue and shock loads.
- Bandless cut edge for even wedging action and uniform fit.
- Meet or exceed RMA standards tests for static conductivity and heat and oil resistance.

(Product Type 9012 - 9014)

Heavy-Duty Industrial Belts

Super HC® and Super HC® Molded Notch V-Belts

Recommended for use on special drives where space and weight limitations are critical. They can transmit up to three times the horsepower of conventional V-belts in the same drive space. In many cases, they can replace high maintenance chain and gear drives.

- Gates matching program guarantee.
- Sheaves can be smaller in diameter and operate at belt speeds up to 6,500 fpm without dynamic balancing.
- Special material that resists oil, heat, sunlight, ozone, weathering and aging.
- Special tensile cords treated with a material that bonds with the cords and surrounding rubber.
- Meets or exceeds RMA standards for static conductivity and heat and oil resistance.

(Product Type 9332, 9334, 9336, 9412, 9414, 9516))

Industrial Micro-V® Belts (J, L and M Series)

Specially designed to replace original equipment belts on extra heavy applications such as machine tools, compressors, pumping equipment and other industrial equipment requiring V-ribbed belts.

- Exclusive Gates truncated belt design offers increased flexibility, reduced heat buildup permit extra high speeds on smaller diameter sheaves.
- Meets or exceeds RMA standards for static conductivity and heat and oil resistance.
- Runs cooler than conventional belts.

(Product Type 9171, 9173 and 9174)

For complete coverage on Gates Special Application and Grounds Maintenance Equipment belts see Catalog #431-2061. Appliance Owners' Manuals should also be consulted for recommended replacement parts.

BladeRunner® Belts

An aftermarket belt designed and applied to specific unique applications providing exact OEM fit, construction, and performance of leading lawn and garden equipment manufacturers. Built to withstand the rigorous start and stop operation of outdoor power equipment.

- Meets or exceeds the performance of each specific application
- Utilizes aramid cord construction in most cases
- Smooth operation during frequent and severe shock loads
- Reduces costly downtime and labor associated with replacing a belt
- Superior performance over fractional horsepower belts on recommended applications.

PowerRated® V-Belts

PowerRated belts transmit more horse-power than conventional utility belts... up to 17 horsepower. Gives outstanding performance on drives with backside idlers.

- Reinforced with aramid tensile cord, pound for pound stronger than steel.
- Green Flex-Weave® cover resists heat, oil and cracking.
- Superior performance on clutching and backside idler drives.

NOTE: PowerRated® V-Belts can be substituted for equivalent sizes of Truflex® V-Belts.

(Product Type 8423)

NOTE PowerRated® belts do not meet RMA requirements for static conductivity.

Special Application Belts

Truflex® V-Belts

Recommended for lower horsepower lawn and garden equipment, heating and home air conditioning drives, light-duty appliances, shop and miscellaneous fractional horsepower applications.

- “Universal Construction” features cord placement that combines with oil and heat-resistant Flex-Weave® cover to provide smooth, quiet operation with reduced vibration.
- Concave sides fill out to make even contact with the sides of the sheave grooves to distribute wear uniformly.
- Oil and heat resistant. Also resists ozone, weather and many chemicals and detergents.
- Meets or exceeds RMA standards for static conductivity.

NOTE: Do not use on clutching drives and applications where PowerRated belts are recommended.
(Product Type 8400)

POWERLINK® Belts

Gates POWERLINK® drive belts are specially designed for a variety of motorized Continuous Variable Transmission (CVT) applications including street legal step-through scooters, ATVs and Go-Karts. POWERLINK® belts are available in two types:

- Conventional Belt offers OE-equivalent performance and durability
- Premium Belt provides longer durability for high performance applications

(Product Type 9807 & 9808)

Trail Runner® Snowmobile Belts

Built for lower horsepower entry-level or touring sleds, or riders with moderate demands. Outlasts ordinary snowmobile belts.

- Quality materials coupled with high-tech design provide long life and dependability.
- Peak clutch efficiency.

(Product Type 9836)

For complete application data, see Gates Catalog 431-2070.

Xtreme® High Performance Snowmobile Belts

Designed to meet the toughest rider demands and hyper sled action. Offers better fit and flexibility using advanced composite technology.

- Aramid cords for unsurpassed strength and flexibility.
- Gives top performance even at -30°F (-34°C).
- Maximum clutch efficiency.
- Extra long life and dependability in deep powder or hard pack conditions.

(Product Type 9839)

For complete application data, see Gates Catalog 431-2070.

Xtreme® Recreation Belts

The Xtreme Recreation belt offers the advantage of a performance-oriented belt, along with the drop-in ease of a replacement product that requires no clutch re-calibration. Truly the blending of “both worlds”, Xtreme Recreation belts will satisfy the needs of all but the most aggressive rider.

- Double-cog design to dissipate heat faster and increase belt life
- Greater flexibility cuts energy loss allowing more horsepower
- Thicker cross-section means more surface contact, resulting in less slippage for quicker acceleration

(Product type 7913)

Coolant Hose and Systems

Hose Shelf Life

Storage environment, along with rubber materials can vary the shelf life limit. Shelf life is difficult to quantify as many variables affect the hose. **Proper storage precautions can result in three to five years shelf life.** Beyond this time there can be a significant service life decrease, depending on storage environment variables. Some variables include:

Hose should be stored in a cool, dry area never exceeding +100°F (+38°C). If stored below freezing, pre-warming may be required prior to handling, testing and placing into service. Store hose in original container. Never stack hose too high, as its weight can crush hose at the bottom of the stack. Gates recommends hose in extended storage be visually inspected and tested prior to use. Hose judged marginal should be replaced to avoid potential failure, property damage or bodily injury. Store hose on a first-in/ first-out basis. Unusually long storage, or poor storage environment can deteriorate hose, reduce performance and may lead to premature failure.

Molded Coolant Hose

Factory molded to fit specific applications. Similar to OEM specifications. Approved for marine applications.

- Recommended for upper, lower, by-pass, heater and other coolant hose applications.
- Heat and ozone resistant cover.
- **Engineered to resist electrochemical degradation – the leading cause of hose failure.**
- Re-engineered materials resist vacuum collapse. This reduces the need for internal springs in many applications.
- Meets SAE 20R4 and 20R3 Type EC Class D-1 and D-2 specifications.

Temperature Rating: -40°F to 275°F (-40°C to 135°C) in coolant hose applications

NOTE: Gates recommends replacing standard worm drive and spring loaded clamps with PowerGrip® SB clamps each time a new coolant hose is installed.

CAUTION: Do not use for fuel or oil transfer applications.

(Product Type 4261)

For sizes and configurations, see Gates 431-2040 Competitive Number I.D. Guide.

Coolant Hose and Systems

Branched Radiator Hose

Molded to fit specific applications. Factory quality connections are durable, and eliminate coolant leaks.

- **Engineered to resist electrochemical degradation – the leading cause of hose failure.**
- Heat & ozone resistant cover
- Meets SAE 20R4 and 20R3 Type EC Class D-1 and D-2 specifications.

Temperature Rating: -40°F to +275°F (-40°C to +135°C) in coolant hose applications.

NOTE: Gates recommends replacing standard worm drive and spring loaded clamps with PowerGrip SB Clamps each time a new coolant hose is installed.

CAUTION: Do not use for fuel or oil transfer applications

(Product Type 4294)

Small Inside Diameter Molded Coolant Hose

Specially designed, OEM style factory-molded hose to fit today's smaller, tighter-fitting engine compartments. Can be used for coolant, water and air applications. Approved for marine applications.

- Similar to OEM specifications.
- Has all the quality features of Gates molded coolant hose.
- **Engineered to resist electrochemical degradation – the leading cause of hose failure.**
- Inside diameters range from 1/4" to 1".
- Meets SAE 20R3 Type EC Class D-1 and D-2 specifications.

Temperature rating: -40°F to 275°F (-40°C -135°C) in coolant hose applications.

NOTE: Gates recommends replacing standard worm drive and spring loaded clamps with PowerGrip SB clamps each time a new coolant hose is installed.

CAUTION: Do not use for fuel or oil transfer applications.

(Product Type 4257)

Coolant Hose and Systems

Vulco-Flex® II Coolant Hose

Gates Vulco-Flex II hose will bend in almost any direction. It easily replicates the angles and planes of a wide variety of expensive original equipment coolant hose, for quick, easy, replacement.

- Improved sealing surface for greater leak resistance and increased flexibility for easier installation
- Heat and ozone resistant cover
- Rated for SAE 20R5 Class D-2 performance
- High temperature rating up to +257°F(+125°C)

NOTE: Gates recommends replacing clamps each time a new coolant hose is installed.

CAUTION: Do not use for fuel or oil transfer applications. (Product Type 4254)

Green Stripe® Straight Coolant Hose

Stick hose designed for demanding heavy-duty coolant/air applications. Approved for Marine Applications.

- Two-ply bias fabric construction to maximize flexibility and strength.
- Resists "cold water leaks" thanks to advanced EPDM tube and cover that stay soft and pliable, even under adverse operating conditions.
- Reduces water loss from water permeating the hose wall and cover, a distinct advantage over silicone.
- Exceeds SAE 20R1 Type EC (Class D-1 Tube, and cover, Standard Wall).
- Cover marked in one-inch increments to facilitate approximate cut lengths. Allows "custom-fit" installations.

Engineered to resist electrochemical degradation – the leading cause of hose failure.

CAUTION: Do not use for fuel or oil transfer applications.

NOTE: For a maintenance free connection, use PowerGrip® SB Clamps.

Temperature rating: -40°F to +257°F (-40°C to +125°C).

Packaging: 3 ft. lengths. (Product Type 4168)

Coolant Hose and Systems

Green Stripe® 4-Ply Coolant Hose

For severe operating conditions found on stationary engines, construction equipment and off-road vehicle applications. Nitrile tube specially compounded to handle common coolants and additives.

- Four ply woven, heavy-duty fabric reinforcement
- Neoprene cover resists heat, abrasion and oil.
- Handles higher temperatures and resists petroleum additives.
- Exceeds SAE 20R1 (Class B Tube, Class C Cover, Heavy Wall).
- Reduces water loss from water permeating the hose wall and cover, a distinct advantage over silicone.
- **Engineered to resist electrochemical degradation – the leading cause of hose failure.**

CAUTION: Do not use for gasoline or diesel transfer applications.

Maximum constant working temperature: -40°F to +212°F (-40°C to +100°C), intermittent to 257°F (125°C)

Packaging: 3 ft. lengths, 1 each. (Product Type 4179G)

Vulco Straight Coolant Hose

Specially engineered stick hose is ideal for straight coolant/air connections in automotive, stationary engine, industrial and home applications.

- Heat-resistant cover.
- Meets SAE 20R1 Standard Wall Class D-2 requirements.
- Cover marked in one-inch increments for easy measuring and cutting... allows "custom fit" light-duty coolant installations.

Temperature rating: -40°F to 257°F (-40°C to 125°C)

Packaging: 3 ft. lengths.

CAUTION: Do not use for fuel or oil transfer applications.

Coolant Hose and Systems

Green Stripe® Vulco-Flex® Coolant Hose

Heavy-duty flexible hose designed to replace straight or curved coolant hoses. The benefit is maximum coverage with minimum inventory. Hose inside diameter remains constant from end to end. No convolutions inside hose so tube is smooth, allowing free coolant flow. Approved for Marine Applications.

- Excellent flexibility, yet collapse and kink resistant.
- Extra strength fabric reinforcement with helical steel wire spiral molded between tube and cover.
- Heat resistant construction throughout.
- EPDM tube and neoprene cover for extended service life.
- Performs to SAE 20R5 Type EC Class D-2 specifications.
- **Engineered to resist electrochemical degradation – the leading cause of hose failure.**

Temperature rating: -40°F to +257°F (-40°C to +125°C)

Working pressure 40 psi maximum.

Packaging: 5 per carton.

CAUTION: Do not use for fuel or oil transfer applications.

(Product Type 4284)

Coolant Hose and Systems

Wire-Inserted Green Stripe® Coolant Hose

Provides the ability to replace many sizes of tailor-made curved hoses. Results in maximum coverage with minimum inventory. Approved for Marine Applications.

- Heavy-duty fabric reinforcement with helical carbon steel wire.
- Bends easily to make curved connections.
- Cuts easily with knife and wire cutters to reduce installation time.
- Exceeds SAE 20R2 Type EC (Class D2 Tube and cover) except in vacuum applications.
- **Engineered to resist electrochemical degradation – the leading cause of hose failure.**
- Resists water permeation.

Temperature rating: -40°F to +257°F (-40°C to +125°C)

Packaging: Available in 5 ft. and 10 ft. lengths, individually cartoned.

CAUTION: Do not use for oil, or fuel transfer applications.

Green Stripe® Vibraflex® Coolant Hose

For heavy-duty applications requiring short length hose that must absorb vibration and/or fitting misalignment. High flexibility reduces installation time and provides lower cost-per-mile operation.

- Oil and heat resistant nitrile tube.
- Oil, abrasion and heat resistant neoprene cover.
- Exceeds SAE J20 (Class B Tube and Class C Cover).
- Two-ply fabric reinforced.

Temperature rating: -40°F to 212°F (-40° to 100°C)

Packaging: One each, not cartoned.

CAUTION: Do not use for gasoline or diesel transfer applications.

Coolant Hose and Systems

Silicone Coolant Hose

Extra long-lasting hose constructed with silicone rubber. Ideal for extremely high temperature service in radiator, heater and other coolant transfer hose applications.

- Excellent for extreme ambient and radiant temperature conditions.
- Resists weathering, ozone, heat and coolant deterioration.
- Silicone tube and cover resist prolonged exposure to under-hood and coolant heat.
- Use PowerGrip SB clamps or silicone hose clamps.
- Exceeds SAE 20R1 (Class A Standard Wall).

Temperature rating: -70°F to +350°F (-56°C to +177°C)

Packaging: 3 ft. lengths. Individually polybagged.

CAUTION: Do not use for fuel or oil transfer applications.

(Product Type 4171)

* SB clamps not available, use silicone hose clamps

Hose I.D. Reducers

Slip inside current Gates hose to reduce inside diameters. Gives maximum coverage with minimum hose inventory. Make it possible to adjust inside diameters of larger hoses for emergency replacements.

- Quality rubber construction assures maximum dependability, no leakage.
- Fits Green Stripe straight or Green Stripe Vulco-Flex hoses.

CAUTION: Recommended for coolant and air applications only.

(Product Type 7736)

Part No.	Size (In.)	Part No.	Size (In.)

26392	2 to 1 3/4	26395	3 to 2 1/2

Coolant Hose and Systems

Safety Stripe® Heater Hose

EPDM hose constructed for extra-long service life.

- Unaffected by most coolants and non-oil based coolant additives.
- Unaffected by high cooling system pressures.
- Good resistance to high temperatures for extended periods of time.
- Similar to SAE 20R3 Class D-2.
- Not recommended for heavy-duty truck, bus and off-road construction equipment — use Green Stripe® heater hose for these applications.

Temperature rating: -40°F to +257°F (-40°C to +125°C)

Packaging: Individual cartons or reels.

CAUTION: Do not use for fuel or oil transfer applications.

(Product Type 3270)

Polybagged Safety Stripe® Heater Hose

Ideal self-service package for retail oriented merchandising. Fits standard pegboard displays.

- Package measures 12" wide x 13" high.
- Hose comes in 6 ft. lengths of Gates Safety Stripe® heater hose in 3/8", 1/2", 5/8" and 3/4" I.D.

Packaging: 25 units per carton.

(Product Type 3269S)

Coolant Hose and Systems

Firewall® Heater Hose

Extra heavy-duty hose designed for maximum durability. Easily recognized by its red cover.

- Unaffected by most coolants and non-oil based coolant additives.
- Unaffected by high cooling system pressures.
- Good resistance to high temperatures for extended periods of time.
- Similar to SAE 20R3 Class D-2.

Temperature rating: -40°F to +257°F
(-40°C to +125°C)

Packaging: Individually cartoned.

CAUTION: Do not use for fuel or oil transfer applications.

Charter® Heater Hose

Economically priced heater hose – yet affords long service life. Tested by Gates to assure reliability.

- Good resistance to high temperatures.
- Moderate resistance to oil and grease contamination.
- Good resistance to non-oil based coolant additives.
- Similar to SAE 20R3 Class D-2.

Temperature rating: -40°F to +257°F (-40°C to +125°C)

CAUTION: Do not use for fuel or oil transfer applications.

Packaging: Individually cartoned.

Coolant Hose and Systems

Green Stripe® Heater Hose

Heavy-duty construction assures dependable operation in truck, bus and off-road equipment heater systems. For a maintenance free connection, install with Power-Grip® SB clamps. Approved for Marine Applications.

- Green Stripe construction provides best cost-per-mile economics.
- Cover is abrasion resistant.
- Advanced EPDM tube, cover and reinforcement withstand high under-hood and coolant temperatures. Designed for extended use without cracking or hardening.
- **Engineered to resist electrochemical degradation – the leading cause of hose failure.**
- Exceeds SAE 20R1 Type EC, Standard Wall Class D-1.
- Reduces water loss from water permeating the hose wall and cover, a distinct advantage over silicone.

Temperature rating: -40°F to +275°F (-40°C to +135°C)

Packaging: Individually cartoned.

CAUTION: Do not use for fuel or oil transfer applications.

(Product Type 3269S)

Silicone Heater Hose

Constructed with silicone rubber. Ideal for extremely high temperature service in radiator, heater and other coolant transfer hose applications. Approved for Marine Applications.

- Reinforced with tough, high temperature resistant polyester textile cords.
- Exceptionally flexible.
- Highly resistant to weathering, coolant deterioration, ozone and temperature extremes.
- Exceeds SAE 20R3 Class A Tube and Cover.
- Also can be used for emission hose applications.

For proper installation, use Gates PowerGrip SB Clamps or Gates Silicone Hose Clamps.

Temperature rating: -70°F to +400°F
(-57°C to +204°C)

Packaging: Individually cartoned.

CAUTION: Do not use for fuel or oil transfer applications.

Coolant Hose and Systems

Heater Hose and Fuel Line Connectors

Unique single barb design provides greater sealability between single or dual inside diameter hoses.

- Using straight, elbow and tee shapes almost any hose configuration can be constructed.
- Glass reinforced nylon resists chemicals, gasoline, diesel fuels and temperatures from -40°F to 480°F (-40°C to 250°C).
- Bulkheads assure proper insertion depths.
- Anti-rotation device prevents hose twisting.

Packaging: 5 per package, except 1" which is 2 per package.

(Product Type 7315)

Coolant System Components

Unicoil* Hose Bending System

Now your customers can make their own custom hoses using stock heater hose and the new, patented Unicoil™ hose bending system. Unicoil is perfect for customized engines, out-of-stock situations and one-of-a-kind routing problems.

- No tools or special equipment needed
 - Great for modified or customized engines
 - Prevents kinks in tight hose bends
 - Perfect solution when custom molded hose isn't available
- Available in these sizes: 1/4", 5/16", 3/8", 1/2", 3/4", 5/8", 1"
(Product Type 7316)

UNICOIL APPLICATION CHART

Part No.	Description	Qty.
28514	1/4" Unicoil	1
28515	5/16" Unicoil	1
28516	3/8" Unicoil	1
28510	1/2" Unicoil	1
28511	5/8" Unicoil	1
28512	3/4" Unicoil	1
28517	1" Unicoil	1

Each coil bends up to 90 degrees!

Use additional coils to make bends of 180 degrees or more!

Fits Gates:

Heater Hose

(Safety Stripe, Firewall, Charter)

Fuel Line Hose

(Safety Stripe, MPI, Barricade)

Transmission Oil Cooler Hose

Unicoil* Assortment

Unicoil assortment contains three each of the six most popular sizes so you can quickly solve most bent hose problems. The assortment has space for more backup coils and/or the optional 1" sizes.

Part No. 28519

UNICOIL ASSORTMENT INCLUDES:

Part No.	Hose ID	Qty.
28514	1/4" (6.3mm)	3
28515	5/16" (7.9mm)	3
28516	3/8" (9.5mm)	3
28510	1/2" (13mm)	3
28511	5/8" (16mm)	3
28512	3/4" (19mm)	3

* Unicoil is a registered trademark of Unicoil International, Pty., Ltd.

Coolant System Components

90° Molded Heater Hose

Especially designed for difficult heater hose applications requiring sharp 90° bends in the hose. Eliminates the need for extensive inventory of OE type curved heater hose. Just 22 sizes handle thousands of applications.

- Engineered to resist electrochemical degradation – the leading cause of hose failure.
- Resists water permeation.
- Similar to heater SAE 20R3 Type EC Class D-2.
- Use with heater hose connectors and bulk heater hose for virtually complete molded heater hose coverage.

Temperature rating: -40°F to 275°F (-40°C to 135°C)

CAUTION: Do not use for fuel or oil transfer applications.

Coolant System Components

SuperStat* Thermostats

The SuperStat thermostat incorporates an all stainless steel construction, larger heat motor and larger spring to provide superior performance. These new features provide:

- Precision temperature control
- More efficient engine operation
- Faster engine warm up
- Fewer emissions
- Better fuel economy

(Product Type 7412)

* SuperStat is a registered trademark of STANT USA Corporation..

For application information, see the Cap and Thermostat Catalog #431-2090

Thermostats

Quality controlled factory calibration assures accuracy of opening and closing, regardless of pressure changes.

- Positive Piston Heat Motor provides accurate temperature control.
- Sturdy metal construction throughout.

Packaging: Individually boxed.

(Product Type 7412)

Offset Thermostats

- Offset design thermostat is specified by many Japanese car manufacturers.
- Stem, spring and heat motor is offset from the center of the thermostat flange.
- A "jiggle pin" located in the offset flange of the thermostat allows release of trapped air behind the thermostat.

Packaging: Individually boxed.

(Product Type 7412)

Seal-Eze Thermostat Gaskets

Cuts installation time in half. Adhesive-backed gasket material helps prevent breaking of water outlet. Gasket cement is not needed. Approved for Marine Applications.

- Self-adhesive backing holds thermostat in place while water outlet is being installed.
- Rubber thermostat seals also available.

Packaging: 10 per box.

(Product Type 7413)

Cut To Fit Gasket Material

Part No. 33635

Coolant System Components

Seal
Part No.
33601

Weir-Stat* Thermostats

The most effective cooling system control ever developed. Provides faster engine warm-up, stable temperature control, longer thermostat and seal life, improved fuel economy and driver comfort. Vehicles can operate without radiator shutters, reducing front axle weight, cost and noise. Fleets can operate at higher temperatures without the unnecessary activation of shut-down devices or fan clutches.

- Machined bead edge that seats positively down on a resilient 3-piece flange. As a result, no-leak, precision control is even greater than the original Weir-Stat.
- Flange retains its elasticity, resists abrasion and corrosion, remains stable during extreme temperature and pressure changes.

Packaging: Individually boxed.

(Product Type 7412)

*Weir-Stat is a registered trademark of STANT USA Corporation.

Weir-Stat Part No.	Temperature
33577	170°
33578	180°
33579	190-195°
33587	170°
33599	190-195°

Green Stripe® Heavy-Duty Thermostats

Quality controlled factory calibration assures accurate heat control under extreme variations in temperature, load and engine vibrations. Approved for Marine Applications.

- Heavy-gauge brass and stainless steel with Positive Piston Heat Motor.
- Available in Choke type, Top By-Pass, Bottom By-Pass, Side By-Pass, Normally Open and other types to meet heavy-duty cooling system designs.

NOTE: Seal should always be changed when new thermostat is installed.

Packaging: Individually boxed.

(Product Type 7412)

Part No.	Temperature
33397	170°
33398	180°

Green Stripe® Heavy-Duty Thermostat Seals

Fits securely around thermostat valve to prevent leakage. Approved for Marine Applications.

- Corrosion-resistant steel construction.
- Specially constructed to assure accurate fit.

Packaging: Individually boxed, 10 boxes to overpack.

(Product Type 7413)

Coolant System Components

All Gates radiator pressure caps are constructed of corrosion-resistant, heavy-gauge metal. This assures long service life and accurate control of pressure. Four types of caps are offered.

1.0 Bars = 14.5 psi
Packaging: Individually boxed,
100 per overpack.

For application information, see the Cap and Thermostat Catalog 431-2090

Spinlok Caps

Can be used for applications with or without coolant recovery systems. Inventory requirements are dramatically reduced.

- Unique 8-sided, scalloped crown allows for a firm grip for easy installation and removal.
- Neoprene upper and lower seal.
- Body rotates independently of crown – customer merely pushes down and twists.
- Safe and reliable.

(Product Type 7410)

Safty-Vent Pressure Release Caps

Can be used for applications with or without coolant recovery systems. Inventory requirements are dramatically reduced.

- Safety release lever.
- Protects against accidental burns by releasing steam thru overflow tube.

(Product Type 7410)

Standard Caps

- Covers a wide range of pressures.

(Product Type 7410)

Cool Control Caps

Diverts pressurized coolant to a reservoir rather than to an overflow valve.

- Constant pressure type cap for use on closed cooling systems.
- Increases cooling system efficiency by eliminating air from the cooling system.

(Product Type 7410)

Coolant System Components

Racing Radiator Caps

The racing radiator caps are specialty parts for use on high performance cooling systems. Caps are available in 18 to 22, 21 to 25 and 28 to 32 pound ranges. Caps are available for mini (32mm ID, 16 mm deep), and standard SAE "A" size (2 1/8" OD, 3/4" deep) filler necks.

31551 (19-21 pounds), 31552 (22-24 pounds)

These two caps fit the mini (32mm ID, 16 mm deep) filler neck. They include a lower and upper gaskets so they can be used on both open (no recovery bottle) and closed (recovery bottle) cooling systems.

31553 (18-22 pounds), 31554 (21-25 pounds), 31555 (28-32 pounds)

These caps fit a standard SAE "A" size (2 1/8" OD, 3/4" deep) filler neck. These do not include an upper gasket so they are for use on open cooling systems only.

31556 (18-22 pounds), 31557 (21-25 pounds)

These are Safti-Vent™ style racing radiator caps that fit the standard SAE "A" size (2 1/8" OD, 3/4" deep) filler neck. They both include both lower and upper gaskets so they can be used on open or closed cooling systems.

31558 (18-22 pounds), 31559 (21-25 pounds), 31560 (28-32 pounds)

These are Spinlok® design caps that fit the standard SAE "A" size (2 1/8" OD, 3/4" deep) filler neck. The caps include both lower and upper gaskets so they can be used on open or closed cooling systems.

Warning – These are high pressure radiator caps made for use on race cars only. Do not use them on a passenger car. Pressure test the complete cooling system to the maximum level of pressure indicated on the box. Failure to test the cooling system to the proper pressure prior to installing the cap may result in damage to the cooling system or bodily injury.

Coolant System Components

Heavy-Duty Radiator Caps

For use on heavy-duty trucks, buses and tractors.

- Fits applications with 3/4" deep filler necks.

Packaging: Individually boxed.

(Product Type 7410)

Part No.	Pressure (psi)	Fits Filler Neck I.D. (In.)
31307	4	2 ¹¹ / ₁₆
31308	7	2 ¹¹ / ₁₆
31309	10	2 ¹¹ / ₁₆

Heavy-Duty Cool Control Caps

Diverts pressurized coolant to reservoir instead of an overflow tube.

- Corrosion-resistant, heavy-gauge metal construction assures long life and accurate control of pressure.
- Atmospheric type valve allows cooling system to pressurize as needed, resulting in less strain on system's components.

Packaging: Individually boxed.

(Product Type 7410)

31348	7
31349	10
31350	15

Radiator Cap and Cooling System Analyzer Kit

Contains all components needed to check cooling systems and radiator caps.

- Lightweight, impact-resistant analyzer.
- Pressure release button on easy-to-read gauge allows for safe venting of system during testing.
- Complete Kit — Includes Part Nos. 31425, 31413 and carrying case. Kit replaces old 31365

Packaging: Individually boxed.

Hose Clamps

PowerGrip® SB Clamps

Maintenance-free clamps that retain dynamic tension and never need retightening. These clamps stop leaks, even on out-of-round applications. Clamp down better in all conditions and temperature extremes. Environmentally friendly, eliminate antifreeze leaks and ground water contamination.

- Easy to install with ordinary heat gun. No scraped hands.
- Wider sealing area entraps connector bead.
- Conform to any shape of hose and housing, even out-of-round fittings.
- Made from a heat-sensitive thermoplastic with a memory to prevent over- or under-tightening.
- Can be used with all brands of silicone hose.

Temperature rating: -40°F - 302°F (-40°C - 150°C)

Packaging: Ten to carton.

(Product Type 7405)

Hose Clamps

Super Hex/Minex Clamps

Top quality clamp with extra-strength construction features. Super Hex features a 1/2" wide band, while the Minex band is 5/16".

- Durable 200 series stainless steel band and screw housing.
- One-piece screw housing is interlocked onto band for extra strength.
- Solid head forged from one piece of steel, cadmium plated.
- Hex shaped screw with deep slot – tightens with screwdriver, nutdriver or socket wrench.
- Tighten to 30 in./lbs.
- Meets SAE J1508

Packaging: 10 per box.

Hose Clamps

Green Stripe® Stainless Steel Clamps

Ideal for applications where corrosion is a problem, or for industrial use.

- Housing and 9/16" wide band constructed of heavy-gauge stainless steel.
- Screw is 400 series stainless steel.
- Rounded band edges.
- Hex shaped screw with deep slot – tightens with screwdriver, nutdriver or socket wrench.
- Tighten to 35 in./lbs.

Packaging: 10 per box.

(Product Type 7408)

Strap Clamps

Packaged 10 to carton.

Part No.	Clamp Length	Fits Hose up to
32112	12"	3 1/2" O.D.
32115	15"	4 1/2" O.D.
32124	24"	7 1/2" O.D.

(Product Type 7400)

Silicone Hose Clamps

Designed to provide an extra-tight seal on silicone hose and prevent hose cover extrusion.

- 300 series stainless steel band, screw and housing resist corrosion.
- Four-piece construction and 100% mechanical interlock for added strength and torque capability.
- Combination 5/16" hexagon, deep slot screw head makes installation easy... tightens with screwdriver, nutdriver or socket wrench.
- One piece band and liner.
- Inner-liner band eliminates hose cover extrusion.
- Wide 9/16" band gives 12-12% more compression than 1/2" band.
- Tighten to 35 in./lbs.

Packaging: 10 per box.

(Product Type 7400)

Green Stripe® Marine Clamps

Constructed of 100% marine grade stainless steel. Bands are 9/16" wide with rounded edges. Screws feature 300 series stainless steel construction and deep slotted 5/16" hex heads. Approved for Marine Applications.

- Saline and corrosion-resistant.

Packaging: 10 per box.

Green Stripe® and Green Stripe Heavy-Duty Constant Tension Clamps

Green Stripe constant tension clamps provide the reusable, self-adjusting band you need for a dependable seal, even in the coldest conditions. Applications include auto, truck and bus cooling systems and turbo chargers.

Green Stripe and Green Stripe HD constant tension clamps feature:

- Larger, heavier gauge precision-formed spring washers with higher rates of band tension and adjustable for a more dependable seal.
- All stainless steel construction for maximum corrosion resistance. Band and Housing – 9/16" wide – GSCT 301 and GSHD 304 stainless steel. Hex-Head Screw – 410 stainless steel GSCT 5/16" and GSHD 3/8" wide.
- A uniform 360° seal.
- Clamping diameters – GSCT 9/16" to 3-1/2" and GSHD 1" to 9-1/8".
- Tighten Green Stripe Clamps to minimum of 50 in./lbs. and maximum of 85 in./lbs.
- Tighten Green Stripe Heavy-Duty Clamps to minimum of 75 in./lbs. and maximum of 125 in./lbs.

Barricade™ Fuel Line Hose

Low-permeation, premium hose for use on carbureted engines, PCV and EEC systems, and for fuel return hose on fuel injection systems. Not for use on the pressure-side of fuel injection systems. Approved for use with leaded and unleaded gasoline, diesel, bio-diesel, E-85, Methanol, Ethanol, and gasohol fuels. Patented 5-layer Greenshield™ barrier technology keeps fuel out of the environment while delivering peak fuel efficiency.

- Meets SAE J30R14T1, EPA 40 CFR 1051.110 , and CARB small engine off-road requirements for low permeation
- Textile spiral layer (2 spiral)
- Thermoplastic barrier layer
- Oil, heat, ozone and abrasion resistant cover
- Recommended for carbureted engines in cars, light trucks, off-road vehicles and small engines

NOTE: Do not submerge in gasoline.

WARNING: Do not use on pressure lines on fuel injection systems or cooling system applications. Use MPI (4219D) or Barricade Fuel Injection (4219BF) hose for Multi-Port Injection systems.

Temperature: -40° F to 257° F (-40° C to 125° C)

Barricade™ Fuel Injection Hose (MPI)

Low-permeation, premium hose for use on all fuel systems, including fuel injection (MPI). Approved for use with gasoline, diesel, bio-diesel including soybean methyl ester (SME), rapeseed methyl ester (RME), palm methyl ester (PME) per ASTM D6751, E-85, methanol, ethanol, ethanol extended gasoline, and gasohol fuels. Patented 5-layer Greenshield™ barrier technology keeps fuel out of the environment while delivering peak fuel efficiency.

- Exceeds SAE J30R14T3 (except for kink resistance) as well as low-permeation requirements for CARB
- Aramid reinforcement spiral braid for superior burst strength
- Thermoplastic barrier layer
- Oil, heat, ozone and abrasion resistant cover
- 225 psi working pressure rating
- Recommended for any fuel injection applications for superior service life

NOTE: Do not submerge in gasoline.

Temperature: -40° F to 275° F (-40° C to 135° C) continuous, up to 302°F (150°C) intermittent

Packaging:				Working	2' retail	25' length	250' reel

(Product Type 4219BF)

Fuel Systems

MPI/Fuel Injection Hose (1987 & newer)

Recommended as the premium choice for clamped hose applications on all fuel systems, including fuel injection systems. Not designed to replace coupled hose assemblies on fuel injected engines.

Approved for use with leaded and unleaded gasoline, diesel fuel and gasoline blends of ethanol, methanol and ethers (up to maximum concentrations allowed by the EPA) and 100% methanol or ethanol and B100 biodiesel, up to 275°F (135°C).

- Outstanding fluoroelastomer liner resists permeation and alcohol.
- Outstanding oil resistant tube combats heat.
- Polyester braid reinforcement increases strength.
- Oil, heat, ozone and abrasion resistant cover.
- Meets SAE 30R9 requirements & CARB CU-06-002 for low permeation.
- Superior for service life over standard fuel hose.

NOTE: Do not submerge in gasoline.

Temperature: -40°F to 275°F (-40°C to 135°C)

Maximum temperature to +302°F (+150°C)

Packaging: See table.

Intended for use with fuels where MTBE concentrations are no greater than 15% by volume.

(Product Type 4219D)

Submersible Fuel Line Hose

Ordinary fuel line hose is designed to handle fuel on the inside only. The Gates Submersible Fuel Line Hose Exceeds the SAE 30R10 rating and is capable of handling gasoline, alcohol-extended gasoline or diesel fuel in fully immersed, mobile, stationary and marine applications.

- Engineered for constant contact with gasoline (and other liquid petroleum distillates) on the inside and the outside.
- Excellent for use on fuel pumps in the gas tank.
- Meets the SAE 30R10 specification for submersible fuel line hose applications.
- Fluoroelastomer (FKM) tubed cover resists gas permeation and retards aging.
- Aramid Fiber reinforcement—the same fiber used in bulletproof vests and is pound-for-pound stronger than steel.
- Maximum temperature +302°F (+150°C)

(Product Type 4219)

Fuel Systems

Safety Stripe® II Return Fuel Line/PCV/Evaporative Emission Control Hose (1986 & older)

Multi-purpose hose for use on Return Fuel Lines, PCV and EEC systems, and for fuel return hose connections on diesel fuel injection systems. Approved for use with leaded and unleaded gasoline, diesel and gasoline blends of ethanol (E85), methanol and ethers (up to the legal limits allowed by the EPA).

- Spiral reinforced construction.
- Nitrile tube.
- NBR-PVC cover.
- Oil resistant cover resists the effects of high heat and ozone found in engine compartments.
- Meets SAE 30R6 and 30R7.
- Vacuum rating of 24 In./Hg for sizes less than 1/2" I.D., and 10 In./Hg for sizes 1/2" to 3/4" I.D. at ambient temperatures. Packaging: See table.
- Temperature rating: -40°F to 257°F (-40°C to 125°C) with gasoline blends

WARNING: Do not use for pressure lines on fuel injected engines or for cooling system applications. Use Multi-Port Injection (MPI) hose for fuel injection applications.

(Product Type 4219 XL)

Intended for use with fuels where MTBE concentrations are no greater than 15% by volume.

Marine Fuel Feed and Vent Hose – Type A

Top quality, multi-purpose hose specifically designed to provide flexible connections between rigid fuel distribution lines and engine. Excellent for vent lines and emission control systems. Braided construction provides greater kink resistance and flexibility than spiral construction hose.*

- Suitable for marine diesel fuel and gasohol blends of ethanol, methanol and ethers up to 10%.
- Temperature Rating: -20°F to 212°F (-29°C to 100°C) for all fuels except B100 biodiesel which is max. temp. of 125°F (52°C).
- Heat and oil resistant Type A neoprene cover.
- Type C nitrile tube with high-tensile synthetic textile cord reinforcement.
- Meets SAE J1527 Style R1 Class 1 and USCG Type A requirements.

Packaging: 25 and 50 foot lengths in carton and 250 foot reels.

(Product Type 4219M)

***NOTE:** Minimum I.D. for vent hose is 9/16".

Fuel Systems

Fuel Fill Hose

Designed for transferring fuel from vehicle's filler neck to fuel tank. Works equally well on passenger cars and light trucks, as well as on auxiliary fuel tanks on recreational vehicles. For use with most types of fuels – especially resistant to gasoline and diesel.

- Suitable for use with gasoline, gasohol blends of ethanol, methanol, ethers, diesel and biodiesel to B20 (up to maximum concentrations allowed by the EPA).
- Corrugated cover with helical wire reinforcement.
- Features a high quality nitrile tube.
- Meets requirements of SAE 30R5.
- Cuts easily with knife and wire cutters.

Temperature rating: -40°F to 212°F (-40°C to +100°C) with gasoline blends, -40°F to 125°F (-40°C to +51°C) with biodiesel (B20).

Packaging: 3 ft. lengths.

NOTE: Use Gates Super Hex Clamps for reliable installation.

(Product Type 4663K)

2 1/2	20	23940	8

Fuel Filler Neck Hose

Designed specifically for auxiliary gas tanks on recreational vehicles. Excellent replacement for passenger cars and trucks where a straight hose with a minimal bend is required.

- Suitable for use with gasoline, gasohol blends of ethanol, methanol, ethers, diesel and biodiesel to B20 (up to maximum concentrations allowed by the EPA).
- Smooth oil resistant cover, tough textile cord reinforcement and petroleum-resistant nitrile tube.
- Non-wire reinforced
- Meets SAE 30R6 specifications.

Temperature rating: -40°F to +212°F (-40°C to +100°C)

Biodiesel (B20) temperature rating: -40°F to +212°F (-40°C to +51°C)

CAUTION: Not recommended for marine gasoline applications.

Gas Pump Hose 124HW (Retractable Reel) For Service Stations

For dispensing gasoline, diesel and gasohol from retractable reel type dispensers where small I.D., lightweight, flexible hard wall hose is required.

- One-ply braided textile with helical steel wire reinforcement and built-in static wire.
- Smooth bore assures fast discharge.
- Coupled with male, NPT, Brass with chrome plate couplings.
- Nitrile tube, CPE cover.
- Underwriters Laboratory (UL330) Listed.

Packaging: Individually cartoned.

Gas Pump Hose 24B (Retractable Cable) For Service Stations and Marine Applications

For dispensing gasoline, diesel and gasohol from stand-up or retractable cable type pumps requiring soft wall hose. Also ideal for fuel or oil transfer applications.

- Nitrile tube and cover provide excellent resistance to oil and petroleum products.
- One (3/4" I.D.) and two (1" I.D.) plies of reinforcement with built-in static wire.
- Coupled with male, NPT, Brass with chrome plate couplings.
- Underwriters Laboratory Listed. Meets UL 330.

Packaging: Individually cartoned.

CAUTION: Not recommended for reel type dispensers.

Fuel Cap Systems

Evaporative Emission Control Fuel Caps

Meet OEM specifications and Federal and State Emission Requirements. Two-way action pressure relief/vacuum relief valve allows fuel tank to “breathe” while preventing the escape of fuel fumes. Seals are compounded from fuel-resistant rubber. Available in three configurations.

(Product Type 7410)

Fenderwell

- Zinc-plated and dichromate dipped for superior corrosion resistance.
- Some models are made from rugged plastic.

Exterior

- Caps have chrome-plated finish.

Locking

- Comes with two keys. Keyed-alike caps available on special order.

Packaging: Individually boxed.

NOTE: Due to the critical nature of the EEC valves, it is necessary to keep these caps clean at all times.

Fuel Caps

Rugged, heavy-duty construction. Meet or exceed OEM specifications. Caps fit both shallow and deep cam filler necks – vented, non-vented and vented anti-surge. Three configurations available for most popular applications.

(Product Type 7410)

Fenderwell

- Sturdy metal construction throughout.

Locking

- Comes with two keys. Keyed-alike caps available on special order.

Exterior

- Attractive chrome-plated finish.

Packaging: Individually boxed.

VaporVent

Designed for late model cars. Allows car owner to release pressure from fuel system prior to removing cap from the filler neck. Reduces the risk of fuel spray and vapor surge.

- Handy push button releases fuel vapor pressure.

Mechanical Fuel Cap Tester Kit

Economical, easy-to-use alternative to electronic testers.

- Compact, lightweight design
- Easy-to-read pass/fail gauge
- Convenient hand operation – needs no batteries
- Set of two pass and fail calibration caps to confirm tester accuracy
- Complete set of nine color-coded adapters with adapter application chart
- Tester unit and adapters packaged in separate plastic carrying cases

(Part No. 12370)

Part No.	Description	Pkg.	Part No.	Description	Pkg.
12370	Fuel Cap Tester Kit	1	12411	Green "Pass" Cap	1
12302	Replacement Gauge	1	12412	Red "Fail" Cap	1

12410	Threaded Adapter	1	12556	Plastic Knob	1

Heavy-Duty Fleet and Off-Road Equipment Heavy-Duty Saddle Tank Caps

Heavy metal construction throughout. Meets I.C.C. requirements.

- Available for side or saddle tanks.
- Locking caps come with two keys. Keyed-alike caps available on special order.

Packaging: Individually boxed.

(Product Type 7410)

Oil Systems

Transmission Oil Cooler Hose

Provides a safe, heat and oil resistant connecting line between oil cooler and transmission.

- One fiber braid reinforcement over an oil resistant nitrile rubber tube.
- Oil and abrasion resistant black hypalon cover.
- Meets or exceeds SAE J1019 requirements.
- Can be stacked on shelf or hung on pegboard.
- Easy-to-follow instructions in each package.
- Handy hose diameter indicator on package.
- Package is recyclable.

Maximum temperature rating: +300°F (+150°C)

Packaging: 3 ft. lengths in retail package; 25 ft. and 50 ft. lengths individually cartoned.

(Product Type 3319N)

PCV Oil Filler Caps

Meets requirements of emission control systems on late model cars and light trucks.

Universal design offers maximum coverage with minimum inventory.

- Sealed construction prevents engine crankcase gases from escaping into the atmosphere.
- Heavy-gauge steel construction resists underhood heat and corrosion.

Packaging: Individually boxed.

NOTE: To assure proper operation of PCV Systems, Oil Filler Caps should be cleaned or replaced every 12,000 miles.

(Product Type 7410)

Oil Filler Caps

Durable construction assures long service life.

- Special finish resists rust and provides excellent protection against underhood heat.

Packaging: Individually boxed.

(Product Type 7410)

Power Steering Systems

See Gates Power Steering Catalog 431-2140 for complete product identification and application. Power Steering products are supplied through Edelmann at 1-800-770-4639.

OEM Type Power Steering Hose Assemblies

Gates extensive field examination and testing assure proper fit. For passenger cars and light trucks. General instructions are packed with every assembly. Hoses and fittings are also available for tailor-made medium and heavy-duty truck applications.

- Comes complete with factory-installed, pre-bent zinc-dichromate plated end fittings, bracketry, sensor ports, sheathing, bushings and grommets.
- Exceeds SAE J2050 performance requirements.

Packaging: Individually bagged.

(Product Type 7741)

Low Pressure Power Steering Return Line Assemblies

Assemblies come complete with factory-installed, pre-bent, coupled end fittings where required.

- Connection on uncoupled end is made with ordinary worm-drive clamps.

Packaging: Individually bagged.

(Product Type 7741)

PS188 Power Steering Hose

Recommended for power steering pressure lines.

- Synthetic rubber hose cover developed specifically to resist rugged under-hood environments. Type CSM.
- Use with one-piece Gates PowerCrimp® power steering couplings (Refer to catalog 431-2080 for details).
- Meets SAE J2050 Type 1 performance requirements.

Packaging: 25 ft. or 50 ft. lengths.

(Product Type 3317)

Power Steering Systems

Bulk Power Steering Return Line Hose (w/o Couplings)

Allows "custom fit" cutting and assembly for low pressure fluid return lines.

- Use with Return Line End Fittings if required.
- Nitrile tube, neoprene cover.
- Meets OEM power steering return line and SAE J189 requirements.

Temperature range: -40°F to +275°F (-40°C to +135°C)

Packaging: Individually boxed.

(Product Type 3283SA)

High Temperature 300° CPE Power Steering Return Line Hose

For late model vehicles.

- Use with Return Line End Fittings if required.
- Special high temperature tube and cover designed for today's high under-the-hood temperatures.
- Meets SAE J189 requirements and SAE J2076.

Temperature range: -40°F to +300°F (-40°C to +150°C).

Packaging: Available in 25 ft. lengths.

(Product Type 3283LF)

Power Steering Return Line End Fitting

Furnished separately – for use with Return Line Power Steering Hose.

- Zinc-dichromate plated to resist corrosion.
- Coverage includes popular inverted flare threads.

Packaging: Individually boxed.

(Product Type 7255)

Power Steering Repair Kits

Kit components are made of OEM quality materials and come with easy-to-read instructions.

Repair Kits available for:

- Adjuster Plug Seal
- Control Valve Seal
- Piston Rod End Bushing
- Pitman Shaft Seal (complete)
- Pitman Shaft Seal (lower)
- Power Cylinder Seal
- Pump Seal
- Rack and Pinion Seal
- Steering Gear Major Seal

Packaging: Individually boxed

(Product Type 7749)

For "O"Ring Assortment See Catalog 431-2140.

Braking Systems

Air Brake Hose Assemblies*

Factory crimped assemblies meet the rigorous demands of the fleet and heavy-duty market.

- Extremely flexible and kink resistant.
- Two spiral construction meets SAE J1402 specifications.
- Complies with DOT FMVSS 106 requirements.
- Couplings meet SAE and DOT minimum pull-off requirements.
- High quality brass male pipe fitting on one end, female air brake swivel with male pipe adapter on other end.

Temperature rating: -40°F to +212°F (-40°C to +100°C)

Packaging: Individually cartoned.

(Product Type 7745)

Nylon Air Brake Tubing

Recommended for truck, bus, and mobile air brake, and service lines where heat and battery acids are not present. Conforms to SAE J844 specifications. Meets D.O.T. FMVSS 106.

- **Tube:** Heat and light stabilized seamless extruded nylon.
- **Cover:** Nylon. Available in black (NABTA), blue (NABTB), green (NABTG), red (NABTR), yellow (NABTY) and orange (NABTO) colors. Other colors available upon request.
- **Temperature Range:** -40°F to +200°F
- **Couplings:** Use Gates DOT SureLok™ (G31) or Gates DOT compression. (G32)

Type A: Non-reinforced in sizes 1/8", 5/32", 3/16", and 1/4".

NOTE: 1/8" and 5/32" are NOT recognized by D.O.T. for air brake systems, these are for service lines only.

Type B: Reinforced with one open ply of fibrous nylon in sizes 5/16", 3/8", 1/2", 5/8" and 3/4".

***NOTE:** Federal law requires registration with the Department of Transportation for anyone producing air brake hose assemblies with swaged or crimped fittings.

Air Brake Hose Assembly Merchandisers

These air brake merchandisers are a must for anyone that has air brake applications. Assortments feature the most popular SAE J1402 hose with brass couplings, as well as the most popular compressor air brake discharge hoses and brass couplings.

- 91181 – Large assortment
- 91182 – Small assortment

*** NOTE:** Federal law requires registration with the Department of Transportation for anyone producing air brake hose assemblies with swaged or crimped fittings.

Braking Systems

SureLok™ Fittings

Recommended for compressed air connector on all Nylon Air Brake Tubing air brake systems at locations other than between chassis frame and axle or between towed and towing vehicle. Also as a connector on all air operated systems as applicable to suspension, steering, engine, transmission and auxiliary mechanisms. Fittings and tubing comply to Department Of Transportation Federal Motor Vehicle Safety Standard, (DOT FMVSS 106) (mandatory requirements for inch tube fittings in U.S.A.) Society for Automotive Engineers (SAE) J1131 (inch tube and fittings) and meet DIN 74324 and German TUV requirements (metric tube and fittings).

- Simple tube connection and disconnection
- Fewer component parts – Internally machined form in body to secure collet
- All collets marked with tube size
- Ease of tube insertion in areas of restricted access
- Total fittings system solution

Maximum Working Pressure: 0 to 150 psi

Working Temperature: -40°F to +220°F (-40°C to +100°C)

Materials: Body, tube support, Collet - Brass;

O-Ring – Buna N (Low Nitrile); Thread Sealant - Precoat 5

Tubing: Tube should be to SAE J844 or DIN 74324

Small Air Brake Assortment

This small SureLok™ assortment is a basic starter package for the jobber or fleet. The SureLok coupling allows for repairs or replacement of J844 nylon air brake lines without the need of tools.

Assortment Contains:

- 4 Sizes of Hoses
- 16 Coupling Configurations
- 158 Individual Couplings

(Part Number: A33001)

Large Air Brake Assortment

The large SureLok assortment is perfect for the jobber or fleet. SureLok couplings allow for repairs or replacement of J844 nylon air brake lines without tools. Along with the SureLok couplings, this assortment features brass field attachable couplings for SAE J1402 DOT All hose.

Assortment Contains:

- 7 Sizes of Hoses
- 51 Coupling Configurations
- 318 Individual Couplings

(Part Number: A33002)

Compression Coupling Assortment

Small Air Brake Assortment

Handy, small compression assortment is a basic starter package for the jobber or fleet. This assortment features brass compression couplings for J844 nylon air brake hose.

Assortment Contains:

- 4 Sizes of Hoses
- 31 Coupling Configurations
- 211 Individual Couplings

(Part Number: A33003)

Large Air Brake Assortment

The large compression assortment is perfect for the jobber or fleet. This assortment features both brass compression couplings for J844 nylon air brake hose and brass field attachable couplings for SAE J1402 DOT All hose.

Assortment Contains:

- 7 Sizes of Hoses
- 59 Coupling Configurations
- 330 Individual Couplings

(Part Number: A33004)

* **NOTE:** Federal law requires registration with the Department of Transportation for anyone producing air brake hose assemblies with swaged or crimped fittings.

Compression Fittings

Recommended for compressed air connector on all Nylon Air Brake Tubing air brake systems at locations other than between chassis frame and axle or between towed and towing vehicle. Also as a connector on all air operated systems as applicable to suspension, steering, engine, transmission and auxiliary mechanisms. Fittings and tubing comply to Department Of Transportation Federal Motor Vehicle Safety Standard, (DOT FMVSS571.106) (Mandatory requirements for inch tube fittings in U.S.A.) Society for Automotive Engineers (SAE J246) and (SAE J1131) (inch tube and fittings).

- **Maximum Working Pressure:** 150 psi
- **Working Temperature:** -40°F to +200°F (-40°C to +100°C)
- **Materials:** Brass
- **Tubing:** SAE J844 or DIN 74324

Component Functions

The Gates compression coupling has four parts:

AB Series Air Brake Hose*

Computer-controlled manufacturing process virtually insures product uniformity.

- Superior EPDM rubber resists damaging effects of ozone and heat, plus harmful grease and oil common to air brake systems.
- Four spiral polyester construction, meets SAE J1402 specifications. Complies with DOT FMVSS 106 requirements.
- Flexible and kink-resistant.
- Designed to accept all styles of air brake couplings, including conventional brass and plastic couplings.

I.D. (In.)	O.D. (In.)	Length (Ft.)	Work. Press. (psi)	Part No.
3/8	3/4	50	225	27240

1/2	7/8	50	225	27241
1/2	7/8	250	225	28761

Temperature rating: -40°F to +212°F (-40°C to +100°C)

Packaging: 50 ft. per carton or 250 ft. reels (maximum 3 pieces, shortest length 50 ft. or greater).

(Product Type 3245E)

Heavy-Duty Green Stripe® Air Brake Hose*

Can be used as flexible connector between frame and axle.

- Compatible with standard air brake couplings.
- Neoprene construction is oil resistant.
- Two-braid rayon reinforced construction with smooth cover.
- Exceeds SAE J1402 and Bendix specifications. Complies with DOT FMVSS 106 requirements.

I.D. (In.)	O.D. (In.)	Length (Ft.)	Work. Press. (psi)	Part No.

Packaging: Individually cartoned.

(Product Type 3245G)

* **NOTE:** Federal law requires registration with the Department of Transportation for anyone producing air brake hose assemblies with swaged or crimped fittings.

Braking Systems

Power Brake Vacuum Hose

Light-duty hose specially engineered for power brake applications on passenger cars and light trucks.

- Complies with DOT FMVSS 106VL. Meets SAE 1403 Type L.
- Ozone-resistant EPDM cover.
- Textile reinforcement.
- Vacuum rating 30 In. Hg.

Temperature rating: -40°F to +257°F (-40°C to +125°C)

(Product Type 3276)

¹⁵ / ₃₂	.82	85	27233	27231

Green Stripe® Vacuum Brake Hose 69W

Extra heavy-duty hose designed to fit most air brake systems on trucks, trailers and other heavy equipment.

- Wrapped hose construction with multiple plies of rubber-impregnated fabric.
- Resists collapsing or deforming even under high vacuum at elevated temperatures.
- Rated at 30 In./Hg.
- Exceeds SAE J1403, Type H. Complies with DOT FMVSS 106VH.

Temperature rating: -40°F to +257°F (-40°C to +125°C)

Packaging: 50 ft. lengths, individually cartoned.

(Product Type 3276 H) (3245T for 5/8 and 3/4)

Air Conditioning & Refrigeration Systems

PolarSeal® Hose

Designed for environmentally safe R134a refrigerants in automotive air conditioning and industrial systems such as tractors, construction trucks, and mobile and stationary refrigeration units. Can be crimped with current AC die sets on MC4-20, PC707, 3000B and OmniCrimp- 21 crimpers, or, with the new PolarSeal Portable Crimper (Part No. 77715).

- Minimizes permeation of both R134a and R12 refrigerants.
- Cover is black synthetic EPDM rubber.
- Nylon barrier inside black chloroprene rubber tube is reinforced with spiraled polyester.
- Meets or exceeds SAE J2064 Type C., Class 2.

Temperature rating: -22°F to +257°F (-30°C to +125°C). Class II.

Packaging: 25 foot cartons and UPS shippable reels.

(Product Type 3353)

NOTE: For a complete listing of PolarSeal Couplings, see Gates Hydraulic Catalog #431-2080.

* Beginning in 1995, all new air conditioning systems in cars, light trucks and industrial applications manufactured in North America must use R134a refrigerant.

PolarSeal® Portable Crimper

PolarSeal® II Hose

PolarSeal II Hose is designed to be installed with PolarSeal® II couplings and clamps. Meets SAE J2064 Type C, Class I - Use with R12, R13A and R22 refrigerants.

Recommended for air condition systems on School/Transit Buses, RV's, Limos and other heavy equipment that has long run or hard to service AC lines. Elastomeric Tube with Fabric Braid reinforcement. Cover is Heat, Moisture and Ozone resistant

Temperature Range: -22°F to +257°F (-30°C to +125°C).

Coupling Recommendation (See Crimp Data Manual 428-7365 or E.Crimp):

PolarSeal® II Coupling

PolarSeal® Couplings & Accessories

OEM quality couplings in 64 configurations to fit most mobile refrigeration and air conditioning applications.

- Available in straight, 45° and 90° styles.
- Comes in male, female, flared, flareless and swivel ends to fit most popular applications.
- 4 sizes of "O Rings" especially compounded for R134a refrigerants.
- 5 inline orifice tubes.

Packaging: 1 each in plastic bag. 5 to 10 per carton according to popularity.

NOTE: For a complete listing of PolarSeal Couplings, see Gates Hydraulic Hose & Fittings Catalog #431-2080..

Windshield Washer and Vacuum Systems

Windshield Washer, Vacuum and Radiator Overflow Tubing

Ideal for windshield washers, and vacuum-operated accessories, and radiator over flow.

- Vacuum and kink resistant construction.
- Vacuum rated to 24" Hg (610mm).
- Meets SAE J1037, J942b specifications.
- 25 psi working pressure.

Temperature rating: -40° to +257°F (-40°C to 125°C)

Packaging: One 72" length per box. 50 ft. reel. One 250 ft. length per box.

(Product Type 4040A)

Windshield Washer and Vacuum Systems

Silicone Vacuum Tubing (EGR Hose)

Specially formulated silicone rubber. High temperature resistance assures long service life in harsh environments.

- Extremely flexible and kink resistant.
- Also used to transfer air, water and coolant for exhaust gas recirculation.
- Orange color for easy identification.

Temperature range: 300°F (149°C) to 25 In./Hg. Possible reduced capacity above 300°F. Maximum 400°F (204°C).

Packaging: One 6 foot length in reusable, recyclable, self-service package.

Air and Defroster Systems

Emission Control Duct Hose

Connects hot air from exhaust manifold shroud to air cleaner for efficient control of emissions. Helps eliminate carburetor icing and improves engine warmup.

- Aluminum polyester construction for economy.
- Fiberglass aluminum (black) for greater strength and durability.
- Completely flexible and easily bent, yet retains shape after forming.
- Resists heat, cold, oil and water.
- Installs easily... cuts with knife.
- Install with or without clamps.
- Temperature rating: -40°F to 400°F (-40°C to +204°C).

Packaging: Individually packed.

Defroster/Air Intake Hose

For defrosters, air ducts, air intakes, under-hood applications and other low pressure, low suction applications. Approved for Marine Applications.

- Flexible, heat-resistant materials and helical steel wire reinforced.
- Easily cut and formed to desired shape and length.
- Tear, abrasion and ozone resistant.
- Complies with DOT FMVSS 302.
- Temperature range: -40°F to +200°F (-40°C to +93°C).

Packaging: Individually boxed in 6 ft. lengths (compressed to 21").

Air and Defroster Systems

Turbocharger Hose

Specially compounded for use as a short, flexible connector between the air intake and the turbocharger. Can also be used for turbocharger air discharge.

- Approved for Marine Applications.
- Silicone elastomer inner liner reinforced with woven fiberglass fabric and coated with orange silicone rubber.
- Resists high temperatures and pressures.
- Resists coolants, weathering and ozone.
- Highly visible orange color helps distinguish this hose from engine coolant hose.

Temperature rating: -60°F to +500°F (-51°C to +260°C)

Packaging: 1 each.

Green Stripe® Ring Retained Turbocharger Hose

Made for turbocharged Class 8 and heavy-duty diesel engines. Multi-hump design isolates vibration and absorbs rotational shock. Depending on application, hose is engineered with three or four rings to maintain design integrity.

- Four layer silicone construction with aramid fiber reinforcement for maximum durability.
- Meets or exceeds OEM specifications.

Air and Defroster Systems

Air Vent Hose

Light-duty hose for air cleaner-to-engine connections, defroster ducts and air or heater ducting.

- Extremely flexible.
- Helical wire construction.
- Heat and oil resistant tube.

Temperature rating: -40°F to +212°F (-40°C to +100°C)

Packaging: 10 ft. lengths, individually cartoned.

NOTE: For abrasive environments use Gates Green Stripe® Heavy-Duty Air Vent Hose.

CAUTION: Not recommended for conveying liquids.

Safety Stripe® Air Hose

Durable, premium hose for garage and service station air impact tools.

- High strength reinforcement.
- High flexibility is easy on wrists.
- Perforated EPDM red cover that resists ozone and abrasion.
- Bend restrictors for extended life.
- Factory assembled male couplings with 300 lb. minimum coupling pull.

Temperature range: -40°F to +200°F (-40°C to +93°C)

Packaging: 25 ft. and 50 ft. individually cartoned.

(Product Type 3215, 3215A)

Thermo GP[®]X Air Hose

Light-weight thermoplastic hose suitable for air impact tools and general service applications.

- White virgin PVC tube with polyester cord reinforcement.
- **Red w/black cover** PVC cover resists abrasion and combats the effects of sunlight, weathering and ozone.
- Bend restrictors for extended life.
- 0.5" ferrule wall thickness to resist crushing and deforming.
- Allows dirt and grease to be cleaned off easily.
- Suitable for air impact tools.
- Factory crimped, heavy-duty male couplings assure maximum dependability pressure.

Temperature range: -15°F to +150°F (-26°C to +66°C) continuous service.

Packaging: 25 ft. and 50 ft. assemblies, individually cartoned.

CAUTION: Do not use near welding equipment.

Service Hose

Charter® Air Hose

Designed for multi-purpose air hose applications. Capable of impact tool use.

- Textile reinforcement.
- Perforated EPDM red cover is ozone and abrasion resistant.
- Factory applied male couplings have 250 lb. minimum coupling pull.

Temperature range: -40°F to +200°F
(-40°C to +93°C)

Packaging: 25 ft. and 50 ft. coupled lengths individually cartoned; 300 ft. reels (maximum 2 pieces, shortest length 50 ft.).

(Product Type 3215)

Charter Multi-Use Air/Water Hose

Ideal for air and water applications. Engineered for heat, abrasion and ozone resistance.

- EPDM rubber tube and cover
- Two layers of spiral synthetic reinforcement
- Gates PowerCrimp specifications available*

Temperature rating -40°F to +200°F.

Packaging: 50-ft. cartons, bulk reels.

*Contact your local Gates sales associate for spec. information.

CAUTION: Do not use for oil, grease or fuel transfer.

(Product Type 3204)

Multi-Use Hose

For handling lower pressure air, water, agricultural spraying, oil or grease. Also can be used for air spray painting.

- Nitrile tube and cover provide high oil resistance.
- One braid polyester cord reinforcement.

Temperature rating: 0°F to +212°F (-18°C to +100°C)

Packaging: 50 ft. to carton; 300 ft. reels (maximum 3 pieces, shortest piece 50 ft.).

CAUTION: Not recommended for use as small I.D. by-pass, coolant and heater hose.

Do not use for fuel transfer applications.

Signal Call Tubing

For driveway signal devices in service station and garages.

- Long-lasting EPDM rubber tubing specially built to register under the slightest pressure.
- Withstands vehicle weight at temperatures up to +150°F (+66°C)
- Meets SAE J1037, J942b specifications.

Packaging: 50 ft. and 100 ft. (without couplings) individually cartoned;

300 ft. reels (maximum 2 pieces, shortest length 100 ft.).

Exhaust System Hose

Exhaust Hose (Hardwall) Wire Reinforced

Heavy-duty fabric-reinforced hose with a helical steel wire reinforcement to meet marine water and wet exhaust hose requirements.

- Features blue layline for easy identification.
- Resists heat and oil.
- Meets SAE J2006 requirements.
- Working pressure 100 psi for water application, 10 psi for exhaust application.
- May be used for engine water circulation, discharge lines, heat exchangers and wet exhaust connections.

Packaging: 12.5 foot lengths.

Service-Master Water Hose

Heavy-duty hose for fleets, service stations and repair shops. Ideal for cement trucks and wash rack use.

- EPDM tube handles hot water up to +200°F (+93°C).
- Two-braid reinforcement.
- Flexible and kink resistant.
- Rugged black EPDM cover with protective rib design resists abrasion, weathering and crushing.
- 25 ft. and 50 ft. lengths come coupled. 250 ft. bales uncoupled.

Merchandisers and Sales Aids

PoweRated® "70" Belt Merchandiser

Eye-appealing merchandiser encourages self-service retailing. Takes up approximately 4 feet of gondola space.

Provides 78% coverage on applications in the 3 to 17 horsepower range.

- Belt measuring device makes it easy to select the correct replacement belt.
- Complete application catalog also furnished.
- Six 4 ft. metal racks.
- Belt number tags.
- 4 ft. header sign.
- One each in the top 70 sizes included.

NOTE: Pegboard and gondola not included

Thermostat, Gasket & Radiator Cap Cabinet Fuel Cap Cabinet

Attractive displays keep products neatly organized. These cabinets are attractive and eye-catching, as well as rugged and durable. The thermostat cabinet comes with a wall mountable gasket board to organize your gaskets. Both cabinets have room to add part numbers beyond the basic 80 percent coverage, whether new numbers or for a specific need. Sturdy Steel construction for prolonged life and durability.

(Part No. 91116 Stat, Gasket & Rad. Cap Cabinet* includes gasket display board)

(Part No. 91117 Fuel Cap Cabinet)

A-frame Curved Hose Racking

Maximize your space with A-frame curved hose racking. A-frame Racking is an easy-to-assemble, efficient and economical storage system for both belts and hoses. This racking is the most practical way to keep stock right at your fingertips without crowding your valuable storage space. The racks are free standing and hold over 300 different hoses.

- Each Kit Contains: Eleven (11) – 8 foot sections of Dexion girder and Two (2) – 24 inch sections of Dexion girder

Dimensions: H 7.5', W 2.5', L 8'

(Part No. 91516)

Barricade™ Fuel Line and Vacuum Tubing Merchandiser/Assortment

Attractive, metal cabinet with heavy gauge plastic see-through cover comes assembled. Holds and dispenses twelve reels of fast-selling Gates Barricade™ Fuel Line, EEC and PCV hoses, or tubing for windshield washers and vacuum-operated accessories.

- Contains 12 fast-selling hose sizes on individually mounted and replaceable reels.
- Handy measuring scale printed on lid makes it easy to measure exact size of hose needed.
- Can be displayed on counter or mounted on wall.
- Attached chain designed to hold hand-held hose cutter.
- Base dimensions are 16"D x 19-1/2"W x 18"H.

NOTE: Combine this merchandiser with the Heater Hose Merchandiser below to create the modular "Hose Center" shown below.

(Part No. 91184)

(Part No. 91183 - Display only. Charge Item)

Replaces the 91158/91159 rack.

Hose Cutters (Hand-Held) and Replacement Blades

Makes clean cuts - no ragged edges. Cuts most non-metal reinforced rubber hoses up to 3" I.D. Excellent for cutting thin walled flexible pipe, PE and PVC pipe (up to 1 1/2") used in sprinkler systems.

- Lightweight with nylon handles.
- Blade closes into handle for safety.
- Use small cutter for hoses up to 1 1/2" I.D.

Packaging: Cutter and blades individually packaged on shrink-wrapped cards ready for pegboard display.

Hose Cutter	Description	Replacement Blade	Cuts to Hose I.D.
91143	Large I.D. Hose Cutter	91144	3"
91153	Small I.D. Hose Cutter	91154	1 1/2"

All charge items

Belt Wear Gauge

Unique tool designed to help inspect serpentine belts for wear. EPDM belts, installed by original equipment manufacturers on new equipment, typically do not show obvious signs of wear such as cracking. Like tires, EPDM belts wear out gradually, steadily losing rubber material.

Contact your local Gates representative to receive your tool.

(Form No. 443-0375)

Conversion Chart

This tool was specifically designed to measure Micro-V AT® Belts. Belts other than Micro-Vs can be measured by following instructions printed on this card.

- Comes attached to each Micro-V AT Belt Length Finder.
- Card is laminated for long service life.

(Form No. 428-1800)

Merchandisers and Sales Aids

V-Belt Number Finder

Versatile device helps determine replacement belt numbers for cars, light trucks, heavy trucks, buses and Truflex®/PowerRated® light-duty belts... when old belt is available.

Packaging: Individually cartoned

For automotive and light-duty belt applications, see Gates Catalogs and Owners' Manuals to verify recommended replacement parts.

(Part No. 91201 - Belt Finder. Charge Item.)

Micro-VAT® Belt Length Finder

Handy tool measures every serpentine belt made to help determine replacement belt for cars, light trucks, buses, heavy trucks and other equipment.

- Telescopes out to measure up to 120" belts. Compact 3 ft. length when closed.
- Accurate, lightweight and easy to use.

Packaging: Individually cartoned

For specific applications and recommended replacement belt numbers, see Gates Catalogs and Owners' Manuals.

(Part No. 91202 Finder. Charge Item)

Truflex® and PowerRated® Belt Length Finder

Improved belt length finder measures fhp belts up to 107" to determine equivalent Truflex or PowerRated belt numbers.

- Instructions for using finder packed with unit.

Packaging: Individually cartoned.

(Part No. 91104)

Product Grabber (Telescoping Pole)

Easy product hanging and retrieval from belt boards that are installed high on walls.

- 4' pole, extends to 11'
- Extra long 8" hook for extended reaches

(Part No. 91233)

Merchandisers and Sales Aids

Power Steering & Alternator Pulley Kit

Designed to remove and install press-on-type belt driven accessory pulleys found on most vehicles.

- Kit includes components necessary to remove and install pulleys on pumps with common 3/8-16 threaded shaft.
- Includes unique interchangeable components to remove and install pulleys on GM Quad 4, 3.1L, and Ford 4.6L engines.
- Designed to be used with either hand tools or air impact gun.
- Kit includes special holding bar to stop housing from spinning during use with impact gun.

(Part No. 91014)

TubeMedic® Radiator Overflow Repair Kit

Offers a unique method of repairing or relocating radiator overflow spouts without removing or disassembling radiator. With kit, technicians can remove broken overflow tube, cut a new hole and O-ring seat, and replace tube in about five minutes.

- Five-pack refill kit is also available (part no. 91005).

(Part No. 91004)

Airlift™ Cooling System Vacuum Fill Tool

Gates Airlift tool places a vacuum on system, filling it to 100 percent capacity in seconds. Unlike other tools, Gates Airlift tool also has a unique cone design that fits all applications without adapters.

- Eliminates trapped air from cooling system.
- Trapped air can destroy an engine, causing corrosion, hot spots, loss of circulation, poor thermostat operation, poor heater output and water pump cavitations. Many vehicles have specialized air-bleeding procedures that are difficult and time consuming.

(Part No. 91003)

Coolant & Battery Refractometer

Measures concentration of coolant mixture in engine. Place small sample of coolant on lens, then hold lens up to light source. Light bends through liquid, providing an accurate reading on scale.

- Measuring coolant concentrations is essential to cooling system maintenance.
- Most technicians use hydrometers to test coolant concentration via gravity or floating ball scales.
- Hydrometers must be temperature corrected, and may give false readings when testing new, propylene-based coolants.
- Gates refractometer automatically corrects for temperature on both types of coolant (ethylene and propylene glycol) while also measuring battery charge levels.

(Part No. 91001)

Tools to help you install Gates products.

Heavy-Duty Ratcheting Serpentine Wrench

Designed for restricted areas where radiator hoses, charged air cooler pipes, hydraulic lines and frame rails often interfere with maintenance.

- 27-tooth ratchet for better tool positioning and more swing than standard serpentine belt wrenches.
- Reversible ratchet head is only 1" thick to fit between tensioner face and fan blades.
- Great for buses and delivery vans.
- Works on any serpentine belt tensioner with a 1/2" square drive opening.

(Part No. 91012)

Serpentine Belt Tension Relief Tool

Ideal tool for removing and installing serpentine belts. Provides necessary leverage and clearance to release spring pressure and move tensioner pulley arm.

- New 3-bar design includes seven sockets (13mm, 14mm, 15mm, 16mm, 18mm, 3/8" and 1/2").

(Part No. 91015)

Serpentine Ratcheting Wrench Set

Provides fast way of releasing tension on serpentine belt drives. Reversible, 21-tooth ratcheting heads on each end allow for better tool positioning and more swing than standard serpentine belt wrenches.

- Wrenches are 21-1/2" long, 6" longer than competitive designs for increased leverage.
- Includes eight sizes for maximum application coverage: 13mm, 14mm, 15mm, 16mm, 17mm, 3/8", 1/2" and 3/4."

(Part No. 91011)

Belt Installation Tool

Time-saving tool affords control and reach when installing serpentine belts. Also helps install V-belts and timing belts located in difficult-to-reach areas.

- Two pin design affords convenient belt push/pull capability.
- Tool's handle lends easy twisting control of belt in hard-to-reach places.

(Part No. 91209. Charge Item)

Micro-V® Stretch Fit® Belt Installation Tool

Installation tool for Gates' Micro-V® Stretch Fit® belts. If the right tools are not used, the belt can be damaged.

- Installation instructions printed on inside of each belt sleeve

(Part No. 91030)

Professional-Grade Tools

DriveAlign™ Laser Alignment Device

Exclusive, patented tool is compatible with all automotive serpentine belt drives. Quickly identifies two most common types of pulley misalignment – parallel offset and angular – that reduce belt and pulley service life and produce unwanted noise. Simply position tool within grooves of pulley and aim laser beam at opposite pulley.

- Lightweight, easy-to-use tool includes special laser enhancement glasses for easy viewing in all light conditions.
- Comes with high-impact resistant carrying case.

(Part No. 91006)

KrikIt® II Micro-V AT® (V-Ribbed) Belt Tension Gauge

Designed for tensioning V-ribbed belts on passenger cars, light trucks, heavy trucks and buses.

- Bright green Pressure Pad and Indicator Arm.
- Calibrated to measure tension from 100 to 320 lbs., and 50 to 150 kg.
- Measure belts up to 8 ribs in width.

Packaging: Individually boxed.

(Part No. 91132. Charge Item.)

KrikIt V-Belt Tension Gauge

Use for tensioning all automotive V-belts up to, and including, 7/8" top widths. Easy to use.

- Scale reads in pounds and kilograms. Measures tension from 30 to 160 lbs., and 15 to 75 kg.
- Die-cast aluminum body, nylon Indicator Arm and Pressure Pad.
- Fits in pocket like a pen. Has stainless steel pocket clip.

Packaging: Individually boxed.

NOTE: Not for use on timing belts.

(Part No. 91107. Charge Item.)

Cam Gear Sprocket Tool

Gear holding tool provides safe, effective means for holding gear while removing and reinstalling belt or sprockets without damaging gears, cams or valves. Many engine-timing procedures require camshaft to be held in position while gear or belt is removed from shaft to re-align cam timing position properly.

- Tool can also be used to turn gears during timing alignment.
- Essential tool for many timing belt, pump adjustment and engine timing applications.

(Part No. 91008)

Multi-Lock Tool

Multi-Lock tool “locks” twin camshafts in place during timing belt replacement or engine overhaul.

- Fits onto sprockets and extends to hold sprocket teeth. Incorporates “variable pitch” adjustable arms to fit various diameters and tooth pitches.
- Unique design is fully adjustable to fit numerous applications including diesel injector pump sprockets and sprockets that are positioned closely together like those on Mitsubishi or GM EcoTec engines.
- Ratchet locking handle provides compact, strong lever action for secure positioning.
- Also includes extension bar for wider spaced cams (\$25 value).

(Part No. 91009)

Timing Belt Tension Tester

Provides a precise method of testing timing belt tension on a variety of automotive applications.

- Gates tension tester will test any timing belt up to 30mm wide, thus replacing several expensive tools.
- Comes with adapters for varying belt thicknesses.
- Uses force deflection method to measure tension.
- Compact design works in tight engine compartments.
- Scale can be read in any position. Includes coupon for free timing belt installation CD-ROM.

(Part No. 91000)

Hydraulic Tensioner Pin Set

A Gates exclusive that's a must have for every technician. Timing belt tensioners need to be compressed during service. Many technicians use a drill bit or allen wrench to hold tensioners in their compressed state, which can be dangerous and may bend or damage tools.

- Hardened spring steel to hold the strongest tensioners.
- Conveniently mounted on key chain with six different sizes to service a variety of applications.
- Holds certain serpentine belt tensioners and timing chain tensioners in place,

(Part No. 91010)

Professional-Grade Tools

Hydraulic Hose, Fittings and Equipment

Gates offers a full line of hydraulic hose and fittings for: agriculture, trucking, mining, construction, excavating & manufacturing. Gates also offers products for specific applications, such as hose for car washes, pressure washers, or porta power applications. For a complete listing of Gates Hydraulic Hose and Fittings see the current 431-2080 catalog.

Part No. 91017

SureLok™ Quick-Release Pliers

SureLok™ couplings (Push-to-Connect) are the easiest and quickest coupling to install. Disconnecting them can be another thing. Placement near obstructions, as well as age and road debris, affect your ability to disconnect the SureLok coupling. Many times getting hands into an area to remove a coupling is almost impossible.

For these reasons Gates is offering SureLok Pliers.

SureLok pliers allow for the removal of a Push-to-Connect coupling from the tubing in seconds with just one hand. To help get into those tight spaces, SureLok pliers offer two different heads; one straight and one with a 90° offset. They also come in two sizes: Small, for tubing from 1/8" to 3/8"; and Large, for tubing 3/8" to 3/4". An instructional CD is included with each part number.

Sold as single units, packs of two (Large or Small), as well as all four in a handy carrying case.

Single Units

Small

Part No. 91023, Straight

Part No. 91021, Angle

Large

Part No. 91022, Straight

Part No. 91020, Angle

Gates Bend-N-Fit™ Tube Bender

Product Number: 7468-1040

Simply and easily duplicates bent tubes:

- Power Steering
- Air Conditioning
- Transmission Oil Cooler
- Fuel Lines
- Plus many more applications

Bends SAE tubing as well as metric tubing – without changing any tooling — in the following sizes:

1/4" 5/16" 3/8" 1/2" 6mm –13mm

One-handed Operation

Load tubing by pushing in on Tubing Lock Release.

- Pull down on Tubing Lock.
- Load tubing into proper size bending slot.
- Close Tubing Lock until it snaps into place. (Tubing Lock must snap for the tube to be firmly supported and for the tube to bend properly.)
- Close the tube support slide onto the tube.

Top of bender is segmented into 7 1/2° marks. This aids in precision bends. Original tube can be used as a pattern by measuring bends or by holding old tube above bender.

IMPORTANT: Be sure the mark on the tube support slide lines up with the zero on the top of the bender. Not lining up with zero will cause notching or creasing of the tube.

- Push handle sliding Tube Support Slide across tube to make your bend.
- Once you've made your first bend, rotate handle out of your way.
- Push in on Tubing Lock Release.
- Pull down on Tubing Lock.
- Remove tubing and reorient for next bend.

Both the Tube Slide and Tube Lock move completely out of the way. This allows for bends in multiple planes.

Tubing Lock

Tubing Lock Release

Notes

Micro-V[®] Belt Installation

At first glance, serpentine belt systems appear much more complicated than they actually are. With a basic understanding of the system, and a few simple rules, serpentine belts are easy to install.

Most vehicle manufacturers have anticipated potential difficulties that may occur when installing a serpentine belt. Such as:

1. Belt routing.
2. Which pulley moves to adjust belt tension.

Thanks to vehicle manufacturers, the installer will usually be able to find this information on a routing decal located on or near the engine. Belt routing can also be found in some owners' manuals. The decal diagrams belt routing around pulleys, and usually indicates direction of movement for the tensioner pulley.

If routing decal is absent, these simple rules may be helpful to the installer.

1. The v-grooved side of the belt meshes with the pulley grooves.
2. The belt basically encircles the pulley system, and is drawn in and looped around smooth pulleys.

3. Usually there is only one pulley that can be threaded incorrectly. That pulley is always near the center of the pulley group, and is always a smooth pulley (no grooves).

IMPORTANT: This publication is designed strictly as a serpentine belt installation tool. The drives listed in the Routing Guide section of this publication are the same as those in the application catalogs designated as serpentine ...except **Routing Diagrams** are referenced rather than belt part numbers.

Micro-V[®] Belt Installation — continued

4. If the belt appears too short or long to be installed, it is probably threaded the wrong way around the pulley mentioned in step 3.

If this routing doesn't work...

try this.

5. Belt should be seated into all pulley grooves and belt spans free of contact with engine components.

With belt routing solved, the tensioner must be located along with its direction and manner of movement.

Serpentine belts are usually tensioned by a spring loaded idler pulley contacting the smooth backside of the belt. The powerful spring that provides tension is located within a small cannister-like housing near the pulley. The pulley pivots around the spring housing.

Spring loading on the tensioner pulley is sufficient to require a lever to pivot pulley away from belt. Manufacturers often provide a small square hole near the pulley or spring container so that a socket driver can be used to pivot pulley.

Rotate tensioner
in direction of
arrow to remove
or install belt

Square Hole

Spring
Cannister

Tensioner
Pulley

If square hole is not present, tensioner pulley can sometimes be pivoted by using a socket wrench on the pulley centerbolt.

Rotate tensioner

or install belt

Centerbolt

Tensioner Pulley

Micro-V[®] Belt Installation

— continued

A - Some 1986-79, V-8 Fords have a special hole on top of the spring cannister where a pry bar can be inserted to relieve tension.

B - Other 1986-82, V-6 Fords use a jackscrew tension adjustment. This system works by simply turning jackscrew in or out to increase or decrease tension.

C - 1988-81, 6-cyl. American Motors vehicles are tensioned at the alternator. There is no spring loading. The alternator pivot and slot bolts must be loosened to pivot alternator.

Belt Tension Ranges for Manual Tensioners

Always use a belt tension gauge that indicates static tension, such as the Krikit Tension Gauge, Part Number 91132, to determine proper tension from the Installation Chart. Many Micro-V belts are automatically tensioned by a spring-loaded automatic tensioner, which does not require the tension to be set.

The tension ranges below are used for applications requiring manual tensioning.

- For drives with manual take-up on locked-center drives, position the belt and set tension to the prescribed Installation Tension.
- Run belt for five minutes
- If belt tension drops below Suggested Tension range, retighten belt to the Installation Tension. This will allow the belt to seat-in and run at Suggested Tension after it has operated under normal driving conditions.

Number of Ribs	Suggested Tension (lbs.) Ranges	Installation Tension (lbs.) Used Belts	Installation Tension (lbs.) New Belts	Number of Ribs	Suggested Tension (lbs.) Ranges	Installation Tension (lbs.) Used Belts	Installation Tension (lbs.) New Belts
3	45-60	67.5	90.0	9	135-180	202.5	270.0
4	60-80	90.0	120.0	10	150-200	225.0	300.0
5	75-100	112.5	150.0	11	165-220	247.5	333.0
6	90-125	135.0	187.5	12	180-240	270.0	360.0
7	105-145	157.5	217.5	14	210-280	292.5	420.0
8	120-160	180.0	240.0				

NOTE: A belt is considered “used” once it has been “run-in”.

Micro - V[®] (Serpentine) Belt Routing Diagrams

If no routing decal is present in the engine compartment or there is no diagram in the vehicle owner's manual, the diagrams below can be useful in installing a new belt. Some other tips to keep in mind:

- 1) The V-grooved side of the belt meshes only with grooved pulleys. 2) The belt basically encircles the pulley system and is drawn inward by smooth pulleys to tension or increase belt wrap. The water pump is also generally run by a smooth pulley.
- 3) There is usually only one pulley that can be threaded incorrectly. In this case the belt will appear too short or long and most likely the belt has been routed on the wrong side of a smooth pulley; i.e., the grooved side of the belt is riding on a smooth pulley.
- 4) The belt should be seated into all pulley grooves and spans free of contact with engine components. Installing the belt off one rib on a pulley is a common mistake and will cause an early failure.

Serpentine belts are usually tensioned by a spring loaded automatic tensioner whose idler pulley comes into contact with the belt. Special tools are available for quick belt installation but a breaker-bar or socket wrench can generally be used to pivot the tensioner arm allowing the belt to be removed or installed. Always check the tensioner and system pulleys for wear or "play" and replace if necessary.

☆ Interference Engine Application. See Inside Back Cover.

◇ See Pages 4-76 for Micro-V® Belt Routing Guide.

✦ Protective Sleeve Required. Use OEM Sleeve or Other Abrasion/Heat Protection.

* Does Not Include Cam. Tensioner Hyd. Assy.

▲ Kit - Does Not Include Water Pump or Seals.

⊙ Two Required.

⊚ Three Required.

⊛ Four Required.

≈ Cut To Fit.

✦ Kit - Includes Seals.

● Vulco-Flex® Coolant Hose.

▼ Does Not Include Pulley.

* Use Durion® Silicone Heater Hose.

⊙ Connector Required.

* Kit - Includes Water Pump.

☆ Interference Engine Application. See Inside Back Cover.

◇ See Pages 4-76 for Micro-V® Belt Routing Guide.

◆ Protective Sleeve Required. Use OEM Sleeve or Other Abrasion/Heat Protection.

* Does Not Include Cam. Tensioner Hyd. Assy.

▲ Kit - Does Not Include Water Pump or Seals.

⊗ Two Required.

③ Three Required.

④ Four Required.

⊗ Cut To Fit.

◆ Kit - Includes Seals.

● Vulco-Flex® Coolant Hose.

▼ Does Not Include Pulley.

* Use Durion® Silicone Heater Hose.

⊗ Connector Required.

* Kit - Includes Water Pump.

☆ Interference Engine Application. See Inside Back Cover.

◆ See Pages 4-76 for Micro-V® Belt Routing Guide.

✦ Protective Sleeve Required. Use OEM Sleeve or Other Abrasion/Heat Protection.

* Does Not Include Cam. Tensioner Hyd. Assy.

▲ Kit - Does Not Include Water Pump or Seals.

② Two Required.

③ Three Required.

④ Four Required.

⑤ Cut To Fit.

✦ Kit - Includes Seals.

● Vulco-Flex® Coolant Hose.

▼ Does Not Include Pulley.

* Use Durion® Silicone Heater Hose.

② Connector Required.

* Kit - Includes Water Pump.

☆ Interference Engine Application. See Inside Back Cover.

✦ See Pages 4-76 for Micro-V® Belt Routing Guide.

✦ Protective Sleeve Required. Use OEM Sleeve or Other Abrasion/Heat Protection.

✦ Does Not Include Cam. Tensioner Hyd. Assy.

▲ Kit - Does Not Include Water Pump or Seals.

Ⓢ Two Required.

Ⓢ Three Required.

Ⓢ Four Required.

✦ Cut To Fit.

✦ Kit - Includes Seals.

● Vulco-Flex® Coolant Hose.

▼ Does Not Include Pulley.

✦ Use Durion® Silicone Heater Hose.

Ⓢ Connector Required.

* Kit - Includes Water Pump.

✦ Protective Sleeve Required. Use OEM Sleeve or Other Abrasion/Heat Protection.

★ Does Not Include Cam. Tensioner Hyd. Assy.

▲ Kit - Does Not Include Water Pump or Seals.

② Two Required.

③ Three Required.

④ Four Required.

≈ Cut To Fit.

✦ Kit - Includes Seals.

● Vulco-Flex® Coolant Hose.

▼ Does Not Include Pulley.

★ Use Durion® Silicone Heater Hose.

② Connector Required.

* Kit - Includes Water Pump.

XL® Belts Listed by Number

Showing Belt Numbers with Corresponding Nominal Outside Lengths, Top Widths and Angles

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Competitive V-Belt

Our V-Belts with
"Vertical Flats"

XL[®] Belts

Listed by Width and Length

Showing Nominal Belt Top Widths, Outside Lengths and Angles with Our Corresponding Belt Numbers

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Competitive V-Belt

Our V-Belts with "Vertical Flats"

Length (in)	Length (mm)	Angle	Belt No.	Length (in)	Length (mm)	Angle	Belt No.	Length (in)	Length (mm)	Angle	Belt No.

Green Stripe® Truck and Bus V-Belts Listed by Number

Showing Belt Numbers with Corresponding Nominal Outside Lengths, Top Widths and Angles

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Competitive V-Belt

Our V-Belts with
"Vertical Flats"

Green Stripe® Truck and Bus Powerband®

Belts Listed by Number

Showing Belt Numbers with Corresponding Nominal Outside Lengths, Top Widths per Strand and Angles

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Free Running or Interference Engine? You and Your Customers Need to Know.

Automobile engines can be classified as either Free-Running or Interference, depending on what occurs if piston/valve synchronization is lost.

As illustrated below, in the free-running engine with the crankshaft still moving, there is enough clearance between the valve and piston, even if the cam stops with a valve fully open.

However, interference engines usually sustain damage if synchronization is lost. As illustrated, disrupted synchronization allows the piston and valve to collide causing damage and very expensive repairs for the vehicle owner. Damage can occur to valves, pistons, or heads, and in some cases, completely ruin the engine. Most import (with higher compression engines) and most car and light truck diesel engines are interference. To avoid costly engine repairs, follow the auto manufacturers' mileage replacement recommendations or we recommend timing belt replacement at around 60,000 miles.

Free Running
No Valve/Piston Interference

Interference
Valve/Piston Interference

NOTE: For your convenience, interference engines have been footnoted with a star in the application listings of this publication. This lets you easily identify them, and pass that information on to your customers.

Since timing belts are inside the engine they tend to be an out-of-sight, out-of-mind item and are seldom thought of as a part of routine maintenance. Here are some questions to ask customers that will help sell belts and protect the customer from expensive repairs:

1. Did you buy the car new? If yes, they'll know if the belt has ever been replaced.
2. Did you buy the car used? If so, they won't know if the belt has been replaced. This is a flag for the customer to get the belt checked, replaced or at least be aware that he has a timing belt.
3. How many miles are on the vehicle? Generally belts should be replaced at around 60,000 miles or less. Our Timing Belt Replacement Recommendations Booklet is an excellent tool for determining replacement intervals.
4. Have you ever replaced the timing belt? If the answer is yes or no (and the customer knows the mileage) you can determine where the vehicle is in the replacement cycle.

Here's a helpful hint for customers with vehicles within a few thousand miles of the recommended replacement interval. If they are having any engine repair done, have the timing belt checked. If it needs replacing, do it along with the other repairs and save time and money
