## Switchboards

#### GE Fastrac Program Service Switchboards

GE Fastrac Program includes the full range of Switchboards in a variety of ratings and configurations.

Product is available from six regional manufacturing locations! Lead times of 2 weeks to 4 weeks available!

Contact your local GE sales office for more details.

## New from GE!

- -New Record Plus Breakers available in Switchboards!
- —30 Cycle 65kAIC ratings available contact your local GE sales office for details!

For more information on these products, order publications from Sections 24 and 25.

## Switchboards Group Mounted Switchboards GE GenTower Generator Switchboard

## **Product Introduction**

For customers who wish to provide their facility with power assurance in the event of a utility failure or onsite generator failure, the new GE GenTower offers a stand alone, permanent solution. It provides end customers the ability to easily connect a mobile generator to feed the main power distribution system in the event of a total power failure. Because the board is permanently installed to the system, there is no need to make emergency modifications to the building or main distribution board to connect a generator during the crisis or outage. This saves the building owner both labor costs and costs associated with down time at the facility.

The GenTower disconnect can be rated up to 4000 amps and it can be connected to the existing equipment either by cabling to the lugs on the main board (provided tap connections are in place), with hard bus connection (to an approved existing GE Switchboard) or through a feeder breaker in the main board. The stand-alone version comes standard with a NEMA 3R enclosure, which offers the flexibility to install it at any location that may be easily accessed by a mobile generator. It meets UL 891 requirements, and in new installs it can be included as a section within a standard Spectra Series Switchboard line-up. It is a logical solution for any commercial or industrial installation where the customer needs the ability to easily connect a portable generator during a prolonged power outage, or at a time when the on site generator is out of service for maintenance.

## **Product Features and Benefits**

- -Provides a permanent connection point for a portable emergency generator
- -Generator disconnect device ratings up to 4000 amps at 65k AIC
- Connection options include color-coded, cam-lock quick connects and traditional lugs
- -Cable supports help maintain proper connection of cables to quick connects
- –NEMA 3R enclosure is standard for stand-alone units, optional for integral units
- A hinged trap door allows NEMA 3R protection while cables are connected to the board
- -GenTower can be cabled to main switchboard (provided tap connections are in place) or direct bus-connected in certain applications
- –GenTower can be offered as a section in a new Spectra Series Switchboard to provide an integral solution
- -Sequence of operation clearly displayed on front cover
- -Can be installed anywhere space allows, providing options to choose the best location for mobile generator access
- —Reduces cost and inconvenience associated with providing temporary generator power such as: modifying the existing switchboard and/or the building, and running cable from the generator to the main board

- Reduced down time provides quantifiable productivity savings for the customer
- For safety, the generator disconnect is furnished with provisions to be key interlocked with the main breaker on the typical Switchboard line-up
- -Voltages include 120/208V or 480/277V
- –Rear access versions: 800A, 1000A, 1200A, 1600A, 2000A and 2500A
- -Front access versions: 800A, 1000A, 1200A, 1600A, 2000A, 2500A, 3000A and 4000A
- -Single section 30"W x 35"D x 90"H (approx. weight 1,115 lbs)
- -Double section 75"-80"W x 30"- 40"D x 90"H (approx. weight 3,400 lbs)
- -Available 10" front extension

## Section 10

## Switchboards Group Mounted Switchboards Merchandised and Metering Jiffy II-Spectra® EUSERC West Coast Utility Applications

The GE Jiffy II® Service Entrance Switchboard is designed especially to address the requirements of your small project needs. The compact unit combines the electrical distribution panel, the main service disconnect and the utility metering compartment into one space-saving unit, delivering maximum installation opportunities.

The switchboard is floor mounted and rated up to a maximum 1000A, 100kAIC @ 480V. At 25" deep, the electrical distribution board easily fits into the tightest areas. A full line of field installable digital solid state electronic trip molded-case breakers is also available. With a combination of superior features and options, the GE Jiffy II® not only meets your space saving needs, but also offers total flexibility in design to meet the requirements of the project.

#### **Primary Features**

- —Switchboard Styled NEMA Type 1 Indoor or NEMA 3R Enclosure
- -1000A Heat Rated Bus Max. 100kAIC @ 480V Max.
- -Ground Fault Protection Optional
- –Left or Right Hand Pull Sections
- —Top or Bottom Feed
- -UL, EUSERC Approved
- —14X, 18X, 23X of Device Space for Feeder Breakers, Bolt-on Construction
- -Seismic IBC Zone 4, CBC Zone 4, UBC Zone 4
- -Heat Rated Aluminum or Heat Rated Copper Bus
- –Accepts Aluminum or Copper Incoming Cable
- -35"W Bolt-on (45"W Plug-in) x 90"H x 25"D (Main Only)
- -35"W x 90"H x 25"D (Bussed Pull Section)
- —Add 11" Depth for NEMA 3R

## Switchboards Group Mounted Switchboards Merchandised and Metering Jiffy II-Spectra®

EUSERC West Coast Utility Applications

## Instructions

- -Drawings Included (Feed to Right STD)
- -Be sure Utility Kit Size matches Distribution Section
- -Fused Switch Distribution Section 45"W
- -Fused Distribution Service Disconnect only
- —No Fusible Main Device available

 —23X Spectra® Interior available for Distribution
 —For Meter Main applications use suffix MM; includes Add On Lug Kit

**Example:** JF63BAW-MM Jiffy Switchboard 600A Bottom Feed, Aluminum Bus, NEMA 3R, 600A Fused Switch Only, No Distribution

## Fused Switch MLO Service Disconnect (6 Handle Rule) 45"W

## Section 10

## Switchboards Group Mounted Switchboards Jiffy III Switchboards

## **Product Introduction**

The GE Jiffy III Utility Service Entrance Switchboard is designed especially to address the Canadian market. The compact unit combines the electrical distribution panel, the main service disconnect and the utility metering compartment into one space-saving unit, delivering maximum installation opportunities.

The switchboard is floor mounted and rated up to a maximum 1200A, 42 kAIC @600V. At 15" (381 mm) deep, the electrical distribution board easily fits into the tightest areas where space is typically limited. The Jiffy III is UL and cUL<sup>1</sup> approved and meets the seismic requirements of IBC Zone 4 and CBC Zone 4.

Designed and approved specifically for the Canadian Utility Market<sup>2</sup>, the Jiffy III is available with mains rated at 800A, 1000A and 1200A; 80% and 100% rated (with the exception of 1200A, which is 80% rated only); and with or without Ground Fault protection. A full line of field installable Digital Solid State Electronic Trip Molded-Case Breakers is also available. With a combination of superior features and options, the GE Jiffy III Utility Service Entrance Switchboard not only meets your space-saving needs, but also offers total flexibility in design to meet the requirements of the project.

## Features

- —Switchboard Styled, Type 1 Indoor Enclosure with Driphood (NEMA 1)
- -1200A-Heat Rated Bus max., 65kAIC @ 600V max.
- -80% and 100% Rated Main (1200A rated at 80% only)
- -Ground Fault Protection optional
- -Left or Right Hand Pull Sections-dependent on region
- -Top or Bottom Feed Main-dependent on region
- -UL, cUL approved
- -23X of Device Space for Feeder Breakers, Bolt-on Construction
- -Seismic IBC Zone 4, CBC Zone 4, UBC Zone 4
- —Heat Rated Aluminum Bus Bar standard with Copper Main Device Straps
- -Accepts Aluminum or Copper Incoming Cable
- -40" W (1016 mm) x 90" H (2286 mm) x 15" D (381 mm) (Main Only)
- -25" W (635 mm) x 90" H (2286 mm) x 15" D (381 mm) (Bussed Pull Section)
- -15" W (381 mm) x 90" H (2286 mm) x 15" D (381 mm) (Blank Pull Section)
- -Branch Feed-MCCB 15-1200A

<sup>1</sup>cUL certified to meet CSA 22.2 No. 31.

<sup>2</sup>Non-BC Hydro Utilities. Contact your local GE Sales Engineer for your utility requirements.

## Section 10

## Switchboards Group Mounted Switchboards

Commercial Metering Switchboard EUSERC West Coast Utility Applications NON-EUSERC Utility Applications Lever Bypass

GE Commercial Metering Switchboards are designed specifically to serve the EUSERC market in the western United States. In addition, they serve the NON-EUSERC markets with a Lever By-Pass arrangement. They are UL listed and labeled and offer a wide range of installation and performance features that simplify any project.

Metering sections are assembled with two sockets pre-wired on the line and load sides. All sockets are 200A continuous duty. A full selection of tenant mains are available including circuit breakers, fusible switches and T-Fuse pullouts.

#### Standards

Switchboard -UL 891 -NEMA PB-2 Meter Sockets -UL 414 -ANSI C12.7 Circuit Breakers -UL 489 Fused Switches -UL 98

# 

For application and size information, refer to publication DEA-340, internet address www.geindustrial.com, or contact your local Sales Office. For pricing support contact your local GE Consumer and Industrial Sales Office.

## **Other Key Features**

- -4000 main service, 480V maximum
- -Aluminum or copper bus
- -65,000A symmetrical bracing; standard 100K available
- -200A continuous duty sockets
- -Hot and cold sequencing is available
- -Type 3R construction available

#### **Available Sections**

- -Underground Pull Sections
- –Underground Pull Section with Main Switch
- -Underground Pull Section with Main Breaker
- –Overhead Sections with Main Switch or Breaker
- -CT Meter Sections with Main Switch
- -CT Meter Sections with Main Switch and Distribution
- -CT Meter Sections with Main Breaker
- -CT Main Sections with Main Breaker and Distribution
- -CT Meter Sections with Main Lugs
- -Auxiliary Sections (Wireways, Corner Sections)
- -Multi Meter Sections with Fusible Pullout Mains
- -Multi Meter Sections with Circuit Breaker Mains
- -Distribution Sections

## Switchboards **Group Mounted Switchboards**

## **Commercial Metering Switchboard EUSERC West Coast Utility Applications NON-EUSERC Utility Applications Lever Bypass Section Types**

-UL Listed, EUSERC, XCEL ENERGY Approved -208Y/120V or 480Y/277V; 100 kAIC -600, 800, 1000, 1200, 2000, 3000, 4000A

#### **Underground Pull Sections**

- -25" minimum depth
- -100 kAIC
- -Bottom feed
- -Cu or Al bus
- -NEMA 1 or 3R

## **Large Tenant Mains**

- -Hot Sequence Metering
- -SG, SK, PBII, THFP, HPC
- -25" minimum depth
- -Minimum widths:
  - -400A and 600A G Frame, 800A K Frame: 35"
  - -1000A and 1200A K Frame: 40"
  - -1600 and 2000A PBII: 40"
  - -400A and 600A THFP, 800A HPC: 35"
  - -1000A and 1200A HPC: 40"
- -Bottom or top exit
- -Device padlocking
- -Equipment ground fault protection on
- 1200A and 2000A (optional on lower amperages)
- -Mounting provisions for CTs
- -Isolating barriers
- -Hinged sealable cover
- -Transformer rated meter socket
- -Front access
- -Middle or bottom mounted neutral
- -Lever bypass meter sockets available

## **Tenant Metering**

- -Cold and hot sequences -Middle or bottom mounted neutral —Tenant mains SF, T-fuse pullout and FD1 -Ringless style meter sockets with J fuse constructions: -Lever bypass meter sockets available a) SF (100A, 200A) -Service entrance barriers  $\left( \right)$ -4000A maximum horizontal bus b) T-fuse pull out (100A, 200A) c) FD1 (100A, 200A) with J fuse -100 kAIC -3 Ph 4 W Service -Top and bottom feed exit С -3 Pole. 2 Pole disconnects -Test bypass block meter socket available -Ringless cover - NO hinge (ST only) -600A-4000A horizontal bus -3-pack 20" width, 6-pack 35" width -5, 7, 13 jaw sockets -25" minimum depth for top or bottom -Locking jaws exit-to 60" -Flash shields -Provisions for field installable socket and -Line lugs at top, load at bottom breaker additions -Small tenant meters: 3- or 6-pack -Front access -Main disconnects lockable in OFF position
- -100% rated neutral; standard ground rating

- -NEMA 1 or 3R enclosure
- Bottom feed
- -Cu or Al bus

## **Underground Pull Sections with Single Main Breaker**

- -400A-2000A
- -G, K and PBII circuit breakers
- -HPC and THFP fused switches
- -25" minimum depth
- -Device padlocking
- —SE barriers
- -Equipment ground fault protection on
- 1200A-2000A (optional on 400A-1000A) -Front access
- **Distribution Panel**
- -Interior 2000A, Cu bus, 100 kAIC
- -13, 18, 23X distribution space
- -Bolt-on and Plug-in
- —3Ph 4W
- -Spectra® main breaker or main lug only interior
- -CT compartment up to 2000A
- Front neutral access

## Section 10

## Switchboards Spectra® Series Switchboards Spectra® Integrated Switchboard Solutions

#### **Product Introduction**

Spectra® Integrated Switchboard solutions save time, money and space, yet sacrifice nothing in terms of safety, performance or flexibility. You get flexibility in design and consistency in execution. Units expand or contract to accommodate your specific needs. And not only do they reflect GE's rigorous Six Sigma quality standards, they are also built and tested in accordance with NEMA PB-2, UL 891 and the NEC. All sections and devices are UL listed and UL labeled.

## Features

Spectra® Integrated Switchboard solutions are custom designed and built to your specifications. You choose all the elements you need. Featured elements include:

- Power distribution
- -Energy management systems
- Building automation systems
   Automatic transfer switches
- —Surge suppression
- —Dry type transformers
- -Lighting controls

## Benefits

- -Save Space—Conventional electrical installations waste space. Lighting and power panels take up long stretches of wall. Transformers eat up floor space. Lighting controls and building automation have to go somewhere. Spectra® Integrated Switchboard solutions integrate all these elements into a fraction of the area.
- -Reduce Total Installed Costs—The Spectra® Integrated Switchboard solution packs virtually all your power requirements into one single integrated distribution and control system—a compact, plug-and-play line-up. This reduces installation costs while turning otherwise non-productive mechanical space into revenue-generating sales or storage space.
- -**Cut Installation Time**-Construction schedules have never been tighter. When you're ready to install electrical equipment, you want it done now, so that you can move on to the next step. Spectra® Integrated Switchboard solutions arrive with everything you need, and when you need it, fully pre-wired to your specifications. All you have to do is set it in place, run the incoming power and wire out the branches. Installation takes less than half the time.

## Typical Installation Steps for Spectra<sup>®</sup> Integrated Switchboard Solution

- 1. Bring conduits through floor
- 2. Receive single switchboard unit
- 3. Set switchboard in place (whether the room is complete or not)
- 4. Run conduits and wire branches

For pricing support contact your local GE Consumer and Industrial Sales Office.

## Switchboards Spectra® Series Switchboards Spectra® Integrated Switchboard Solutions

Lighting Panels

A-Series Panel type AQ, AL, AE, AD

## A-Series Panel Type AQ, AL, AE, AD

A-Series Panel Height	Switchboard Cover Height	
19	32	
25	32	
31	36	
37	40	
43	48	
49	60	
58	64	
70	76	

To determine A-Series Panel height (AQ, AL and AE only), refer to EQIP Sizing 2001.

#### **A-Series Panel Specifications**

Amperage	400 Amp maximum, MCB or MLO.
Voltage	600 Vac maximum
Int. Rating	65 kA max., fully or series rating.
Circuits	42 circuits maximum in each panel.
Section Depth	15" to 30"
Section Width	20" to 40"

Maximum panels heights in stack are 36"H and 48"H.

If 400 A panel serves as an incoming component then a 4" cover is necessary between the panel and either top (for top feed) or bottom (bottom feed)

If 600 A panel serves as an incoming component, then an 8" cover is necessary between the panel and either top (for top feed) or bottom (bottom feed)

The A-Series panels above 125A must be type M (equipment panel)

## Individual Transformer

**Dual Transformer** 

## Switchboards Spectra<sup>®</sup> Series Switchboards Spectra® Integrated Switchboard Solutions Stacking Lighting Panels with Transformer

## **Product Description**

Panel type	AQ, AL, AE
Panel height	37"H with MCB
Transformer type High-Efficiency, 3 Phase, 15 - 150 kVA	
Section size	In individual mounting, section depth and width
	depend on the transformer.
	In double mounting, minimum section width is 40W.
	Section depth depends on the transformer.

Transformers can be placed at the bottom of the section only.

Contact local GE Sales Engineer for Dual Mounted panels with different voltages.

Lighting Contactors and Relays

The minimum section depth required to mount a 463, 260L, or 360ML2 is 15"D. All other contactors require 20"D section. Total Box size includes the size of the contactor and necessary wire bending space required. Contactors are placed at the bottom of the section.

## Switchboards Spectra<sup>®</sup> Series Switchboards Utility Metering Compartments

## Section 10

The following utilities have approved the type of metering compartment shown. Compartments are available with the following features:

- -CT busbars mounted on high impact glass fiber polyester insulation and arranged in an edgewise plane.
- —Door with concealed hinges, 3-point catch and lock, handle seal over CT compartment: barriers rear and bottom (top). Note: The bottom barrier is furnished at top if main device is over CT compartment.
- -9" or 11" centerline standard. For other centerlines refer to factory.
- -CT bus bars drilled for transformers with NEMA terminations.
- -#10-32 and 1/4-20 screws for potential taps.
- -Removable links provided if part of utility requirements.
- -Type 1 Compartments have 9" centerlines
- -Type 2 Compartments meet EUSERC standards
- Type 3 Compartments have 11" centerlines, potential transformer space and mounting bracket if required.
- Cold sequence metering has CT compartment on load side of main device. Hot sequence CT Compartment is on line side.

See next two pages for utility company information matrix.

## Switchboards Spectra<sup>®</sup> Series Switchboards Utility Metering Compartments

Utility compartments are available with the following features:

- -CT busbars mounted on high impact glass fiber polyester insulation and arranged in an edgewise plane.
- —Door with concealed hinges, 3-point catch and lock, handle seal over CT compartment: barriers rear and bottom (top). Note: The bottom barrier is furnished at top if main device is over CT compartment.
- -9" or 11" centerline standard. For other centerlines refer to factory.
- -CT bus bars drilled for transformers with NEMA terminations.
- -#10-32 and 1/4-20 screws for potential taps.
- -Removable links provided if part of utility requirements.
- -Cold sequence metering has CT compartment on load side of main device. Hot sequence CT Compartment is on line side.

## Section 10

## Switchboards Spectra<sup>®</sup> Series Switchboards

Class I

#### Group-Mounted Main and Feeders Front-Accessible

- —1200A Mains maximum
- —1200A Feeders maximum
- -Rear alignment standard
- -Minimum depth 25"
- -Main lugs to 2000A
- -May be mounted against wall.

#### Main and Feeder Devices Group-Mounted

- —Molded case circuit breakers
- -Fusible switches type ADS available in (Spectra® only)
- –Spectra<sup>®</sup> RMS <sup>1</sup> Molded case circuit breakers
- –Spectra® RMS<sup>1</sup>
- Molded case circuit breakers with MicroVersaTrip<sup>®</sup> Plus or MicroVersaTrip<sup>®</sup> PM trip units
- -Current-limiting circuit breakers
- -Integral ground fault
- -Integral protective relay functions
- -Energy Management Connectability

## For pricing and application assistance, contact your local GE Sales Office

Class II

## Individually-Mounted Main, Group-Mounted Feeders Front-Accessible

- -5000A Mains maximum
- —6000A main lug
- -1200A feeders maximum
- -Rear alignment standard
- -Utility CT Compartments
- —Depths:
- Mains 25"-60"
- Feeders 25" minimum

## Mains Individually-Mounted

- –Power Break® and Power Break® II
- Insulated case circuit breakers
- 800-4000A
- with MicroVersaTrip® Plus
- or MicroVersaTrip® PM trip units
- -High pressure contact switches 800-4000A
- -WavePro low voltage power circuit breakers
- -Integral ground fault
- -Integral protective relay functions
- -Energy Management Connectability

## Feeder Devices, Group-Mounted

- -Molded case circuit breakers
- -Fusible switches type ADS
- –Spectra® RMS<sup>1</sup>
- Molded case circuit breakers
- -Spectra<sup>®</sup> RMS<sup>1</sup>
- Molded case circuit breakers with MicroVersaTrip® Plus or MicroVersaTrip® PM trip units
- -Current-limiting circuit breakers
- —Integral ground fault
- —Integral protective relay functions
- -Integral POWER LEADER® network communications

 $^1\!Available$  as 100% equipment rated for group mounted construction.  $^2\!For$  WavePro options, contact factory.

## Switchboards Spectra<sup>®</sup> Series Switchboards

## Section 10

#### **GE Spectra® Switchboards**

#### Class 1

	A	Available Dev	ices
Description	Function	Туре	Rating (Amps)
Group mounted—mains and feeders	Maria	MCCB	1200
Rear alignment standard	Main	QMR	1200
Front accessible	Candana	MCCB	1200
Max. 1200-amp mains—1200-amp feeders	reeders	QMR	1200

## Spectra® Class 2

		Available Devi	ces
Description	Function	Туре	Rating (Amps)
Individually mounted mains		MCCB	1200
Group mounted feeders		QMR	1200
Rear alignment standard		HPC	4000
Main section side or rear accessible standard	Main	PB/PB II	4000
Feeder sections-front access		WavePro	5000
Max. 4000-amp mains—1200-amp feeders		BPS	4000/5000 <sup>1</sup>
Utility metering compartment	Foodors	MCCB	1200
	Feeders	OMR	1200

<sup>1</sup> Not UL labeled.

#### Standards

GE switchboards are manufactured to meet specific quality standards using standardized components. They meet the following standard:

(a) Underwriters Laboratories No. UL891.

**Note:** GE switchboards are constructed to this standard as to enclosure, busing, wiring and clearances. Only switchboards or switchboard sections containing all UL Listed devices can be UL labeled.

(b) NEMA Standard PB2-latest issue.

(c) CSA (Spectra® Class 1 only)

#### Short-circuit Rating

The standard main or vertical bus in each switchboard is aluminum (copper optional) braced for an integrated equipment rating of 65,000 rms symmetrical amperes. When required, bus bars can be furnished braced for higher short-circuit currents (at additional price).

#### **Ground Bus**

Ground bus is furnished as standard.

#### Space and Busing for Future

When space only is required for future addition of any specified feeder device in a GE switchboard, corresponding vertical bus and blank filler plate will be furnished. (Device mounting hardware may be included.)

#### **Blank Space Only**

When blank space is specified for any class of GE switchboard, corresponding vertical bus, device mounting, and connecting straps will not be furnished.

For pricing and application assistance, contact your local GE Sales Office

## Switchboards Spectra<sup>®</sup> Series Switchboards

#### **Bolted Pressure Switches**

	Available (	Ratings	Contact Interrupting Rating Based on	Switch-fuse Combination at Switch-rated		
Туре	Continuous Amperes	ac Volts	Overload Unassisted by the Fuse	ac Volts With Class "L" Fuses		
Bolted Pressure Switches	800, 1200 1600, 2000 2500, 3000 4000 5000 <sup>1</sup>	240 and 480	"Open" — 12 X amp rating "Close-Open" — 6 X amp rating	200,000		

<sup>1</sup>Bolted pressure switch only; not UL labeled.

## Type ADS Fusible Switches<sup>2</sup>

		Fuse	Interrupting Rating rms
Amp Rating	UL Class	Description	Symmetrical amps <sup>3</sup>
	Н	One-time	10,000
	K5	Time-delay or Current-Limiting Non-Rejection	100,000
(30-1200)	J	Current-Limiting Rejection	200,000
	R	Current-Limiting Rejection	200,000
	L	Current-Limiting	200,000
	Т	Current-Limiting	200,000

<sup>2</sup>Available in Spectra® Series only.

<sup>3</sup>The interrupting rating of the fuse must equal or exceed the short-circuit rating of the switch. If it is lower, then the short circuit rating is the same as the fuse. Fusible switches have no short-circuit rating if renewable fuses are used.

## Estimated 400 Hz Interrupting Ratings for Power Break® II Breakers rms Symmetrical Amperes—Not UL Listed

Standard Break				
Frame Size (Amps)	Max. Rating Plug Ampacity <sup>4</sup>	120/240	277/480	346/600
800	600	6500	5000	4200
1600	1000	8500	6500	5000
2000	1200	8500	6500	5000
2500	1600	10000	10000	8500
Hi-Break®				
Frame Size (Amps)	Max. Rating Plug Ampacity <sup>4</sup>	120/240	277/480	346/600
800	600	10000	10000	6500
1600	1000	12500	10000	6500
2000	1200	12500	10000	6500
2500	1600	20000	15000	10000

<sup>4</sup> No additional thermal derating is required for above-maximum rating plug ratings for frame sizes noted. Note: 400-Hz interrupting ratings are based on engineering judgement, taking into consideration the operating characteristics of insulated case circuit breakers and the worldwide lack of test facilities to verify performance. Power+™ trip units and the energy management functions in MicroVersaTrip PM™ trip units are suitable for 50/60 Hz applications only.

## Switchboards Spectra<sup>®</sup> Series Switchboards

## Section 10

## Switchboard Sizing Considerations

Listed below are rules and arrangements that must be considered when sizing and dimensioning Spectra® switchboards.

Switchboard depth is the most variable of section dimensions as depth varies depending upon type and size of feed required; type, size, feed and combination of devices required; and the circuitry involved.

![](_page_35_Figure_5.jpeg)

![](_page_35_Figure_6.jpeg)

The dimensions shown in this publication are based on the following considerations:

- -Typical circuit and device arrangements as shown in Figure.
- -Lug or busway feed not exceeding the ampacity of the largest rated devices. For oversize lugs, a lug section may be required. See table 1 on page 10-37.
- —When two or more devices are involved in the same section, the section width and depth is to be determined by the largest of the devices.
- —Where bottom feed is involved, use reverse mounted or reverse fed devices, if possible. If not, a pull section may be required to prevent looping of bus bars, and to facilitate barrier replacement. See Figure 1 on page 10-37.
- —Where main lugs are involved spaces must be allowed for bending cable. Allow space at top (or bottom) of section per table 2 on page 10-37.
- —In combining lug space and devices there will be cases where it will not be possible to fit more than one device per section. When such space becomes critical refer to factory for alternate arrangements.
- For connection to substation transformers see page 10-41 for further sizing requirements.
- -Use of busway may dictate section dimensions. For busway locations and dimensions see page 10-42.
- -Dimensions for front accessible sections may be reduced if rear access is available.

## 6'-7" Handle Rule

The National Electrical Code (Article 380-8) requires that switches or circuit breakers shall be installed so that the center of the grip of the operating handle of the switch or circuit breaker when in its highest position is not more than 6'-6'' above the floor or working platform.

![](_page_35_Figure_19.jpeg)

## Wiring Bending Space

The National Electrical Code latest issue (Tables 373-6 (a and b) specify minimum wire bending space. A 14" unit height allowance as shown in Figure 3 will meet NEC requirements and provide wire bending space for front and rear accessibility. The 14" allowance for wire bending space may be utilized for metering (page 10-39), but not for devices. If there is rear access than it may be possible to reduce or eliminate the 14" allowance. Refer to factory.

![](_page_35_Figure_22.jpeg)

## Wiring Terminals (Lugs)

Pressure type lugs suitable for 250-600 kcmil aluminum or copper wire, are provided for short circuit ratings to 100,000A. Above 100,000A compression type lugs are provided.

When oversize lugs are required, a lug section with minimum width shown in Table 1 on page 10-37 may be furnished.

![](_page_35_Picture_26.jpeg)
#### **Bussed Pull Sections**

Section has cross bus that connects to adjacent main section bus. Section width and number of lugs are shown in table below.

#### **Table 1 Pull Section Dimensions**

Amperes	Number of Lugs per ø and N <sup>1</sup>	Section Width Minimum	Section Depth Minimum
800	3		
1000	4	25	25
1200	4		
1600	5	70	25
2000	6	50	25
2500	8	75	70
3000	9	22	30
4000	12	40	35

 $^{\overline{1}}$  50% Neutral will have one-half the lugs shown, 250-600 kcmil. Al or Cu wire.

#### **Pull Sections**

Pull section are available in widths and depths from fifteen inches (15") to sixty inches (60") in five inch (5") increments. Twenty inch (20") width is standard. Depth is same as main section. The pull section provides space for pulling and installing cables. It is also used with bottom feed where reverse feed or reverse mounted devices cannot be used. A barrier is provided for service entrance to meet NEC requirements. Busing and lugs are not provided.

### **Switchboards** Spectra<sup>®</sup> Series Switchboards Spectra<sup>®</sup> Series Low Voltage Transition Sections and Dual Voltage Switchboards

#### Low Voltage Transition Sections

Transition sections are required for connection of low-voltage Spectra® Series switchboards to all liquid-filled transformers, and not required for GE or SEPS open dry-type transformers from 500 to 2000 kVA. They are also required for connection of switchboards to motor control centers. Transformer and transition sections are always aligned on center of depth of both sections.

Transition section depth is determined by device and circuitry of service entrance section. Transformer depth can be either deeper, the same, or shallower than the transition section depth.

Note that the minimum allowable switchboard depth is 40".

For the 1500 and 2000 kVA, 95 BIL transformers, a 100-inch high transition section is required. The switchboard remains 90" high.

Transition sections are 15" wide except for 2000-3000 kVA which require 20" wide transition section.

#### Transition Section - -\_ \_ \_ Flange 38"-94" Transformer 40 Liquid 45 45"-55" 50' Dry Flange Shallower L Same L Deeper Center Line of Transformer & Transition Section

### Switchboards Spectra® Series Switchboards Spectra® Series Busway Entrance

The Spectra® Busway switchboard stub may connect to the switchboard top main bus or the line or load terminals of a device in the switchboard section into which it enters. All dimensions shown are to centerline of busway. When two busway runs enter a switchboard section, refer to factor. For busway entrance locations other than Spectra® Busway refer to factory.

#### Switchboard Stubs

Both top and bottom entrance is available, however, TFR is the recommended standard entrance position. Dimensions for bottom entrance are the same as top entrance. Note that TEL and TER entrance positions require a separate 15-inch wide switchboard adjacent to the switchboard main device for entrance.

#### Spectra<sup>®</sup> Busway Rating by Stack

No. of Stacks	Aluminum Bus Ampere Rating	Copper Bus Ampere Rating
1	225-2000	225-2000
	2500	3000
2	3000	4000
	4000	5000

#### Spectra® Busway Switchboard Equivalent Stacks

Stacks	Aluminum Bus Amps	Copper Bus Amps
	800	800
-	1000	1000
1	1200	1200
_		1600
		2000
	1600	2500
	2000	3000
2	2500	4000
	3000	
3	4000	5000

#### **Dimensions (inches)**

		"W" Dim.			"D" Dim.	
		Busway Stacks			Busway Stacks	
Stub Type	1	2	3	1	2	3
TFR	25	30	40	-	-	-
TFF	25	35	45	-	-	-
TEL, TER	-	-	-	1	1	1

<sup>1</sup>Refer to factory

Notes: TFR requires rear access or must be preassembled into switchboard before it is set into place Any feeder busway must be on extreme ends of switchboard with path ground, or consult factory.

## Section 10

### Switchboards Spectra® Series Switchboards Spectra® Series Conduit Entrance Space

#### **Group-Mounted Distribution Sections**

To find "A" dimension subtract 5" from width of switchboard section. To find "B" dimension subtract 9" from depth of switchboard section.

#### **Incoming Line Sections**

To find "A" dimension subtract 5" from width of switchboard section. See table for "B" dimension. "B" dimension is conduit entrance space available with neutral bus and device at extreme top or bottom.

Section Sizing

#### NEMA 3R Outdoor Enclosure Non Walk-In

NEMA 3R outdoor enclosures consist of standard indoor cubicles and components enclosed with a front frame and roof assembly to provide a weather resistant structure. Any number of sections may be bolted together. However, all sections must be of the same depth.

Standard outdoor construction consists of:

- —Flat roof
- -Section height 91"
- -Floor sills 1.5"
- -Front and rear venting
- -Galvanized end caps, front/rear louvered doors and rear covers
- -Standard screen behind louvers
- -Single door 15"W 35"W
- -Double door 40"W 60"W
- -Wind stop on each door
- -3-point catch with provisions for padlock
- -Front extensions: non walk-in 5" and 10", walk-in 35" and 40"
- -110 mph wind rating

Options available are:

- -Gasketing
- -Fluorescent light, 120-volt, 15-amp and grounded convenience outlet
- -Rodent guards
- -Rear doors same as front with wind stops
- -Inside, movable, 4-way hoist and trolley (walk-in only)
- -Busway entrance
- -130 mph wind rating
- -Filters
- -Lifting brackets

<sup>3</sup>Section width is determined by widest main or feeder used; refer to Dimension tables on page 10-50.

#### Spectra® Distribution Bolt-on Switchboards

Distribution Bolt-on switchboard sections may be furnished in 20-inch depths when the following conditions are met:

- 1. Incoming feed enters switchboard section at opposite end from load cables–1200A max and no metering or ground fault.
- 2. Device "X" Height for incoming sections and feeder sections should be limited to 33X to provide adequate front access for line and load cable terminations.
- **3.** Branch devices are limited to circuit breakers shown on pages 10-49 and 10-50.

#### Class-1, Class-2 Feeder Section Dimensions

<sup>3</sup> Add 1X per double or single branch for internal accessories side control wiring space. (Shunt trip, auxiliary switch, bell alarm, undervoltage release).

<sup>4</sup>Breakers with MicroVersaTrip Plus™ trip units with optional control power require a Voltage Module.

## Section 10

### Switchboards Spectra<sup>®</sup> Series Switchboards Automatic Throwover Equipment

GE Zenith ZTS series automatic transfer switches are for use with electrically operated circuit breakers. They include the standard ZTS switch, the ZTSD delayed transition switch, ZTSCT closed transition switch and ZBTS Bypass/Isolation. ZTS are electrically operated, mechanically-held by a simple, over center mechanism. The components of the ATS are accessible for inspection and maintenance without removal of the switch or the power conductors.

Mechanical indicator and contact chamber cover are designed for inspection, safety and position designation. Logic devices including microprocessor control auxiliary time delays and special accessory equipment are assembled on the door for ease of maintenance and separation from the power section. The various functions of the switch are listed in the Standard Features table.

YEN	PB—Bypass T&W Times

S = STANDARD

<sup>1</sup>Please indicate choice when ordering—7 days provided unless otherwise specified.

These pricing pages are coded to indicate which shipment cycle the product feature qualifies for. The cycle category can be matched with quoted cycles from Equipment Plant Customer Service updates. The shipment cycle codes for group mounted switchboards are:

Code	Shipment Cycle	Explanation
S	Short	Limited product scope, very quick shipment
М	Mid	Larger product scope than short cycle
Ν	Normal	Standard delivery covering 80% of all product options
N+	Normal +	Special order items requiring additional lead time

The codes have two uses:

The **shortest shipment cycle possible** for a given proposition is the longest code associated with any of the options quoted, i.e., if everything falls under the "S" code except for one item which is "N", then the proposition should be quoted as a Normal Cycle delivery.

To **quote correct shipment cycle time,** match the longest shipment code to the current lead times published by Equipment Plant Customer Service.

## Section 10

## Switchboards Spectra® Series Switchboards

Incoming Line—Individual Sections (Plug-in and Bolt-on Styles)

#### Service Entrance Equipment (SE Label)

Switchboards used as service entrance equipment (maximum six sub-main devices) include a UL service entrance label, a neutral bonding jumper, neutral disconnect link, ground bus, and grounding electrode. **List price addition \$450, GO-108A.** Ground-fault protection is required by NEC on main service disconnect at 1000 amperes and greater, on 480Y/277 volt solidly grounded systems, and must be priced separately.

#### Main Lugs

Use only when no main protective device is required on switchboard. Ship cycle shown applies to standard lug size only (see page 10-37). Otherwise, ship cycle is N+.

Ampere	List Price Each, GO-108A					
Rating	3-phase, 4-wire	3-phase, 4-wire 3-phase, 3-wire		Cycle

Breakers with MicroVersaTrip<sup>®</sup> Plus trip units with optional control power require a Power Supply. **Add \$1000** list for 1-Distribution Cable Junction Box and 1-Distribution Cable Harness for each breaker with this option. See pricing page 10-69 for options and page 10-73 for accessories.

<sup>2</sup> MicroVersaTrip® PM circuit breaker in N cycle. Breakers with MicroVersaTrip® PM trip units must use a Voltage Module. Price includes 1-installed auxiliary switch (1 element), 1-Distribution Cable Junction Box, 1-Distribution Cable Harness and 1X filler plate for side control wiring space. See pricing page 10-69 for options and page 10-73 for accessories.

#### Main Fusible Switch-Spectra® Series Only-240 Volts ac ADS Fusible Switch

Standard (Class R) fuse clips are furnished. For optional fuse clips see pricing table for notes. Fuses are not included.

FCV/FCS/FCN/FCL Series 2P breaker supplied in 3P envelope ONLY.

Circuit breaker 1" per pole, but requires switchboard spacing of full "X" height.

Record Plus 15-20 Amp Circuit Breakers come with Load Lugs Factory Installed.

<sup>1</sup>Not available in Bolt-on design.

<sup>2</sup>Space unit includes vertical bus and filler plate only. MicroVersaTrip® circuit breaker spaces are 4 pole (includes 1X for side control wiring space.)

<sup>3</sup>Use only on 3-ph, 4-wire 208Y/120 volts systems.

<sup>4</sup>Use only on 3-ph, 4-wire systems, 480Y/277 volts maximum.

<sup>5</sup>Spectra<sup>®</sup> Series only.

<sup>6</sup>MicroVersaTrip<sup>®</sup> Plus circuit breaker. See pricing table on page 10-69 for options and page 10-73 for accessories. Breakers with MicroVersaTrip<sup>®</sup> Plus trip units with optional control power require a power supply. Refer to Table for pricing. Add \$1000 list for 1-Distribution Cable Junction Box and

1-Distribution Cable Harness for each breaker with this option.

<sup>7</sup>SG6 and SG4 can be twin mounted in section rated for 2000A or less.

<sup>8</sup>2-pole device is rated 480 Vac max.

FCV/FCS/FCN/FCL Series 2P breaker supplied in 3P envelope ONLY.

Circuit breaker 1" per pole, but requires switchboard spacing of full "X" height.

Record Plus 15-20 Amp Circuit Breakers come with Load Lugs Factory Installed.

<sup>1</sup>MicroVersaTrip<sup>®</sup> Plus circuit breaker. See pricing table on page 10-69 for options and page 10-73 for accessories. Breakers with MicroVersaTrip<sup>®</sup> Plus trip units with optional control power require a power supply. Refer to Table for pricing. Add \$1000 list for 1-Distribution Cable Junction Box and 1-Distribution Cable Harness for each breaker with this option.

<sup>1</sup>MicroVersaTrip<sup>®</sup> PM circuit breaker. Price includes 1-installed auxiliary switch (1 element), 1-Distribution Cable Junction Box, 1-Distribution Cable Harness and 1X filler plate for side control wiring space for each breaker. Breakers with MicroVersaTrip® PM trip units must use a Voltage Module.

See pricing page 10-69 for options and page 10-73 for accessories.

<sup>2</sup>Space unit includes vertical bus and filler plate only. MicroVersaTrip® PM circuit breaker spaces are 4 pole (includes 1X for side control wiring space). See pricing page 10-69 for options and page 10-73 for accessories.

 $^1\mathrm{Unit}$  space price includes vertical bus and filler space only.

<sup>2</sup>Maximum IC rating cannot exceed 100kA regardless of circuit breaker or voltage.

<sup>3</sup>100% rated for section ratings up to 2000A max. 80% rated for 2500-4000A.

<sup>4</sup>MicroVersaTrip<sup>®</sup> Plus circuit breaker. Add \$1000.00 list for 1-Distribution Cable Junction Box and 1-Distribution Cable Harness for each breaker.

<sup>5</sup>MicroVersaTrip® PM circuit breaker. Price includes 1-installed auxiliary switch (1 element), 1-Distribution Cable Junction Box, 1-Distribution Cable Harness and 1X filler plater for side control wiring space for each breaker. See pricing page 10-69 for options and page 10-73 for accessories. Breakers with MicroVersaTrip® PM trip units must use a Voltage Module. See 10-72.

<sup>6</sup>MicroVersaTrip<sup>®</sup> PM circuit breaker spaces are 4 pole (includes 1X for side control wiring space).

<sup>7</sup>1220A must have fully rated bus. Copper lugs must be used on line or load side of breaker.

<sup>1</sup> MicroVersaTrip® Plus circuit breaker. Breakers with MicroVersaTrip® Plus trip units with optional control power require a Power Supply. Add \$1000 list for 1-Distribution Cable Junction Box and 1-Distribution Cable Harness for each breaker with this option. See pricing page 10-69 for options and page 10-73 for accessories.

<sup>2</sup> MicroVersaTrip<sup>®</sup> PM circuit breaker in N cycle. Breakers with MicroVersaTrip<sup>®</sup> PM trip units must use a Voltage Module. Price includes 1-installed auxiliary switch (1 element), 1-Distribution Cable Junction Box, 1-Distribution Cable Harness and 1X filler plate for side control wiring space.

<sup>3</sup>1200A must have fully rated bus. Copper lugs must be used on line or load side of breaker. See pricing page 10-69 for options and page 10-73 for accessories.

FCV/FCS/FCN/FCL Series 2P breaker supplied in 3P envelope ONLY.

Circuit breaker 1" per pole, but requires switchboard spacing of full "X" height.

Record Plus 15-20 Amp Circuit Breakers come with Load Lugs Factory Installed.

<sup>1</sup>Not available in Bolt-on design.

<sup>2</sup>Space unit includes vertical bus and filler plate only. MicroVersaTrip<sup>®</sup> circuit breaker spaces are 4 pole (includes 1X for side control wiring space.)

<sup>3</sup>Use only on 3-ph, 4-wire 208Y/120 volts systems.

<sup>4</sup>Use only on 3-ph, 4-wire systems, 480Y/277 volts maximum.

<sup>5</sup>Spectra<sup>®</sup> Series only.

<sup>6</sup>MicroVersaTrip<sup>®</sup> Plus circuit breaker. See pricing table on page 10-69 for options and page 10-73 for accessories. Breakers with MicroVersaTrip<sup>®</sup> Plus trip units with optional control power require a power supply. Refer to Table for pricing. Add \$1000 list for 1-Distribution Cable Junction Box and

1-Distribution Cable Harness for each breaker with this option.

 $^7\mathrm{SG6}$  and SG4 can be twin mounted in section rated for 2000A or less.

<sup>8</sup>2-pole device is rated 480 Vac max.

FCV/FCS/FCN/FCL Series 2P breaker supplied in 3P envelope ONLY.

Circuit breaker 1" per pole, but requires switchboard spacing of full "X" height.

Record Plus 15-20 Amp Circuit Breakers come with Load Lugs Factory Installed.

<sup>1</sup>MicroVersaTrip<sup>®</sup> Plus circuit breaker. See pricing table on page 10-69 for options and page 10-73 for accessories. Breakers with MicroVersaTrip<sup>®</sup> Plus trip units with optional control power require a power supply. Refer to Table for pricing. Add \$1000 list for 1-Distribution Cable Junction Box and

1-Distribution Cable Harness for each breaker with this option.

Section 10

(Bolt-on Style)

<sup>1</sup>MicroVersaTrip® PM circuit breaker. Price includes 1-installed auxiliary switch (1 element), 1-Distribution Cable Junction Box, 1-Distribution Cable Harness and 1X filler plate for side control wiring space for each breaker. Breakers with MicroVersaTrip® PM trip

units must use a Voltage Module.

<sup>2</sup>Space unit includes vertical bus and filler plate only. MicroVersaTrip® PM circuit breaker spaces are 4 pole (includes 1X for side control wiring space).

<sup>1</sup>Unit space price includes vertical bus and filler space only.

<sup>2</sup>Maximum IC rating cannot exceed 100kA regardless of circuit breaker or voltage.

<sup>3</sup>100% rated for section ratings up to 2000A max. 80% rated for 2500-4000A.

<sup>4</sup>MicroVersaTrip<sup>®</sup> Plus circuit breaker. Add \$1000.00 list for 1-Distribution Cable Junction Box and 1-Distribution Cable Harness for each breaker.

<sup>5</sup>MicroVersaTrip<sup>®</sup> PM circuit breaker. Price includes 1-installed auxiliary switch (1 element), 1-Distribution Cable Junction Box, 1-Distribution Cable Harness and 1X filler plater for side control wiring space for each breaker. See pricing page 10-69 for options and page 10-73 for accessories. Breakers with MicroVersaTrip® PM trip units must use a Voltage Module. See page 10-72.

<sup>6</sup>MicroVersaTrip<sup>®</sup> PM circuit breaker spaces are 4 pole (includes 1X for side control wiring space).

<sup>7</sup>1220A must have fully rated bus. Copper lugs must be used on line or load side of breaker.

ower Management Devices for Switchboards								
Power Management Device	List Price GO-108	Description	Ship Cycle					
Voltage Module, Ground Mounted or individually compartment mounted	\$7400.00	24 Vdc Power Supply Conditioner PTs						
Power Supply only for LCD display individually compartment mounted	\$4050.00	For Spectra® Plus Breakers, remember to add cable and J-Box						
POWER LEADER® Repeater for Commnet	\$6000.00	Extends the distance and number of devices for the Commnet network, one per 1000' or >30 devices	N					
Modbus Monitor	\$19100.00	Window into PM devices for one location						
RS485 Modbus Concentrator	\$7000.00	Converts GE Commnet to open protocol Modbus communication for GE PMCS or third party use. See GEH-6502 Network Architecture and GEH-6508 Protocol Ref.						
Multinet®	\$8250.00	Modbus to Ethernet Converter

<sup>1</sup>Requires additional 1 pole space.

<sup>2</sup>Normal ship cycle.

<sup>3</sup>Slide plate interlock applies to panel mounted breaker only.

<sup>4</sup> Provision only is **\$411**.

<sup>5</sup> Bell alarm has two (2) versions, bell alarm trip and bell alarm mechanism.

### MagneTrip<sup>™</sup> Trip

Description	Product Number Suffix	List Price GO-108A	Ship Cycle
Adjustable current plus adjustable short-time and fixed instantaneous	D	\$1213.00	N
Inverted construction (Stationary only)	В	No Adder	

#### Automatic Throwover Devices Pricing Guidelines<sup>6</sup>

Note: Automatic throwover using electrically operated fused switches is not available.

- -Molded case breakers-stationary only and 2 breaker transfer only. Price from page 10-56 (Plug-In) and 10-64 (Bolt-On) and add \$4267 list per breaker (includes motor operator and auxiliary switch and bell alarm).
- -Insulated case-price from page 10-54 and add \$2121 list per breaker (includes auxiliary switch, bell alarm and hidden ON button).
- -All control functions operate from 115 Vac control power.

### Automatic Throwover 7,8 Max. 480 Vac, Three-phase, three or four-wire

### Two Breaker Transfer U-U or U-G (Normal and Emergency Source Breakers)

Equipment Required	List Price GO-108A	Ship Cycle
1-GE FANUC 90/30 PLC (STD Programming) Special Programming refer to Factory RTF	\$25400.00	
2-Electric Operator Breakers (see type desired)		_
AKR-50, AKR-75 or AKR-100 Power Circuit Breakers	See	
Insulated Case Circuit Breakers TP, THP, SS, SH	pricing	NI+
Motor Operator TKM8, TKM12 or THKM12	guidelines above	INT
Molded Case Circuit Breakers		_
Exercise Time Switch	add <b>\$1449.00</b>	_
UPS 1kVA	\$5850.00	

### Three Breaker Transfer U-U (Two-normal Source and One-tie Breaker)

Equipment Required	List Price GO-108A	Ship Cycle
1-GE FANUC 90/30 PLC (STD Programming) Special Programming refer to Factory RTF	\$32400.00	
3-Electric Operated Breakers (select type desired)	See	
AKR-50, AKR-75 or AKR-100 Power Circuit Breakers	pricing	N+
Insulated Case Circuit Breakers TP, THP, SS, SH	guidelines above	- INT
Position Switch (electrical interlocking)	\$995.00	
UPS 1kVA	\$5850.00	
616 dama and the second s	the (ALCO) and success	TCC)

<sup>6</sup>If drawout breakers are used, also add position switch (AKR) or bypass switch (TSS) to each breaker.

<sup>7</sup>Price includes three-phase voltage sensing time delay transfer and return control and test switches, control power transfer and control power transformers. <sup>8</sup>Upgrades available—consult factory.
