Bulletin CDR-1  
FEBRUARY 2010

## **UNDERGROUND ENCLOSURE PERFORMANCE SPECIFICATIONS**

Enclosures, boxes and covers are required to conform to all test provisions of the most current ANSI/SCTE 77 "Specification For Underground Enclosure Integrity" for Tier \_\_\_\_\_(Specify Tier 5, 8, 15 and/or 22) applications. When multiple "Tiers" are specified the boxes must physically accommodate and structurally support compatible covers while possessing the highest Tier rating. All covers are required to have the Tier level rating embossed on the surface. In no assembly can the cover design load exceed the design load of the box. Independent third party verification or test reports stamped by a registered Professional Engineer certifying that all test provisions of this specification have been met are required with each submittal.

## National Electric Code, ANSI/SCTE 77

### ***NEC and Underground Enclosures***

The National Electric Code states in article 314.30 that enclosures "shall be designed and installed to withstand all loads likely to be imposed,"<sup>1</sup> and addresses issues related to enclosure size, wiring entries, enclosures without bottoms, and bonding requirements for covers.

The Code references the ANSI/SCTE 77<sup>2</sup> "Specification for Underground Enclosure Integrity" National Standard<sup>3</sup>, which outlines various tests that enclosures must pass to meet the standard. ANSI/SCTE 77 also provides load charts with Tier ratings to help end users determine the appropriate enclosure to select depending on the loadings expected in the application.

All CDR enclosures meet or exceed the test provisions of ANSI/SCTE 77 2007. No one wants to be responsible for an accidental electrocution from a collapsed enclosure or energized cover. By using the NEC, ANSI/SCTE 77 requirements in the enclosure selection process, end users will help ensure long service life, increased safety and reduced potential liability associated with failed underground enclosures.

### ***Testing Requirements for ANSI/SCTE 77 2007***

Underground enclosures must successfully pass numerous material and product performance test before they can meet ANSI/SCTE 77 2007. These tests include:

- Three Position Load Testing to Simulate Actual Application
- UV Degradation per ASTM G-154
- Fire Resistance per RUS 7CFR 1755.910 (PE-91)
- Chemical Resistance per ASTM D-543
- Water Absorption per ASTM D-570
- Impact Resistance per ASTM D-2444
- Accelerated Service per ASTM D-756, Procedure E

**NOTE:** ETL listed Products are available upon request please contact manufacturer representatives.

1 National Fire Protection Agency, 2005 & 2008 National Electric Code.

2 Subsequent to the insurance of the 2005 NEC, ANSI approved an updated version of the standard, ANSI/SCTE 77 2007.

3 The latest copy of the standard may be purchased from ANSI. It may also be viewed in PDF form on SCTE's website at [www.scte.org/documents/pdf/ANSISCTE%202007.pdf](http://www.scte.org/documents/pdf/ANSISCTE%202007.pdf).

# Enclosure Selection Guide

(BASED ON LOAD RATINGS)

## Load Ratings

CDR underground enclosures are designed to meet or exceed the tier loadings set forth in the American National Standards Institute's ANSI/SCTE 77 2007 "Specification for Underground Enclosure Integrity"<sup>1</sup>. ANSI tier designations are minimum specifications used by the industry to ensure the safe and reliable performance of underground handhole enclosures.

The ANSI application tier number relates to a nominal design load times 1,000 pounds (i.e.: Tier 8 = 8 x 1,000 lbs. + 8,000 lbs.). All ANSI tier loadings will have a corresponding test load which is 50% greater than the design load. The maximum deflection at the indicated design load shall be 1/2 inch for vertical tests and 1/4 inch per foot of length for lateral tests.

- Design and Test Loads for Tier 5, 8 and 15 are over a 10" square.
- Design and Test Load for Tier 22 is over a 10" x 20" rectangle.

## Application Tiers & Static Vertical Wheel Load Ratings per ANSI/SCTE 77 2007 "Specification for Underground Enclosure Integrity"

NOTE: CDR products are not intended for use in deliberate traffic areas.

Application Tiers	Loading Requirements			
<b>TIER 5</b> <sup>1</sup> Sidewalk applications with a safety factor for occasional non-deliberate vehicular traffic	Vertical	Design Load Test Load	22.2 kN 33.3 kN	5,000 lbs. 7,500 lbs.
	Lateral	Design Load Test Load	28.7 kPa 43.1 kPa	600 lbs./sq. ft. 900 lbs./sq. ft.
<b>TIER 8</b> <sup>1</sup> Sidewalk applications with a safety factor for non-deliberate vehicular traffic	Vertical	Design Load Test Load	35.6 kN 53.4 kN	8,000 lbs. 12,000 lbs.
	Lateral	Design Load Test Load	28.7 kPa 43.1 kPa	600 lbs./sq. ft. 900 lbs./sq. ft.
<b>TIER 15</b> <sup>1</sup> Driveway, parking lot, and off-roadway applications subject to occasional non-deliberate heavy vehicular traffic	Vertical	Design Load Test Load	66.7 kN 100.1 kN	15,000 lbs. 22,500 lbs.
	Lateral	Design Load Test Load	38.3 kPa 57.5 kPa	800 lbs./sq. ft. 1,200 lbs./sq. ft.
<b>TIER 22</b> <sup>1</sup> Driveway, parking lot, and off-roadway applications subject to occasional non-deliberate heavy vehicular traffic	Vertical	Design Load Test Load	100.1 kN 150.1 kN	22,500 lbs. 33,750 lbs.
	Lateral	Design Load Test Load	38.3 kPa 57.5 kPa	800 lbs./sq. ft. 1,200 lbs./sq. ft.
<b>AASHTO H-20</b> Deliberate vehicular traffic applications ONLY. CDR does not currently offer any enclosures for this application tier.	Certified precast concrete, cast iron or other AASHTO recognized materials* *There are not AASHTO design or test provisions for polymer composites. Therefore there is no recognized method of testing for qualification. Applying other material testing methods to polymer composites is not recognized by AASHTO. <b>BUYER BEWARE!</b>			

### NOTE:

ETL listed products are available upon request please contact manufacturer representatives.

## Three Position Testing

A key requirement outlined in ANSI/SCTE 77 2007 is three position testing for enclosures. Three position testing is required to determine how a product will perform in actual use.

In order to qualify a product's performance, test loading should be performed at the lateral center of the longest sidewall, at the vertical center of the longest sidewall, and at the vertical in the center of the cover. CDR products have been tested to each of the three positions as required by ANSI and all have met or exceeded the requirements.

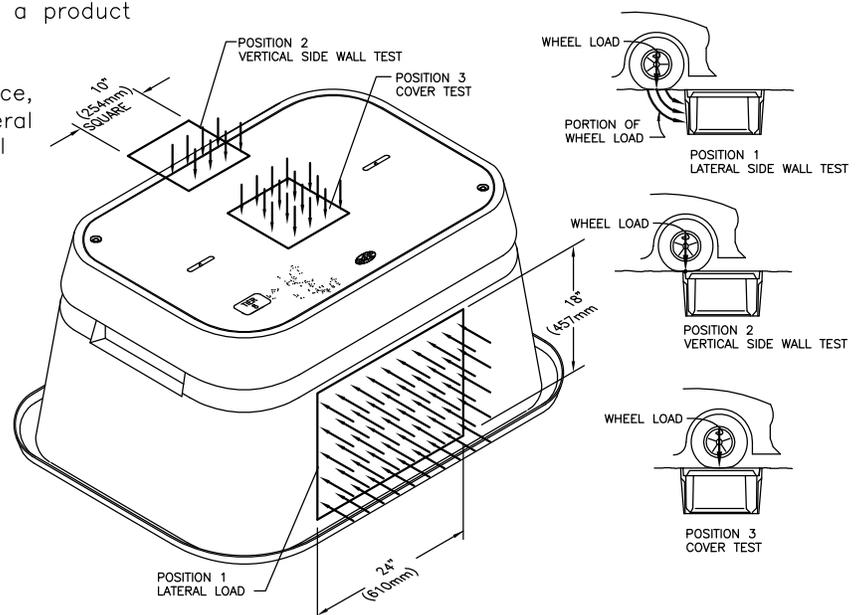

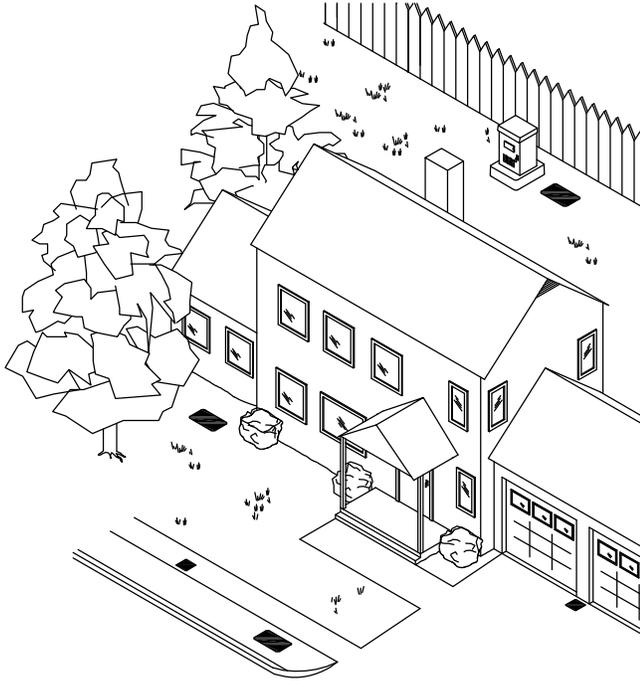

Figure 1 from ANSI/SCTE 77 2007

<sup>1</sup> Electronic file available at [www.scte.org/documents/pdf/ANSISCTE%2077%202007.pdf](http://www.scte.org/documents/pdf/ANSISCTE%2077%202007.pdf).

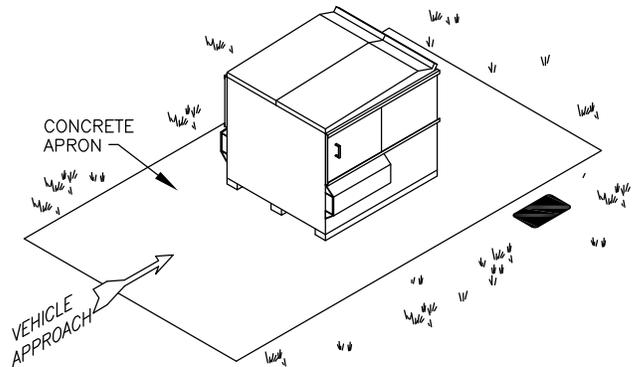

# "ANSI TIER" SELECTION AND PLACEMENT IN NON-DELIBERATE VEHICULAR TRAFFIC APPLICATIONS

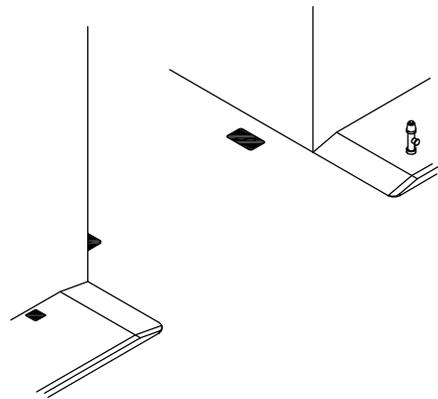

**RESIDENTIAL**  
(NON-DELIBERATE TRAFFIC)  
Enclosures can be placed in grassy areas or sidewalks. They may also be placed in areas next to the structures or poles where it is unlikely a vehicle will run over the enclosure. Enclosures should not be placed in the street or driveway where deliberate traffic is anticipated.

The enclosures shown in these sketches have been color coded to indicate the proper Tier level required for the application.

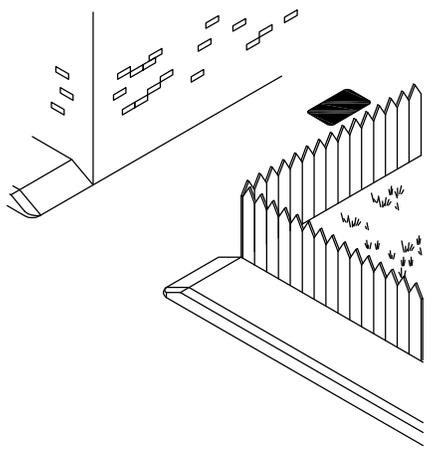

Green = Pedestrian/Tier 5  
Magenta = Tier 8  
Blue = Tier 15 or 22

**TRASH RECEPTACLE APPLICATION**  
(NON-DELIBERATE TRAFFIC)  
In an area where a trash receptacle is placed, the enclosure should be placed away from the concrete that the receptacle is set on so that the receptacle will not be placed on the enclosure or the wheels of the truck will not roll over the enclosure. Even though the traffic expected on the concrete apron or in front of the receptacle is occasional, it is deliberate because the traffic is both intentional and heavy duty in nature.

**DUAL LANE ALLEY**  
(NON-DELIBERATE TRAFFIC)  
In a single lane alleyway (at right) the enclosure should be placed in the center of the alleyway. The placement minimizes the possibility of the enclosure being run over. In a dual lane alleyway, the enclosure should be placed as close to the building as possible. Most of the time, two vehicles will not be in the alleyway at the same time, so the chances of the enclosure getting run over will be minimal. Knowledge of the location and expected traffic patterns should be used to determine if traffic would be deliberate or non-deliberate as defined previously.

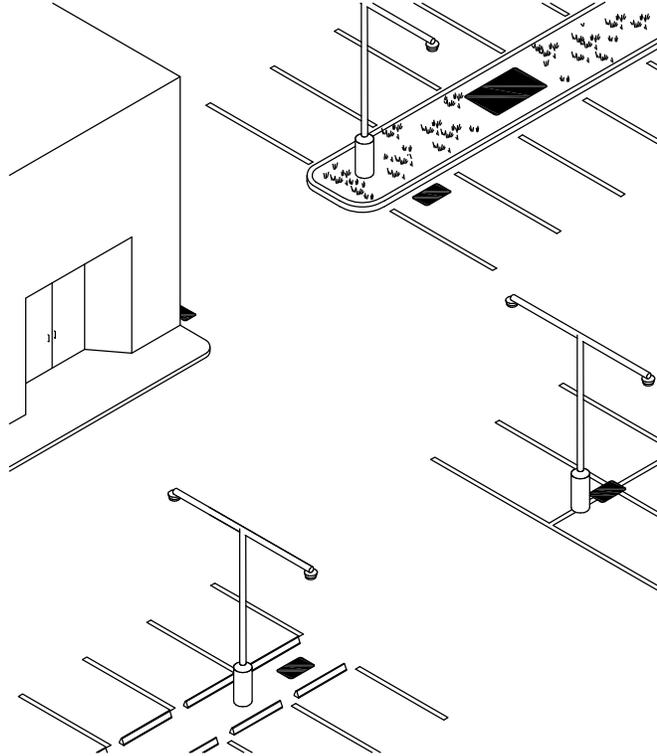

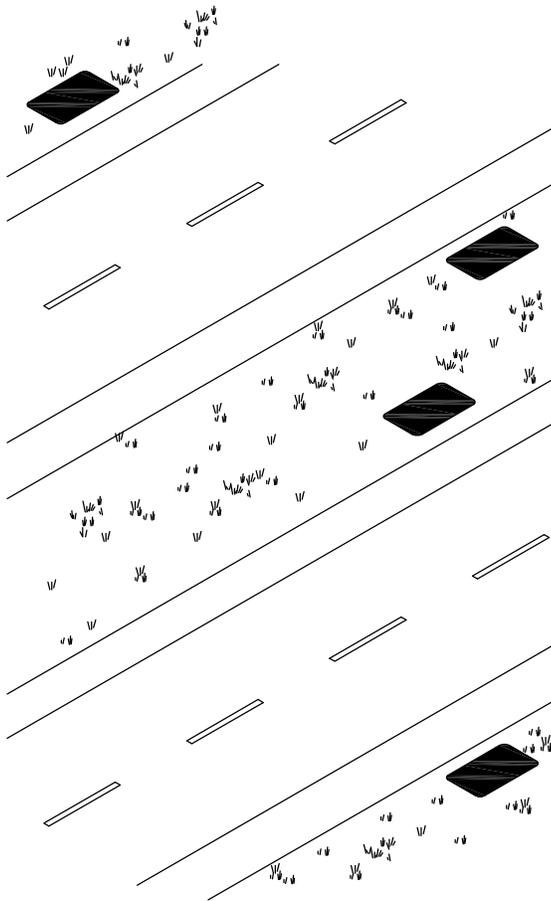

# "ANSI TIER" SELECTION AND PLACEMENT IN NON-DELIBERATE VEHICULAR TRAFFIC APPLICATIONS

## PARKING LOTS (NON-DELIBERATE TRAFFIC)

Enclosure applications:

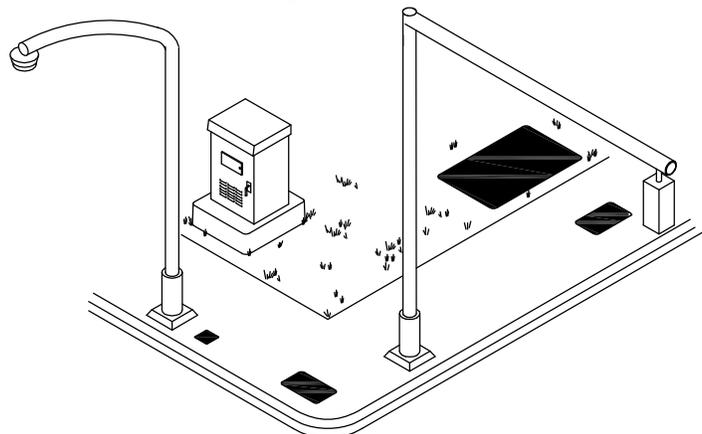

- In the front center of a parking space with the enclosure placed so that the tires of the vehicle will straddle the enclosure.
- In the grassy area where the parking lot ends.
- Placed alongside and close to the lighting pole.
- Placed between the parking curbs where the possibility of running over the enclosure is remote. This enclosure could be placed anywhere between the parking curbs.
- Along the building but not in front of a door or pick up area where vehicular traffic would be expected.

## DIVIDED HIGHWAY (NON-DELIBERATE TRAFFIC)

On a divided highway, the enclosure should be placed in any area that is not paved and where deliberate traffic is not expected. They can be placed in the grassy median or off the shoulder of the highway.

**NOTE:** The paved shoulder of the highway is normally considered a deliberate traffic location because it may be used as a breakdown lane or may be used as a lane in heavy traffic periods or in times of construction. Therefore, an enclosure should never be placed in the paved shoulder of a road or in the road itself. The enclosure should be placed off the shoulder, in the grassy areas.

## SIDEWALK & GRASSY AREA (NON-DELIBERATE TRAFFIC)

An enclosure can be placed in any grassy area and in most sidewalks. However, an enclosure should not be placed in a sidewalk where a driveway crosses over the sidewalk.

1 Convenient to store, easy to transport, vault comes palletized.

2 Can be assembled directly on pallet if desired.

3 Vault assembles using only hand tools.

Save **TIME • SPACE • MONEY**

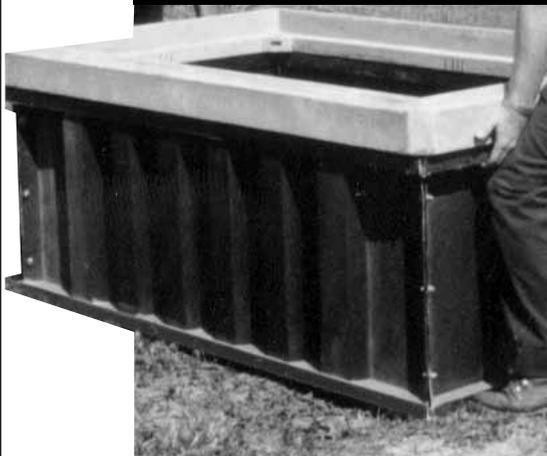

# QAV-II

QUICK • ASSEMBLE • VAULT

4 Exclusive one-piece collar keeps vault square.

5 Quick and easy level to grade.

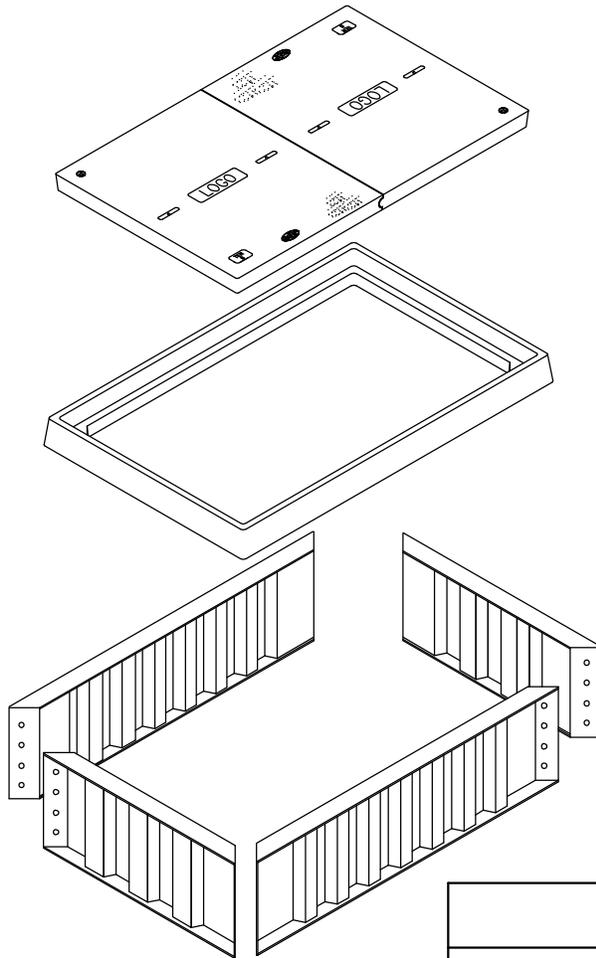

6 Vault assembles and installs in minutes.

**SPECIFICATIONS/DATA**

**QUICK ASSEMBLY VAULT**

**LIGHTEST WEIGHT**

1/3 TO 1/10 THE WEIGHT OF STANDARD CONCRETE BOXES  
EASILY INSTALLED BY 1 OR 2 MEN WITHOUT HEAVY EQUIPMENT.

**HIGHEST STRENGTH**

SPECIAL COMBINATION OF POLYMER CONCRETE AND FIBER REINFORCED POLYESTER – 3 TO 4 TIMES THE COMPRESSIVE STRENGTH OF CONCRETE & HAS THE TENSILE STRENGTH OF STEEL.

**LONGEST LIFE**

PROJECTED 30 OR MORE YEARS – BASED ON PAST INSTALLATIONS IN ALL CLIMATES.

**ADDITIONAL FEATURES:**

EXCLUSIVE ONE PIECE COLLAR PREVENTS VAULT FORM GOING "OUT OF SQUARE" DURING BACK FILL OPERATION OR AFTER GROUND SETTLES. VAULT COVERS ARE EASILY INSTALLED OR REMOVED EVERYTIME!

OPENINGS ARE EASILY CUT, OR CAN BE ORDERED WITH OPENINGS ALREADY CUT FROM THE FACTORY.

TONGUE AND GROOVE INTERLOCKING DESIGN IN LARGE TWO OR THREE PIECE COVERS SPEED INSTALLATION AND REMOVAL OF LID PANELS.

- Bolting covers to boxes is simplified by utilized captive stainless steel bolts and self-centering nuts that are replaceable if the threads are stripped.
- Boxes can be made in any depth from 12 to 48 inches.
- Boxes are available with or without bottoms.
- Vaults are palletized for convenient storage and transportation to job sites.

Two men can assemble a vault in 15 minutes with standard hand tools.

# SERVICE BOXES & vaults

**LIGHT WEIGHT - SAVES TIME = SAVES MONEY!!**

1/3 to 1/10 the weight of standard concrete boxes - easily installed by 1 or 2 men without heavy equipment.

**HIGHEST STRENGTH**

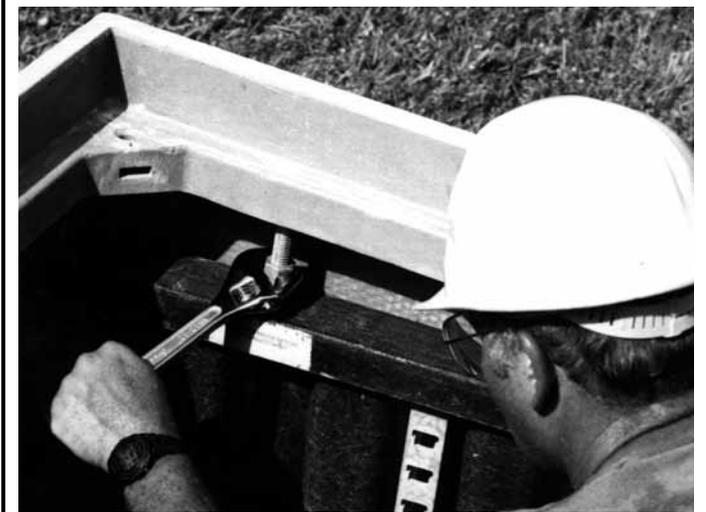

Special combinations of polymer concrete and fiber reinforced polyester – 3 to 4 times the compressive strength of concrete and has the tensile strength of steel.

**LONGEST LIFE**

Projected 30 or more years – based on past installations in all climates.

TWO MEN EASILY HANDLE A SERVICE BOX.

ADJUST TO GRADE OPTION.

**ADDITIONAL FEATURES:**

- Boxes can be made in **any depth** from 12 to 48 inches. Extensions from 6 to 24 inches are available.
- Available with or without **integral bottoms** on boxes 30 x 48 and larger.
- **Adjust to grade option** available on boxes 30 x 48 and larger. Vertical adjustments including tilting to 4 inches can be made in minutes. No grouting necessary and adjustments can be made during installation or at any time afterwards.
- **Knockouts** are easily made in the field with a wood hole cutting saw or ordered with knockouts already cut. **Conduit terminators** are also available.
- **Racks** can be cast into the box as optional equipment on boxes 30 x 48 and larger. **Pulling-eyes** can also be provided on these larger boxes.
- **Tongue and groove** interlocking design in large two or three piece covers speed installation and removal.
- 24 x 36 or smaller covers are one piece, 30 x 48, 30 x 60 and 36 x 60 – one or two pieces, 48 x 78 – two pieces and 48 x 96 – three or four pieces.
- Bolting covers to boxes is simplified by utilizing **captive stainless steel bolts** and “**self centering**” fasteners that are replaceable.

# "BUILD A PART" NUMBER SYSTEM

Special  
5, 0

\*Assemblies with both a standard box  
and cover will receive an "A" in the 10th  
digit. The same applies to "G". All other  
special modifications or combinations  
will be assigned a 500#.

- The diagrams explain how our catalog number system works and allows you to "design" your own box, cover or assembly from the options available.

Available stock assemblies are listed below. These are the standard boxes with Tier 8: for sidewalks, paved pedestrian areas or areas not subject to full vehicular traffic.

Also available – Tier 15 and Tier 22 ratings; designed for driveways, parking lots and off-roadway applications subject to occasional non-deliberate heavy vehicular traffic.

Boxes with different depths, special features or in different sizes are available on request or can be made to order.

Boxes can be ordered with or without integral bottoms and covers are available with or without bolting capability.

## STRAIGHT WALL AND FLARED WALL ASSEMBLIES 6 X 8 THRU 30 X 48

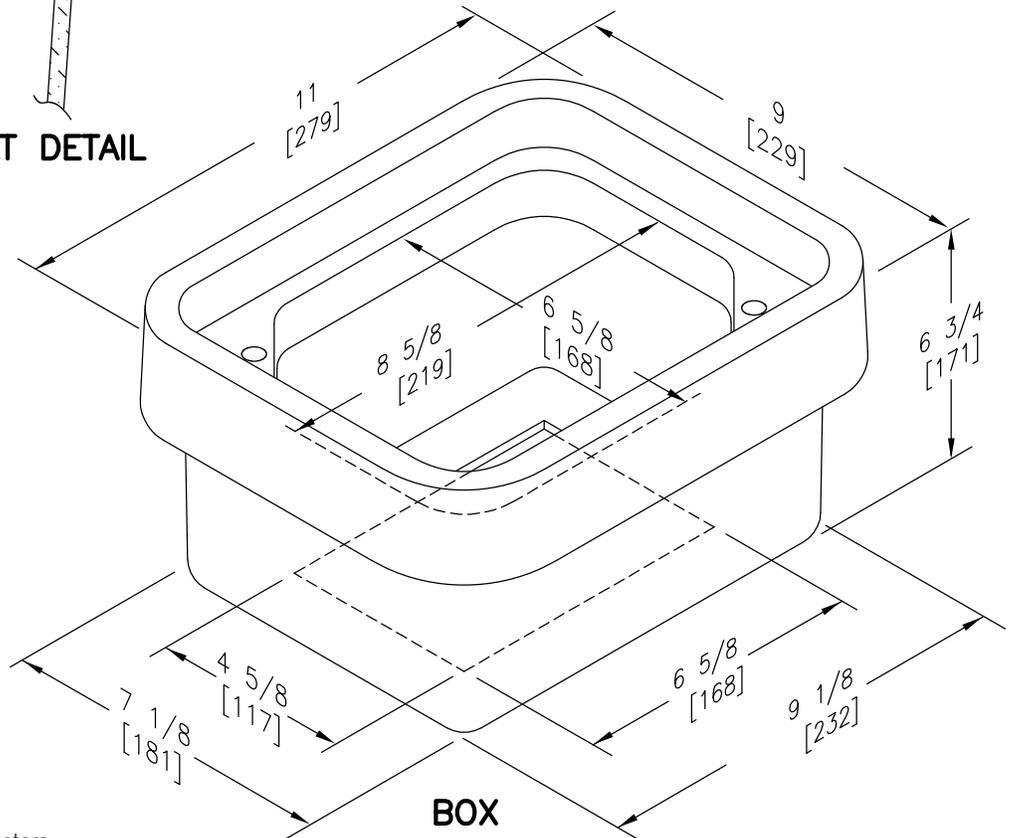

- **LIGHTWEIGHT-** Quick easy installation for LOWEST INSTALLED COST
- **HIGH STRENGTH** Special combination of polymer concrete and fiber reinforced polyester – 3 to 4 times the compressive strength of concrete and has the tensile strength of steel.
- **AVAILABLE-** Most are available in Tier 8, Tier 15 & Tier 22
- **NESTABLE-** Most Flared Boxes are Nestable for easy storage, transportation and freight savings.
- **STACKABLE-** Most Straight Wall Boxes are Stackable for extra depth as required.
- **NON-CONDUCTIVE-** And unaffected by UV light, moisture, freezing and sub soil chemicals
- **STAINLESS STEEL HARDWARE-** Non–corrosive
- **NO EXTRA CHARGE-** For standard cover logos (refer to page 142 for the most popular logos)
- **OPTIONS-** Include mouseholes, holes, knockouts, terminators, various hardware items as well as drop in and meter reading lids (see pages 143 & 144 for options)

**SPECIFICATIONS/DATA**

•Loadings comply with ANSI/SCTE 77 (See page 3 & 4)

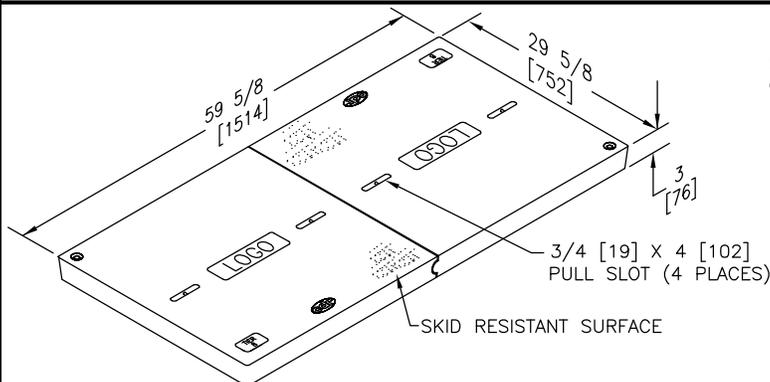

## LARGE STRAIGHT WALL ASSEMBLIES 30 X 48 THRU 36 X 72

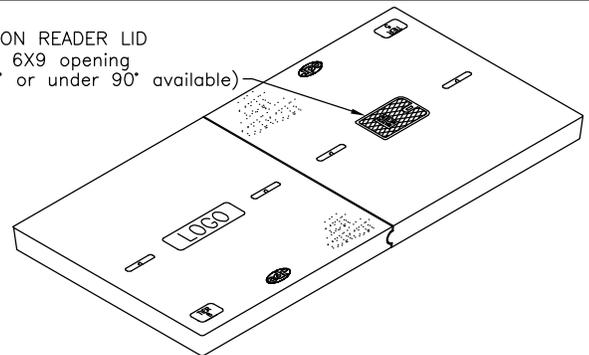

- **LIGHTWEIGHT-** Quick easy installation for LOWEST INSTALLED COST
- **HIGH STRENGTH** Special combination of polymer concrete and fiber reinforced polyester – 3 to 4 times the compressive strength of concrete and has the tensile strength of steel.
- **AVAILABLE-** Most are available in Tier 8, Tier 15 & Tier 22
- **STACKABLE-** Most Straight Wall Boxes are Stackable for extra depth as required.
- **NON-CONDUCTIVE-** And unaffected by UV light, moisture, freezing and sub soil chemicals
- **STAINLESS STEEL HARDWARE-** Non–corrosive
- **NO EXTRA CHARGE-** For standard cover logos (refer to page 142 for the most popular logos)
- **OPTIONS-** Include mouseholes, holes, knockouts, terminators, various hardware items as well as drop in and meter reading lids (see pages 143 & 144 for options)

## CORRUGATED WALL ASSEMBLIES 30 X 48 THRU 96 X 96

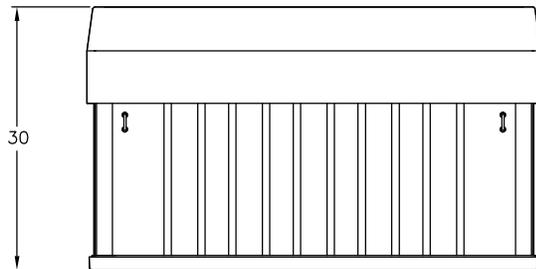

- **LIGHTWEIGHT-** Quick easy installation for LOWEST INSTALLED COST
- **HIGH STRENGTH** Special combination of polymer concrete and fiber reinforced polyester – 3 to 4 times the compressive strength of concrete and has the tensile strength of steel.
- **AVAILABLE-** Most are available in Tier 8, Tier 15 & Tier 22
- **INTEGRAL or SEPERATE BOTTOMS AVAILABLE-** When a solid bottom is the preferred option
- **CORRUGATED WALLS-** For superior strength and durability
- **ADJUST TO GRADE OPTION-** See page 80
- **BOTTOM EXTENSIONS-** Available for extra depth
- **NON-CONDUCTIVE-** And unaffected by UV light, moisture, freezing and sub soil chemicals
- **STAINLESS STEEL HARDWARE-** Non–corrosive
- **NO EXTRA CHARGE-** For standard cover logos (refer to page 142 for the most popular logos)
- **OPTIONS-** Include knockouts, terminators, racking and pulleys  
Please specify your requirements

# SPECIFICATIONS/DATA

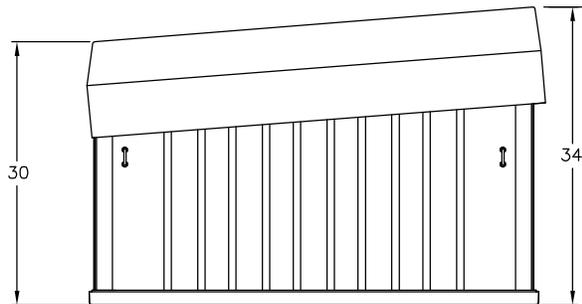

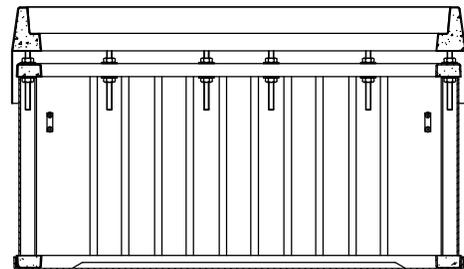

## ADJUST-TO-GRADE OPTION

### ADJUST-TO-GRADE (ATG) BOXES

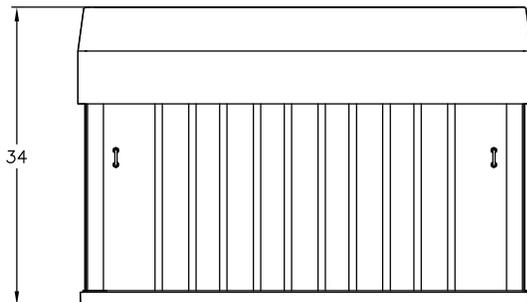

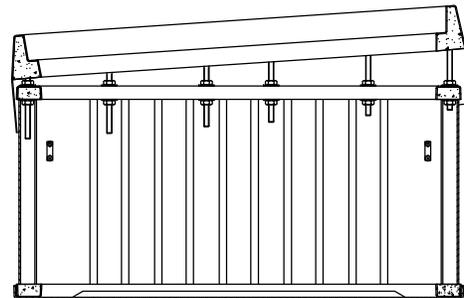

- 30" DEEP BOX USED FOR ILLUSTRATION
- ADJUST-TO-GRADE AVAILABLE IN CORRUGATED WALL ASSEMBLIES 30 X 48 AND LARGER (30, 36 & 48 DEEP MAY BE MADE AS ADJUST-TO-GRADE BY REPLACING B WITH LETTER G - EXAMPLE: G1A304830A).
- TILTING TO 4 INCHES CAN BE MADE IN MINUTES. NO GROUTING NECESSARY AND ADJUSTMENTS CAN BE MADE DURING INSTALLATION OR AT ANY TIME AFTERWARDS.
- IDEAL WHEN FINAL GRADE IS NOT KNOWN AT THE TIME OF INSTALLATION OR DURING REPAVING.

\*Gaskets reduce the inflow of fluids but do not make the enclosure water tight. One piece covers are recommended when using gaskets.

\*\*Boxes 30, 36 and 48" deep may be made as Adust-To-Grade by replacing B with letter G (example: G1A304830A)

• Loadings comply with ANSI/SCTE 77 (See page 3 & 4)

\*Gaskets reduce the inflow of fluids but do not make the enclosure water tight. One piece covers are recommended when using gaskets.

\*\*Boxes 30, 36 and 48" deep may be made as Adust-To-Grade by replacing B with letter G (example: G1A306030A)

• Loadings comply with ANSI/SCTE 77 (See page 3 & 4)

\*Gaskets reduce the inflow of fluids but do not make the enclosure water tight. One piece covers are recommended when using gaskets.

\*\*Boxes 30, 36 and 48" deep may be made as Adust-To-Grade by replacing B with letter G (example: G1A366030A)

• Loadings comply with ANSI/SCTE 77 (See page 3 & 4)

## ROUND ENCLOSURE ASSEMBLIES

- **LIGHTWEIGHT-** Quick easy installation for LOWEST INSTALLED COST
- **HIGH STRENGTH** Special combination of polymer concrete and fiber reinforced polyester – 3 to 4 times the compressive strength of concrete and has the tensile strength of steel.
- **LIDS CAN NOT FALL INTO ROUND ENCLOSURE-** Ideal for fiber optic cable applications to protect cable. Round design also ideal to coil cable. Covers also have bolt alignment guides.
- **AVAILABLE-** Most are available in Tier 8, Tier 15 & Tier 22
- **NESTABLE-** Flared Boxes are Nestable for easy storage, transportation and freight savings.
- **NON-CONDUCTIVE-** And unaffected by UV light, moisture, freezing and sub soil chemicals
- **STAINLESS STEEL HARDWARE-** Non–corrosive
- **NO EXTRA CHARGE-** For standard cover logos (refer to page 142 for the most popular logos)
- **OPTIONS-** Include mouseholes, holes, knockouts, terminators, various hardware items as well as drop in and meter reading lids (see pages 143 & 144 for options)

# SPECIFICATIONS/DATA

## 2000 ROUND ENCLOSURE (NESTABLE) ASSEMBLY

## PADS AND BOX PADS

- **LIGHTWEIGHT-** Quick easy installation for LOWEST INSTALLED COST
- **HIGH STRENGTH** Special combination of polymer concrete and fiber reinforced polyester – 3 to 4 times the compressive strength of concrete and has the tensile strength of steel.
- **PADS AVAILABLE with CABLE WELLS--** also can be bolted directly to CDR boxes for use as a cable well
- **NON-CONDUCTIVE-** And unaffected by UV light, moisture, freezing and sub soil chemicals
- **PADS HAVE UNISTRUTS-** or threaded insert mounting
- **UNIVERSAL PAD MOLD-** CDR can make to any special size up to 102" x 125" x 4" thick
- **BOX PADS OPTIONS-** Include mouseholes, holes, knockouts, terminators and pulleys Please consult factory for sizes

## Standard Small Enclosure Installations

### ***Installation Guidelines for Enclosure Sized 2448 and Smaller:***

#### **1. Prepare the Excavation**

- 1.01 Excavate approximately 10 inches greater around the actual outside dimension of the Enclosure to be installed and 6 inches deeper than to depth will be required for installation.
- 1.02 Add 6 inches of gravel or crushed rock for drainage.

#### **2. Place Enclosure in Hole**

- 2.01 Top of Enclosure should be at grade level.

#### **3. Fill and Compact Soil**

- 3.01 Fill to grade level with cover in Enclosure.

#### **4. Grade Adjustment**

- 4.01 If grade level is raised later, a straight sided Enclosure can be pulled up and bricked at the bottom on one or four sides to conform to the landscape.

## Hole Cutting Instructions

### ***Preferred Method for Cutting Holes in CDR Enclosures:***

#### **Wood Cutting Hole Saw**

1. Drill a 7/8" pilot hole with a carbide tipped drill.
2. Drill hole using a hole saw. A diamond tipped hole saw will be able to cut more holes than a regular hole saw.
  - This is the preferred method from engineering.
  - Estimated drilling time is 15 – 20 seconds
  - Holes cut in the enclosure should not exceed more than 25% of the area of each sidewall and should not be cut into a structural reinforcing rib, corner, or box lip.

## **Standard Large Enclosure Installations**

### ***Installation Guidelines for Enclosure Sized 3048 and Larger:***

#### **1. Select an appropriate site or location for an underground enclosure**

- 1.01 Utility easements
- 1.02 Streets
- 1.03 Parking lots
- 1.04 Parking lot entrances
- 1.05 Shipping & delivery docks
- 1.06 Waste removal (dumpster)

#### **2. Place Conduit or water pipes**

- 2.01 Trenching or plowing of conduit.
- 2.02 Boring under road crossings & railroads.
- 2.03 Mark depth of conduit (marker tape).

#### **3. Prepare the Excavation**

- 3.01 Excavate approximately 10 inches greater around the actual outside dimension of the Enclosure to be installed and 6 inches deeper than to depth will be required for installation.

#### **4. Prepare the enclosure for Placement**

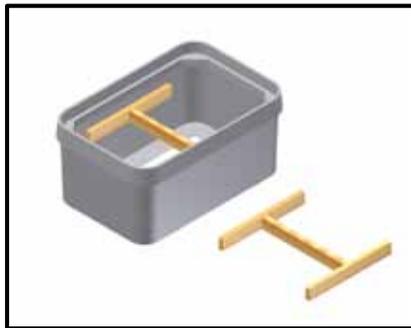

- 4.01 Unpalletize the enclosure.
- 4.02 Place nylon straps or chains around the lifting bolts or through lifting holes and secure to the backhoe or equivalent excavation equipment bucket.
- 4.03 Lift the enclosure and place it into the hole.
- 4.04 Place gravel in the enclosure and around the side if necessary.
- 4.05 Lift the enclosure to the proper elevation allowing the gravel to run out under the enclosure.
- 4.06 Check the elevation of the enclosure with a level and range pole.
- 4.07 Make the necessary elevation adjustments with lifting equipment and recheck the elevation.
- 4.08 Once the enclosure is set to the proper elevation, reinstall the cover or covers and backfill.
- 4.09 If 95% compaction is required, internal bracing should be used on all manufacturer's enclosures to prevent deflection and premature failure. Please see sheet 144 for internal bracing recommendations.

## INTERNAL BRACING FOR BOX INSTALLATION

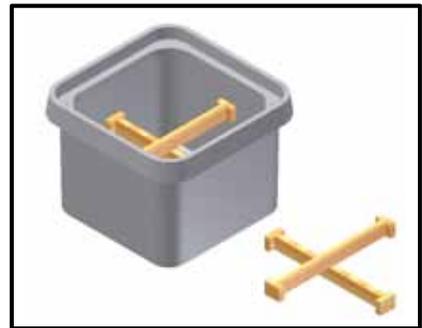

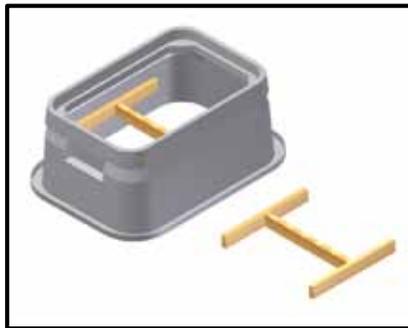

### **Installation Guidelines for Internal Bracing:**

Internal bracing may be warranted for any manufacturer's underground enclosure. If 95% compaction is required or if heavy vehicles are going to be present during construction and/or throughout the life of the enclosure, internal bracing during back-filling operations will ensure minimal box sidewall deflections. This installation practice applies to enclosures made from any material to maintain the original sidewall geometry.

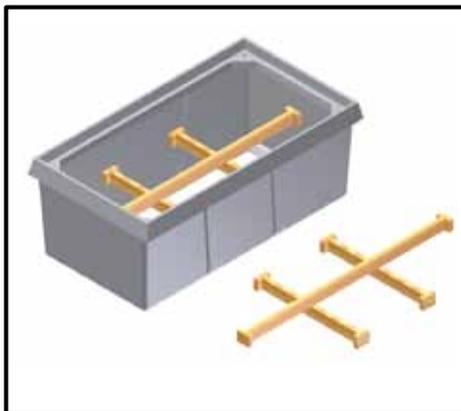

Supports should be 2 x 4 or similar material sized to hold at mid-depth.

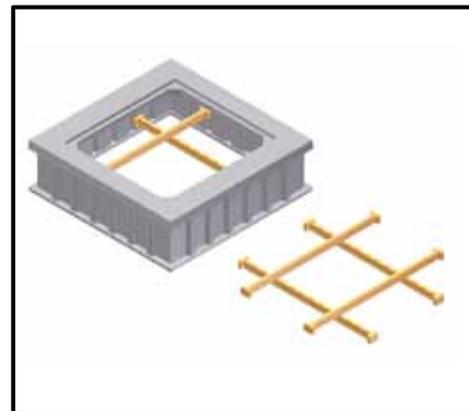

**3048**

**Sizes 3636 and 4848**

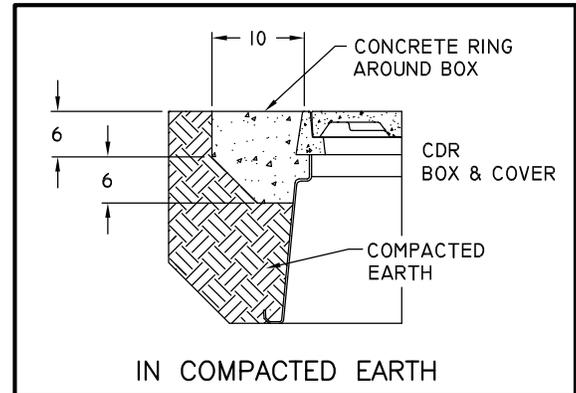

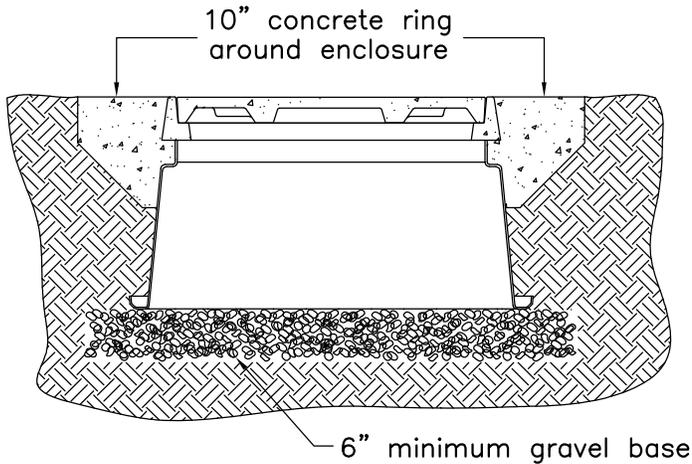

**Sizes 3060 thru 4896**

**Larger than 4896**

**Note:** Regardless of the design and materials used in the construction of the product, the bracing required is the same.

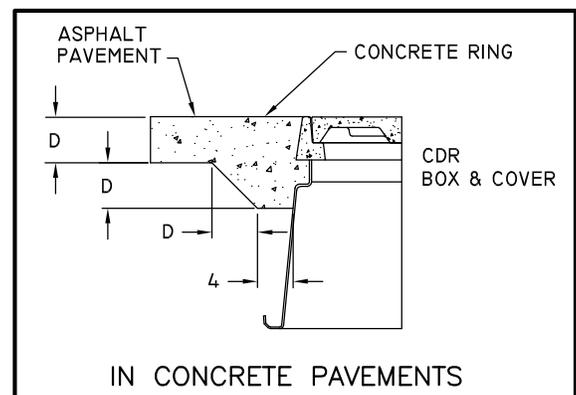

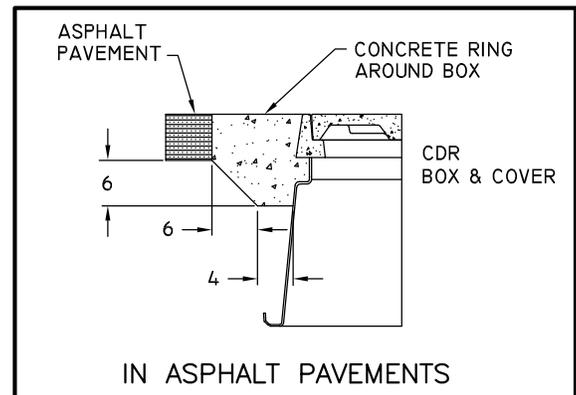

# CONCRETE COLLAR APPLICATIONS

Concrete collars may be desired for installations in driveways, parking lots and off-roadway applications where subject to occasional non-deliberate traffic. This applies to boxes made from any material to provide added protection for the top lip. This is not necessary in grassy areas or areas subject to pedestrian traffic. However, it is recommended and is referred to as a "housekeeping apron". It prevents mower blades from contacting the edges of the box.

## Notes:

1. Concrete encasement to be 3,000 psi minimum.
2. Concrete encasement collar dimension, D, to be equal to design pavement depth.
3. Pavement and subgrade to be as shown on the engineering plans.

## **Box Pad Installations**

### ***Installation Guidelines for Box Pads***

#### **1. Prepare the Excavation**

- 1.01 Excavate a sufficiently large and deep area to set the box pad. If normal utility practice is to install a gravel base, then the excavation should be deep enough to allow base installation. The excavations should be planned to leave approximately the top 4 inches of the box pad exposed above the planned finish grade.

#### **2. Placement**

- 2.01 Place the base material, tamp and level following utility normal practices.

#### **3. Boypad Placement**

- 3.01 Set the box pad in the excavation, assuring even support under the lower flange and assuring that the top surface is at the correct level and grade.
- 3.02 Install any grounding equipment and barriers at the the appropriate time as called for by utility standard practices.
- 3.03 Place backfill around the boypad following normal utility practices for backfilling. Complete backfill to rough grade if finish grading will be done later. Fill to final grade with planned finishing materials.
- 3.04 If 95% compaction is required, internal bracing should be used on all manufacturer's enclosures to prevent deflection and premature failure. Please see sheet 147 for internal bracing recommendations.

#### **4. Utility Equipment Placement**

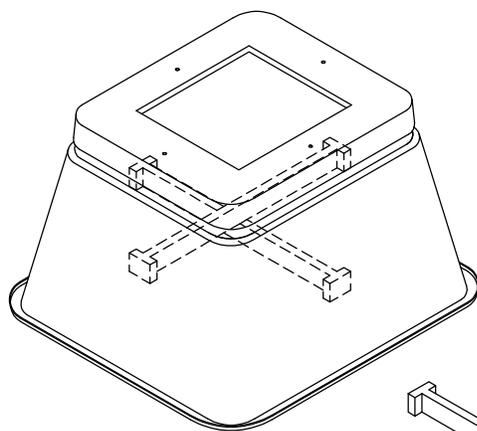

- 4.01 Install utility equipment on the box pad. Follow utility plans for completing installation.

## INTERNAL BRACING FOR BOX PAD INSTALLATION

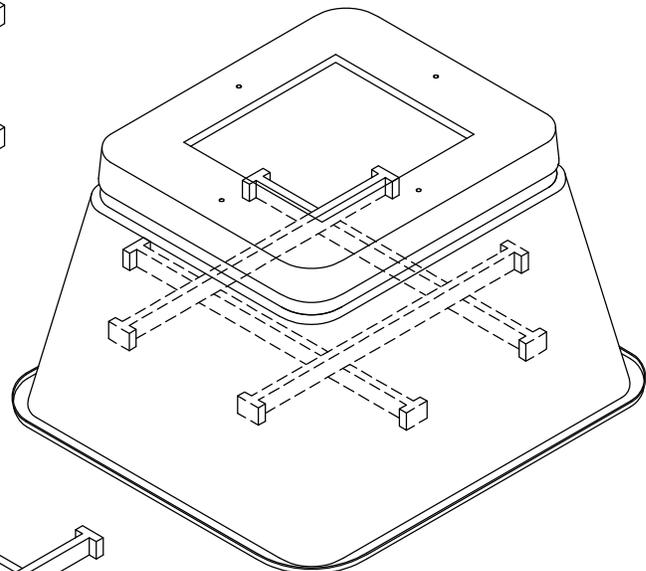

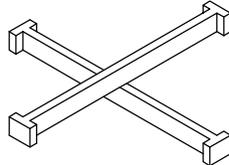

### **Installation Guidelines for Internal Bracing:**

Internal bracing may be warranted for any manufacturer's underground enclosure. If 95% compaction is required or if heavy vehicles are going to be present during construction and/or throughout the life of the enclosure, internal bracing during back-filling operations will ensure minimal box sidewall deflections. This installation practice applies to enclosures made from any material to maintain the original sidewall geometry.

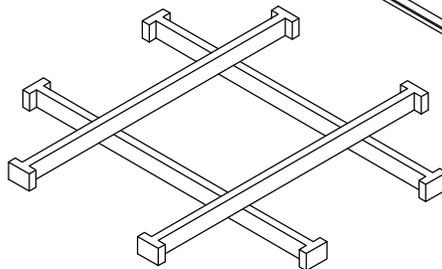

Supports should be 2 x 4 or similar material sized to hold at mid-depth.

**4848 and smaller**

**Larger than 4848**

**Note:** Regardless of the design and materials used in the construction of the product, the bracing required is the same.

## **Power and Telecommunication Pads Installations**

### ***Installation Guidelines for Power and Telecommunication Pads***

The following installation procedure is the same for all sizes of foundation pads.

1. Determine cable/conduit entry position.
2. Excavate around cable entry position to accommodate size of pad to be installed and sub-grade fill as specified by utility standards. Recess area as required so pad face will be three inches above grade when installation is complete. Provide any soil treatments as specified by utility standards.
3. Level dirt around cable opening.
4. Level and tamp down dirt in the area to be occupied by the foundation pad.
5. Remove plastic protective covers from inserts to be used with a pair of pliers. Discard.
6. Place pad in prepared, level area with opening in pad (throat) directly over cable entry position.
8. Attach cabinet to the foundation pad with bolts, brackets, and/or lugs provided by cabinet manufacturer.
9. Backfill and tamp earth around pad so it is level with surrounding landscape.

## Quick Assembly Enclosure Installations

### ***Installation Guidelines for Quick Assembly Enclosures (QAV)***

#### **1. Prepare the Excavation**

- 1.01 Excavate approximately 10 inches greater around the actual outside dimension of the Enclosure to be installed and 6 inches deeper than to depth will be required for installation.
- 1.02 For installation around an existing transformer, determine at the site the appropriate procedure and sequence for removing the existing enclosure and installing the new enclosure.
- 1.03 Quick Assembly Enclosures are shipped dis-assembled and complete on one pallet. Enclosures are equipped with holes in each corner or the enclosure wall where a lifting sling can be attached for handling fully or partially assembled units with suitable lifting equipment.

#### **2. Enclosure Assembly**

- 2.01 Unpalletize the enclosure.
- 2.02 The following and tools may be required to assemble the enclosure:
  - Adjustable wrench
  - Hammer and/or mallet
  - Hex Socket or Open-end wrenches (3/4-in & 9/16-in)
  - Rasp or coarse file
  - Pliers
  - Band cutter or shears
  - Penta-socket wrench
  - Power saw (chop saw or saws-all)
- 2.03 Assemble enclosure per accompanying instructions. (It may be fully pre-assembled or may be assembled inside of the excavation as warranted by field conditions.)

#### **3. Prepare the enclosure for Placement**

- 3.01 If the enclosure is fully assembled outside the excavation, Place nylon straps or chains around the lifting bolts or through lifting holes and secure to the backhoe or equivalent lifting equipment.
- 3.02 Lift the enclosure and place it into the hole.
- 3.03 Place gravel in the enclosure and around the side if necessary.
- 3.04 Lift the enclosure to the proper elevation allowing the gravel to run out under the enclosure.
- 3.05 Check the elevation of the enclosure with a level and range pole.
- 3.06 Make the necessary elevation adjustments with lifting equipment and recheck the elevation.
- 3.07 Once the enclosure is set to the proper elevation, reinstall the cover or covers and backfill using procedures prescribed by your company's specifications or instructions.

# HUBBELL LENOIR CITY, INC. COMPLETE TERMS & CONDITIONS OF SALES

Hubbell Lenoir City, Inc. (hereinafter called HLC) hereby gives notice of its exception to any different or additional terms and conditions other than as stated herein. All sales are expressly made conditional on Buyer's assent to the following terms and conditions. Buyer's acceptance of the provisions of HLC's terms and conditions as recited herein shall be conclusively presumed upon Buyer's receipt of the goods, or if no written objection is received by HLC within fifteen (15) days from the date on HLC's order acknowledgment, whichever event shall first occur. These terms and conditions constitute the entire agreement between HLC and Buyer, and supersede other communications between the two parties, whether written or oral.

## PRICING

*Refer to appropriate Price Schedule, unless otherwise quoted.*

## TERMS

*HLC's payment terms are net 30 days. Invoices will be dated the day of shipment. A service charge of 1-1/2% per month or, if such rate exceeds the maximum lawful rate, the maximum lawful rate shall be assessed on all past due accounts and shall be payable on demand.*

## QUOTATIONS

*Unless otherwise stated in writing, HLC's quotations are subject to acceptance by the Buyer within thirty (30) days from the date of issue.*

## SALES AND SIMILAR TAXES

*HLC's prices do not include any sales, use, excise or similar taxes. Consequently, in addition to the price specified herein, the amount of any present or future sales, use, excise or other similar tax applicable to the sale or use of the equipment hereunder, shall be paid by the Buyer, or in lieu thereof the Buyer shall provide HLC with a tax exemption certificate acceptable to the taxing authorities.*

## ACCEPTANCE OF ORDERS

*All orders are subject to acceptance by HLC at its main office at 3621 Industrial Park Drive, Lenoir City, TN, USA, and to "HLC Complete Terms and Conditions of Sales". Any other terms proposed by Buyer are rejected unless expressly accepted in writing. Orders shall be deemed to be executed in the State of Virginia and shall be construed and performed in accordance with the Laws of that State. Acceptance of any order is subject to availability of product and the ability of HLC to deliver. Orders will be billed at prices in effect at time of shipment unless otherwise agreed.*

## SALES BY AGENTS

*Sales by agents or through overseas representatives shall be at prices, terms and conditions of sale specified by HLC. All invoices will be issued by and payment remitted to HLC.*

## DELAY

*HLC will use reasonable efforts to meet shipment or delivery dates specified by HLC, but such dates are estimates only. HLC shall in no event be liable for any delay or nondelivery if such delay or nondelivery is caused directly or indirectly by Acts of God, fire, flood, strike or lockout or other labor dispute, accident, civil commotion, riot, war, governmental regulation or order, whether or not it later proves to be invalid, or from any other cause or causes (whether or not similar to any of the foregoing) beyond HLC's control. In no case will HLC be liable for loss of profits or any special or consequential damages on account of any delay in delivery or nondelivery whether or not excused hereunder.*

## SHIPPING DEFERMENT

*Buyer requests for shipping deferment must be approved by HLC and are subject to price negotiation.*

## LIMITED WARRANTY AND LIMITATION OF LIABILITY

*MATERIAL: HLC warrants all products sold by it to be merchantable (as such term is defined in the Uniform Commercial Code) and to be free from defects in material and workmanship. Buyer must notify HLC promptly of any claim under this warranty. The Buyer's exclusive remedy for breach of this warranty shall be the repair or replacement, F.O.B. factory, at HLC's option, of any product defective under the warranty, which is returned to HLC within one year from the date of shipment. NO OTHER WARRANTY, WHETHER EXPRESS OR ARISING BY OPERATION OF THE LAW, COURSE OF DEALING, USAGE OF TRADE OR OTHERWISE IMPLIED, SHALL EXIST IN CONNECTION WITH HLC'S PRODUCTS OR ANY SALE OR USE THEREOF. HLC SHALL IN NO EVENT BE LIABLE FOR ANY LOSS OF PROFITS OR CONSEQUENTIAL OR SPECIAL DAMAGES INCURRED BY BUYER. HLC's warranty shall run only to the first Buyer of a product from HLC, from HLC's Buyer, or from an original equipment manufacturer reselling HLC's product, and is non-assignable and non-transferable and shall be of no force and effect if asserted by any person other than such first Buyer. This warranty applies only to the use of the product as intended by HLC and does not cover any modification, misapplication, or misuse of said product.*

Effective November 1, 2009

## **LIMITED WARRANTY AND LIMITATION OF LIABILITY (continued)**

*APPLICATION: HLC does not warrant the accuracy of and results from product or system performance recommendations resulting from any engineering analysis or study. This applies regardless of whether a charge is made for the recommendation, or if it is provided free of charge. Responsibility for selection of the proper product of application rests solely with the purchaser. In the event of errors or inaccuracies determined to be caused by HLC, its liability will be limited to the reperformance of any such analysis or study.*

*PURCHASER INSPECTIONS: Tests, inspections and acceptance of all material must be made at the factory. Purchasers' inspectors are welcome at the factories and are provided with the necessary facilities for carrying out their work. Name and phone number of who should be contacted for inspection should be given to HLC no later than two weeks prior to scheduled shipment date.*

*LIMITATION OF LIABILITY: IN NO EVENT, WHETHER AS A RESULT OF BREACH OF CONTRACT OR WARRANTY OR ALLEGED NEGLIGENCE, SHALL HLC BE LIABLE FOR SPECIAL OR CONSEQUENTIAL DAMAGES INCLUDING, BUT NOT LIMITED TO, LOSS OF PROFITS OR REVENUE, LOSS OF USE OF THE EQUIPMENT OR ANY ASSOCIATED EQUIPMENT, LOSS OF CAPITAL, COST OF SUBSTITUTE EQUIPMENT, FACILITIES OR SERVICES, DOWNTIME COSTS, OR CLAIMS OF THIRD PARTIES OF THE BUYER FOR SUCH DAMAGES. Any claim by Buyer for breach of the foregoing warranty shall be deemed waived by Buyer unless submitted to HLC in writing within thirty (30) days from the date Buyer discovered, or by reasonable inspection should have discovered the alleged breach. Any cause of action for breach of the foregoing warranty shall be brought within one year after the cause of action has accrued.*

## **FREIGHT ALLOWANCE and F.O.B. POINT**

*All shipments are F.O.B. origin. Risk of loss and title of goods shall pass to Buyer upon delivery to the designated carrier. Freight is prepaid and allowed on all shipments of products with a net order value of \$5,000 and above to destinations within the Continental U.S.A and Canada. Shipments to Alaska and Hawaii are F.O.B. Pacific Coast docks, collect beyond. Tool trailers will be F.O.B. HLC's dock – no freight allowed.*

*HLC reserves the right to route all qualified freight allowed shipments via least expensive surface route within the Continental United States and Canada. Buyer will assume all charges for transportation specified via more expensive means. Acceptance of a specified routing does not constitute a guarantee of ship date, transit time or arrival date. HLC will not be responsible for any cartage or storage charges at destination.*

*HLC's responsibility for exception-free delivery ceases when the transportation company receives shipment in good condition. Claims for loss or damage must be reported directly to the carrier. HLC's willingness to assist does not indicate liability for claim or replacement.*

## **PARTIAL RELEASE**

*If an order has multiple releases specified by the Buyer, each release will be treated as individual orders, relative to freight allowance and minimum billing.*

## **BACK ORDERS**

*Back orders that are the responsibility of HLC will be shipped F.O.B. factory or point of shipment with freight prepaid and allowed via the most cost effective method, providing the original order qualified for freight allowance.*

## **MINIMUM BILLING**

*Standard Orders -- \$400 net per order. Minimum waived on hardware only orders. \$40 surcharge for below minimum orders.*

## **ORDER ADD-ON POLICY**

*HLC's "Add-On" policy allows you to add items to an existing unshipped order for up to fifteen (15) days from the entry date of the original order.*

## **DELIVERY SCHEDULE**

*Based on estimated shipping dates, HLC makes every effort to meet Buyer's shipping requirements. HLC will not assume liability because of delayed shipment for any reason. HLC's responsibility ceases upon acceptance of shipment by carrier.*

## **CANCELLATIONS**

*Cancellation of an order for current stock product requires a minimum of five (5) days' notice prior to actual ship date. Stock item orders shipped after cancellation notice is received, but before expiration of the five-day requirement, will be subject to all standard Returned Goods conditions.*

*Cancellation on non-stock items may be made only if no work has been performed or material purchased. If cancellation is requested after work is in progress, there will be a cancellation charge as established by HLC.*

*Orders may not be cancelled unless HLC gives its written consent, and then only upon agreement as to applicable cancellation charges.*

Effective November 1, 2009

## RETURNED GOODS

*GENERAL CONDITIONS applying to all transactions:*

1. Merchandise is not returnable without the written consent of HLC.
2. Request for permission to return merchandise must be made in writing within one year from date of shipment, and Buyer must provide original HLC invoice number.
3. Material to be returned must be considered standard material by HLC.
4. HLC reserves the right to refuse returns of any special or made-to-order material, regardless of condition.
5. All returned goods must be in excellent, resaleable condition and packaged in the original carton. Products will be inspected upon return; and any service or repair needed to place them in first class, saleable condition will be charged and added to the restocking charge.
6. A 25% restocking charge will be deducted from all credits issued on authorized returns.
7. Return Goods Authorization (RGA) Packing List, supplied by the factory, must accompany the return shipment.
8. Return freight must be prepaid. Material must be received by HLC within sixty (60) days of issuance of RGA.
9. Net value of the return must not be less than \$250.
10. HLC reserves the right to deduct for any damage sustained in transit.
11. Unauthorized returns will be refused. Equipment returned without proper authorization from HLC will, at the sole option of HLC, be returned to the Buyer freight collect, or scrapped immediately with no issuance of credit. Unauthorized material included in a return will not be credited.

## BROKEN PACKAGE POLICY

*Shipments will be made in standard package quantities or multiples thereof. HLC Customer Service will notify the Buyer of any orders that do not comply. The Buyer must authorize an adjustment to comply with standard package quantities before the order will be entered.*

## QUOTATION PRICE PROTECTION

*All prices shown in the price lists are subject to change without notice.*

*All quotations on special products or modifications to catalog items are binding only if confirmed in writing by the factory for the period shown on the quotation.*

*Price protection will be provided for a period of thirty (30) days from date of quotation from HLC.*

## ORDERS

*All orders are taken and prices quoted only with the understanding that each order shall be subject to the acceptance of HLC at its principal office upon such terms as we may specify when order is received.*

*Prices to cover amount of any sales or excise tax which now or hereinafter may be imposed by any taxing authority upon this merchandise or the sale or manufacture thereof.*

## PRODUCT SPECIFICATION

*HLC reserves the right to discontinue items, modify designs, and change specifications or prices without incurring obligation.*

## INVOICING

*All invoices are due and payable per the standard terms stated herein. In the case of an apparent discrepancy in a line item charge, Buyer is obligated to advise HLC Customer Service in writing of the nature of the claimed discrepancy within five (5) days of receipt of the invoice. This includes all requests for proof of delivery. A claim of discrepancy does not relieve Buyer of the absolute obligation to pay the remaining balance of the invoice in accordance with the standard terms of payment. HLC, after review, will have sole discretion to resolve the discrepancy; and the Buyer expressly agrees to abide by HLC's decision. HLC will promptly advise Buyer of its decision regarding any disputed items or charges.*

## OSHA

*HLC warrants that at time of shipment, the equipment will conform to the applicable occupational safety and health standards promulgated pursuant to the Federal Occupational Safety and Health Act of 1970, which are in effect on the date that HLC enters its acknowledgment of Buyer's order. The Buyer's exclusive remedy and HLC's liability for breach of this warranty is limited to replacement of the nonconforming equipment.*

## FAIR LABOR STANDARDS ACT AS AMENDED

*HLC represents that any goods to be delivered hereunder will be produced in compliance with the requirements of the Fair Labor Standards Act of 1938, as amended.*

## NOTE

*These Terms and Conditions supersede all those published and issued previously by Hubbell Lenoir City, Inc., Quazite, CDR Systems, CDR, Polycast, Electrimold, Custom Composites, Western Power Products, Comcore, Hotbox, Windbreaker and Jandec.*

Effective November 1, 2009
