## Utility Knives & Blades

[www.irwin.com](http://www.irwin.com)

### IRWIN® 4-Point Snap Blades

The new IRWIN 4-Point snap blade combines the toughness of a traditional blade with the functionality of a snap blade. When one edge dulls, just snap the tip for another. With four cutting edges, these blades are built to last twice as long as traditional carbon blades.

1. Snaps on the score for new sharp tip
2. Four notches for full blade extension

**2X** LONGER LIFE\*  
\* vs. traditional carbon blades

1764983 (1782112\*)

### Bi-Metal Utility Blades

2084100

- Welded Bi-Metal for sharp edge and flexible body
- Stay sharper 3X longer than traditional carbon blades

### Bi-Metal Safety Blades

2088100

- Blunted ends inhibit puncture wounds
- Speed tip penetrates surfaces easily
- Stay sharper 3X longer than traditional carbon blades

### Traditional Carbon Blades 4-Point Snap Blades

2083100  
1764983 (1782112\*)

- Snaps on the score for new sharp tip
- Four notches for full blade extension
- 2X longer life than traditional carbon blades

### Traditional Carbon Blades

2083100

### Large Carbon Hook Blades

2087100

- Hooked point protects surface underneath

- Internal blade storage

### 9 mm Standard Snap Knife

2086100

- Patented auto blade lock and auto blade load
- Handle provides secure grip and comfort
- Internal blade storage

### Bi-Metal Snap Blades

The IRWIN® Bi-Metal snap blade has revolutionized traditional snap blades with the introduction of Bi-Metal technology. Bi-Metal snap blades are produced through a patented process of combining two types of metal, spring steel and high speed steel, allowing the blade to bend without accidentally breaking. It also ensures that the blade snaps cleanly on the score every time.

Hi Flex Blade

Snaps Cleanly Every Time
