

Capabilities

As one of North America's largest sources for bearings, Kaman Industrial Technologies offers a wide range of solutions to meet your facility's needs, whatever your strategic objectives. Our bearing specialists are committed to working with you to minimize downtime, improve operating efficiency and reduce your total cost of ownership.

Kaman's bearing capabilities include:

- Comprehensive offering of sizes, configurations and materials
- Extensive inventory for immediate delivery
- Application troubleshooting, failure analysis, condition monitoring and training
- Bearing repair, reclamation & reconditioning and spindle repair
- Local expertise backed by application experts

Comprehensive Offering

Kaman carries a wide range of bearings, from general purpose to high-performance products. Our catalog includes a comprehensive assortment of configurations—including ball, linear, cylindrical, spherical and tapered roller, needle, plain and mounted bearings—available in a broad selection of sizes and materials.

Specialized Services

Kaman's full range of bearing-related support services will help keep your critical components at peak performance. Prevent breakdowns and minimize unscheduled downtime with our condition monitoring products and programs. Kaman can also repair or recondition damaged components to prolong bearing life while saving you money.

Application Troubleshooting

Our experienced account managers are equipped to provide technical advice and application troubleshooting. Together with our in-house product and application experts, your local account manager will work with you to determine the root cause of bearing damage or failure and develop a plan to address systemic problems. We also offer customized training on bearing installation and maintenance.

High-Performance Products

Premium bearings from Kaman's name-brand suppliers deliver exceptional performance in load, speed, vibration, reliability and product life. We carry an array of high-performance bearings, including high-temperature, washdown-resistant and corrosion-resistant options.

Reliable Alternative For General-duty Applications

ReliaMark® is a high-value brand offering a range of bearings designed to deliver both reliable performance and cost-efficiency. Distributed exclusively through Kaman Industrial Technologies, all ReliaMark® bearings are utility-tested and engineered to meet industry standards for general-duty applications.

Inventory/Install-Based Management

Maximize the return on your most valuable capital assets with Kaman's programs to manage your storeroom and installed bearings. Kaman will work with you to audit your existing inventory, standardize components, eliminate duplicates and streamline sourcing. We can also help develop a comprehensive plan for bearing maintenance, repair, reclamation and reconditioning.
