SPECIFICATIONS: If any particular dimension or specification is critical, it should be verified at time of order placement.

CAPACITIES: All capacities are based on Uniformly Distributed Loads (UDL). Do not exceed load capacities.

WARRANTY: Any product that has been subjected to normal use for which it is intended and is shown to be defective within one (1) year from date of purchase will be repaired or replaced at seller's option, provided such defect is reported promptly to the manufacturer. Authorization is required prior to returning.

Mobile Instrument Cart

1000 lbs. Capacity

This cushion-load cart is ideally suited for transporting delicate equipment or sensitive devices. Non-Conductive and sound-deadening wood composite shelves are covered with non-slip vinyl surface. Top shelf has a full perimeter non-marking bumper to protect walls and furniture. Top shelf measures 22"W x 36"L x 34-1/2"H. Bottom shelf dimensions 20"W x 30"L. Powder coated finish.

CHOICE OF CASTERS

FULL PNEUMATIC – (2 swivel and 2 rigid) Shock absorbing wheels provide an air cushion ride. Inflation pressure of tires can be adjusted to provide the desired level of shock load reduction for different floor and load conditions.

POLYURETHANE TREAD – (4 swivel) Non-marking polyurethane tread for greater maneuverability under heavier load conditions, and where cushioning of shock loads is not as important.

6-Inch Deep Shelf Trucks

The extra carrying capacity of the 6" high shelf lips, combined with the heavy 12 gauge welded construction make these trucks ideal for heavier applications. Shelves are formed from a single sheet of steel and welded in place, resulting in an extremely rigid, durable unit. Polyurethane casters roll quietly and more easily under heavier load conditions. Clearance between shelves is 16-1/2".

1200 lbs. Capacity; 5" Polyurethane casters, 35" overall height

Hardwood Deck Platform Trucks

Capacities to 2400 lbs.

These premium wood platform trucks are built to last, with solid hardwood construction. Deck boards and cross battens are 5/4 hardwood, and feature chamfered edges. All hardware is plated and bolts countersunk to provide a smooth deck surface. Sturdy removable pipe handle is standard with 2 steel cross-braces to help retain big loads.

HE-1648

High-End Platform Truck

With Non-Marking Polyurethane Wheels
2000 lbs. Capacity

Narrow 16-inch wide steel deck is ideal for busy aisles, or 24-inch for more loading capacity. Six wheel design is fully maneuverable with two 8" x 2" rigid center wheels with roller bearings, and four 5-inch corner mounted swivel casters with ball bearing wheels. All wheels are non-marking Polyurethane tread for added maneuverability. Two removable pipe handles extend 48" above the deck for taller loads, which means fewer trips.

Optional Floor Lock -FL

Caster Steer Trailers

2000 lbs. Capacity

This versatile unit can be used as an independent platform truck for manual order picking and then quickly connected into a train of trailers. The caster steer design means wheels stay under the load at all times, providing better stability with unevenly distributed loads. The two swivel casters rotate 360°, providing excellent maneuverability even in tight areas.

- Reinforced 12 gauge steel deck is 11-1/2" high
- Heavy service casters to withstand the rigors of towing
- 8" x 2" mold-on rubber wheels with cast iron centers and roller bearings
- Removable pipe rack/pushbar handle extends 29" above the deck
- Ring drawbar stays in upright position for manual operation as a platform truck
- Pin and clevis coupler at rear

Wishbone half of coupler stands upright when not in use

PIN & CLEVIS REAR COUPLER

Versatile ring type wishbone coupler with 2-1/2" I.D. Ring can also be used with most pintle hitches.

Custom Designs

Trailers can be engineered with any number of combinations of deck size, special superstructure, and running gear to meet the unique demands of your specific application.

DOUBLE 5TH WHEEL STEER Tracking Trailer

2000 lbs. Capacity

The pivoting axles of these trailers are connected by a tie rod which turns the front and rear wheels in opposite directions. This design provides agile maneuvering of individual or multiple trailers in narrow aisles and around tight corners. A rear hitch on the four wheel steering trailer allows multiple trailers to track in the path of the lead trailer.

Model
CT-3660-16P

Model
CH-3060-16P

Wagon Trucks

3500 lbs. Capacity

Fifth wheel steering describes a type of steering where the front wheels and axle assembly pivot on a center point, which is referred to as the fifth wheel. Because the steering wheels encounter less friction when turning than would be encountered in a swivel caster, wagon trucks with fifth wheel steering can be easier to maneuver under heavier load conditions. This is especially true when softer, wider pneumatic wheels are required because of use on rough or uneven surfaces. Wagon Trucks with this type of steering are typically pulled, but can also be pushed. T-handle with vinyl handgrips allows two man operation.

- Heavy 12 gauge reinforced steel decks with 1-1/2" retaining lip, or flush edge.
- Full 1-inch diameter axles and roller bearing wheels.
- Structural channel undercarriage for heavier loads and durability.

* Pan Steel Decks are standard with a 1-1/2" retaining lip. For Flush Steel Deck, add: **-FSD** to model number.

Spill-Control Platforms

Heavy-gauge steel construction holds up in applications where plastic units just won't do, either for durability reasons, or when materials being stored are not compatible with plastic. Welded steel bar grating is removable for easy clean-up. Drip Channels "hook" units of same heights together, help prevent drainage between units. Optional Ramps available in 2 heights. All models help you comply with EPA and OSHA requirements; models with 66 and 99 gallon capacity help you comply with Uniform Fire Code.

IBC Containment & Dispensing Station

Heavy gauge steel construction for durability and extended life. Large 400 gallon sump capacity with 10,000 lbs. load capacity. Steel grating deck panels are easily removable for cleaning. Includes drain plug and grounding screw. Helps you comply with EPA requirements.

SINGLE IBC UNIT

Large deck surface has room for additional storage. Three-piece steel grating deck is 29" high. "Convertible" deck allows IBC to be positioned for internal dispensing within sump area. Included Pail Holder shelf attaches conveniently to inside or outside of sump.

Model No.	Overall Size	Capacity	Wt. (lbs.)
SST-IBC	51"W x 76"L x 29"H	400 gal	625

Right: Positioned widthwise, Pail Shelf can be hung outside of sump, allowing extra storage space on deck.

Model SST-IBC

Model SST-IBC

Above: Positioned lengthwise with IBC moved back, there is sufficient room to hang Pail Shelf on inside of sump (one decking panel is removed).

DOUBLE IBC UNIT

Convenience of storing 2 IBC's side by side, and a lower profile for easier access. Four piece removable grating deck is 23" high. Includes 2 removable Pail Holder Shelves.

Model No.	Overall Size	Capacity	Wt. (lbs.)

Big Wheel Cradle Truck

Carries a variety of loads, including lumber, tool boxes, and pipe up to 20" diameter. Extra large 16" pneumatic wheels with roller bearings and 4 ply tires roll over the roughest surfaces. Carrier bed is constructed of 3/16" plate and measures 30" long x 12" x 12". Offset "T" handle allows for 2 hand grip and greater control of load.

Model No.	Capacity	Wt.
TB-1	1000 lbs.	90

Adjustable Spring Safety Gate

Adjustable width 22-1/2" to 36". Set screws secure at desired width. Stainless steel torsion spring closes the gate automatically. Spring is tension adjustable, and reversible. Meets OSHA 1910.23a requirements. Powder Coated red finish (except spring). Outside tubing 1.37" OD x 12g wall. Mounting channel is 2" x 1" with two mounting holes (hardware not included).

Model
SGS-R

24 x 3 x 24	◆ SGS-R	18

* Shipping Dimensions. See above for max adjustable width.

Hydraulic Arm Safety Gate

Adjustable width 15" to 31". Set screw used to secure at desired width. Gate arm uses hydraulic pressure to smoothly close without slamming. Closing tension is adjustable. Mounting plate is 1-3/8" x 6" with two mounting holes (hardware not included). Mount to the left only. Durable Powder Coat red finish. Meets OSHA 1910.23a requirements.

Model
SGH-R

Overall W x D x H*	Model No.	Wt.
21 x 3-1/2 x 6	◆ SGH-R	10

Wheel Selection Guide

Mold-On Rubber

Cushion tread vulcanized to semi-steel center for quiet operation, and floor protection.

Phenolic

Reinforced phenolic resin rolls easily with high capacity. Recommended where rubber or metal wheels are not practical.

Pneumatic Wheels

Air filled tires provide quiet, cushioned operation and floor protection, but greater rolling resistance under heavier loads. Ideal for fragile loads, or over rough surfaces.

Polyurethane

High strength polyurethane tread mechanically locked to a polymer core. Quiet, non-marking, resists chemicals.

Solid Rubber Tire

Puncture-proof cushion rubber. Easier to move under heavier conditions than pneumatic wheels.
