When running conduit, having inferior conduit bodies can grind a project to a halt. Breaking or coming loose due to poor fit can cost valuable time and labor. All of Madison's conduit bodies are made from high grade aluminum or malleable iron for Rigid conduit, and aluminum for EMT. Madison produces quality at an affordable price. Available in all conduit body types and with a wide range of conduit sizes we have exactly what you need to get the job done.

STRUT-TO-STRUT CLAMP

Provides fast assembly of back-to-back half-slot strut as an alternative to welded strut

Features: Alternative to welded strut or traditional hardware (nuts, bolt and washers). Eliminates additional attachments to building structure by permitting quick attachment to existing strut trapeze. Allows dissimilar half-slot channel to be joined, regardless of profile size or finish. No more loose parts. Easily installed using a 1/2" nutdriver. Ideal for prefab or special applications

Notes: 1000 lbs. working load per total assembly. (5-to-1 safety factor.) Not to exceed 1000 lbs. Half slot dimensions vary by manufacturer. Minimum half-slot dimensions 9/16" x 7/8". Strut type and structure need to be evaluated to establish load for assembly. Use 1 STS per 1 ft of strut, minimum of 2 required.
