MAG-LED[®] Technology

THE MAG PHILOSOPHY

Mag Instrument is dedicated to the highest standards of integrity. We seek performance and a reputation reflecting the very best we can achieve. Each Mag Instrument flashlight represents a culmination of more than 30 years of research, development, testing and continuous state-of-the-art refinement in every precision feature. We are proud to offer products of classic American design and are committed to remaining a U.S.-based manufacturer.

We believe the spirit and character of the company is most clearly defined and expressed by our founder, owner and president Anthony Maglica. Each flashlight is a result of his obsession with fine engineering, craftsmanship and his commitment to perfection. An experimental machinist by training and a manufacturing innovator by practice, Mr. Maglica has guided his company's growth from a one-man machine shop in 1955 to an enterprise

that employs hundreds of dedicated employees today. But his work does not stop there. Mr. Maglica continues his commitment to quality by continually improving upon the product that bears his name. A prolific inventor, Mr. Maglica has over 100 United States patents to his name, plus a multitude of foreign patents.

Mag Instrument is proud to be a leader in the current renaissance in American manufacturing. Mr. Maglica himself, a fervent believer in the importance of manufacturing in the United States, insists that the manufacture of Mag Instrument's flashlights remain U.S.-based. He has dedicated himself to proving that American products can excel in the global marketplace by using technology to continuously improve quality and reduce costs. Over the last three decades, Mr. Maglica's innovations have enabled Mag Instrument to offer consumers a consistently better value than the competition.

Strengthen American Manufacturing

Mag Instrument is the only flashlight company with significant market share that still manufactures its entire line of flashlights in the United States. Unlike its competitors, Mag Instrument has chosen not to outsource the manufacturing of its flashlights to foreign countries in order to take advantage of cheap labor and less stringent environmental standards, which may also result in inferior quality. The outsourcing of manufacturing by other U.S. companies has caused hundreds of thousands, if not millions, of jobs in the United States to be lost. Indeed, if Mag Instrument had chosen the path of other flashlight companies, the jobs of hundreds of its employees in Ontario, California, would have been lost - with corresponding job losses, no doubt, at other U.S. companies that supply parts, materials and services to Mag Instrument.

Mag Instrument, Late 50's

For warranty details, see your Mag-Lite® product retailer, the package literature, or call Mag Instrument, Inc. at: 1-800-289-6241. You may also email: salesdesk@magmail.com or visit our website at www.maglite.com for more information. To find the warranty terms applicable in a particular country, click on "Customer Service" and select that country when prompted.

Trademark Information

The distinctive shapes, styles and overall appearances of all Mag® flashlights, and the circumferential inscriptions extending around the heads of all Mag® flashlights, are trademarks of Mag Instrument, Inc. The circumferential inscription on the head of every flashlight signifies that it is an original Mag® flashlight and part of the Mag® family of flashlights. U.S. Trademark Registrations for the shape, style and overall appearance trademarks of Mag® flashlights and for circumferential inscription trademarks of Mag® flashlights include Nos. 1,808,998; 2,074,795; 2,687,693; 2,745,460; 2,765,978 and 2,765,979. The pair of bands encircling the barrel of the Mag Charger® flashlight is a trademark of Mag Instrument, Inc. ©2010 MAG INSTRUMENT, INC.

FLASHLIGHT FEATURES & BENEFITS

Step 1: Unscrew flashlight head
Step 2: Place head down on table
Step 3: Set flashlight into head

Candle Mode

Mini Maglite® AA & AAA flashlights convert quickly to a free standing candle mode, for convenient, hands-free light whenever you need it!

The Solitaire® flashlight features an innovative extended key lead that allows the light beam and keys to be used together in the same direction.

Mag-Lite® C & D Cell flashlights feature a Cam Action Fast Focusing Beam

Our exclusive cam-driven focusing system changes the beam from a wide angle flood to an intense spot with just a quick twist of the head.

Cam action
Roller bearing

- All Mag-Lite® flashlights feature a high intensity fast focusing adjustable beam.
- Design balanced optics and power for maximum performance
- Anodized inside and out for better corrosion resistance and durability
- Water and shock resistant
- High-grade rubber seals in every size flashlight
- Precision machined high-strength aluminum alloy cases

- Backed by Mag Instrument's **Renowned Warranty Service.** Limited lifetime warranty in the Western Hemisphere; ten-year limited warranty elsewhere. See product packaging for details.

- All Mag® flashlights are designed and manufactured in the U.S.A. May contain some imported components.

C & D Switch

One piece construction

A self-cleaning switch fights the buildup of performance-degrading deposits on the contacts. The result is an extremely durable, reliable switch.

Unique design provides battery protection

Constant battery contact

Mag-Lite® Switch

All Mag® incandescent flashlights include a spare lamp safely secured inside the tail cap.

The ANSI/NEMA Flashlight Standards were developed by several flashlight manufacturers and national retailers.

The ANSI/NEMA FL-1 2009 Flashlight Basic Performance Standard was finally approved and delivered to the industry in the fall of 2009.

Rather than perform the testing "in-house" as other companies are doing, MAG Instrument, Inc. has sent its products to an independent laboratory for testing.

MAG believes that providing the consumer with independent verification brings more credibility to its published product performance and reliability measurements.

THE MAG-LED® TECHNOLOGY STORY

Owner and Founder
Anthony Maglica

Anthony Maglica, known for his obsession with precision engineering, craftsmanship and commitment to perfection, was not satisfied with the performance of a "regular" LED as a usable light source. Mr. Maglica set his sights on producing an LED light source that would have the kind of durability, reliability, and performance Maglite® flashlights are known for. With an emphasis on uncompromising performance, **MAG-LED® Technology** is the result of that quest.

The next generation MAG-LED® Technology includes:

- A NEW Premium Performance Power LED
 - A More Powerful Projecting LED Beam that focuses simply by rotating the head.
 - Enhanced Balanced Optics™ - Refining a concept pioneered by Mag Instrument, the "next generation" Mag® LED flashlight combines a newly re-designed reflector with a NEW premium performance white-light LED module platform in order to take advantage of significantly higher output intensity.
 - Intelligent Energy Source Management - The second generation Mag® LED flashlight includes a sophisticated electronic LED module which continuously monitors the balance between high brightness and efficient power usage allowing for prolonged battery life.
 - Extended Battery Life - Compared to incandescent flashlights of similar battery count and similar lumen output, the user can expect much improved battery longevity from this "next generation" flashlight.
- PLUS:** All of the quality features professionals and consumers expect from a Mag® flashlight:
- Rugged, machined aluminum construction with knurled design.
 - Anodized inside and out for improved corrosion resistance.
 - Water and shock resistant.

STAYS BRIGHTER LONGER THAN EVER. ASSUMING THAT'S IMPORTANT TO YOU.

Introducing the Maglite® LED flashlight.

As precise an instrument as we've ever designed, combining legendary Maglite durability with state-of-the-art LED technology.

You'll find a powerful projecting beam that focuses effortlessly by simply rotating the head.

You'll find Balanced Optics™, combining a highly refined reflector with a quality LED, for a brilliant, adjustable beam.

You'll find Intelligent Energy Source Management that balances intense brightness with efficient power usage to make your batteries last even longer.

It's an LED flashlight so advanced, in fact, so unique, we carefully engrave each one with its own individual serial number.

Leading us to make this rather critical suggestion.

Next time you choose a flashlight, make that selection wisely.

Needless to say, your very life may depend on it somewhere down the road. Or, possibly, rope.

OUTSHINES THEM ALL.™

XL100® AAA-CELL LED

Introducing the Maglite® XL100® LED FLASHLIGHT

Introducing the all new MAGLITE® XL100® LED Flashlight. A revolutionary breakthrough in flashlight technology. Designed for optimum light output, the new MAGLITE® XL100® LED flashlight delivers user-friendly, performance oriented features in a sleek, tactical design. Engineered from the ground up, this advanced lighting instrument is driven by the next generation of MAG-LED® technology and includes the **Advanced Flashlight User Interface™**. The XL100® features a rear push-button tail cap switch coupled with five selectable modes, plus variable strobe rates, intensity level memory recall and lockout (prevents accidental operation). (see www.maglite.com/XL100_operation.asp)

NEW! Advanced Modes

- 1. Normal Mode (on-off)**
Adjustable Brightness with Memory
 - 2. Strobe Mode**
Adjustable Strobe Rate
 - 3. Nite Lite Mode**
 - 4. Signal Mode**
On/Off with a Twist of the Wrist
 - 5. SOS Mode**
Signals International Morse Code Distress Signal for SOS
- Plus: Lockout (prevents accidental operation)

Colors subject to availability:
Black, Red, Blue, and Gray

MAG-LITE® D-CELL LED

2 & 3 D-Cell Flashlights with **MAG-LED®** Technology

Mag-Lite® LED D-Cell flashlights are also offered in a variety of colors (refer to color guide below).

The Maglite® flashlight, renowned for its quality, durability, and reliability, is now available with the new **MAG-LED™ Technology**. Designed for professional and consumer use, Maglite® LED flashlights build on the experience in craftsmanship, engineering, and advanced technology evident in all Mag® flashlights. The Maglite® flashlight is internationally accepted as the Professional Flashlight®. Built tough enough to last a lifetime, its durability and patented features now combined with the new **MAG-LED™ Technology** make the Maglite® LED flashlight a technologically advanced lighting instrument. Available in 2 & 3 Cell D size, the benefits include:

- **A Powerful Projecting Beam** that focuses simply by rotating the head.
- **Balanced Optics™**, combining a highly refined reflector with a quality LED, for a brilliant adjustable beam.
- **Intelligent Energy Source Management** balancing high brightness with extended battery life.

 SOS

The Mini Maglite® LED flashlight delivers performance oriented features in a sleek compact design. This advanced lighting instrument is driven by the next generation of **MAG-LED®** Technology.

The benefits include:

- **A Powerful Projecting LED Beam** that focuses simply by rotating the head.
- **Balanced Optics™**, combining a highly refined reflector with a new performance enhanced LED, yielding high output intensity.
- **Intelligent Energy Source Management** - Refining a concept pioneered by Mag Instrument, the second-generation electronics in the 2-Cell AA flashlight let the user choose the power level.
- **The Multi-function electronic switch** offers two different power settings - a maximum-power setting that yields maximum brightness and a 25% power setting to conserve battery power for reading at night, or for a prolonged emergency.
- **Extended battery life** - Compared to the prior-generation Mini Maglite® 2AA LED flashlight, this next-generation flashlight yields much improved battery longevity even in the maximum-power mode. And at the 25% power setting, a fresh set of batteries should literally last for days of continuous operation.

MAG CHARGER® RECHARGEABLE FLASHLIGHT SYSTEM (NiMH)

FEATURES

- Easily replaced high-intensity halogen lamp.
- 1/4 turn, cam action focus, spot-to-flood.
- Self-cleaning 3 position rotary switch: On, Off & Signal (Manual, Momentary On-Off).
- Charger operates on A/C or D/C current.
- Flashlight can be charged in any position.
- Highly polished, scientifically designed, metallic reflector, withstands extreme temperatures.
- Tempered glass lens.
- Durable extra hard anodized finish.
- Limited Lifetime Warranty in the Western Hemisphere; Ten-Year Limited Warranty Elsewhere.
- Individually serial numbered.
- Flashlight designed and manufactured in U.S.A. May contain some imported components. Certain accessories imported.

Without question, our ultimate lighting tool. Refined and enhanced over many years of dedicated service, the Mag Charger® Rechargeable Flashlight System is chosen by professionals worldwide.

Spare Halogen Lamp Included in Tail Cap

- (2) Detachable mounting brackets included allows for multiple charging locations, quick movement from car to home
- Mounts securely in any position

Charging Cradle (ARXX185)

(ARXX088)

Includes Two Mounting Brackets

Mag Charger® Rechargeable Flashlight Only (ARXX014)

12V DC Cigarette Lighter Adapter (ARXX205)

Rechargeable (NiMH) Battery Pack (ARXX235)

120V AC Converter (ARXX195)

System No. 1 Available In Hang Pack

Now, Improved Performance with a High Capacity Rechargeable NiMH Battery!*

Versatile *Tight spot or wide-angle flood* Quick-focusing “continuous cam-action” operates with a quarter-turn of the flashlight head – *Charging Cradle* mounts securely in any position with minimal space, AC or DC – Flashlight can be charged in any position.

Reliable A proven performer all day, every day; all night, every night – *Self-cleaning 3 position rotary switch*: on, off & signal (manual, momentary on-off). A *back-up Halogen lamp* is stored in the tailcap.

Durable Sleek black finish, hard-anodizing inside and out for improved durability – Water resistant seals throughout to protect from weather and harsh environmental conditions.

Fit and Finish Precision machined high-strength aluminum alloy case – Individually serial numbered for identification.

Performance *Next generation optical reflector* A high-tech metallic reflector, combined with a tempered glass lens that delivers superior optical performance – *Now, improved performance with a high capacity rechargeable NiMH battery**, providing over 1,000 hours of operational life.

Purchase with Confidence Mag’s warranty (limited lifetime warranty in Western Hemisphere, ten-year limited warranty elsewhere) is backed by Mag’s international network of Warranty Service Centers.

Mag Instrument, Inc. is a proud participant in the RBRC (Rechargeable Battery Recycling Corporation). By recycling NiMH rechargeable batteries, you are helping to keep NiMH batteries out of the solid waste stream. When you throw away a NiMH battery, it eventually ends up in a landfill or municipal incinerator. By recycling your used NiMH batteries through Mag Instrument’s Battery Recycling Program, you are helping to create a cleaner and safer environment for generations to come. For more information about the RBRC, visit www.rbrc.com.

MAG-LITE® D-CELL FLASHLIGHTS

Every Mag-Lite® flashlight embodies a precise balance of refined optics, efficient power, durability and quality. Each Mag-Lite® D-Cell flashlight includes two high intensity White Star® Krypton Gas Lamps for enhanced brilliance and extended range.

FEATURES

- High-intensity krypton light beam
- 1/2 turn, cam action focus, spot-to-flood
- Self-cleaning 3 position rotary switch: On, Off & Signal (Manual, Momentary On-Off)
- Spare replacement lamp safely secured in the tailcap (see page 3)
- High-strength aluminum alloy cases
- O-ring sealed for water resistance
- Limited Lifetime Warranty in the Western Hemisphere; Ten-Year Limited Warranty Elsewhere.
- Individually serial numbered
- All Mag® flashlights are designed and manufactured in the U.S.A. May contain some imported components.

Mag-Lite® D-Cell flashlights are also offered in a variety of colors (refer to color guide below).

Mini Maglite® 2-Cell AA (Presentation Box) Includes: Mini Maglite® 2-cell AA Flashlight, two AA cell premium alkaline batteries and presentation box.

Figure C

The Mini Maglite® flashlight also features a fast-focus beam that adjusts from spot-to-flood with a turn of the head.

MINI MAGLITE® 2-CELL AA FLASHLIGHT

Overall Length:	5-3/4 in.	146.00 mm
Barrel Diameter:	23/32 in.	18.23 mm
Head Diameter:	1 in.	25.40 mm
Weight without battery:	2.1 oz.	60 g
Weight with battery:	3.8 oz.	107 g
Battery voltage output:	3.0 volts	
Batteries Required:	Two (2) AA size alkaline	

Mini Maglite® AA flashlight in Presentation Box (M2A01L) Black

MINI MAG-LITE® 2-CELL AAA FLASHLIGHT

The Mini Maglite® 2-Cell AAA flashlight has all the same features and functions as the Mini Maglite® AA flashlight in a smaller, lighter version for ease of use and storage.

FEATURES

- High-intensity light beam
- 1/2 turn, twist focus, spot-to-flood (see fig. C, page 13)
- Candle Mode (see fig. B, page 12)
- Spare lamp safely secured in the tailcap (see fig. A, page 12)
- High-strength aluminum alloy case
- O-ring sealed for water resistance
- Vented tailcap (patented) reduces chance of gas buildup
- Compact/lightweight construction
- Limited Lifetime Warranty in the Western Hemisphere; Ten-Year Limited Warranty Elsewhere.
- Flashlight designed and manufactured in the U.S.A. May contain some imported components.

Mini Maglite® AAA flashlight in Hang Pack (M3A116) Blue Includes: Two AAA-cell premium alkaline batteries and pocket clip

Mini Maglite® AAA flashlight in Presentation Box (M3A032) Red Includes: Two AAA-cell premium alkaline batteries and pocket clip

MINI MAGLITE® 2-CELL AAA FLASHLIGHT

Overall Length:	5 in.	127.00 mm
Barrel Diameter:	1/2 in.	12.70 mm
Head Diameter:	3/4 in.	19.00 mm
Weight without battery:	0.9 oz.	26 g
Weight with battery:	1.7 oz.	49 g
Battery voltage output:	3.0 volts	
Batteries Required:	Two (2) AAA size alkaline

Xenon

Maglite® C & D Cell
The Ultimate Upgrade™
 Move Up To Xenon!
 Up To 100% Brighter¹

Mag-num Star® Xenon lamps are now available for C & D Cell genuine Mag-Lite® flashlights. Upgrade today and experience the next generation in Mag® lamp technology.

* Mag-Lite® C and D-Cell Flashlight Mag-num Star® Xenon C and D-Cell Replacement Lamp (LMSA201-301-401-501-601) (2 through 6 cell) 1 Per Pack

Quality and dependability are the hallmarks of our flashlights. We insist upon the same quality and dependability for every lamp and accessory. Each Mag-Lite® and Mini Maglite® lamp is specifically designed to work in conjunction with the reflector to deliver optimum performance.

¹ Measured against prior-generation (Krypton) Mag-num Star® lamps, peak beam candlepower ("PBC") of new (as of early 2003) Xenon Mag-num Star® lamp ranged from 100% higher for 2D-cell lamp to 27% higher for 6D-cell lamp, average PBC increase across the range of lamps (2D-cell through 6D-cell) being 59%. All performance figures are approximate. Actual performance can vary due to manufacturing variations in flashlights, lamps, and/or batteries.

Krypton

* Mag-Lite® C and D-Cell Flashlight White Star® Krypton C and D-Cell Replacement Lamp (LWSA201-301-401-501-601) (2 through 6 cell) 2 Per Pack

Maglite® C & D Cell
White Star® Replacement Lamps
 Now Up To 69% Brighter²

White Star® Krypton lamps are installed as "original equipment" on all C & D cell genuine Mag-Lite® flashlights.

² Measured against prior-generation White Star® lamps, peak beam candlepower ("PBC") of new (as of early 2003) White Star® lamp ranged from 69% higher for 3D-cell lamp to 20% higher for 2C-cell lamp, average PBC increase across the range of lamps (2-cell through 6-cell) being 48%. All performance figures are approximate. Actual performance can vary due to manufacturing variations in flashlights, lamps, and/or batteries.

Mag Charger® Rechargeable Flashlight Halogen Replacement Lamp (LR00001) 1 Per Pack

Halogen

Better, Brighter, Next-Generation Halogen Lamp³

The improved Mag-Lite® Halogen lamps now come as standard "factory equipment" on the Mag Charger® Rechargeable Flashlight System and are available separately.

³ Compared to prior generation lamp, introduced in early 2002. The newest-generation lamp was found in June 2005 tests to produce a 25% increase in peak beam candlepower when installed in a Mag Charger® flashlight. All performance figures are approximate. Actual performance can vary due to manufacturing variations in flashlights, lamps and batteries.

World Trade Center 1

A quick story... on Sept. 11, 2001, me and 30 of my fellow workers were working 8 levels under the World Trade Center at 110°C. At approximately 8:50 AM that morning we were given a heads up that a plane had crashed into the adjacent North Tower (we had been previously involved in the 1993 bomb blast... the jet 7 dove up the fire exit to the lower level and escaped with our lives. We were unaware that one of our coworkers was left in the bathroom. The lights went out. Totally black 7 stories underground, except for the MagLites! The technician who has had overnight and had hearing made his way up the stairs and out of the building as the second plane hit the south side of the south tower, directly above the fire exit. He barely made it across the street as the building began to collapse, steel, glass, people, falling down on him. Without the MagLites he would have been buried alive. Thank You.

National Law Enforcement Officers Memorial

PAST, & PRESENT

Did you know there was a National Law Enforcement Officers Memorial established in 1991?

It honors all of America's federal, state and local law enforcers. Inscribed on the Memorial's blue-gray marble walls are the names of more than 17,000 officers who have been killed in the line of duty, dating back to the first known death in 1792.

Designed by Washington, D.C. architect Davis Buckley, the Memorial sits on three acres of federal park land called Judiciary Square. The site has served for some 200 years as the seat of our nation's judicial branch of government. A glance around the space finds plush carpets of grass, nearly 60,000 plants and 128 trees decorating the Memorial grounds. Each year, around the first of April, some 14,000 orange and yellow daffodils make the Memorial one of Washington's most spectacular attractions. Bordering the Memorial's beautifully landscaped park are two tree-lined "pathways of remembrance" where the names of the fallen officers are engraved.

Each of the pathway entrances are adorned with a powerful statuary of an adult lion protecting its cubs. The bronze statues were sculpted by Raymond Kaskey. They symbolize the protective role of our law officers and convey the strength, courage and valor that are the hallmarks of those who serve the law enforcement profession.

An inscription on the Memorial's east wall explains the uplifting spirit that is felt by every visitor to the Memorial: "In valor there is hope".

President George Bush, Sr. assisted in the dedication of the memorial in 1991. Mag was one of three original corporate sponsors to the Memorial Fund. John Wyatt, Vice President of Sales, attended the event on behalf of Mag and remarked at the time that, "Mag's contribution is our way of showing our gratitude for the support that Mag-Lite® flashlights have received from law enforcement officers across the nation." Mag has supplemented its initial commitment during the ensuing years in order to help ensure that the men and women who have laid down their lives for our protection will never be forgotten.

National Law Enforcement Officers Museum

THE FUTURE

Did you know there is going to be a National Law Enforcement Museum?

Overview

In 2000, a law (P.L. 106-492) passed by the United States Congress and signed by President Clinton authorized a national law enforcement museum to be built on federal property in Washington, D.C. The museum will be privately funded and will be developed, constructed, owned and operated by the National Law Enforcement Officers Memorial Fund (NLEOMF) — the same nonprofit organization that built and now oversees the National Law Enforcement Officers Memorial. Building and exhibit designs are being finalized. Precious artifacts that reflect the work of law enforcement, past and present, are being collected. And the "A Matter of Honor" fundraising campaign is underway. The museum will reach a broad and diverse audience, with attendance expected to be as high as half a million visitors a year, including 40,000 students on class trips.

The Need

The need for a museum first became evident soon after the National Law Enforcement Officers Memorial was completed and there was a keen interest expressed by many visitors in learning the stories behind the thousands of officers memorialized. In 1993, a small Memorial Visitors Center was established near the monument. By 1997, the museum vision had grown and the NLEOMF decided to make the creation of a "Smithsonian-like law enforcement museum" its number one long-term objective. The museum's mission is to increase public support for law enforcement and to promote law enforcement safety.

Dating back to the first fatality in 1792, more than 17,000 officers have sacrificed their lives in the line of duty. Yet despite the dangers and other difficulties of the job, there are more than 800,000 federal, state and local law enforcement officers serving proudly today in communities across America, putting their lives on the line for the safety and protection of others. It is an incredible story of service and sacrifice that, for the most part, has gone untold. As a result, many Americans continue to take our police officers for granted. The National Law Enforcement Museum will help to generate a better understanding and appreciation of the vital contributions our law officers have made to our nation.

"Clearly, the courage and sacrifice displayed by our law enforcement officers is having a profound and positive effect on our society," declared Senator Ben "Nighthorse" Campbell after the museum legislation passed. "Establishing this museum is the least we can do to honor them and ensure that their stories of heroism and sacrifice are never forgotten."

The Site

The museum will be located in the heart of our Nation's Capital in a historic setting called Judiciary Square (400 block of E Street, NW). Appropriately, the museum site is directly across the street from the National Law Enforcement Officers Memorial, which was established in 1991. This property is surrounded by court buildings, the original City Hall for the District of Columbia, and the National Building Museum. This is a thriving area of downtown Washington that already attracts millions of tourists each year.

Maglite® Proud to help.

In the spirit of continuing Mag's commitment, Mag Instrument is now both a Founding Partner of the National Law Enforcement Museum and a Founding Member of the NLEOMF, and has been a Sterling Circle Member of the NLEOMF since 2002. For more information: please visit www.maglite.com.
