① 361 to 433 PSL (single bearing) or PDL (double bearing) models are the alternate to CSL models and have equivalent performance and dimensions.

② PMG Option available as build-up only.

③ Specialty and two bearing orders utilize these windings in place of 280 frame CSL models.

④ All MagnaPlus models have linkboard as standard.

① All 1000 frame generators have 4 bus bars, with the capability of differential protection.

② All 1000 frame generators incorporate form wound coils and VPI insulation systems.

① 361 to 433 PSL (single bearing) or PDL (double bearing) models are the alternate to CSL models and have equivalent performance and dimensions.

② PMG Option available as build-up only.

③ Specialty and two bearing orders utilize these windings in place of 280 frame CSL models.

④ All MagnaPlus models have linkboard as standard.

① 361 to 433 PSL (single bearing) or PDL (double bearing) models are the alternate to CSL models and have equivalent performance and dimensions.

② PMG Option available as build-up only.

③ Specialty and two bearing orders utilize these windings in place of 280 frame CSL models.

④ All MagnaPlus models have linkboard as standard.

See dedicated 380 Volt generators on page 12 for improved ratings and transient performance.

- ① 361 to 433 PSL (single bearing) or PDL (double bearing) models are the alternate to CSL models and have equivalent performance and dimensions.
 ② PMG Option available as build-up only.
 ③ Specialty and two bearing orders utilize these windings in place of 280 frame CSL models.
 ④ All MagnaPlus models have linkboard as standard.

① All 1000 frame generators have 4 bus bars, with the capability of differential protection.

② All 1000 frame generators incorporate form wound coils and VPI insulation systems.

③ All MagnaPlus models have linkboard as standard.

- ① 361 to 433 PSL (single bearing) or PDL (double bearing) models are the alternate to CSL models and have equivalent performance and dimensions.
 - ② PMG Option available as build-up only.
 - ③ Specialty and two bearing orders utilize these windings in place of 280 frame CSL models.
 - ④ All MagnaPlus models have linkboard as standard.
 - ⑤ For 120 volt only service, use an AVC63-4A or a VR63-4C voltage regulator to replace the standard SE350 regulator. See Modification Section for price adder.
 - ⑥ 240/120 volts can be obtained by connecting in either a Low Zigzag or Double Delta; and 480/240 volts can be obtained by connecting in High Zigzag connections. (See page 60 for connection diagrams)

- ① 361 to 433 PSL (single bearing) or PDL (double bearing) models are the alternate to CSL models and have equivalent performance and dimensions.
 - ② PMG Option available as build-up only.
 - ③ Specialty and two bearing orders utilize these windings in place of 280 frame CSL models.
 - ④ All MagnaPlus models have linkboard as standard.
 - ⑤ For 120 volt only service, use an AVC63-4A or a VR63-4C voltage regulator to replace the standard SE350 regulator. See Modification Section for price adder.
 - ⑥ Pancake generators are designed for space-critical applications.
 - ⑦ CSA models are SAE 5, CSB models are SAE 4.
- Notes A, B, C, D, E, and F on page 51 apply to this page.

① Medium voltage sensing potential transformers (P/Ts) are not included. For three phase sensing, a three phase PT is required. See Modification Section for price adder.

② All medium voltage generators incorporate form wound coils and VPI insulation systems.

③ All 740 and 1000 frame generators on this page have 100 ohm platinum winding RTDs as standard equipment.

④ All 1000 frame generators have 4 bus bars, with the capability of differential protection.

- High voltage sensing potential transformers (P/Ts) are not included. For three phase sensing, a three phase PT is required.
 - All 1000 frame generators on this page have 100 ohm platinum winding RTDs as standard equipment.
 - All high voltage generators incorporate form wound coils and VPI insulation systems.
 - All 1000 frame generators have 4 bus bars, with the capability of differential protection.
- Notes A, B, C, D, E, and F on page 51 apply to this page.

① 361 to 433 PSL (single bearing) or PDL (double bearing) models are the alternate to CSL models and have equivalent performance and dimensions.

② PMG Option available as build-up only.

③ Specialty and two bearing orders utilize these windings in place of 280 frame CSL models.

④ All MagnaPlus models have linkboard as standard.

① 361 to 433 PSL (single bearing) or PDL (double bearing) models are the alternate to CSL models and have equivalent performance and dimensions.

② PMG Option available as build-up only.

③ Specialty and two bearing orders utilize these windings in place of 280 frame CSL models.

④ All MagnaPlus models have linkboard as standard.

① All 1000 frame generators have 4 bus bars, with the capability of differential protection.
② All 1000 frame generators incorporate form wound coils and VPI insulation systems.

① 361 to 433 PSL (single bearing) or PDL (double bearing) models are the alternate to CSL models and have equivalent performance and dimensions.

② PMG Option available as build-up only.

③ Specialty and two bearing orders utilize these windings in place of 280 frame CSL models.

④ All MagnaPlus models have linkboard as standard.

- ① 361 to 433 PSL (single bearing) or PDL (double bearing) models are the alternate to CSL models and have equivalent performance and dimensions.
- ② PMG Option available as build-up only.
- ③ Specialty and two bearing orders utilize these windings in place of 280 frame CSL models.
- ④ All MagnaPlus models have linkboard as standard.
- ⑤ For 110 volt only service, use an AVC63-4A or a VR63-4C voltage regulator to replace the standard SE350 regulator. See Modification Section for price adder.
- ⑥ 220/110 volts can be obtained by connecting in either a Low Zigzag or Double Delta; and 440/220 volts can be obtained by connecting in High Zigzag connections. (See page 60 for connection diagrams)

① LIMA®MAC generators are specifically designed for starting three phase AC electric motors. LIMA®MAC generators provide 1 hp/kW, Code G induction motor starting capability with 35% voltage dip (80°C rise rating).

② LIMA®MAC generators are self-excited and inherently-regulated, providing 4% voltage regulation without external voltage regulator or transformers. LIMA®MAC generators inherently provide 500% 3 phase short circuit support and volts/hertz operation.

③ Only 12-lead units may be connected for single phase operation: 120 V Delta, 240/120 V Low Zigzag or 480 V High Zigzag. Notes A through D on page 51 apply to this page.

① Models include VPI insulation, form wound coil construction, PMG excitation support, raised drip cover, and space heaters as standard equipment. All models are specially designed to accept heavy SCR (Thyristor) loading. Notes A, B, C, D, E, and F on page 51 apply to this page.

Marathon Electric's Crane Duty AC generators are designed for Rubber Tired Gantry Cranes or other mobile/stationary crane applications.

MAGNAMAX^{DVR}

STANDARD FEATURES:

- Form wound main stator coils with special VPI insulation system.
- Epoxy overcoat for humid and salt air environments.
- Intake air filters with pressure shut-off switches.
- IP23 weather protected enclosures and space heaters.
- Heavy duty ball bearings with a B-10 life of 40,000 hours.
- Low sub-transient (X"d) reactance and low voltage dip.
- PMG excitation support system and three phase, true RMS sensing voltage regulator.
- Single or optional two bearing close-coupled engine mounting.

Ratings for all units on this page are very application specific and require an application review for proper sizing. Please contact factory for application assistance.

- ① Pricing for 431 frame and 572 frame induction generators includes the conduit box, however the conduit box must be listed as a separate line item on the order.
 ② The 431 frame and 572 frame induction generators are constructed in synchronous generator rolled steel housings with standard generator mounting feet. The 431 and 572 frame units will accept Marathon standard SAE adapters and drive discs. Contact the factory to obtain pricing for specific customers.
 ③ This is a 3 lead unit, designed to operate at 480 V only.
 ④ Other designs available; please contact factory.
 ⑤ These are in motor frames and are not a standard generator frame type.

The Marathon Mariner features a heavy duty rectifier assembly designed to handle extreme voltage transient surges and over-current situations (oversized diodes and surge suppressors are included for extreme voltage transient surges). Windings have also been reinforced to handle the harshness of salt-laden, marine applications. Proven wrappings and polybutadiene overcoat used in crane duty and reefer applications have been applied to the design. The Marathon Mariner is the ideal choice for heavy duty industrial applications. Modifications such as PMG/DVR[®]2000E+ AVR, space heaters, dripcovers, etc., are also available (see Modification Section for details).

Marathon Mariner units are capable of being Marine Agency certified. Please contact factory for price adders for agency certification.

① All Mariner Models have linkboard as standard

- For ABS certification only. For certification by other Marine Classification Societies such as Lloyds, DNV, NKK, etc., contact Marathon for pricing. ABS witness testing may not be required for units rated below 100 kW.
- If space heaters are specified for frames 363 and smaller, see Modification Section for pricing.
- Required information at time of order placement: Vessel Name/Hull Number, shipyard, nameplate ratings, and mounting arrangements.
- Winding RTD's are required on Mobil Offshore Drilling Units (MODU) for units rated 400 kW (500 kVA) and above. See Modification Section for pricing.
- Winding RTD's are required on all units rated 1000 Volts and above. See Modification Section for pricing.

① All MagnaPlus models have linkboard as standard. Notes A, B, C, D, E, and F on page 51 apply to this page.

Marine Classification Society Requirements for Certification of Shipboard Generators

| Subject | American Bureau Of Shipping (ABS) | Lloyd's Register Of Shipping | Germanischer Lloyd's | Korean Register Of Shipping | Nippon Kaiji Kyokai NKK | Det Norske Veritas |

| Ambient Temperature | 50° C | 45° C | 45° C | 50° C | 50° C | 45° C |
| Temperature Rise | 95° C | 95° C | 90° C | 95° C | 95° C | 95° C |
| Embedded ④ Temperature Detectors | Required for all units 1 kV and over | Required for propulsion systems only | Not Specified | Not Specified | Not Specified | Required for all units 1000 kW and over |
| Space Heaters | Required ① | Not Specified ② | Not Specified ② | Not Specified ② | Not Specified ② | Req. for all units |
| Sustain Short Circuit Current in Percent (%) Rated F.L. Current | 300% for 2 Sec. | 300% for 2 Sec. | 300% for 2 Sec. | 300% for 2 Sec. | Not Specified | 300% for 2 Sec. |
| Drip Cover or Minimum Enclosure Required | IP22 | IP22 | IP22 | IP23 | IP22 | IP22 |
| Fixed Termination of Load Leads ③ | Not Specified | Required | Not Specified | Not Specified | Not Specified | Required |
| Shaft Material Test ④ | Not Specified | Required | Required | Required | Not Specified | Required |

Notes: ① Required for generators weighing 1000 pounds and over.
 ② Not required by Agency Rules, but strongly advised.
 ③ Generator load leads must be terminated on a fixed terminal such as a bus bar, link board or insulated stand-off.
 ④ Requires generator to be a build-up.
 For generators requiring Certification by Agencies other than those listed in the above table, please consult factory.

① 361 to 433 PSL (single bearing) or PDL (double bearing) models are the alternate to CSL models and have equivalent performance and dimensions.

② PMG Option available as build-up only.

③ Specialty and two bearing orders utilize these windings in place of 280 frame CSL models.

④ All MagnaPlus models have linkboard as standard.

⑤ This chart depicts a suggested ambient and temperature rise (27°C ambient/130°C rise) that would be in accordance with the UL maximum temperature of 160°C.

Notes A, B, C, D, E, and F on page 51 apply to this page.

Marathon Electric has supplied custom railroad duty generators for more than 30 years.

Marathon’s custom railroad duty generators optimize performance and provide the customer with the expected service life for this stressful application.

Using the customer’s electrical and mechanical requirements, Marathon selects the appropriate materials, designs, and processes to meet the customer’s needs.

The use of special coil designs with random and form wound coils, processed with multi-layered high solids varnishes, epoxy resins, and VPI systems, help resist the rigorous vibrations, longitudinal impacts, high transient voltages and currents, and the aggressive railroad environment. The proprietary insulation process provides the strongest mechanical strength and the best sealing to protect against the moisture and the railroad contaminants found in the railroad application. The final build specification may affect the final output kW.

The generator assembly is finished by providing the best cooling air flow, lead handling, and drive configuration, in one of the shortest configurations in the industry.

Contact us with your railroad requirements and let us build your generator.

| Documentation | If required, two certified copies of production test reports, outline drawings, rotor weight & WK ² drawings and connection diagrams, and service manuals available upon receipt of purchase order.④ Performance data sheets, obsolete drawings, or drawings and additional technical data that is not available on website, a handling charge will apply. Decrement curves (calculated) | N/C \$125 \$210 | |
| Dripcover | IP22 standards - Standard on all LIMA®MAC IP22 standards - 280 to 740 frame (MAGNAPLUS® 360 frame series with SAE #1 flywheel housing adaptor must use IP23 drip cover, see below) IP23 standards - 280 frame (all), 360 MAGNAPLUS®, 430 frame (all) IP23 standards - 570 frame IP23 standards - 740 frame | N/C \$105 \$340 \$400 \$480 | |

① All designs are intended for bottom entry (right side facing conduit box). Top entry would require the use of customer-provided trough or gutter.

② The designs are for copper (only) customer conductors, with compression-installed lugs. Stacking type lugs may be required depending upon the number of customer conductors.

③ Available in 570 and 740 Frame sizes (MAGNAMAX^{DVR®}) and includes box extension.

④ Please allow five to ten business days from PO receipt date for drawing delivery. Production test reports are not available until after generator shipment.

Modification Section: Generators

| Modification | Description | List Price | *Build To Order |
|--|---|--|-----------------|
| Export Packaging | 250, 280, & 330 frames | \$260 | |
| | 360 frame | \$320 | |
| | 430 & 440 frames | \$440 | |
| | 570 & 580 frames | \$560 | |
| | 741 & 742 frames | \$690 | |
| | 743 & 744 frames | \$810 | |
| Foot Options | Capacitor excited, frames 331 and 332 - 2 hole steel foot plate | N/C | |
| | Pancake generators frames 331 through 336 - 4 hole steel foot plate Consult factory for additional options | N/C | |
| Hydraulic Drive | 280 Frame MagnaPlus. Standard SAE A, B, or C mounting flanges are available along with shaft options of 7/8" (13 tooth spline) or 1 1/4" (14 tooth spline)Ⓛ | \$1,230 | * |
| Instrument Panel 4-Lead Single Phase Generators | Meter panel with voltmeter, ammeter and frequency meter and selector switch including current transformers. (MAGNAPLUS® frames 280, 360 and 430 only) Panel not suited for 120 V only applications. | \$1,175 | |
| Instrument Panel Three Phase Generators | Meter panel with voltmeter, ammeter and frequency meter and selector switch including current transformers (not available on MAGNAMAX ^{DVR®}) 480 volts and lower | \$1,175 | |
| Pilot Shaft (for use with Cat® Engine) | Pilot diameters (3.148", 3.935", 4.723", and 5.116") | \$630 | |
| | Not available on 280-430 frame models | | |
| PMG Excitation MAGNAPLUS® Units | Permanent Magnet Generator & PM300 Regulator 280, 360 & 430 frames | \$545 | |
| | Permanent Magnet Generator & DVR®2000E+ Regulator 280, 360 & 430 frames | \$1,000 | |
| Space Heaters 240/120 Volt | 250 & 280 frame - LIMA®MAC (250: 125 watt; 280: 150 watt) | \$250 | * |
| | 280 & 360 frame - MAGNAPLUS® (280: 84 watt; 360: 250 watt) | \$340 | |
| | 360 & 440 frame - LIMA®MAC & 6 Pole SER® (360: 250 watt; 440: 350 watt) | \$315 | |
| | 430 & 570 frame - MAGNAMAX ^{DVR®} and MAGNAPLUS® (430: 250 watt; 570: 500 watt) | \$510 | |
| | 580 frame - LIMA®MAC only. (500 watt) | \$510 | |
| | 680 frame - LIMA®MAC only. (500 watt) | \$645 | |
| | 740 frame - MAGNAMAX ^{DVR®} (1000 watt) | \$905 | |
| | 1000 frame - MAGNAPOWER® (1250 watt) | \$1,005 | * |
| Special Insulation | Special insulation system consisting of multiple dips and bakes of 100% solids varnish with epoxy overcoat for harsh environmental applications. This adder may also be used for Refrigerated Rail and Reefer configurations. (Contact factory for details for these configurations). 250 & 280 frame | \$320 | * |
| | 360 frame | \$480 | * |
| | 430 & 440 frame | \$1,275 | * |
| | Tropical/fungus insulation system consisting of epoxy overcoat and fungus proofing for moisture protection. 250 & 280 frame | \$295 | * |
| | 360, 430 & 440 frame | \$330 | * |
| | 570, 580 & 680 frame | \$530 | |
| | Tropical insulation (epoxy overcoat) on MAGNAMAX ^{DVR®} , MAGNAPLUS® and LIMA®MAC | standard | |
| | Vacuum pressure impregnation (480 & 600V Random Wound MAGNAMAX ^{DVR®}) 430 frame | \$1,730 | * |
| | 570 frame | \$2,605 | * |
| | 740 frame | \$4,185 | * |
| | Consult factory for other special insulation systems/requirements. | | |
| | Special Painting | Consult factory for available finishes | \$165 |
| Special Windings | Special windings are available for Pancake, MAGNAPLUS®, and MAGNAMAX ^{DVR®} products. Consult factory for ratings and pricing. | consult factory | * |
| Standoff Assembly | 430 & 570 MagnaMax consists of stud and linkbar assembly for terminating generator leads in low or high wye connections. | \$590 | |

Ⓛ Internal shaft spline available in 281 through 284 frames.

* Build-to-Order modifications require normal lead time, and cannot be performed on stock generators.
The base model number of MAGNAMAX^{DVR®} generators may change when build-to-order modifications are made.

Modification Section: Voltage Regulators & Accessories

All prices shown are list prices

| Modification | Description | List Price | *Build To Order |
|---|--|------------------|-----------------|
| Temperature Detectors | Consult factory for possible RTD generator rating adjustment | | |
| | Winding RTDs, (2 per phase) 100 ohm platinum standard, others optional. | \$1,590 | * |
| | Thermocouples, Iron Constantine, Type J | \$720 | * |
| | Thermostats, specify N.O. or N.C. | \$720 | * |
| | Thermistors (1 per phase) must specify operating temperature | \$720 | * |
| | Bearing RTD, 100 ohm platinum standard, others optional - MAGNAMAX ^{DVR®} only. | \$1,070 | * |
| Two Bearing | MagnPlus, MagnaMax, and LimaMac generators are available in two bearing at same list price as single bearing. Generator shaft coupling not included. | N/C | |
| Current Boost System | CBS 305 and power current transformer for APR 63-5 | \$1,270 | |
| Dual Regulators | Two DVR [®] 2000E+ Regulators with change-over switch (570 & 740 MAGNAMAX ^{DVR®} only) | \$2,745 | |
| Isolation/Step Down Transformer | SE350 and APR 63-5 Regulators: 312 VA, 240 V secondary, 240/480/600 V primary | \$645 | |
| | APR 125-5, and SSR125 Regulators: 1000 VA, 120/240 V secondary, 208/240/416/480 V primary | \$825 | |
| | 1000 VA, 120/240 V secondary, 600 V primary | \$825 | |
| | 1000 VA, 120/240 V secondary, 2400/3300/4160 V primary | \$1,990 | |
| Manual Voltage Control Module | MVC 300 for APR 63-5, APR 125-5, and DVR [®] 2000E+ regulators | \$1,455 | |
| | MVC 108 - Used with DVR [®] 2000E+ when EMI suppression to MIL-STD 461C needs to be maintained (furnished loose for mounting by others) | \$4,725 | |
| Paralleling C/Ts | DVR [®] 2000E+ (600 V and Lower) | \$395 | |
| | DVR [®] 2000E+ (602 - 4999 V) | \$845 | |
| | DVR [®] 2000E+ (5000 - 6600 V) | \$1,680 | |
| Paralleling Module (includes C/T) | APM 2000 for SE350, PM300, APR 63-5, and APR 125-5 regulators (three phase systems only) | \$710 | |
| Sensing Transformer | Medium voltage potential transformer used for regulator sensing only—will not support additional accessories. 15 VA up to 4160 V for DVR [®] 2000E+ (Single Phase) | \$535 | |
| | A 3 phase 15 VA/phase up to 4160 V for DVR [®] 2000E+ (Three Phase) Consult factory for voltages greater than 4160 V. | \$1,080 | |
| Voltage Adjust Rheostat | For SE350 regulators | \$115 | |
| | For all other regulators except DVR [®] 2000E+ | | standard |
| Voltage Adjust Switch | For DVR [®] 2000E+ only | \$35 | |
| Voltage Regulators List Price Adder (for substituting AVR for standard unit) | SE350 MAGNAPLUS [®] and Pancake | standard | |
| | No regulator - MAGNAPLUS [®] and Pancake | deduct \$55 net | |
| | VR63-4C - MAGNAPLUS [®] (120 Volt systems only) | \$195 | |
| | AVC63-4A - MAGNAPLUS [®] | \$105 | |
| | APR 63-5 - MAGNAPLUS [®] | \$295 | |
| | APR 125-5 - MAGNAPLUS [®] | \$745 | |
| | AVC 63-12B1 50/60 Hz | \$515 | |
| | AVC63-12B2 - 400 Hertz only | standard | |
| | DVR [®] 2000E+ - All MAGNAMAX ^{DVR®} | standard | |
| | No regulator - MAGNAMAX ^{DVR®} | deduct \$115 net | |
| | PM300 - MAGNAMAX ^{DVR®} | deduct \$25 net | |
| DVR [®] 2000EC - All MAGNAMAX ^{DVR®} (with VAR/PF controller installed) | \$515 | | |
| SSR125-12 - All MAGNAMAX ^{DVR®} (furnished loose for mounting by others) | \$3,760 | | |
| 1000 Frame | 1000 frame medium voltage (to 6600 V) and high voltage (to 13800 V) modifications are order specific. Consult factory with your requirements. | | |

Modification Section: Testing

All prices shown are list prices

| Modification | Description | List Price |
|---|---|------------|
| Special Testing | Basic setup charge | \$1,280 |
| | MIL-STD-705C | |
| | Method | |
| | 410.1 Open Circuit Saturation Curve | \$250 |
| | 411.1 Synchronous Impedance Curve - Short-Circuit Saturation Curve | \$280 |
| | 412.1 Zero-Power Factor Saturation Curve - 1875 kVA maximum @ 480 volts | \$500 |
| | 413.1 Rated Load Current Saturation Curve - 1875 kVA maximum @ 480 volts | \$550 |
| | 415.0 Summation of Losses - units of 50 kW and larger | \$675 |
| | 415.0 Summation of Losses - units of less than 50 kW | \$550 |
| | 420.1 Short Circuit Ratio | \$265 |
| | 421.1 Direct-Axis Synchronous Reactance (Xd) | \$250 |
| | 422.1 Negative Sequence Reactance (X2) | \$250 |
| | 423.1 Zero-Sequence Reactance (X0) | \$200 |
| | 425.1 Direct-Axis Transient Reactance (X'd) | \$500 |
| | 426.1 Direct-Axis Subtransient Reactance (X''d) | \$345 |
| | 427.1 Direct-Axis Transient Short Circuit Time Constant (T'd) | \$345 |
| | 430.1 Direct-Axis Transient Open Circuit Time Constant (T'do) | \$520 |
| | 432.1 Short Circuit Time Constant of Armature Windings (Ta) | \$340 |
| | 505.1 Overspeed | \$200 |
| | 511.1 Voltage Regulator Range - 1875 kVA maximum @ 480 volts | \$1,295 |
| | 601.1 Voltage Waveform (Oscillographic) - 1875 kVA maximum @ 480 volts | \$800 |
| | 601.1 Voltage Waveform (Deviation Factor) - run in conjunction with 601.4 | N/C |
| | 601.4 Voltage Waveform (Harmonic Analysis) - 1875 kVA maximum @ 480 volts | \$480 |
| | 611.1 Inherent Voltage Droop (generator only) - 1250 kVA maximum | \$720 |
| | 615.1 Inherent Voltage Regulation (generator only) - 1125 kVA maximum @ 480 volts | \$720 |
| | 620.1 Voltage Unbalance with Unbalanced Load (Line-to-Neutral Load) | \$320 |
| | 620.2 Voltage Unbalance with Unbalanced Load (Line-to-Line Load) | \$320 |
| | 625.1 Short Circuit (Mech. Strength) - 3 phase only, 7000 amp maximum | \$750 |
| 680.1 Temperature Rise (generator only) - Heat Run: 5-100 kW | \$900 | |
| 680.1 Temperature Rise (generator only) - Heat Run: 101-500 kW | \$1,105 | |
| 680.1 Temperature Rise (generator only) - Heat Run: 501-1500 kW @ 480 volts | \$1,600 | |
| Standard Testing | Winding resistance, 401.1a | N/C |
| | Insulation resistance of all windings, 301.1b | N/C |
| | High potential test on all windings, 302.1a | N/C |
| | Exciter check | N/C |
| | Regulator operation | N/C |
| | Exciter field current | N/C |
| | Voltage balance | N/C |
| Overspeed (1 Min.) | N/C | |
| Witness Testing | Additional daily charge for witnessing by customer or customer's agents | \$905 |

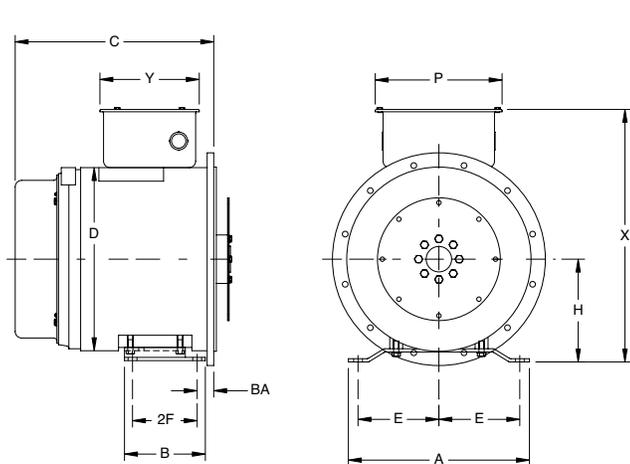

General Notes (Applicable to price on pages 1 through 47)

- A. All base models listed (except MAGNAPOWER®) are single bearing with two bearings available as a no-charge option. Pricing includes flexible drive discs, SAE adapter, standard voltage regulator, and full guarding. Drip covers are optional. All voltage regulators have underspeed protection, EMI filtering, and are encapsulated for moisture protection.
- B. MAGNAPLUS® and MAGNAMAX^{DVR}® products have Class H insulation. LIMA®MAC products have Class H insulation on the rotor, and Class F insulation on the stator. MAGNAPOWER® products have Class H insulation for 4160V and below, and Class F insulation for above 4160V. Pancake products have Class F insulation except for Model 334RSA3010, which is Class H insulation. Rating columns headed NEMA B, F, and H indicate that generators operated at the specified ratings will not exceed the temperature rise limitation for the specified Class of insulation specified in NEMA MG1-22.40. The rating columns do not specify the Class of insulation used in the generator's construction.
- C. The frame size for each model is the first 3 or 4 digits of the model number.
- D. All generator ratings listed in this publication are based upon temperature rises measured by the resistance method as defined by MIL-STD-705C and IEEE STD 115, Method 6.4.4. For ratings at rises as measured by embedded temperature detectors, consult Marathon.
- E. Pancake AVR and MAGNAPLUS® products are shunt-excited (non-PMG) generators. The automatic voltage regulator derives input power from the generator's output leads.
- F. MAGNAMAX^{DVR}® and MAGNAPOWER® generators incorporate a Permanent Magnet Generator (PMG) as the input power source for the voltage regulator.

Notes: CF = Consult factory for price and availability.
 Std. = Standard adaption available at no additional cost.
 Std.1 = Adaption is available for standard units, but at extra cost. Consult factory for pricing.
 Build-up = Requires non-standard shaft. Consult factory for lead times.

Technical Data

Environmental and Special Considerations

Once the size of the generator has been determined, it is important to review the environmental and special conditions which may affect the life of the generator. Some of the most common conditions which may require special attention are outlined below.

ALTITUDE / AMBIENT – For applications over 3300 feet elevation or where the temperature of the ventilating air to the generator exceeds 40°C (104°F), derating of the generator will be necessary. To determine the derating, use the chart below by moving vertically on the specified altitude to the horizontal line that matches the required ambient temperature, then select the derating required.

ABRASIVE DUSTS – When it is possible that airborne abrasive dusts will be introduced to the generator with the ventilating air, additional protection is recommended. Dirt, sand, volcanic ash, gravel, rock dust, etc. are typical of this type of application. Although the generator windings are protected against abrasive environments, severe conditions may warrant protection by means of baffles, housings and filters, or other suitable means. Refer to Marathon Electric for recommendations.

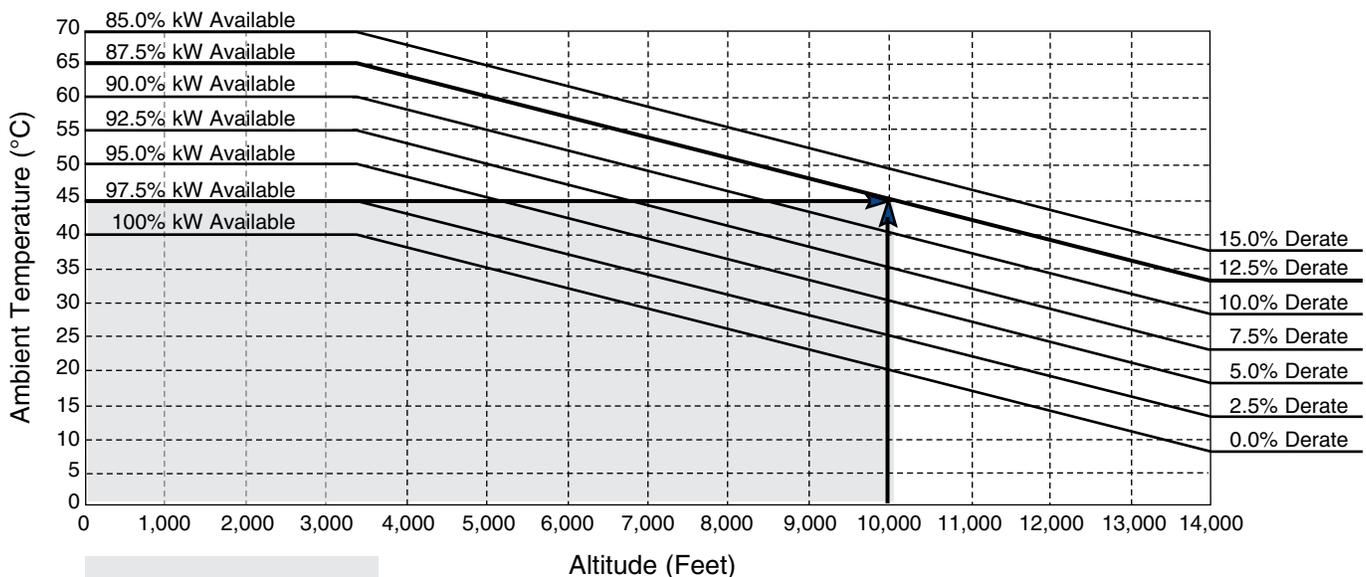

HIGH HUMIDITY AND TROPICAL CLIMATE – In moist or humid areas such as the Tropics, coastal areas, and all marine service, additional protection is recommended. Although the standard windings are humidity and moisture resistant, space heaters are required for these environments.

OUTDOOR APPLICATION – All generators for outdoor application must be protected from the elements by sheet metal housings with the proper openings for ventilation. This protection should be designed to prevent the direct contact of wind driven rain, snow, or dust with the generator. Space heaters are recommended depending on location and type of service. Refer to Marathon Electric for recommendations on enclosure requirements.

NON-LINEAR LOADING – Solid state electronic control devices which utilize thyristors or SCR firing circuits (such as variable frequency induction motor controls, precision motor speed controls, no-break powered battery chargers, etc.) can introduce high frequency harmonics which adversely affect the normal waveform of the generator. This creates additional heat in the generator stator and rotor and can cause overheating. These devices can and do present problems to non-utility power generating equipment or any limited power bus system. The problems which can occur are not limited to the generator itself, but can affect the solid state control device, the equipment it controls, other associated loads, monitoring devices or a number of combinations over the entire system.

It is important that the control manufacturer, the generator manufacturer, and the systems engineer work together to insure the proper selection of all components. Please refer to Marathon for application assistance.

ALTITUDE/AMBIENT RATING ADJUSTMENT

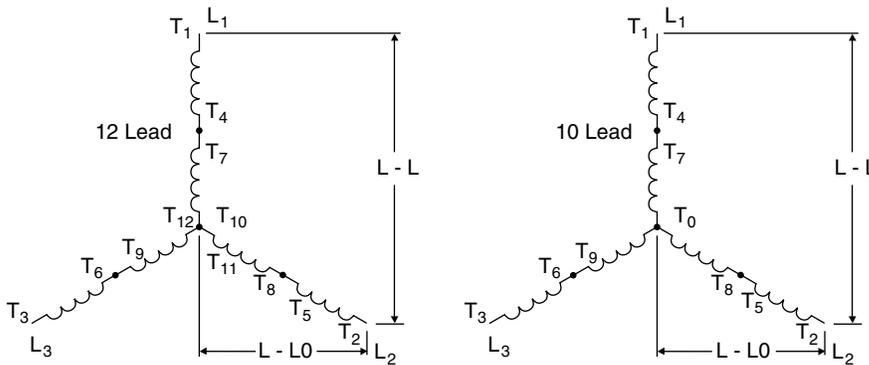

Example:
 Elevation: 10,000 feet
 Ambient: 45°C
 Required Derate: 12.5%
 Catalog Rating x .875

① With regulator mounted in generator conduit box.

② Meets MIL461C, Part 9.

③ Requires the addition of a paralleling current transformer.

④ Requires the addition of a paralleling module along with a paralleling current transformer.

⑤ Requires the addition of VAR/PF Module.

⑥ Protection is inherent. Sensing and power input share the same two leads.

A loss of sensing (open in the sensing circuit) results in an open in the input power circuit, and the regulator will shut down.

MARATHON ELECTRIC MANUFACTURING CORPORATION

GPN411 TERMS AND CONDITIONS OF SALE

ALL QUOTATIONS ARE MADE AND ALL ORDERS ARE ACCEPTED BY MARATHON ELECTRIC MANUFACTURING CORPORATION SUBJECT ONLY TO THESE TERMS AND CONDITIONS.

1. MODIFICATIONS OF SALES TERMS

Any Terms and Conditions contained in any purchase order or other form of communication from Marathon's customers which are additional to or different from these Terms and Conditions shall be deemed rejected by Marathon unless expressly accepted in writing by Marathon. In general, no modification, amendment, waiver or other change of any of these Terms and Conditions and those contained on the reverse side hereof and/or in attachments hereto ("Terms and Conditions"), or of any of Marathon's rights or remedies thereunder, shall be binding on Marathon unless expressly accepted in writing by Marathon's authorized officers. No course of dealing, usage of trade or course of performance shall be relevant to explain or supplement any of these Terms and Conditions. In case of conflict between the Terms and Conditions printed on this page and those contained on the face side or in attachments hereto, the latter shall control. If any document issued by any party hereto is sent by facsimile or another form of electronic document transmission, the parties hereto agree that (a) the copy of any such document printed on the facsimile machine or printer of the recipient thereof is a counterpart original copy thereof and is a "writing", (b) delivery of any such document to the recipient thereof by facsimile or such other form of electronic document transmission is authorized by the recipient thereof and is legally sufficient for all purposes as if delivered by United States mail, (c) the typewritten name of an authorized agent of the party sending such document on any such document is sufficient as a signature thereon and behalf of such party and the intent of such signature is to authenticate the writing, and (d) an electronically stored and reproduced copy of any such document shall be deemed to be legally sufficient evidence of the terms of such document for all purposes.

2. ACCEPTANCE OF ORDERS

Acceptance by Marathon of Buyer's purchase order(s) is expressly conditioned upon Buyer's assent to these Terms and Conditions. Buyer will be deemed to have assented to such Terms and Conditions unless Marathon receives written notice of any objections within fifteen (15) days after Buyer's receipt of this form and in all events prior to any delivery or other performance by Marathon of Buyer's order.

3. QUOTATIONS

Quotations by Marathon shall be deemed to be offers by Marathon to sell the equipment described therein subject to these Terms and Conditions, and acceptance of such offers is expressly limited to acceptance by Buyer of all of these Terms and Conditions within thirty (30) days from the date of the quotation. Purchase orders submitted by Buyer for the equipment quoted by Marathon shall be subject to and will be deemed to constitute acceptance of these Terms and Conditions. All purchase orders will be subject to approval by Marathon.

4. PRICES; PRICE CHANGES

All prices are net F.O.B. shipping point and are subject to change without notice. In the event of a change in Marathon's prices, the price for equipment unshipped will be the price in effect on the date of shipment.

If Marathon's quoted price was based upon delivery to and acceptance by Buyer of a specified quantity of equipment, such price shall be subject to adjustment if Buyer does not accept the quantity at the times specified in Marathon's quotation, and Buyer will be invoiced at Marathon's standard price without quantity discounts, if any, for the quantity of equipment actually accepted by Buyer.

5. TAXES

In addition to any prices, Buyer shall pay the amount of any present or future manufacturer's tax, retailer's occupation tax, use tax, sales tax, excise tax, duty, custom, inspection or testing fee, or any other tax, fee or charge of any nature whatsoever imposed by any governmental authority, on or measured by the transaction between Marathon and Buyer. In the event Marathon is required to pay any such tax, fee or charge, Buyer shall reimburse Marathon therefor; or, in lieu of such payment, Buyer shall provide Marathon at the time the order is submitted with an exemption certificate or other document acceptable to the authority imposing such tax, fee or charge.

6. TERMS OF PAYMENT

All orders are subject to the approval of Marathon. Terms of payment are cash in full no later than thirty (30) days from date of shipment, without discount. If, during the period of performance of an order, the financial condition of buyer is determined by Marathon not to justify the terms of payment specified, Marathon may demand full or partial payment in advance before proceeding with the work, or satisfactory security or guarantees that invoices will be promptly paid when due, or, at its option without prejudice to other lawful remedies, may defer delivery or cancel this contract. If delivery is deferred, the equipment may be stored as provided in Section 9 hereof and Marathon may submit a new estimate of cost for completion based on prevailing conditions. If Buyer defaults in any payment when due, or in the event any voluntary or involuntary bankruptcy or insolvency proceedings involving Buyer are initiated by or against Buyer, then the whole contract price shall immediately become due and payable upon demand, or Marathon, at its option without prejudice to its other lawful remedies, may defer delivery or cancel this contract.

Prorata payments shall become due as shipments are made. If shipments are delayed by the Buyer for any cause, payments shall become due from the date on which Marathon is prepared to make shipment and storage shall be the Buyer's risk and expense as provided in Section 9 hereof. If manufacture is delayed by the Buyer for any cause, a partial payment based upon the proportion of the order completed shall become due from the date on which Marathon is notified of the delay.

7. DELIVERY; RISK OF LOSS

All sales are F.O.B. Marathon's plant or other point of shipment designated by Marathon. Shipping dates are estimates only which are not guaranteed and are based upon prompt receipt from Buyer of all necessary shipping and other information. Marathon reserves the right to make delivery in installments, all installments to be separately invoiced and paid for by Buyer when due per invoice, without regard to subsequent deliveries.

Delivery of equipment to a commercial carrier at Marathon's plant or other loading point shall constitute delivery to Buyer, and any risk of loss and further cost and responsibility thereafter for claims, delivery, loss or damage, including, if applicable, placement and storage, shall be borne by Buyer. When equipment is delivered by Marathon's truck, unloading at Buyer's dock shall constitute delivery to Buyer. Claims for shortages or other errors in delivery must be made in writing to Marathon within ten (10) days after receipt of shipment and failure to give such notice shall constitute unqualified acceptance and a waiver of all such claims by Buyer. Claims for loss or damage to equipment in transit by common carrier must be made to the carrier and not to Marathon.

Freight and handling charges by Marathon may not reflect actual freight charges prepaid to the carrier by Marathon due to incentive discounts earned by Marathon based upon Marathon's aggregate volume of freight tendered to a carrier or when a carrier must be used which charges a rate which is different than the rate upon which

Marathon's freight and handling charges were based. When shipments are delivered in Marathon's private trucks, Buyer will be charged an amount approximating the prevailing common carrier rate.

8. EXCUSABLE DELAYS; FORCE MAJEURE

Marathon shall not be liable for any ordinary, incidental, or consequential loss or damage as a result of Marathon's delay in or failure of delivery or installation due to (i) any cause beyond Marathon's reasonable control, (ii) an act of God, act of the Buyer, embargo or other government act, authority, regulation or request, fire, theft, accident, strike, slowdown or other labor disturbance, war, riot, delay in transportation, or (iii) inability to obtain necessary labor, materials, components, or facilities.

Should any of the aforementioned events of force majeure occur, Marathon, at its option, may cancel Buyer's order with respect to any undelivered equipment or extend the delivery date for a period equal to the time lost because of delay. Notice of such election shall be given promptly to Buyer. In the event Marathon elects to so cancel the order, Marathon shall be released of and from all liability for failure to deliver the equipment, including, but not limited to, any and all claims on behalf of Buyer for lost profits, or any other claim of any nature which Buyer might have.

If shipping or progress of the work is delayed or interrupted by Buyer, directly or indirectly, Buyer shall pay Marathon for all additional charges resulting therefrom.

9. STORAGE

If the equipment is not shipped within thirty (30) days after notification has been made to Buyer that it is ready for shipping, for any reason beyond Marathon's control, including Buyer's failure to give shipping instructions, Marathon may store the equipment at Buyer's risk and expense in a warehouse or on Marathon's premises, and Buyer shall pay all handling, transportation and storage costs at the prevailing commercial rates promptly following Marathon's submission of invoices for such costs.

10. WARRANTIES TO DISTRIBUTORS AND INDUSTRIAL OR COMMERCIAL CUSTOMERS

This warranty is extended only to Marathon's distributors and industrial or commercial customers and does not apply to consumer purchasers. This warranty applies to all generator and related parts sales.

Warranty Period - (a) Marathon warrants Standby Duty Generators manufactured by or for it to be free from defects in materials and workmanship and to conform to Marathon's written specifications for a period of 24 months from date of startup, 30 months from date of shipment, or 1000 hours in use, whichever period shall expire first. (b) Marathon warrants the Continuous Duty Generators manufactured by or for it to be free from defects in materials and workmanship and to conform to Marathon's written specifications for a period of 12 months from date of startup or 18 months from date of shipment, whichever period shall expire first.

Warranty Remedies - If, prior to expiration of the foregoing applicable warranty period, any of such products shall be proved to Marathon's satisfaction to be defective or nonconforming, Marathon will repair or replace such defective equipment or components thereof, F.O.B. Marathon's plant or other destination designated by Marathon, or will refund or provide Buyer with a credit in the amount of the purchase price paid therefor by Buyer, at Marathon's sole option. Buyer's exclusive remedy and Marathon's sole obligation under this warranty shall be limited to such repair or replacement, F.O.B. Marathon's plant or other destination designated by Marathon, or refund or credit by Marathon, and shall be conditioned upon Marathon's receiving written notice of any defect within a reasonable period of time (but in no event more than sixty (60) days) after it was discovered or by reasonable care should have been discovered. In no event shall Marathon's liability for such defective or nonconforming products exceed the purchase price paid by Buyer therefor.

Exclusions - This warranty does not (i) cover shipping expenses to and from Marathon's factory or other destination designated by Marathon for repair or replacement of defective equipment or any tax, duty, custom, inspection or testing fee, or any other charge of any nature related thereto, nor does it cover the costs of disassembling or removing defective equipment or reassembling, reinstalling, or testing repaired or replaced equipment or finishing the reinstallation thereof, (ii) apply and shall be void with respect to equipment operated in excess of rated capacity or otherwise not in accordance with installation, maintenance, or operating instructions or requirements, to equipment repaired or altered by others than Marathon or Marathon's authorized service agencies, or to equipment which was subjected to abuse, negligence, misuse, misapplication, accident, damages by circumstances beyond Marathon's control, to improper installation (if by others than Marathon), operation, maintenance or storage, or to other than normal use or service, and (iii) apply to equipment or components not manufactured by or for Marathon. With respect to equipment or components not manufactured by Marathon, Marathon's warranty obligations shall in all respects conform and be limited to the warranty actually extended to Marathon by its suppliers, but in no event shall Marathon's obligations be greater than those provided under Marathon's warranty set forth in this Section 10.

THE FOREGOING WARRANTIES ARE IN LIEU OF ALL OTHER EXPRESS AND IMPLIED WARRANTIES (EXCEPT TITLE), INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. NO EMPLOYEE, REPRESENTATIVE, OR AGENT OF MARATHON OTHER THAN AN OFFICER OF MARATHON IS AUTHORIZED TO ALTER OR MODIFY ANY PROVISION OF THIS SECTION 10 OR TO MAKE ANY GUARANTEE, WARRANTY, OR REPRESENTATION, EXPRESS OR IMPLIED, ORALLY OR IN WRITING, WHICH IS CONTRARY TO THE FOREGOING. Any description of the equipment, whether in writing or made orally by Marathon or Marathon's agents, specifications, samples, models, bulletins, drawings, diagrams, engineering sheets or similar materials used in connection with Buyer's order are for the sole purpose of identifying the equipment and shall not be construed as an express warranty. Any suggestions by Marathon or Marathon's agents regarding use, application or suitability of the equipment shall not be construed as an express warranty unless confirmed to be such in writing by Marathon's authorized officer.

11. LIMITATIONS OF LIABILITY; CONSEQUENTIAL DAMAGES

Nuclear Use Disclaimer - Equipment sold by Marathon is not intended for use in connection with any nuclear facility or activity. If so used, Marathon disclaims all liability for any nuclear damage, injury or contamination, and Buyer shall indemnify and hold Marathon, its officers, agents, employees, successors, assigns and customers harmless from and against any and all losses, damages or expenses of whatever form or nature (including attorneys' fees and other costs of defending any action) which they or any of them may sustain or incur, whether as a result of breach of contract, warranty, tort (including negligence) or otherwise, by reason of such use.

Consequential Damage Disclaimer - Marathon's liability with respect to equipment proved to its satisfaction to be defective within the warranty period shall be limited to repair, replacement or refund as provided in Section 10 hereof, and in no event shall Marathon's liability exceed the purchase price of the equipment involved. Marathon shall not be subject to any other obligations or liabilities, whether arising out of breach of contract, warranty, tort (including negligence) or other theories of law, with respect to equipment sold or services rendered by Marathon, or any undertakings, acts or omissions relating thereto. Without limiting the generality of the foregoing, Marathon specifically disclaims any liability for property or personal injury damages, penalties, special or punitive damages, damages for lost profits or revenues, loss of use of equipment or any associated equipment, cost of capital, cost of substitute products, facilities or services, downtime, shutdown, or slowdown costs, or for any other types of economic loss, and for claims of Buyer's customers for any such damages.

EVEN IF THE REPAIR OR REPLACEMENT REMEDY SHALL BE DEEMED TO HAVE FAILED OF ITS ESSENTIAL PURPOSE UNDER SECTION 2-719 OF THE UNIFORM COMMERCIAL CODE, MARATHON SHALL HAVE NO LIABILITY TO BUYER FOR CONSEQUENTIAL DAMAGES, SUCH AS LOST PROFITS, LOST REVENUE, DAMAGE TO OTHER EQUIPMENT OR LIABILITY OR INJURY TO A THIRD PARTY. MARATHON SHALL NOT BE LIABLE FOR AND DISCLAIMS ALL CONSEQUENTIAL, INCIDENTAL AND CONTINGENT DAMAGES WHATSOEVER.

12. INDEMNIFICATION BY BUYER

Buyer shall indemnify, hold harmless, and defend Marathon and Marathon's employees and agents from and against any and all damages, liability, claims, losses, and expenses (including reasonable attorneys' fees, court costs, and out-of-pocket expenses) arising out of or resulting in any way from claims by customers of Buyer or third parties against Marathon alleging a breach of contract or warranty by Marathon to the extent that such damages, liability, claims, losses, and expenses which may be payable by Marathon to Buyer pursuant to and as limited by Marathon's warranty and damage obligations as contained in Sections 10 and 11 hereof so as to effectively limit Marathon's obligations to customers of Buyer or third parties to those set forth in Sections 10 and 11 hereof.

13. PATENT INDEMNIFICATION

Marathon will, at its own expense, defend or settle any suits that may be instituted against Buyer for alleged infringement by the equipment of any United States patent, provided that (a) such alleged infringements consist of the use of the equipment for any of the purposes for which such equipment was sold, (b) Buyer shall have made all payments for such equipment then due hereunder, (c) Buyer shall give Marathon immediate notice in writing of any such suit and transmit to Marathon immediately upon receipt all processes and papers served upon Buyer, and (d) Buyer shall permit Marathon through its counsel, either in the name of Buyer or in the name of Marathon, to defend such suit(s) and give all needed information, assistance and authority to enable Marathon to do so.

In case of a final award of damages in any such suit, Marathon will pay such award but will not be responsible for any compromise or settlement made without its written consent. In case the equipment itself is in such suit held to infringe any valid patent issued in the United States and its use enjoined, or in the event of a settlement or compromise approved by Marathon which shall preclude future use of the equipment sold to Buyer hereunder, Marathon shall, at its own expense and at its sole option, either (a) procure rights to continue using such equipment, (b) modify the equipment to render it non-infringing, (c) replace the equipment with non-infringing equipment or (d) refund the purchase price paid by Buyer for the equipment after return of the equipment to Marathon. Notwithstanding the foregoing, Marathon shall not be held responsible for infringements of combination or process patents covering the use of equipment in combination with other goods or materials not furnished by Marathon.

The foregoing states the entire liability of Marathon for patent infringement, and **IN NO EVENT SHALL MARATHON BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES ATTRIBUTABLE TO AN INFRINGEMENT** nor for infringement based on the use of the equipment for a purpose other than that for which sold by Marathon. As to any equipment furnished by Marathon to Buyer manufactured in accordance with designs proposed or furnished by Buyer or any claim of contributory infringement resulting from the use or resale by Buyer of equipment sold hereunder, Buyer shall indemnify Marathon for any award made against Marathon or settlement by Marathon for any patent, trademark or copyright infringements, including attorneys' fees and defense costs.

14. SECURITY AGREEMENT AND FINANCING STATEMENTS

To secure payment of the purchase price and of all monies which may be due hereunder, and performance of all of Buyer's obligations hereunder, Buyer hereby grants to Marathon a security interest in all equipment sold by Marathon, and agrees to execute such other

Security Agreements and Financing Statements as Marathon may reasonably request.

15. INSURANCE

Until payment in full of the purchase price, Buyer shall maintain insurance covering all equipment sold by Marathon to Buyer in such amounts and against such risks as is customary by companies engaged in the same or similar business and similarly located, and shall, upon Marathon's request, furnish evidence of such insurance satisfactory to Marathon.

16. DRAWINGS; OTHER DESIGN DATA

All specifications, drawings, designs, data, information, ideas, methods, tools, gages, dies, fixtures, patterns and/or inventions made, conceived, developed or acquired by Marathon in connection with procuring and/or executing Buyer's order will vest in and inure to Marathon's sole benefit notwithstanding any charges therefor which may have been or may be imposed by Marathon.

Buyer shall not give, loan, exhibit, sell or transfer to any person not then employed by Buyer and authorized to receive such information, or to any organization or entity, any drawing, photograph or specification furnished by Marathon or reproduction thereof which may enable such person, organization or entity to furnish similar goods or parts therefor.

17. RETURN OF EQUIPMENT

No equipment or part shall be returned to Marathon without written authorization and shipping instructions first having been obtained from Marathon.

18. ASSIGNMENT AND SUBCONTRACTING

None of the Buyer's rights under any order shall be assigned by the Buyer to any other person, whether by operation of law or otherwise, without Marathon's prior written approval. Marathon may, without the necessity of obtaining Buyer's prior written consent, subcontract the production of all or any portion of the equipment.

19. CANCELLATION

No order submitted to Marathon may be cancelled by Buyer without the prior written consent of Marathon, which consent will at all times be conditioned on Buyer's agreement to pay Marathon's cancellation charge. For finished equipment which in Marathon's judgment is readily resalable to others, the cancellation charge shall be 15% of the invoice price of the equipment. For all other cancellations, the cancellation charge shall amount to all costs and expenses incurred by Marathon and arising out of or in connection with Buyer's order, net of recoverability, but in no event less than 10% of the invoice price of the equipment or more than the invoice price.

20. GENERAL

Governing Law - These Terms and Conditions, and the contract of sale between Marathon and Buyer, shall be governed by and construed in accordance with the laws of the State of Wisconsin. Marathon and Buyer hereby agree that any legal action deemed necessary by either party hereto shall be brought in the Circuit Court in and for Marathon County, Wisconsin and hereby consent to the personal jurisdiction of such court in any such action over the parties hereto. The rights and obligations of Marathon and Buyer shall not be governed by the provisions of the United Nations Convention on Contracts for the International Sale of Goods.

Attorneys' Fees - Buyer agrees to pay all of Marathon's costs and expenses of collection and related litigation, including but not limited to attorneys' fees and costs.

Salvatory Clause - The invalidity, in whole or in part, of any of the provisions of these Terms and Conditions, shall not affect the enforceability of any of the other provisions thereof.

Applicability - The Terms and Conditions as stated herein are applicable as of the date of this printing and until such time as changed by Marathon.

Freight Policy

All prices are quoted F.O.B. Monterrey, Mexico; or Pharr, TX; or Wausau, WI; or Indianapolis, IN; dependent upon plant of manufacture. Customers may use any one of the following methods:

- Pick up generators at our plant of manufacture on their own carrier
- Allow us to ship the generators freight collect
- Allow us to ship via our carriers

Marathon will ship the generator on our approved corporate freight carriers at the following percentage (%) adders applied to the net generator and accessory price:

| | | | |
|-------------------------------|----------------------------|-----------------------------|-----------------------------|
| Alabama 5% | Indiana 5% | Nebraska 5% | South Carolina 5% |
| Alaska . . . refer to factory | Iowa 5% | Nevada 5% | South Dakota 5% |
| Arizona 5% | Kansas 5% | New Hampshire 5% | Tennessee 5% |
| Arkansas 5% | Kentucky 5% | New Jersey 5% | Texas 5% |
| California 5% | Louisiana 5% | New Mexico 5% | Utah 5% |
| Colorado 5% | Maine 5% | New York 5% | Vermont 5% |
| Connecticut 5% | Maryland 5% | North Carolina 5% | Virginia 5% |
| Delaware 5% | Massachusetts 5% | North Dakota 5% | Washington 5% |
| Florida 5% | Michigan 5% | Ohio 5% | West Virginia 5% |
| Georgia 5% | Minnesota 5% | Oklahoma 5% | Wisconsin 5% |
| Hawaii . . . refer to factory | Mississippi 5% | Oregon 5% | Wyoming 5% |
| Idaho 5% | Missouri 5% | Pennsylvania 5% | Eastern Canada 6% |
| Illinois 5% | Montana 5% | Rhode Island 5% | Western Canada 6% |

Need a generator in a hurry?

Ask for our ONE DAY SERVICE (\$190 Net Adder Per Generator)

- 1) Generator must be in stock and be ordered with standard adaption, standard voltage regulator, and standard primer paint overcoat.
- 2) Customer must have pre-approved credit with Marathon Electric, or request C.O.D. shipment.
- 3) Orders must be phoned in to Wausau by 12:00 p.m. Central Time to allow the generator to ship the next business day.
- 4) Complete adaption, regulator, regulator nameplate data and shipping information must be received at the time of order entry.

IMPORTANT INFORMATION

Please Read Carefully

This catalog is not intended to provide operational instructions. Appropriate Marathon Electric instructions provided with the generator and precautions attached to the generator should be read carefully prior to installation, operations and/or maintenance of the equipment. Injury to personnel or generator failure may be caused by improper installation, maintenance or operation.

The following **WARNING** and **CAUTION** information is supplied for your protection and to provide you with many years of trouble free and safe operation of your Marathon Electric generator.

WARNING

- Buyer shall be solely responsible for determining the adequacy of the product for any and all uses to which Buyer shall apply the product. The application by Buyer shall not be subject to any implied warranty of fitness for a particular purpose.
- For safety, Buyer or User should provide protective guards over all shaft extensions and any moving apparatus mounted thereon. The User is responsible for checking all applicable safety codes in his area and providing suitable guards. Failure to do so may result in bodily injury and/or damage to equipment.
- Hot oil can cause severe burns. Use extreme care when removing lubrication plugs.
- Disconnect power and lock out drive equipment before working on a generator.
- Always keep hands and clothing away from moving parts.
- The lifting eyes on the generator are not to be used to lift the entire generator set. Only the generator may be safely lifted by the lifting eyes. Do not use the conduit box for lifting or support of the generator.
- Install and ground the generator per local and national codes.
- Discharge all capacitors before servicing the generator.
- Misapplication of a generator in a hazardous environment can cause fire or an explosion and result in serious injury.
- Never attempt to measure the temperature rise of a generator by touch. Temperature rise must be measured by thermometer, resistance, imbedded detector or thermocouple.
- Operation of a generator at higher than its nameplate ratings may result in fire, damage to equipment or serious injury to personnel.
- Do not apply any force to the generator fan when rotating the generator rotor.

CAUTION

- Mounting bolts should be routinely checked to ensure that the unit is firmly anchored for proper operation.
- Consult qualified personnel with questions. All electrical repairs must be performed by trained and qualified personnel only.
- Generators should not be operated faster than their rated speed.
- For inverter applications, follow the inverter manufacturer's installation guidelines.
- Make sure the generator is properly secured and aligned before operation.
- When installing the generator, insure that loose parts or tools do not fall inside the generator.
- When connecting the generator, be sure to follow the correct wiring diagram for the desired voltage. Insure that the voltage regulator is connected per the wiring diagram.

RESALE OF GOODS

In the event of the resale of any of the goods, in whatever form, Resellers/Buyers will include the following language in a conspicuous place and in a conspicuous manner in a written agreement covering such sale:

The manufacturer makes no warranty or representations, express or implied, by operation of law or otherwise, as to the merchantability or fitness for a particular purpose of the goods sold hereunder. Buyer acknowledges that it alone has determined that the goods purchased hereunder will suitably meet the requirements of their intended use. In no event will the manufacturer be liable for consequential, incidental or other damages. Even if the repair or replacement remedy shall be deemed to have failed of its essential purpose under Section 2-719 of the Uniform Commercial Code, the manufacturer shall have no liability to Buyer for consequential damages.

Resellers/Buyers agree to also include this entire document including the cautions and warnings above in a conspicuous place and in a conspicuous manner in writing to instruct users on the safe usage of the product.

This information should be read together with all other printed information supplied by Marathon Electric.
