Industrial Quality... Affordable Price

Wildcat® 200

CC, DC Engine-Driven Welder/Generator

Industrial Quality and Durability at an Affordable Price

- Fully enclosed case
- Compact size, lightweight
- Full three-year warranty
- 50–200 amp range, 6,500 watts power
- 12-hour run time using 1/8-inch Stick electrode
- Excellent DC Stick/TIG welding performance

Fully Enclosed Case

The Wildcat's fully enclosed case protects the engine from falling objects and the internal welding components from dust and debris. Heavy-duty construction and 104° F rating ensure durability in all climates and conditions.

Compact Size

Thirty percent smaller than competitive models, the Wildcat offers industrial quality performance in a compact frame, freeing up needed space and weight on work trucks for tools and other equipment.

Full Three-year Warranty

A testament to its durability, the Wildcat features not only Miller's True Blue® three-year warranty on the welder/generator, but also a three-year warranty on the 14 HP Subaru engine. (Engines warranted separately by the manufacturer.)

Professional Weld Performance

Provides excellent DC Stick and TIG welding capabilities up to 200 amps (up to 5/16-inch electrode) and up to 6,500 watts of peak power (5,500 watts continuous).

Efficient Operation

Large, seven-gallon fuel tank easily keeps the unit running for a full day's work—12 hours using a 1/8-inch Stick electrode. Plus, the Auto Idle™ feature conserves fuel when not in use.

Accu-Rated™ – Not Inflated Generator Power

The Wildcat 200 is the right choice for:

- Maintenance and repair
- Farm and ranch
- Fabrication
- Stand-alone generator

Easy to Setup for Welding

Choose the amperage range and electrode type using the coarse range switch, and dial in the optimal arc using the fine control. A convenient front panel ignition switch and a back-up recoil start in the rear ensure reliable and convenient starting every time.

Compact, lightweight, durable and cost effective machine is designed for the contractor and is great for maintenance/repair, farm and ranch applications.

Wildcat[®] 200

CC, DC Engine-Driven Welder/Generator

“As a mobile service company, we love the size and weight of the Wildcat 200. We can easily load and unload it from our pick-up trucks to save time on quick patch and repair jobs.”

— Tyler Birkholtz, Lil Red Wagon Welding
Buckeye City, AZ

Q&A:

Is space a concern on your work truck?

Solution: The Wildcat's footprint is 30 percent smaller and it weighs over 150 pounds less than competitive welder generators. The Wildcat provides industrial performance and durability in a lightweight, compact frame.

Are you worried about job site abuse?

Solution: The Wildcat's fully enclosed frame protects your investment against falling objects, dust and general debris that can damage welder generators with exposed engines. Plus, the heavy-duty construction of the Wildcat means it can withstand the rough handling and abuse common to industrial job sites.

Will this machine meet my industrial job site needs?

Solution: Over 90% of welder/generator owners use only the DC Stick process and need generator power to run job site tools. The Wildcat 200 matches your job site needs at a price you can afford.

Wildcat[®] 200 Upgrade Benefits

Feature	Blue Star [®] 185 DX		Wildcat [®] 200		Bobcat [™] 225
