Solutions for Enterprise Networks

Copper Interconnect Solutions

Our Copper Interconnect Solutions include an extensive line of insulation displacement connector (IDC) products for voice and data applications and a comprehensive portfolio of complimentary accessories including mounting frames, distribution boxes and installation tooling.

All the products in the Copper Interconnect Solutions range have gained industry acceptance and recognition for consistent performance and ease of termination.

3.1 Cross Connection Blocks

3.1.1 Quante™ RCP Category 6 Cross Connects

Description

Quante™ RCP - Overview

3M offers a complete punch down system for voice and data cross-connect applications. The new RCP Category 6 is the “next generation” of cross-connect and the latest 3M innovation in a broad line of solutions for high speed data networks. The RCP cross-connect system uses a simple modular approach with a few basic components such as 8-pair cross-connect modules, back-mount frames and management accessories.

The new cross-connect RCP Category 6 offers an outstanding connecting block performance. Its NEXT performance has in general about 5dB headroom when used in a Category 6 permanent link. The RCP Category 6 can be used as cross-connect in a standard phone system today, and will support future digital voice over IP (VoIP) connecting block in the telecommunications industry.

Highlights:

- Innovative design- embedded IDC contacts, individual pairs are isolated via a unique shielded crosstalk-barrier technology
- Easy installation
- Standard cross-connect Back-mount Frames, footprint, labelling
- Shielded version for EMI/RFI immunity
- 360° screen contact on an earthing bar
- Performance exceeds Category 6 component requirements even when jumpers are used
- Category 6 disconnection modules for termination of two 4-pair cables

Quante™ RCP Category 6 – Cabling Modules

Shielded rear-cable modules

with metal cover Protects against conducted and radiated electromagnetic interference. Single-wire and multi-wire cables can be connected to either the upper or lower contacts. Equipped with a bonding comb, bonding strip, a channelled wire guide (with the lower half metallised) and a metal cover on the upper half. Requires shielded cords. 8 pair disconnection module

3.1 Cross Connection Blocks

3.1.1 Quante™ RCP 2000

Description

Quante™ RCP - Technical Modules

Essential compliments for the RCP 2000 connection modules, the technical module range permits the protection of equipment lines, Ethernet or Token Ring computer networks, additional functions for PABX's and also to provide connection interfaces with the active elements in the network.

Highlights:

- Series protection limiting transient voltage surges
- Double deck protection with 3-pole surge arrester and transyl or varistor
- Earthing through the rail
- Maintains constant voltage at equipment terminals
- Nominal current of 300mA
- Fuses reset automatically
- 2 step modules

Telephone and special links protection module

For telephony applications (4pair). Working Voltage (V): 48/90 AC/DC. Bandwidth: 5MHz. Ability to handle (8/20 μ s spike): 10 shocks 5kA. Limiting voltage in common mode:

- 0.5/700 μ s spike 6kV: 200V
- 8/20 μ s spike 5kA: 250V

P45922AA

Computer protection module

For Ethernet, Token Ring 4 and 16 Mb/s application. Working Voltage (V): 12 AC. Bandwidth: 20MHz. Ability to handle (8/20 μ s spike): 10 shocks 5kA. Limiting voltage in common mode:

- 0.5/700 μ s spike 6kV: 18V
- 8/20 μ s spike 5kA: 270V

P45722AA

Bipole module, protection and viewing 2 pairs (lines)

All 3 functions available for 2 lines. Mounts directly on network lines. Meets TCI requirements. Working Voltage (V): 48/90 AC/DC. Bandwidth: 5MHz. Ability to handle (8/20 μ s spike): 10 shocks 5kA. Limiting voltage in common mode:

- 0.5/700 μ s spike 6kV: 200V
- 8/20 μ s spike 5kA: 250V

P45975AA

3.1 Cross Connection Blocks

3.1.1 Quante™ RCP 2000

Quante™ RCP - Technical Modules

Viewing / call / occupation module

P45990AA

Connected to one of the wires of the network line. No. polarity indication. 2 LED's per line: call and occupation. Low power consumption.

Disconnection IDC
Colour: Blue

Module for 4 fuses

P45941AA

Accommodates cylindrical fuses 5 x 20mm 100mA fuses supplied. pair / pair protection against overcurrents.

Disconnection IDC
Colour: Red

Line re-routing module

Re-routes 2 units directly to telephone network in case of PABX power failure. Equipped with 4 RT relays that permit the use of any telephone in the system.

Disconnection IDC
Colour: Blue

Quante™ RCP and RCPT - Accessories

Disconnection Plug
1 pair disconnection plug, colour: Red
PU: 100, MOQ: 1PU

C222909A

Parallel Test Plug
Double sided with 2-wire cable, length 3m.
Allows for setting a line in parallel without disconnection
PU: 1, MOQ: 1PU

C242613A

Serial Test Plug
Double sided with 4-wire cable, length 3m.
Allows the line to be placed in series
PU: 1, MOQ: 1PU

C242610A

Viewing Plug
100 Ohm in series on the line, two-coloured diode, 2V
power reduction, colour: grey
PU: 1, MOQ: 1PU

C242628A

Viewing Plug
PABX, 1 pair powered by 48V and common +,
two-coloured diode, colour: yellow
PU: 1, MOQ: 1PU

C242629A

Accessories for Earthing

Bonding Strip
for unshielded modules to allow rear cabling
supplied with 2 metal jackets per strip.
PU: 10, MOQ: 1PU

P44510AA

Bonding Springs for Drains
PU: 20, MOQ: 1PU

P44619AA

Bonding Comb
for shielded and screened cables
PU: 20, MOQ: 1PU

Quante™ RCP and RCPT - Accessories for Labelling

Label holder 8-pair

Size 14mm, colour: light grey
PU: 1, MOQ: 1PU

P44223AA

Label holder 4-pair

Clips to the front of the module and covers 4-pairs
Size 14mm, colour: light grey
PU: 10, MOQ: 1PU

P44505AA

Rotating label holder 8-pair

Clips on the module and prevents the attachment of patch cables, Size 14mm, colour: light grey
PU: 10, MOQ: 1PU

P44506AA

Half-size label holder

Clipped onto the mounting profile, smaller in size and does not obstruct the wire guide with channels on the jumpering and cable end.
PU: 1, MOQ: 1PU

P44620AA

Side label holder

Clips onto either the RCP or RCPT. Protects the input of bare cables and earth drain in cases of side cabling. Supplied complete with adhesive labels. Cannot be mounted onto module equipped with inverted channel wire guides. Colour: light grey
PU: 1, MOQ: 1PU

P44640AA

Side identification label

Clips to the side of either RCP or RCPT module
Colour: light grey
PU: 100, MOQ: 1PU

C222903A

Identification tab

Clips onto the module to identify each pair.
Prevents the use of patch cords
PU: 100, MOQ: 1PU

C222916B

Identification cap

Numbered from 0 to 9, clips on to the side of the module
PU: 100, MOQ: 1PU

C222917A

	<p>Multi purpose connection tool Inserts and cuts wire in a single operation Permits the connection of modules in the RCP and RCPT range. Terminates Dia 0.4 to 0.8mm conductors. Extractor included. PU: 100, MOQ: 1PU</p>	<p>C234030A</p>
	<p>4 Way RJ-45 support Clips onto the backmount frame (straight or curved E8 rail). Supports 4 off Giga modules PU: 1, MOQ: 1PU</p>	<p>P44380AA</p>
	<p>4 Way Keystone 'K' Series RJ-45 support Clips onto the backmount frame (straight or curved E8 rail). Supports 4 off 'K' Series modules PU: 1, MOQ: 1PU</p>	<p>VOL-SA-F4K</p>
	<p>4 Way ST and SC support Clips onto the backmount frame (straight or curved E8 rail). Supports 4 off ST and SC connectors. Supplied with ST and SC port covers and SC coupling screws. PU: 1, MOQ: 1PU</p>	<p>P44430AA</p>

3.1 Cross Connection Blocks

3.1.2 Quante™ STG 2000

Description

Quante™ STG modules - Overview

Category 5 transmission performance as standard

for Quante™ backmount frames

STG 2000 is the last evolution of STG range of connection modules. This module offers category 5 transmission performance as a standard. As a result this module can be used in any modern network and is fully compatible with all kind of applications (xDSL, Pair gain...). Termination is easy, cables and jumpers can be managed from the rear or from the side.

Reliability and performance Straight IDC technology offers outstanding performances:

- Multiple reterminations with all kinds of conductor gauges in the 0.4 mm to 0.8 mm range
- Improved wire retention (in all directions)
- Gas-tight connection area - corrosion proof
- Tin-lead plating on contacts prevents corrosion
- Transmission performances meet cat 5 (100 MHz)
- 2 wires can be accommodated in the same slot
- Very compact connection module
- Specific contacts for stranded wires upon request.

Application in network

- Suitable for high-density installation (2400 pair single sided cross connection cabinets, 1600 pairs on 2.6 metre vertical MDF, containerised exchanges...)
- STG 2000 modules are suitable for public telephony (MDF, cross connection cabinets, building distribution) as well as for private telephony and high data rates transmission.

for Quante™ and QSA backmount frames

Highlights:

- Category 5 as a standard
- Very compact size (16mm pitch)
- 0.4 - 0.8mm wires
- Specific module with rear cable termination
- Multiple reterminations
- Comprehensive range of protection circuits and accessories

3.1 Cross Connection Blocks

3.1.2 Quante™ STG 2000

Description

Quante™ STG - Protection Solutions

Protection solutions for STG are comprise of multi pair protection magazines and a complete range of single pair protection plugs.

Protection magazine

Front facing magazines suitable for all IDC STG connection modules, with the relevant protection facilities. Automatic earthing through the backmount frame - 5 kA drain current capacity. Magazine with earth cord for upgrading standard connection modules or blocks with protection.

Single pair protection plugs

This range of single pair protection modules is designed to increase flexibility in network management (protection can be removed separately only on faulty lines).

Wide range of protection circuits is available, from standard over-voltage protection, to overvoltage and current protection, up to fast 5 pole protection. A disconnection access on the protection plugs allows using all STG disconnection and test accessories without removing protection.

1 circuit = 1 colour

Single pair protection modules are suitable for the standard 16 mm pitch.

Highlights:

- Comprehensive range of protection
- Fast 5 pole protection
- Compact design
- Automatic earthing

3.1 Cross Connection Blocks

3.1.3 Quante™ SID™

Description

Quante™ SID™ – Overview

With the Quante SID product family 3M is setting the standards for high density IDC termination combined with improved handling. The main applications are in telecommunications and data networks.

The SID insulation displacement contacts are enclosed by the plastic housing of the module. This improves the insulation performance and helps in providing a safe working practice.

The SID product family is available in 8 and 10 pair connection and disconnection modules.

3M's individual mounting systems reflects the trend towards improved handling. Backmount frames or profile rails are available as required, and also „FlexiRail“ as an individual mounting system for targeted applications.

A significantly increased capacity compared to other techniques is achieved with the compact SID-C module.

A wide range of accessories and a comprehensive overvoltage protection complete the product family.

Highlights:

- High density
- One wire per slot 0.40 - 0.80 mm
- Optimised cable conductor guide
- Long-life tools
- Flexible mounting systems
- Removal without a special tool
- Comprehensive overvoltage protection system

Cable management

1. Sectional view of SID-C module

2. Push wires into connection slot. Allow enough of wire to overhang the far side of the module.

3. Locate insertion tool in a straight position on the module. The printed scissors should face the centre of the module. Push the tool firmly into the slot.

4. The clicking sound indicates that the wire is terminated and automatically cut to length in the process.

3.1 Cross Connection Blocks

3.1.3 Quante™ SID™

Description

Quante™ SID™ – Overview

Quante™ SID™-C High-density system

Quante SID-C connection and disconnection modules (8 and 10 pair) for mounting on individual profile FlexiRail and backmount frame. SID-C are available in the following different types:

- Connection module 8 and 10 pair, printing black
- Disconnection module 8 and 10 pair, printing green

Both types can be protected with primary overvoltage protection magazines or 1 pair Single Pair Protection plugs (SPP). Earthing modules, printing red for 40 wires

Highlights:

- Compact system with a pitch of 17.5 mm
- Wire diameters from 0.4 mm to 0.8 mm
- Assembling on SID-C backmount frames and Quante™ SID™ FlexiRail profiles
- Removable by hand without tools

Further information on SID-C see pg. 140 - 141

Quante™ SID™-CT Compact top model for all standard backmount frames

The modified fixing system offers the possibility to use all standard backmount frames with only one type of module.

Therefore SID-C backmount frames with a pitch of 17.5mm, as well as, LSA-PLUS backmount frames with a pitch of 22.5mm are suitable for the SID-CT module. Due to the slim design of the module SID-CT offers nearly twice as much jumpering space between two modules.

SID-CT can also be used on the individual profile system - Quante™ SID™ FlexiRail. Individual movement on the profile guarantees a maximum of flexibility by optimised handling. Due to the click in system, SID-CT can be easily unclamped by hand; no tool is necessary.

Highlights:

- Fits on SID-C and LSA-PLUS backmount frames and on profile system Quante™ SID™ FlexiRail
- Pitch of 17.5 mm
- Nearly twice as much jumpering space between the modules when using LSA-PLUS backmount frame
- Simple removal by hand without tools
- Comprehensive accessories from SID-C range can be used

Further information on SID-CT see pg. 142

3.1 Cross Connection Blocks

3.1.3 Quante™ SID™

Description

Quante™ SID™ – Overview

Quante™ SID™-C Switching modules

A new extension to the SID Product family is the SID-C switching module. By retaining the familiar method of working and implementation of the SID-C accessories, the switching modules offer a variety of applications.

A disconnection module is disconnected only by the use of a disconnection plug but in the switching module the contact is permanently open and has to be connected by the use of a plug. To avoid mistakes the top of the module is coloured brown (RAL 8004).

A reliable gas tight connection is achieved by controlled penetration of the insulation by the IDC element.

Further information on SID-C Switching see pg. 141

Highlights:

- Reliable SID Technique
- Only required lines are connected
- Various applications
- Cost-optimised protection solutions
- Retains the reliable method of working
- Preferred use in MDF's and DDF'S

Quante™ SID™-CD Screw mounted strips with DIN mounting dimensions for small distribution boxes

SID-CD the handy screw-on solution with DIN mounting dimensions of 96 mm for 8/10 pair or 170 mm for 20 pair.

Its main application is in small to medium telecommunications and data distribution boxes. The SID-CD strips are available both as connection and disconnection modules for 8, 10 and 20 pair cables. Earthing strips for 40 and 80 wires made up with two earthing connections each, are fixed at the right and left hand side of the module. A complete range of accessories allows optimum use of the SID-CD system.

Further information on SID-CD see pg. 143

Highlights:

- One wire per slot 0.4-0.8 mm
- 8, 10 and 20 pair modules
- Also available as disconnection strips
- Supplementary earth connection

3.1 Cross Connection Blocks

3.1.3 Quante™ SID™

Description

Quante™ SID™ – Overview

Quante™ SID™-C 8xabs Category 5e modules

The SID disconnection module consists of 24 **I**nsulation **D**isplacement **C**ontacts (**IDC**) with disconnection facility. The contacts are arranged in abs triples in order to accommodate 8 triples of a and b wires with drain wire. The IDC contacts are designed to be used with SID approved IDC insertion tools. For fixing, several SID backmount frames are available. Special disconnection plugs allow line disconnection.

Further information on
SID-C 8xabs see pg. 144

Highlights:

- Category 5e Transmission performance
- 8xabs contact arrangement
- Wire guide channel for cable management
- 0.4mm up to 0.8mm wire diameters
- Max. shielded jumper wires 2.7 mm (recommended Jumper wire diameters 0.5-0.6 m)

Quante™ SID™-C EXTREME

Connection technologies are increasingly required to be used under extreme climatic conditions. New technologies and applications have to be able to withstand these extreme requirements without faults. SID-C EXTREME is a system which can provide environmental protection for copper terminations.

Further information on
SID-C EXTREME see pg. 140

Highlights:

- Application under harshest environmental conditions
- High density
- Improved reliability

3.1 Cross Connection Blocks

3.1.3 Quante™ SID™

Description

Quante™ SID™ - protection for overvoltage solutions

The SID overvoltage protection magazines are designed for the 8/10 pair Quante™ SID™-C/CT/CD modules for use in telecommunications circuits. Earthing of the overvoltage protection magazine is achieved through the magazine to the backmount. The backmount must then be earthed according to the country regulations. The magazine is inserted into the test access contacts.

The SID-SPP is designed to give protection to the equipment. Testing of the circuit and jumper re-termination can be carried out with the SID-SPP in-situ.

There are three different application specific versions of the SID-SPP, protection concept making it the ideal solution for the most varied in-house and telecom network connection demands.

Quante™ SID™-SPP B3

Quante™ SID™-SPP B2

Quante™ SID™-SPP DS/R2 G

The magazine is inserted within the test access contacts of the module and uses standard surge arresters in the magazines, if necessary fail-safe devices can be incorporated (3 pole magazines only).

It is also still possible to utilise the extra environmental protection offered by dust covers with the magazines installed.

As part of the Quante™ SID™-system philosophy, Quante™ SID™-SPP makes it possible to protect individual circuits

Highlights:

- One overvoltage protection magazine for 8 or 10 pair modules
- Magazines for 3 pole surge arrester
- Surge arrester with and without fail-safe
- Single pair protection plugs (SPP)

3.2 Patch Cable

3.2.1 Quante™ CBE for RCP and STG

Description

Quante™ CBE Patch Cable

The CBE family is a range of patch cables for computer and video cabling systems that have a snap-on system to allow for direct connection on to both RCP 2000 and STG 2000 connection modules. They are available in both shielded and un-shielded versions.

The shielded version consists of metal shell with the braid screen in 360° contact with the metal parts providing an efficient drain to earth of all electromagnetic interference. The products are characterised by their optimised transmission performance, easy installation and identification.

For applications with data acquisition software, 2 and 4 pair cords with PVC sheaths are available in both shielded and un-shielded versions.

Highlights:

- 100 Ω , 2 and 4 pair cables consisting of 7 x 0.15mm stranded conductors
- Quick and easy installation
- Available in both shielded and un-shielded versions.
- Mixed CBE-RJ45 cords available for connection to active equipment.
- Attenuation @ 100MHz - 29dB/100m
- Cross talk @ 100MHz - 35dB

3.3 Frames and Boxes

3.3.1 Quante™ MRE / Quante™ CIPE

Description

Quante™ MRE / Quante™ CIPE - Overview

A comprehensive range of wall mount frames for Quante STG and Quante RCP DDF connection modules. Suitable for both rear, side or mixed cabling (Rear cabling method or flat cabling method).

These frames can be delivered CKD and are manufactured using corrosion proof materials. A complete range of covers are also available which offer a further degree of protection. Suitable for all STG accessories and protection solutions (earth post).

CKD = Completely Knocked Down.

Highlights:

- From 300 to 400 pair
- High density (16 mm pitch)
- Wide range
- CKD configuration
- Flat wall mount version (MRE)

Technical Characteristics

3.3 Frames and Boxes

3.3.2 3M™ QVG

Description

3M™ QVG - Overview

The 3M QVG distribution frame is of use wherever a number of telecommunication components have to be clearly and practically mounted and connected in back mount frames, profile rails and DIN designs.

The 3M QVG distribution frame is a modular design using mounting rails (QRS), and wall mounting sets.

Mounting rail set QRS

The QRS mounting rail set consists of a mounting rail, wire guide ring (1000 pairs for horizontal jumpers), a wire guide rail, wire guide rings for the vertical jumpers and system related mounting materials.

The mounting rail is available in three heights - 700, 1000 and 1600mm.

The frame allows, by design, the cable and jumper levels to be separated. It is also possible to mount a cable channel (see order examples) and secure cables to the wire guide rail.

In order to connect telecommunication components (except in back mount frames), the wire guide rings are attached to the mounting rail. When using back mount frames (e.g. Quante™ SID™-C), the wire guide rings are mounted on the wire guide rail simply by re-attaching in the required locations. An additional wire guide rail can be added (see order examples).

Three distribution frames QVG 700, QVG 1000 and QVG 1600, with differing capacities, are available as standard.

The QVG can be expanded as required by adding further mounting rails.

Two lengths are available:

- 550 mm for 2 QRS
- 750 mm for 3 QRS

Material

- Mounting rail set: stainless steel, diecast zinc
- Wall mounting rail set: sheet steel, chromed
- Synthetic parts: PA.

3.3.3 Distribution Boxes

3M™ VKK

Description

3M™ VKK distribution boxes for 10-20 pair Quante™ SID™-CD

3M™ VKK distribution boxes for 10 and 20-pair, are a range of empty plastic boxes for use in surface mount indoor applications. Their primary use is for the mounting of Quante™ SID™-CD or DIN connection strips in 'dry room' environments.

Manufactured from thermoplastic synthetic material (ABS) the boxes offer a high degree of impact resistance. Knockouts are provided on all sides of the cover and within the base plate to provide cable inlets / outlets.

Each box is supplied complete with screws for the mounting of component parts. Maximum allowable height of internal components is 38mm.

Protection Rating: IP31 (EN60529)

Colour: RAL 7032, Pebble grey

Material: ABS

Possible Configurations

VKK 1

1 component part, hole-spacing 96 mm
(e.g. 10-pair connection strip SID-CD or type A*).

VKK 2

1 component part, hole-spacing 170 mm
(e.g. 20-pair connection strip SID-CD/10, 20-pair type B*).

VKK 3

2 component parts, hole-spacing 170 mm
(e.g. 20-pair connection strip SID-CD/10, 20-pair type B*).

3M™ VKK distribution boxes for 20 pair Quante™ SID™-CD

VKK distribution boxes for 20 and 40-pair, are a range of empty plastic boxes for use in surface mount indoor applications. Their primary use is for the mounting of SID-CD or DIN connection strips in 'dry room' environments.

Manufactured from thermoplastic synthetic material (ABS) the boxes offer a high degree of impact resistance. Knockouts are provided on all sides of the screw-on cover and within the base plate to provide cable inlets / outlets.

Each box is supplied complete with screws for the mounting of component parts, wire guide hooks and cable tie holders.

Maximum allowable height of internal components is 38 mm.

Protection Rating: IP31 (EN60529)

Colour: RAL 7032, Pebble grey

Material: ABS

Possible Configuration

K10/20

2 component parts, hole-spacing 96 mm
(2 x 10-pair connection strips SID-CD)

* Connection strip according to DIN 47614

3M™ VKA

Description

3M™ VKA Distribution box for 100 pair Quante™ SID™-CD

The VKA 3K distribution box is a surface mount empty housing for mounting connection strips in a 'dry room' environment. Manufactured in thermoplastic synthetic material (ABS) the housing offers both high impact and flame resistance.

Each housing includes a screw-on cover and baseplate that include 5 slide in plates with contoured knockouts, (3 in the top and 2 in the bottom). Cable strain relief is also provided at the cable inlet areas.

**Protection Rating:**

IP 31 (EN60529)

Colour:

RAL 7032, Pebble grey

Material:

ABS

Standard equipment

- Wall mounting hardware
- component fixing screws
- wire guiding hooks
- cable tie holder
- earth bar

Accessories (to be ordered separately):

- "Q2" or "15" safety lock
- monitoring switch
- second earthing bar

Possible Configurations

- Connection strips (hole-spacing 96 mm or 170 mm, respectively), 3 pcs. for 10 or 20 pairs each (screwing and soldering connections).
- Quante SID-CD-strips:
5 pcs. for 10 or 20 pairs each (max. 100 pairs).
- Or other components on the baseplate.

3.3 Frames and Boxes

3.3.3 Distribution Boxes

3M™ VKA

Description

3M™ VKA distribution boxes for 60 - 640 pairs

The VKA distribution boxes are designed to accommodate component parts with a mounting measurement of 170 mm (DIN strips), Quante™ SID™-C, Quante™ SID™-CD, as well as overvoltage protection modules.

The distribution boxes are available in four sizes capable of accommodating from 60 to 480 pairs for DIN strips. The Quante SID-C system (depending on the housing size) accommodates a maximum of 80 to 640 pairs (recommended capacity: 480 pairs). The distinguishing feature of this generation of distribution boxes is the rotating baseplate - "FlexiBase".

FlexiBase allows for flexible mounting:

SID-CD strips (DIN design) can be mounted on one side, with a back mount frame or Quante™ SID™ FlexiRail for SID-C integrated on the other side. Quante™ SID™ FlexiRail allows for continuously variable module configuration.

"DIN-SID-C" - based on FlexiBase - is offered for:

- VKA 4,
- VKA 8
- VKA 12.

"DIN-SID-C" stands for combined DIN and SID-C FlexiRail systems in a single housing. Quante SID-C is optimal where high density is required.

The "DIN" models are suitable for DIN strips (screw and solder connections). This design concept offers users the possibility to decide between the DIN and frame systems to meet their individual needs for on-site, last-minute installation, without having to buy additional frames. Thanks to the FlexiBase, a quick "turn of the hand" transforms a DIN distributor into a frame distributor for SID-C with FlexiRail.

VKA2 / DIN as well as the "DIN-SID-C" models provide the ultimate solution for mounting SID-C strips even in DIN format (mounting measurement 170 mm). The strips are simply secured to the baseplate by means of special retaining clips without having to be screwed on which is a distinct assembly advantage. Furthermore, the retaining clips can be simultaneously used as wire guide hooks.

Cables are inserted through plastic caps with knockout contours, which are fastened to VKA 4, VKA 8 and VKA 12 mounting profiles and allow easy cover installation and removal in a mounted distribution box.

The distribution boxes are standard equipped with snap locks. Safety locks are a retrofit option.

3M™ STB / 3M™ STF

Description

3M™ STB - 3M™ STF indoor distribution boxes

The range of indoor distribution boxes comprises of complete boxes with connection modules (STB) and boxes to be equipped with STG connection modules (STF)

These boxes are suitable for all indoor applications and the cover can be removed from the base with 1/4 turn captive screws. Built in impact resistance polystyrene the protection class is IP 41, standard colour is RAL 9001 (off white). The box is designed to be mounted with 4 screws (not supplied).

On STF boxes and STB (30, 40, 50 pairs) each side of the box is made up of a sliding panel which can be removed. This allows for several boxes to be installed side by side with jumpers routed from one box to the other. A valuable feature when extending the number of lines in an installation.

STB fully equipped boxes

- STB 10 and 20 pairs:
Compact boxes with lockable cover, based on STG IDC technology. The multipair cable is routed through the centre of the box with the distribution cables exiting through the side or the rear of the box. A specific high depth cover allows to install multi pair protection magazines.
- STB 30, 40 and 50 pairs:
STF boxes equipped with STS screw mount disconnection modules.

STF empty box for STG connection modules

- STF is available in two box sizes, 100 and 200 pairs.
Provision is made to mount STG modules on an internal backmount frame with earth post.
- The box is delivered complete with cable ties.

3.4 Patch Panels

3.4.1 Quante™ 19" Patch Panels

Description

Quante™ 19" Category 3 Patch Panels

The 3M Category 3 patch panels provide a point of integration of voice grade channels into structured building wiring. High pair count communication cables from the PABX can be terminated in to the 19" subrack clearly and compactly to provide a distribution via RJ45 connections.

The panel is available in 25 or 50 RJ45 Sockets 8 (4), (4 pins of the 8 occupied) versions with the connection of cables using SID-P connecting terminals (AWG 26-22).

Housing:

1U x 19" Galvanised Steel sheet. Screened port numbering. Cable management points for individual and for up to 3 high pair count cables. Separate grounding pin (M6) for potential equalisation.

Color:

Front face only - RAL 7032 (pebble-grey)

Transmission characteristics :

Exceeds the requirements of the Category 3 (EN 50173)

Highlights:

- Optimal integration of 25 or 50 voice grade channels into the structured building wiring via RJ-45 sockets
- Very high component density of 25 or 50 sockets in 1U
- 50 or 100 pair cable can be terminated completely
- Satisfies and exceeds Category 3 (EN 50173)
- Installation-friendly, presenting of the lines on Quante™ SID-P of blocks without un twisting of the pairs complete
- Supplied complete with all 19" mounting materials

3.5 Telephone Sockets

3.5.1 Analogue Sockets

3M™ RJ11 - Overview

Description

3M™ RJ11 - Overview

3M™ RJ11 telephone socket is the worldwide standard for customer premises. This product offers all the facilities required by the customer particularly the T-connection to extend the line to another room.

Quante 3M Telecommunication range of MJP telephone sockets is designed to meet all these requirements. MJP will offer a long life service as the socket is filled with self healing gel.

Based on double slotted IDC's, the termination system makes the product very easy to be installed even by the end user.

Accommodates all conductors in the range of 0.5 to 0.65 mm.

A gold plating on the contact allows multiple insertion of the RJ plug.

Different sizes are available according to local specifications:

- RJ11 with 2 contacts,
- RJ11 with 4 contacts
- RJ11 with 6 contacts.

Highlights:

- Tool free termination
- Long life service - gel filled
- T-connection facility
- Comprehensive range
- Flush or wall mount boxes

Different types of flush mount or wall mount support are also available. Wall mount boxes offer strain relief devices for the incoming cable as well as different possible entries for the cable.

A number of mounting devices are offered (screws, double sided tape...).

Additional features can be offered with the RJ11 range of connectors such as protection circuits, remote test circuits, RF filters.

Please consult us for any specific requirement.

3.5 Telephone Sockets

3.5.2 ISDN Sockets

3M™ PMJ - Overview

Description

3M™ PMJ - ISDN telephone sockets

- International standard RJ45 telephone socket for ISDN networks.
- T-connection facility which allows a bus configuration to be built. The total impedance may be adapted by using resistors.
- Cable screen continuity in the bus is maintained through an earth post installed in the socket.
- Impedance can be adjusted with resistors directly connected in the double slotted IDC contacts of the last socket in the bus system.
- Based on Quante-Pouyet TOOL FREE system, termination is performed by pushing on a termination flap.
- PMJ can be reterminated.
- Double slotted IDCs offer a T-connection facility
- Accommodates solid copper conductors from 0.5 to 0.65 mm.
- High pressure gold plated contacts of the socket allow insertion and removal the plug many times.

Installation

- PMJ ISDN telephone sockets are designed for flush as well as wall mount applications.
- PMJ sockets come with all mounting accessories.

Range of products

- 1 outlet wall mount ISDN socket.
- 2 outlet wall mount socket.
- 1 outlet flush mount socket.

Technical characteristics:

Dimensions (LxWxD)

65 x 65 x 40 mm for wall mount socket
80 x 80 x 31 mm for flush mount socket
(23 mm inside the wall)

Connection

Solid copper conductors from 0.5 to 0.65 mm
Overall insulation diameter: 1.5 mm max.

Materials

Housing: thermoplastic materials
Colour: ivory colour
Socket: thermoplastic material
tin-lead plated contacts
gold plated Volition™ RJ45 outlet

Mounting solutions

Mounting screws for wall mount sockets
Clipped on flush mount

Electrical characteristics

Leading through resistance: < 20 mΩ
Insulation resistance: > 10 mΩ

Highlights:

- 3M TOOL FREE IDC technology
- Double slot IDC
- Gold plated Volition™ RJ45 contacts for outstanding reliability
- Sliding flap protects Volition™ RJ45 outlet
- Strong mechanical plastic material offers a good resistance to shock.

2 outlet Volition™ RJ45 wall mount ISDN socket

N301023B

Standard type without earth post, with impedance adaptors, with mounting screws

1 outlet Volition™ RJ45 flush mount ISDN socket

Standard type without earth post	NN330240
----------------------------------	----------

ISDN socket with 2.5 mm ² earth post for cable screen continuity	330244VA
---	----------

1 outlet Volition™ RJ45 45 x 45 face plate

ISDN socket	P28230A5
-------------	----------

Box for wall mount application (empty)	P28420AA
--	----------

3.5 Telephone Sockets

3.5.2 ISDN Sockets

3M™ Flush Mount Sockets

Description

3M™ Flush mount Sockets

ISDN socket for flush mounting applications, with 50 x 50 mm central plate which fits most standard mountings. They are equipped with 2 parallel RJ45 sockets (8p/4c) and integrated, switchable resistors for bus termination (R100 option).

Highlights:

- Can be used with most standard frame systems
- Mounting to wall box or in trunking, using bolts or of spreading clamps
- For eight position Quante™ SID™ terminal (SID-8) or quadruple screw-terminal (option `SK)
- Clean and simple bus termination in the last box with integrated, switchable 100 Ω resistors (option `R100)
- Downwards facing cable entry, angled 15° off away from the wall
- Mounting and removing of the central plate without tool

Technical characteristics:

Design:

Complies with EN 60603-7, EN 28877, EN 60950 standards.
Two Volition™ RJ45-jacks with 4 contacts each (contacts 1, 2, 7 and 8 are not in used).

Technical Data:

Weight: approx. 18 g
Dimensions: 70 x 70 mm, 20 mm deep, 19.5 - 22.5 mm high
Operating voltage: < 42 VDC
Testing voltage: 1000 VAC 50 Hz
Operating current: < 1A
Insulation resistance: > 200 M-Ω
Terminal: screw terminal or SID-P terminal (options „SK“ or „SID8“)
Contact lifetime: min. 750 insertions

Material:

Housing: thermoplastic ABS, complies with UL94HB
Colour: white
Contacts: Bronze, galvanic nickel with 60 μm gold

3M™ Wall Mount Sockets

Description

3M™ Wall mount Sockets

ISDN socket for wall mounting applications. Each type is equipped with two parallel Volition™ RJ45 jacks (8p/4c) and integrated, switchable resistors for bus termination.

Highlights:

- Accommodates two Volition™ RJ45 sockets for connection of various ISDN devices
- Equipped with two integrated switchable 100 Ohm termination resistors for the S0 bus (optional)
- Mounting to the wall using bolts or spreading clamps
- Cable entry from 4 sides and through bottom
- For eight position SID terminal (option „SID8“) or quadruple screw-terminal (option „SK“)
- Clean and simple bus termination in the last box with integrated, switchable 100 Ω resistors (option „R100“)
- Downwards cable entry, parallel to the wall

Technical characteristics:

Design:

Complies to standards EN 60603-7, EN 28877.
Two Volition™ RJ45 jacks with 4 contacts each.

Technical Data:

Weight: ca. 39 g (47 g including clamps)
Dimensions: 80 x 80 mm, 23 mm (+16 mm deep when clamp-mounted)
Operating voltage: 48 VDC
Testing voltage: 1000 VAC 50 Hz
Operating current: < 1A
Insulation resistance: > 200 M-Ω
Lead through resistance: < 20 m-Ω
Contact lifetime: min. 750 insertions

Material:

Housing: thermoplastic ABS, complies with UL94HB
Colour: RAL 1013 (white)
Contacts: Bronze, galvanic nickel with 60 µm, gold
