

Solutions for Outside Plant

3M Telecommunications offers an extensive range of housings and closures for outside plant. They are available in a variety of sizes, made from either plastic or metal. For housings, the preferred connection technologies are SID or QSA/LSA plus. For closures the proven splice methods Scotchlok or MS2 are more appropriate. These give the maximum number of splices in the smallest possible space. With optical fibre cable, fibre management is more important than density. 3M Telecommunications extensive 'know-how' has produced a variety of closure sealing options. Both encapsulated and mechanically-closed closures are available. For example, the BPEO family of closures are re-enterable several times and do not require specialist tools or additional materials such as gaskets or mastic.

2.1 Copper splicing

2.1.1 3M™ Scotchlok™ Connectors and Tools

Description

Over 40 years ago, 3M™ introduced the industry's original U element connector, the Scotchlok UR Connector. The latest series of connectors, the Scotchlok UR2, UY2, and UB2A Connectors, feature that same originality in technology advantages, building on the successful Scotchlok Connector's design, shape, color-coded cap concepts, and element technology.

The Series 2 Connectors additionally offer full wire range capability, increased port size to accommodate up to 2.08 mm (0.082") insulation sizes, double elements in all products, and a solvent resistant plastic construction.

Scotchlok™

UR2/UR2-D Butt Connectors

The UR2 Connector accepts two or three solid copper conductors that can be of different wire gauges for butt splicing. The connector is filled with a moisture resistant sealant and the UR2-D Connector is a dry version. **RUS Listed**

UY2/UY2-D Butt Connectors

The size of the UY2 Connector reduces the splicing bundle O.D. to a minimum. The wires joined can be of different wire gauges. Factory inserted sealant seals out moisture. In addition, the UY2 Connector is available in a dry version, UY2-D Connector. **RUS Listed**

UB2A/UB2A-D Tap Connectors

The UB2A Connector has a pre-crimp feature that gives the user a time-saving edge. By positioning the connector on the conductor and pre-crimping, the conductor is prevented from slipping out of the connector before the crimp is completed.

Like the UR2 Connector, a factory sealant insulates against moisture and seals out corrosion. The UB2A Connector permits tapping directly onto an existing conductor without interrupting service. In ready access closures, the UB2A Connector eliminates cutting cable pairs, opening circuits, and piecing out wires. The UB2A-D Connector is a dry version of the UB2A Connector. **RUS Listed**

211 Trim-Out Connector

The Scotchlok™ 211 Trim-Out Connector is a polypropylene, moisture-resistant, self-stripping insulation displacement contact device with a built-in cut-off blade and a test port. Wires are positioned in the connector from the sides, allowing the 211 Connector to be

used as a maintenance connector for replacing problem connectors without interrupting service. The 211 Connector may also be used for standard two-wire butt type splicing operations.

A pre-crimp feature permits easy, positive connector positioning by gripping the conductors until the crimp is completed. Excess wire is cut off when the connector is crimped. **RUS Listed**

557TG Self-Stripping Dropwire Connector

Use the Scotchlok 557TG aerial connector to electrically connect two dropwire solid copper legs, insulate and provide moisture protection for the connection.

2.1 Copper splicing

2.1.1 3M™ Scotchlok™ Connectors and Tools

Description

UP2 Butt Connector

A dry flame retardant two-wire, UL Listed connector for use on paper, pulp or PIC cable where moisture resistance is not a requirement.

UP3 Butt Connector

The UP3 Butt connector is a dry, flame-retardant two or three-wire connector for paper, pulp or PIC cable where moisture resistance is not a requirement.

UPB Tap Connector

A dry, flame-retardant, two-wire UL Listed connector with a pre-crimp feature for use on pulp, paper or PIC cable where moisture resistance is not a requirement.

U1B Inline Connectors

The U1B connector is a sealed moisture-resistant four-wire (1 full pair) inline connector for larger gauge solid copper

U1R Inline Connectors

The U1R connector is a sealed moisture-resistant four-wire (1 full pair) inline connector for larger gauge solid copper.

UDW2 Inline connector

A sealed moisture-resistant, four-wire (1 full pair) inline aerial connector for copper or copper-coated steel conductors. Not for mid-span splices unless strain-relief is provided. Tape over-wrap is not required.

E-9Y Crimping Tool

Stepped jaws and long nose provide parallel crimping action. Features include a side wire cutter, insulated handles, and a return spring. Not recommended for any 19 gauge, 3 wire application due to fatigue factor.

E-9J Crimping Tool

The E-9J tool is a lightweight, handheld tool featuring a single-stroke, parallel crimping action with a work-saving 10-to-1 mechanical advantage over applied hand force. For use with Scotchlok butt and tap connectors.

E-9BM Crimping Tool

The E-9BM has parallel closing action with adjustable jaws, and features high mechanical advantage. For use with all Scotchlok Connectors.

E-9C Cartridge Tool with Case & Gauge

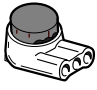

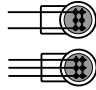

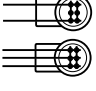

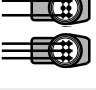

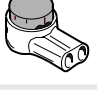

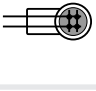

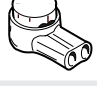

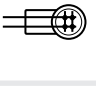

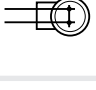

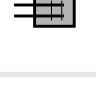

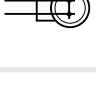

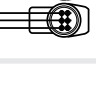

The E-9C tool holds the connectors (in cartridges) firmly in place, allowing the user the use of the other hand for guiding wires. This time-saving tool holds cartridges of UR2, UR2-D, UR, UY2, UY2-D, UY, UAL, ULG, UCC, UPC, UP2 and UP3 Connectors. Its automatic feed, ratchet, and parallel jaw action assure perfect crimps every time.

2.1 Copper splicing

2.1.2 3M™ MS²™ Splice Modules and Accessories

Description

MS² 25-Pair Super-Mini Splicing Modules

The MS² Super-Mini 25-pair and MS² Super Mate 25-pair Splicing Modules provide the reliability of soldered connections, the efficiency of multi-pair splicing, plus the proven performance of MS² splicing system.

The MS² 4000TR Series Super-Mini and 4005TR Series Super Mate Modules are the basic components of MS² Modular System Splicing from 3M™. The modules are building blocks of a systematized splicing technology that can reduce installation time of outside or inside plant, and in addition can reduce reworking demands, saving both time and effort in your construction and maintenance programs. To make your job easier, all MS² modules are now transparent.

U-shaped contacts enable solder-equivalent connections

The MS² 4000TR 25-pair Series Super-Mini and MS² 4005TR Super Mate Modules feature an array of U-shaped, phosphor-bronze contacts and stainless steel cut-off blades.

As a module is crimped, each contact strips the insulation from the positioned wire and securely grips the conductor. During this crimping operation, the cut-off blades inside each module trim the excess wire.

A single crimp completes a gas-tight connection on all 25-pairs in the module. It's simple and fast, because there's no need to strip or trim any of the individual pairs.

Pair testing is easy

Test entry ports on the front side of all modules provide access for testing individual pairs. All tests can be accomplished without opening the module, stripping insulation, or otherwise interrupting service.

The rugged design and construction of the modules can withstand crimping and reopening to facilitate transfers or cable rearrangements.

MS² 4000-G/TR Super-Mini Splicing Module

The new 4000-G/TR Super-Mini Splicing Module not only meets CAT-5 requirements of the TIA/CIA 568A and the ISO/IEC 11801:1995 for high-speed connectors, but it also delivers in place performance withstanding extended exposure to various conditions of extremely high humidity, including water immersion, while maintaining insulation resistance and circuit integrity.

MS² 4000-DWP/TR Module with Sealant Box

The 4000-DWP/TR 25-pair module combines a 4000-D/TR Super-Mini Module with a 4075-S Sealant Box. This combination offers waterproof splicing of copper in buried, aerial, and under ground applications.

The module also makes re-entry into splices encapsulated

with re-enterable gel much easier. Because the sealant box prevents the encapsulants from filling the wire channels and test entry ports, modules may be tested at any time once the sealant box is removed.

The term "waterproof" applies to this system as determined according to 3M™ Test Method No. TP0200-05. Users should write for this method to determine suitability for application.

The MS² 4008D/TR 25-pair Series Super-Mini Modules are similar to the 4000TR Series, except that the cut-off blades have been removed from the bottom of the modules. This allows the run of through wires to be half-tapped without cutting the conductors. The wires in the base are electrically connected, but are not cut off. Both 4000TR and 4008TR Series Modules are available dry, or encapsulated. **RUS Listed**

2.1 Copper splicing

2.1.2 3M™ MS²™ Splice Modules and Accessories

Description

MS² 4075-S Sealant Box

The 4075-S Sealant Box is a molded PBT polyester box designed to be used with the MS² 4000 Series Super-Mini Modules.

One applicator tool is included with every order.

RUS Listed

MS² 4005-DPM/TR Super Mate Pluggable Module

4005-DPM/TR 25-pair Series Super Mate Pluggable Modules increase productivity and reduce expense by avoiding the time and cost-intensive job of cutting and re-splicing conductors for re-arrangement, addition, and removal of apparatus and stubs. The 4005-DPM/TR Series Super Mate Modules plug into other Super Mate Modules and onto the top of the 4000-D/TR Super-Mini Module Series for bridging applications. The 4005-CBM/TR Series Modules is for bridging to encapsulated 4000-C Series Modules, as a bridge only. The UL Listed 4005-DPM/FR is for applications which require a flame-retardant module.

MS² 4077 Series Sealant Boxes

Designed for use with MS² 4005-DPM/TR Super Mate Modules and/or in combination with 4000-D/TR Modules. The Sealant Boxes provide waterproof protection in PIC splicing applications where one or more modules are plugged together.

One applicator tool is included with each box of 12 sealant boxes.

The term “waterproof” applies to this system as determined

according to 3M™ Test Method No. TP0200-05. Users should write for this method to determine suitability for application.

|---|--|---|--------------------|--|
|  | <p>Super-Mini Module Cover</p> <p>The 4003-D/TR Super-Mini Module Cover is identical to the 4003-D Cover with the exception that it is clear to allow for the visual inspection of conductors.</p> | 12/bag 120/cs. 0,6 (1.4) | 120 each | 4003-D/TR |
|  | <p>Super-Mini Module Base</p> <p>The 4004-D/TR Super-Mini Module Base is identical to the 4004-D Super-Mini Module Base with the exception that it is smoked transparent.</p> | 12/bag 1 120/cs. 0,6 (1.4) | 20 each | 4004-D/TR |
|  | <p>Super-Mini Test Base</p> <p>The 4004-DT/TR Super-Mini Test Base is identical to the 4004-DT Super-Mini Test Base with the exception that it is smoked transparent.</p> | 12/bag 120/cs. 0,6 (1.3) | 120 each | 4004-DT/TR |
|  | <p>4005-DPM/TR/36PTJ Preterminated Jumper Assemblies</p> <p>The assemblies consist of 24 AWG, PIC, unsheathed 25-pair binder group terminated on each end with a 4005-DPM Module. It enables quick restoration of cut cable and is available in 91,4 cm (36") and 182,9 cm (72") lengths with transparent covers.</p> | 12 assy./kit 12/cs. 36" 2,63 (5.8) 72" 3,8 (8.5) | 12 each 12 each | 4005-DPM/TR/36PTJ 4005-DPM/TR/72PTJ |
|  | <p>Bottom Test Plug</p> <p>The 4005-DPM/BTP is a test plug assembly consisting of a 4005-DPM module attached by a 60,9 cm (24") jumper to a module designed to plug into the bottom of a Super-Mini module. This assembly enables re-entry into any Super-Mini/Super Mate combination splice without interruption of service.</p> | 1/bag 12/cs. | 12 each | 4005-DPM/BTP |
|  | <p>Marking Pen</p> <p>Use the 4039 Marking Pen for permanent marking of MS² modules for easy identification at a later date.</p> | 12/box 144/cs. 0,5 (1.1) | 144 each | 4039 |
|  | <p>Half-Tap Cover</p> <p>Used to protect wire ends after the half-tap has been cut out of the MS² Super-Mini 4008 Half-Tap Module in pulp/paper and pressurized PIC cable and vault splices.</p> | 12/bag 120/cs. 1,4 (3.1) | 120 each | 4078-C |

2.1 Copper splicing

2.1.2 3M™ MS²™ Splice Modules and Accessories

Description

MS² 10-Pair Super-Mini Splicing Modules

Multi-pair splicing; full wire range

The MS² 10-Pair Super-Mini Splicing Modules provide the reliability of soldered connections, plus the efficiency of multi-pair splicing in 10-pair units. This eliminates the need to strip or trim any of the individual pairs, saving time and simplifying the process.

For added convenience and efficiency, all MS² super-mini modules accept 0.35 mm - 0.9 mm (26-19 AWG) solid copper up to a maximum insulation outside diameter of 1.8 mm (0.70) PIC, pulp and paper-insulated conductors.

Solder-equivalent connections

The MS² 10-pair super-mini modules feature an array of U-shaped, phosphor-bronze contacts and stainless steel cut-off blades. As a module is crimped, each contact strips the insulation from the positioned wire and securely grips the conductor. During this crimping operation, the cut-off blades inside each module trim the excess wire.

A single crimp completes a gas-tight, solder equivalent connection on all pairs in the module.

* The term "water resistant" applies to this system as determined according to 3M™ Test Method Number TPO200-05.

MS² 9700-10/TR Module for two-wire straight splicing

The 9700-10/TR module provides for two-wire straight splicing. Like all super-mini modules, the 9700-10 module is designed so that wire gauges and insulation types may be mixed in the module.

MS² 9700-G/TR Super Mini Module

Encapsulated Super-Mini Module for protection against humidity and condensation.

MS² 9708-10/TR Module for half-tap splicing

The 9708-10 Super-Mini Module is similar to the 9700-10 module, except that the cut-off blades have been eliminated from the bottom of the modules. This allows the through wires to be half-tapped without cutting the conductors. The wires in the base are electrically connected, but are not cut off.

MS² 9700-DWP/TR Module for water resistant* splicing

The 9700-DWP/TR System consists of a 9700-10/TR Module, a 9777-S Sealant Box, and an insertion tool for seating the module.

Designed specifically for buried and underground plant applications where PIC cable is not pressurized, the sealant box protects the splice by filling the module wire channels and test ports with a moisture resistant sealant. This simplifies reentry and reworking when necessary. The 9700-DWP Module is also recommended for use in aerial applications where additional moisture protection is desired.

The 9777-S Sealant Box may be ordered separately. An applicator tool is provided to facilitate installation.

2.1.2 3M™ MS²™ Splice Modules and Accessories

Description

MS² 9700 Series 10-Pair Super Mate Pluggable Modules

MS² 9705-10TR Super Mate Pluggable Modules transfer without interrupting service

MS2 9705-10TR Super Mate Pluggable Modules increase productivity and reduce expenses by avoiding the time- and cost-intensive job of cutting and resplicing conductors for re-arrangements, additions, and removals of apparatus and stubs.

With super mate pluggable modules you can do it all, 10 pairs at a time, in “make before break” fashion — without interrupting service. Once a splice is in place, you have the flexibility to complete future transfers by simply plugging and unplugging the existing modules. Using simple handtools, super mate modules mate with other super mate modules, allowing multiple counts as necessary.

- Cut apparatus in or out without re-splicing
- Easy pair testing
- Full wire range
- Rugged design
- Ideal for lightweight tooling applications

MS² 9755-10 Lightweight Rig

2.1 Copper splicing

2.1.3 3M™ MS²™ Modular Splicing Rigs & Equipment

Description

MS² 25-Pair Super-Mini Splicing Modules

3M MS² splicing tools and equipment are easy to use in any kind of splicing operation, regardless of the environment or working conditions. By designing system components and techniques that are interchangeable, 3M simplifies the splicing task and reduces potential inventory headaches. Included in the system are detailed step-by-step instructions for each splicing application, user-friendly parts and components, and testing equipment to optimize splice accuracy.

Systemized splicing technology

MS² splicing simplifies wire joining and terminating operations by allowing many jobs to be performed with the same components, tools, and techniques. Any of five standard splicing rigs with MS² splicing modules could meet all your multi-pair splicing requirements in inside or outside plant — new construction, cable rearrangements or maintenance. Easily learned procedures, designed to assure both splicing accuracy and good housekeeping, make the system's components simple to master.

MS² 4020-M Splicing Rig

The 4020-M Splicing Rig is a splicing rig designed for one-person fold-back or inline splicing. The 4020-M Splicing Rig contains the same components as the 4021-M Splicing Rig, except the crimping unit.

MS² 4021-M Splicing Rig

The 4021-M Splicing Rig is a complete splicing rig designed for one-person fold-back or inline splicing.

MS² 4049 Lite Rig

The MS² 4049 Lite Rig is a complete splicing rig and provides many features and benefits.

MS² 4021-M/36 Splicing Rig

The 4021-M/36 Splicing Rig is a complete splicing rig designed for one-person fold-back or inline splicing. This rig contains the 4036-25 Hand Crimper.

MS² 4021-M2/36 Splicing Rig

The 4021-M2/36 Splicing Rig is a complete splicing rig designed for one-person fold-back or inline splicing. This rig contains the 4036-25 Hand Crimper.

MS² 4026-A Module Maintenance Kit

The 4026-A Module Maintenance Kit contains the tools necessary for reentry of Super-Mini and Super Mate Modules.

MS² Rig Components

| | | Pkg & kg (lbs.)/cs. | Min. Order | |
|---|--|---------------------|------------|----------------|
|  | Rubbermaid Rig Case 66 x 29.2 x 28.2 cm (26 x 11.5 x 11.1") Cube: 9.8 kg. (21.7 lbs.) Ctn. size: 67.1 x 30 x 58.4 cm (26.4 x 11.8 x 23") | 2/cs. 9,8 (16.5) | 2 each | 4028 |
|  | Air/Hydraulic Crimping Unit The 4030 Air/Hydraulic Crimping Unit is designed for use with an air or nitrogen supply. An air cylinder or compressor with output pressure of 5.37kg/cm 21 (90-100 PSI) must be used. The unit is either hand operated. | 1/cs. 8,3 (18.2) | 1 each | 4030 |
|  | Hand/Hydraulic Crimping Unit The 4031 Hand Crimping Unit is lightweight and hand-operated. When the correct crimping pressure is reached, a bypass valve opens. | 1/cs. 6,3 (13.8) | 1 each | 4031 |
|  | Aerial Strand Clamp A 4035-A Aerial Strand Clamp is designed to hold a 4041-P Splicing Head in aerial splicing applications. Anchored to the suspension strand, the aerial strand clamp, clamps behind and below the splice bundle and can be used with strands from 5mm (3/16") diameter to 10 mm (3/8"). | 1/cs. 1,7 (3.7) | 1 each | 4035-A |
|  | Hand Crimper The 4036 Hand/Hydraulic Crimper is a self-contained, pistol-gripped crimper designed to crimp MS ² Modules in the 4041 Splicing Head. | 1/cs. 6,3 (13.8) | 1 each | 4036-25 |
|  | Splicing Head Assembly This assembly contains a splicing head, a pedestal, a traverse clamp assembly with a longbar, & a head clamp for use with two manifold-back splicing. | 1/cs. 3,2 (7.1) | 1 each | 4040 |
|  | Splice Head The 4041 Splicing Head is the standard MS ² Splicing Head without any support components. | 1/cs. 1,3 (2.9) | 1 each | 4041 |
|  | Splicing Head and "T" Bar Additional Splicing Head and "T" Bar support for use with the MS ² System. | 1/cs. 1,7 (3.7) | 1 each | 4041-P |
