

# FTTx – Outside Plant

3M Telecommunications offers a wide range of protection products, cable cleaning and visual network marking products suitable for use in FTTx networks.

With 3M's proven mechanical sealing technology, all 3M fibre optic closures are suitable for applications within FTTx networks such as track (backbone), spur (branch) or distribution points. Outdoor fibre optic distribution boxes are also available for the "last mile" applications.

#### Description

### 3M 2178-L/S Fibre Optic Splice Closures

The 2178 Fibre Optic Splice Closure has always given you great protection for fibre optic connections. Now, the addition of 2178-L/S Series more capabilities can be offered.

With the new addition you get all the features of the popular 2178 splice closure. Plus, the 2178-L/S series is made of a tough chemical-resistant material with a new gasket seal which makes this the ideal splice closure for outside plant in underground, aerial, pedestal and direct buried applications.

The 2178-L/S series is designed with larger and smaller interchangeable closure halves so you can select the size case that meets your needs today but with the flexibility to expand for the future. Cable ports and space for trays can be added at reentry with the 2181-L/S Cable Addition Kit.

The ease of installation is unsurpassed, requiring no special tools or complicated training procedures. The closures are easily re-enterable to allow access to the splices.

The 2178-L/S series features a tough, rigid non-filled case, tested under real-world conditions, that stands up to even the most severe conditions of moisture, vibration and extreme temperatures. The closure will withstand up to 90.7 kg (200 lbs.) compression.

Design improvements to the 2178-L/S series include changes to improve the cable strain relief and a movable tray support. The closures hold cables of varying sizes and provide flexibility to add ports on both ends with the cable addition kit.

The 2178-L/S series splice cases can be used with the 2522 or 2523 Fibre Splice Organiser Trays or the Fibrlok™ 2524 Small Fibre Splice Organiser Tray.

#### Highlights:

- Gasket seal
- Constructed of a highly chemically resistant material
- Unique strength member clamp assembly
- Several sizes with interchangeable parts requirements
- Multiple cable entry options
- No special tools required
- Non-filled closure
- Multiple ground studs
- Pressurisation valve
- Varying cable port sizes cable sizes
- Expandable from two cable entries per end up to eight
- Easy re-entry and reusable seal
- Use in buried applications
- Prevents cable sheath movement with temperature changes
- Expandable system to fit capacity and space
- Butt or in-line configuration for splicing
- Easy installation and re-entry
- No compound required; easy re-entry
- Isolated grounding capability
- Provides ability to flash test
- Accommodates all common trunk and feeder
- Add cable with minimum disturbance; eliminates splice rebuilding when adding lines

## 6.1 Splice Protection Products

### 6.1.1 Closures

#### 3M™ 2178-L/S

##### Description

#### 3M 2178-L/S-FR Flame Retardant Splice Closure

Designed for use in vault and building applications, the 2178-L/S-FR series splice closures are moulded with a flame retardant material that allows them to pass Telcordia Technologies (Bellcore), UL and various global specifications which require a flame retardant rating.

This new material also increases the resistance of the closure to the effects of sprays and release agents used for easier re-entry.

#### Meet your changing network needs

The 2178-L/S-FR series closures are designed with larger and smaller interchangeable closure halves so that you can select the size and case that meets your needs today with the flexibility to expand in the future. Cable ports and space for trays can be added at re-entry with the 3M™ 2181-L/S-FR Cable Addition Kit.

#### The ultimate protection for fibre optic connections

The 2178-L/S-FR series features tough, rigid non-filled closures, tested under real-world conditions which stand up to even the most severe conditions of moisture, vibration and extreme temperatures.

Design improvements to the 2178-L/S-FR series include changes to improve the cable strain relief and a movable tray support. The closures hold cables of varying sizes and provide flexibility to add ports to both ends with the cable addition kit.

Both the 2178-L/S series and the 2178-L/S-FR series splice closures can be used with the 3M Fibrlok™ 2524 Fibre Splice Organiser Tray and most other commercially available trays.

##### Highlights:

- Constructed of flame retardant materials
- Gasket seal
- Unique strength member clamp assembly
- Several sizes with interchangeable parts
- Multiple cable entry options
- No special tools required
- Non-filled closure
- Multiple ground studs
- Pressurisation valve
- Expandable from two cable entries per end up to eight
- Same design and installation practice as 2178-L/S Series
- Tested to various global specifications
- Increases resistance of closure to effects of sprays and release agents
- Easy re-entry and reusable seal
- Prevents cable sheath movement with temperature changes
- Expandable system to fit capacity and space requirements
- Butt or in-line configuration for splicing
- Easy installation and re-entry
- No compound required; easy reentry
- Isolated grounding capabilities
- Provides ability to flash test
- Add cable with minimum disturbance; eliminates splice rebuilding when adding lines
- Use in vault and building applications
- Extends capabilities of 2178-L/S series family

### 3M™ 2178-L/S

#### Description

#### 3M 2178-L/S & L/S-FR Series Accessories

##### 3M 2180 Cable Kit

All materials required for re-entry into 2178 Splice Closure. Includes plugs, washers and sealing materials.

##### Kit Includes:

- Two plugs
- Two hose clamps
- Four green cable ties
- Four blue cable ties
- One hex key
- 48 sealing washers
- One box sealing cord
- One box sealing tape

##### 3M 2181-LS

Contains gasket and materials for installing additional cables.

##### 3M 2181 Cable Addition Kit

For use with 2178 and 2178-G Splice Closures. Contains mastic, cable adapter and materials for installing additional cables in 2178 splice case. This kit permits butt splicing of multiple cables from a single and after initial plant construction. Splice re-arranging, branch cables and customer premise drop can be added with minimal disturbance to plant in service.

##### Kit Includes:

- One cable adapter
- Three plugs
- Four hose clamps
- Four green cable ties
- Four blue cable ties
- One spacer clamp assembly
- One box sealing cord
- One box sealing tape
- Ten bolts
- Eight sealing washer trees

##### 3M 2181-LS/FR Cable Addition Kit

Contains gasket and materials for installing additional cables and is flame retardant.

## 6.1 Splice Protection Products

### 6.1.1 Closures

# 3M™ 2178-L/S

#### Description

### 3M 2522 and 2523 Fibre Splice Organiser Trays

The 2522 and 2523 Fibre Splice Organiser Trays store and protect discrete and mass, mechanical and fusion fibre optic splices in closures and fibre distribution units. The 2521 Series of splice inserts are easily added to either tray to secure splices into the trays. Fibres are routed into the trays using 2520 FibrTube Transition Tubing that zips over the fibres.

\* Splice Inserts must be ordered separately.

#### Highlights:

- Meets Bellcore requirement for bend diameter
  - Easy maintenance
- Trays allow entry and exit of buffer tubing at
  - Provides flexibility in fibre any of the four corners management
- Extra tray depth
  - Ribbon fibre may be coiled without twisting
- Modular design of the splice holder
  - Accommodates many types of splices
- Stackable hinged tray
  - Easy access without removing other trays

### Fibrlok 2524 Splice Organiser Tray

#### Highlights:

- Single entry point
  - Controls fibre management
- Hinged trays snap together
  - Stackable; individual tray access
- Flame retardant / isopropyl alcohol resistant
  - Meets fire codes and industry standards
- 10,16 cm (4") bend diameter
  - Individual fibre access; allows easy maintenance

The Fibrlok 2524 Splice Organiser Tray holds 24 Fibrlok Splices (2525, 2590, 2599, 2529) and accommodates up to eight buffer tubes holding up to 48 fibres (900 µm or 250 µm). The tubes are secured with channel snaps so that cable ties are not required. The fibres all enter the tray in one corner eliminating the need for figure 8's in the fibre.

An important design feature of these stackable trays is the snap-on hinge cover on each tray. Individual trays may be accessed without disassembly of the trays above or below—and without kinking buffer tubes.

The 2524-FT Fusion Splice Organiser Tray holds up to 24 fusion splices. The 2524 splice organiser tray can be adapted for fusion splice storage using the 2524-F Fusion Insert.

The 2524 and 2524-FT splice trays fit and mount in the 2177 Fibre Optic Splice Closure, the 2178 Fibre Optic Splice Closure and the 2178-S Fibre Optic Splice closure.

## 6.1 Splice Protection Products

### 6.1.1 Closures

# 3M™ 2178-L/S

#### Description

#### 3M 2181-B Double Butt Adapter Kit

Contains fasteners necessary to assemble the 2178-L/S Series Splice Closures when two 2181 or 2181-LS Cable Addition Kits are used.

- Ten bolts
- Two fillister head screws

#### 3M 2181-C Triple Adapter Kit

Contains bolts for installation of three 2181-LS or 2181 Addition Kits.

#### 3M 2178-EGI External Ground Isolation Kit

Provides a means to ground each cable shield with water proof isolation. The 2178-EGI housing can be used with any of the 2178-L/S and 2178-L/S-FR Series LightLinker Fibre Optic Splice Closures, and is placed in the cable port.

#### Contents of 2178-EGI Kit:

- Two 2178-EGI housing assemblies & caps
- Two ground wire assemblies
- Two O-rings
- Two bolts

#### 3M 2178-125 Mastic Tape

The 2178-125 Mastic Tape is a non-conductive black mastic that provides excellent sealing properties and does not degrade with gasoline or encapsulating compounds. The tape is 3.2 mm (1/8") thick and is available in rolls 3.8 cm (1-1/2") wide x 114 cm (45") long.

#### 3M 2178-CORD Reenterable Mastic

The 2178-CORD Mastic Cord is available in rolls 1.85 m (6') in length with a .87 cm (0.344") cord diameter.

#### 3M 2172 Strength Member Clamp for Fibre Cable

Provides a means to tie the strength member to the cable sheath.

#### 3M 2183 Universal Aerial Hanger Kit and 3M 2197 Aerial Hanger/Hinge Kit

The 2183 Aerial Hanger Kit or the 2197 Aerial Hanger/Hinge Kit can be used with the 2178, 2178-G or 2178-L/S and 2178-L/S-FR series fibre optic splice cases for use in aerial applications. Both kits also accommodate the 2178 Splice Closure with one or two 2181 Cable Addition Kits. The 2197 aerial hanger/hinge kit provides additional hardware to attach the splice closure cover to its base.

#### Contents of 2183 aerial hanger kit

- Four nylon stop nuts
- Two corner inserts with studs
- Two universal hanger bracket assemblies

#### Contents of 2197 aerial hanger/hinge kit

- Six corner inserts
- 12 nuts
- Two flexible hinges
- Two "L" brackets
- Two bonding/hanger brackets
- Two bolts with washers

### 6.1.1 Closures

# 3M™ 2179-CS

#### Description

### 3M 2179-CS Fibre Optical Splice Closure

The 2179-CS Fibre Optic Splice Closure is a moulded plastic enclosure used for protecting splices in fibre optic cables. It's suitable for buried, underground, aerial, and pedestal applications. The Splice closure has two cable entrance ports on each end. Port plugs allow the closure to be used for butt or in-line splices. The rigid non-encapsulated closures provide physical and environmental protection. The splice closures are suitable for short-term pressurisation during flash testing.

2179-CS closures are delivered with trays and accessories.

\*Only 2179-CS/DIN closure is delivered without DIN trays and accessories. To be ordered separately.

#### Description

### 3M FFSS Heat Shrink Fibre Fusion Splice Sleeves

Transparent plastic tube and stainless steel bar for single fibre protector, ceramic strength bar for ribbon fibre protector designed to prevent stress and protect fusion fibre optic splices in field and factory operations. Sleeves are made ethylene vinyl acetate (EVA) with heat-activated memory which causes them to shrink under exposure to heat. Sleeves shrink tightly to exclude air and hold the bar firmly, preventing abrasion of delicate glass fibres.

Three different versions are available, single fibre sleeve (60 mm in length), 6 fibre ribbon sleeve (40 mm in length) and 12 fibre ribbon sleeve (40 mm in length). Minimum shrink temperature is 90°C, heating time 2-3 min @ 120°C. Minimum diameter after shrink; for single fibre sleeve 3.00-3.20 mm, for 6 fibre ribbon sleeve is 4.25-4.45 mm and for 12 fibre ribbon sleeve 5.35-5.55 mm.

# 6.1 Splice Protection Products

## 6.1.1 Closures

### 3M™ FibrDome

#### Description

#### 3M FibrDome Fibre Optic Splice Closure

FibrDome Closures protect fibre optic splices from the elements while providing fast and easy no-cost reentry. These closures can be installed in above-ground pedestals, hand-holes, and mounted on poles and strands. The FibrDome closure utilizes proven sealing technology and over 30 years of experience with copper protection. Fibre splices are enclosed in a polypropylene dome that is clamped together with a stainless steel latch and sealed with an O-ring. Pre-stretched tubing is slipped over the base of the closure and onto a gel sealing collar. Pulling the plastic rip cord shrinks the tubing to an air and water tight seal around the collar. No special tools, power supply or torches are required for assembly. To re-enter, simply pull the latch.

Available in two sizes, the FibrDome closure accommodates various cable constructions and splice capacities. Each tray holds two splice inserts. Four types of inserts are available to hold Fibrlok Splices or Fibrlok Multi-Fibre Splices, fusion or mass fusion splices. For quick installation and field-proven performance specify 3M fibre protection products.

#### Highlights:

- Proven 3M sealing technology
  - High product reliability; minimised maintenance costs
- Easy installation
  - No special tools, torch or power supply required
- Ready access
  - No-cost re-entry to splices; craft friendly
- Flexible fibre management
  - Accommodates a variety of cable sizes
- Flexible splice capability
  - 1 - 96 fibres in discrete splices; 4 - 432 fibres in ribbon splices
- Minimal training
  - Cost savings
- Gel end seal technology
  - No compounds to mix; air tight seal over multiple cable configurations
- 100 lb. strain relief with shield bond connector assembly
  - Long product life; craft friendly—no exposed metal
- Rugged and versatile design installed in a variety of
  - One system fits all; inventory costs savings environments

## 6.1.1 Closures

### 3M™ FibrDome

#### Type/Order text

#### Ref.-No.

Follow **5** Easy Steps for Ordering

1. FD06 FibrDome Closure with splice tray

2. FD08 FibrDome closure

3. FD06 FibrDome closure with transition tray and 2 splice trays

4. FD08 FibrDome closure with 4 splice trays

5. Scotchlok™ 4460-D/FO Shield Bond Connector Assembly

#### 1 For complete installation select one of the following:

	Pkg.	Min. Order	Ref.-No.
<b>FD06 FibrDome Closure</b> Contains transition tray and one splice tray; capacity for one more splice tray	1 kit/cs.	1 each	<b>FD06</b>
<b>FD08 FibrDome Closure</b> Contains transition tray and one splice tray; capacity for three more splice trays	1 kit/cs.	1 each	<b>FD08</b>
<b>FD06-D FibrDome Closure</b> Contains transition tray, one splice tray, two 4460-D/FO Shield Bond Connectors, two 2521-F Splice Inserts for fusion splices, and two 2521-FL Splice Inserts for Fibrlok™ splices	1 kit/cs.	1 each	<b>FD06-D</b>
<b>FD08-D FibrDome Closure</b> Contains transition tray, one splice tray, two 4460-D/FO shield bond connectors, two 2521-F splice inserts for fusion splices, and two 2521-FL Splice Inserts for Fibrlok™ splices	1 kit/cs.	1 each	<b>FD08-D</b>

#### 2 Choose one package for each splice tray:

<b>2521-FL Fibrlok™ Splice Insert</b> Holds six single mechanical splices in each insert	2/pkg. 12 pkg./cs.	12 pkg.	<b>2521-FL</b>
<b>2521-MF Fibrlok™ Multi-Fibre Splice Insert</b> Holds four multi-fibre splices in each insert	2/pkg. 12 pkg./cs.	12 pkg.	<b>2521-MF</b>
<b>2521-F Fusion Splice Insert</b> Holds twelve discrete fusion splices in each insert	2/pkg. 12 pkg./cs.	12 pkg.	<b>2521-F</b>
<b>2521-RF Ribbon Fusion Splice Insert</b> Holds five ribbon fusion splices in each insert	2/pkg. 12 pkg./cs.	12 pkg.	<b>2521-RF</b>

#### 3 Choose one shield bond connector or strength member clamp for each cable:

<b>Scotchlok™ 4460-D/FO Shield Bond Connector Assembly 4460-D/FO</b> Provides grounding and central strength member clamp	100/cs.	100 each	
<b>FD110 Ground Kit</b> Includes two Scotchlok™ 4460-D/FO Shield Bond Connector Assemblies and two ground straps	12 kit/cs.	12 each	<b>FD110</b>
<b>2172 Strength Member Clamp for Fibre Cable</b> Clamps strength member to cable sheath	100/cs.	100 each	<b>2172</b>

#### Ordering Information (continued)

1. FibrDome Closure Splice Tray Kit

2. FibrDome Cable Addition Kit

3. 2520 FibrTube Transition Tubing

#### 4 Choose additional trays as necessary :

	Pkg.	Min. Order	
<b>FD100 FibrDome Closure Splice Tray Kit</b>	3 kits/cs.	3 each	<b>FD100</b>
Contains splice tray, cover, cable ties and FibrTube transition tubing			

#### 5 Choose additional accessories as necessary :

<b>FD106 Cable Addition Kit</b>	1 kit/cs.	1 each	<b>FD106</b>
Contains PST, gel strip, cable ties, sheath scuff, FibrTube transition tubing; for re-entry into FD06 Closure			

<b>FD108 Cable Addition Kit</b>	1 kit/cs.	1 each	<b>FD108</b>
Contains PST, gel strips, cable ties, sheath scuff, FibrTube transition tubing; for re-entry into FD08 Closure			

<b>2520 FibrTube Transition Tubing</b>	50/cs.	50 each	<b>2520</b>
Protects fibres between trays; accommodates ribbon fibres; cut in one-foot lengths			

<b>2520-3FT FibrTube Transition Tubing</b>	24/cs.	24 each	<b>2520-3FT</b>
Protects fibres outside trays; accommodates ribbon fibres; cut in three-foot lengths			

<b>4600-GSS Gel Sealant Strip</b>	50/cs.	50 each	<b>4600-GSS</b>
Gel strip seals cables and gel core in FD06 or FD08 FibrDome Closures			

<b>FD120 Mounting Bracket</b>	1 kit/cs.	1 each	<b>FD120</b>
Mounting bracket for FD06/FD08 closures			

<b>FD130 Strand Mount Bracket</b>	1 kit/cs.	1 each	<b>FD130</b>
Strand mounting bracket for FD06/FD08 closures with three clamps			

<b>FD130-S Strand Mount Bracket, single clamp</b>	1 kit	1 each	<b>FD130-S</b>
Strand mounting bracket for FD06/FD08 closures with one clamp around closure base			

<b>FD06 Pull 'N' Shrink Tubing</b>	5/cs.	5 each 36402	<b>FD06-PST</b>
------------------------------------	-------	-----------------	-----------------

<b>FD08 Pull 'N' Shrink Tubing</b>	5/cs.	5 each 36403	<b>FD08-PST</b>

### 6.1.1 Closures

# LightLinker™

#### Description

#### The LightLinker System

The LightLinker system is a full series of splice closures and trays used for housing, organising and protecting single or mass fusion fibre splices. Completely modular in design, the system offers total flexibility to meet the evolving requirements of worldwide fibre optic networks.

A full range of closure sizes, diameters from 76 - 241 mm (3- 9-1/2") in combination with lengths up to 914 mm (36"), gives systems designers multiple options when considering splice location options. And while smaller size closures would normally be considered optimal, larger LightLinker closures can be used in many cases to provide extra storage space for ribbon or buffer tubed fibre.

LightLinker closures may be used with all types of fibre optic cable and for cut, uncut and taut sheath applications.

# 6.1 Splice Protection Products

## 6.1.1 Closures

### 3M™ Gf-DKSM

#### Description

#### Pressure-resistant optical fibre closure for heavy duty applications

The Gf-DKSM is a modified 2-Type Closure to protect splices in fibre optic cables. Suitable for pressurised and unpressurised access and distribution networks.

Gf-DKSM can accommodate 180 single fibre splices in 15 splice trays and is suitable for all outdoor optical fibre cables. The closure consists of two half-shells and two endplates. The closure parts are sealed against each another and the cable with a permanent elastic sealant.

The closure has a fully wrap around design for the installation of uncut, no-slack, mid-span applications. Unused cable ports are sealed with dummy plugs. The Gf-DKSM is designed for installation of DIN splice trays.

Alignment bars are available to keep closure endplates in place, during the installation. Additionally, the Gf-DKSM is equipped with a valve and a compression-resistant valve cap.

The closure can be used either as a butt closure or, using an additional closure adapter spool, as an in-line closure.

#### Highlights:

- Complete kit, suitable for DIN splice trays
- capacity of up to 180 splices
- up to four cable entries per side
- suited for in-ground, cable shaft and building installation
- pressure and water resistant
- easy reopening and closing
- no heat source (open flame, gas) required

#### Delivery:

- 1 set closure body with upper and lower half-shell
- 1 endplate with spool adapter for four cable entries and cable strain relief
- 1 endplate with dummy plugs
- 1 tray support for 15 trays
- 1 attachment rail for tray tray
- 1 set of sealing tapes
- 1 set of washers
- installation instructions

#### Type/Order text

#### Ref.-No.

#### Gf-DKSM

for 12 to 180 single fibre splices

Suitable for up to 15 DIN splice trays. (Splice tray not included).

Dimensions (HxWxD): 470 x 206 x 258 mm  
Colour: black, Weight: approx. 6,7 kg, Packaging: 1 unit

Cable spool adapter, left side:  
4 round inlets for cables, 5 mm to 25 mm

Cable spool adapter, right side: optional  
4 round inlets for cables, 5 mm to 25 mm

**N501294A0000**

### 3M Gf-DKSM-L

#### Fiber Closure for uncut and taut sheath applications

Gf-DKSM-L closure is based on the 2A2C closure and provides 915 mm sheath opening and is suitable for branching out of taut sheath ( no slack in-line) cables. 1 or 2 trays inside the closure can accommodate one bundle or up to 12 fiber splices for branching.

#### Technical characteristics

Dimensiones (WxHxD): 1130 x 165 x 215 mm  
Colour: Black  
Weight appr.: 12,8 kg  
Cable openings both sides: 41 mm and 25 mm

# 6.1 Splice Protection Products

## 6.1.1 Closures

### 3M™ BPEO

#### Description

#### Fibre Optic Closure System for Access Networks

BPEO 1

BPEO 2

BPEO 3

BPEO: Fully Mechanical, Easy to Install, No Specific Tools BPEO is the newest generation of watertight splice-protection closures for FTTx networks. The BPEO range of product is designed for all types of networks from 12 to 432 optical fibres. These fully mechanical, watertight/sealed closures are designed for installations in the outside plant, in manholes or in directly buried, pole or wall applications. The design allows multiple re-entries.

**Each closure is composed IP68 Protection class of:**

- body
- cable seals
- tray support
- splicing trays

The range is comprised of three sizes for different capacities and applications. The closure features small outer dimensions. The design of the full range is based on a low depth in order to fit in existing manholes or premises. Primary use is in butt configuration.

**BPEO Value**

- Fully mechanical
- Unique latch mechanism for body seals and re-entry
- No resin, no power supply, no chemicals required
- No specific tools required
- Multiple re-entry
- Closure re-entry without breaking cable seals
- Fully mechanical cable seals

**BPEO: The Closure**

The closure is made up of two parts designed as a fast locking system with captivated clamps.

- No specific tools for the re-entries
- Watertightness is ensured by a half-shell gasket (resilient sealing)

**ECAM: The Mechanical Cable Entries**

Two types are available:

- Single entry for cables up to 18 mm (0.71 in.)
- Double entry for midspan access application.

**The ECAM entries have two main functions:**

- Watertightness and anchoring
- The watertightness is fully mechanical
- The anchoring is done on the sheath, the central strength member and the strain-relieves

The installation of the cable entry is done completely outside the closure. The cable entry is fixed on the closure simply by clipping.

ECAM, the fully mechanical cable entry, will be very useful for connections and the local loop because of its simplicity.

**The BPEO is designed for all the locations in the FTTx network:**

- Installation in manholes
- Directly buried
- Pole or wall mounting
- Aerial mounting
- Continuous pressure: 80 mbar

Features	Advantages	Benefits
Accepts a range of fibre optic cables	Will handle a fibre optic cable range of 12 to 432 fibres	Suitable for use in optical fibre backbones in existing premises
Watertight/sealed	Can be used in aerial, buried or underground applications	Will keep water out of the splice in typical environmental conditions
Unique latch mechanism	Easy to use, tool free opening and closing of the closure	No special tools are needed to close or re-enter the BPEO
ECAM Mechanical Single Port ports Cable Seal	Suitable for use on a wide range of cable diameters	Easy to use method of sealing the cable entry from the ingress of water, dirt, dust and bugs. Also provides superior cable strain relief.
Grounding kit	Facilitates grounding continuity	A reliable, safe, durable bonding and ground feature without using a cable port

## 6.1 Splice Protection Products

### 6.1.1 Closures

# 3M™ BPEO

#### Description

#### 3M BPEO 1 Closure

##### BPEO 1 Butt Closure (N501198A0000) - Example

Butt closure for protection of straight splices. For 48 single fibre splices.

Dimensions (HxWxD):

349 x 204 x 92 mm

Colour: black; Packaging: 1 unit

Weight: approx. 1,8 kg

Cable ports, bottom:

4 round ports for cables,

5 - 18 mm

Delivery:

- 1 kit wall or pole mount bracket
- 2 round dummy plugs
- 2 single ECAM cable seal
- 4 splice trays 10 mm for 12 single fibre splices, splice insert for shrink splice protector included
- BPEO closure body
- installation instructions

##### BPEO 1 Branch closure (N501199A0000) - Example

Branch closure for cut or uncut cables.

For 48 single fibre splices

Dimensions (HxWxD):

349 x 204 x 92 mm

Colour: black; Packaging: 1 unit

Weight: approx. 1,8 kg

Cable ports, bottom:

2 round ports for cables,

5 - 18 mm

1 oval port for 2 cables 5 mm

to 20 mm

Delivery:

- 1 kit wall or pole mount bracket
- 2 round dummy plugs
- 1 set double ECAM cable seal for cut or uncut cables
- 4 splice trays, 10 mm for 12 single fibre splices, insert for shrink splice protection included
- BPEO closure body
- installation instructions

##### BPEO 1 Fibre Distribution Closure (N501272A0000) - Example

Distribution closure both cut and uncut cables having the possibility of installing 6 drop cables.

For 48 single fibre splices

Dimensions (HxWxD):

349 x 204 x 92 mm

Colour: black; Packaging: 1 unit

Weight: approx. 1,8 kg

Cable ports, bottom:

6 round cable ports, 4-8 mm

1 oval cable port for 2 cables,

5-20 mm

Delivery

- 1 kit wall or pole mount bracket
- 6 each 8 mm cable seals
- 1 double ECAM for oval port
- 4 trays, 10 mm. Heat shrink splice protector insert included
- BPEO closure body
- installation instructions

Typical closure configurations. Different configurations are available upon request.

## 6.1 Splice Protection Products

### 6.1.1 Closures

# 3M™ BPEO

#### Description

#### 3M BPEO 2 Closure

##### BPEO 2 Butt closure (N501240A0000) - Example

For 144 single fibre splices.  
Dimensions (HxWxD):  
510 x 320 x 148 mm  
Colour: black  
Packaging: 1 unit  
Weight: approx. 4,9 kg

Cable ports, bottom:  
6 round ports for cables,  
5 - 18 mm  
1 oval port for 2 cables 5 mm  
to 27 mm

Delivery:

- 1kit wall or pole mount bracket
- 4 round dummy plugs
- 1 dummy plug for oval port
- 2 single ECAM seal
- 12 splice trays 10 mm for 12 single fibre splices, including splice insert for shrink splice protector
- BPEO closure body
- installation instructions

##### BPEO 2 In-Line (N501240A0000) - Example

In-line closure for 144 single fibre splices.  
Dimensions (HxWxD):  
510 x 320 x 148 mm  
Colour: black; Packaging: 1 unit  
Weight: approx. 4,9 kg

Cable ports, bottom:  
6 round ports for cables,  
5 - 18 mm  
1 oval port for 2 cables 5 mm  
to 27 mm

Delivery:

- 1kit wall or pole mount bracket
- 10 round dummy plugs
- 1 dummy plug for oval port
- 2 single ECAM cable seals
- 12 splice trays 10 mm for 12 single fibre splices, splice insert for shrink splice protector included
- BPEO closure body
- installation instruction

Cable ports top:  
6 round ports for cables,  
5 - 18 mm

Typical closure configurations. Different configurations are available upon request.

#### BPEO 3 Butt closure (N501284A0000) - Example

Cable ports, bottom:  
6 round ports for cables,  
5 - 18 mm  
1 oval port for 2 cables 5 mm  
to 27 mm

For 288 single fibre splices.  
Dimensions (HxWxD):  
680 x 320 x 148 mm  
Colour: black  
Packaging: 1 unit  
Weight: approx. 6.7 kg

#### Delivery:

- 1 kit wall or pole mount bracket
- 4 round dummy plugs
- 1 dummy plug for oval port
- 2 single ECAM cable seal
- 24 splice trays 10 mm for 12 single fibre splices, splice insert for shrink splice protector included
- BPEO closure body
- installation instruction

Typical closure configurations. Different configurations are available upon request.

## 6.1 Splice Protection Products

### 6.1.1 Closures

# 3M™ BPEO

#### Description

##### Breakout adapter

Available in several variations, they guarantee the safe guidance and breakout of FO fibres to the splice trays. Simply plug the adapter onto the incoming bundled fibre and lengthen with the bundled fibre tube. Suitable for all bundled fibres with 2.4 mm to 3.2 mm OD.

#### Type/Order text

#### Ref.-No.

#### 3M BPEO Accessories

##### Breakout adapter 1/1

Consists of breakout adapter 1/1 and bundled fibre tube. For the flexible guidance of incoming/outgoing fibres to the splice trays. Packaging: 16 units, bundled fibre tube, 3.2 m

N581078A0000

##### Breakout adapter 1/1

for the extension of bundled fibres with the bundled fibre tube. Packaging: 10 units

N581124A0000

##### Breakout adapter 2/1

To split one bundled fibre into two bundled fibre tubes. Packaging: 10 units

N581121A0000

##### Breakout adapter 1/4

To split one bundled fibre into four bundled fibre tubes. Packaging: 10 units

N581122A0000

##### Breakout adapter 1/6

To split one bundled fibre into six bundled fibre tubes. Packaging: 10 units

N581123A0000

##### Bundled fibre tube

for lengthening/breaking out of bundled fibres. Simply plug onto the breakout adapter.

N581125A0000

ID: 1.8 mm; OD: 3.0 mm  
Colour: black, Packaging: 25 m spool

##### BPEO earthing kit

for a conductive connection and earthing of all metallic cable components. Packaging: 4 units

N151064A0000

##### BPEO number identification kit

for numerical identification of all splice trays. Packaging: 0 - 9 with 30 numbers each

N621020A0000

## 6.1 Splice Protection Products

### 6.1.1 Closures

# 3M™ BPEM II

#### Description

#### A range adapted to all network configurations

- In line applications
- Distribution applications
- Branching
- Butt configurations

#### Multi-purpose splice protection

A proved robustness adapted to all installation environments:

- Assembly in manholes
- Outside on a support
- Directly into the ground
- With no special protection.

#### Watertightness

- Shells made of high-pressure polyester
- Thick-section seals
- Stainless steel screws and nuts
- Continuous pressurisation possible up to 500 mb (boxes supplied pressurised).

#### Fibre management

Optimised working space:

- Cabling laid flat in the box.
- Fibre routing simplified
- No need to install over tubes to protect the fibres\*
- Large-capacity trays
- New splice support enabling 24 fibres to be installed per tray for high-density applications
- New organiser with between 144 and 288 splices in the 3B model. The trays come in different colours for easier identification.

\* Where necessary, over tubing kits are available as an accessory upon request.

#### Materials

Protective body: high-pressure polyester

Organiser: Thermoplastic material

Screws and nuts: Stainless steel

#### Protection rating:

Watertightness: 0.5 bar continuous

(IP 68 in compliance with NF EN 60 529)

Impact strength: 20 joules

(IK 10 in compliance with EN 50 102)

Cable traction resistance: 100 daN

#### Operational temperature

- 30° C to + 70 ° C

#### Technical characteristics:

#### Capacities

Box	Length in mm	Width in mm	Depth in mm
T1B	344	290	126
T1A	344	290	180
T2	538	276	164
T3B	654	360	127

For standard use, we advise to use the tray for 12 single splices (fusion). In our opinion, this is the configuration in which you benefit the most from the optimum conditions for cabling and maintenance.

Organiser	Tray number	Fibre capacity	Very High Density*
1C	1	12	24
2C2	24	48	
3C3	36	72	
1C PAS	1	12	24
2C PAS	2	24	48
3C PAS	3	36	72
6C 6	72	144	
10C	10	120	240
12C	12	144	288

\*Very High Density: The internal volume and the tray splicing support make it possible to increase the density up to 24 single splices. This density is an advantage when cables with micro-structures are used. (Consult us)

#### Cable glands (to be ordered separately from the boxes)

#### Number of cable inlet ports in the boxes

Box	Model	Number of ports
T1B	Size 1 lower	5
T1B PAS	T1B midspan	3
T1A	Size1 upper	5
T2 Size 2	6	
T3B	Size 3 lower	4

#### Inlet kits (inlet port equipment)

Type	Model	Capacity in numbers of cables	Acceptable diameters in mm
		Ø 7 to 25	
N 72 1044	Th	1	Ø 17 to 30
N 72 1045	Th	2	Ø 6 to 14
N 72 1043	Th/R	1	Ø 8 to 18
N 72 1040	Th/R	1	Ø 17 to 25

Th : Watertightness ensured by heat-shrinkable sheath

Th/R : Special in-line cable (Resin + Thermoplast)

#### Type/Order text

#### Ref.-No.

#### Accessories for trays

Additional accessories for SCOOP trays  
In the box kits, each tray comes with two supports enabling a total of 24 fusion type single splices to be stored.  
These two supports can be replaced by other models:

- Set of 30 ground splice supports,**  
fusion type, Ø 5 mm (3 splices per support)
- Set of 30 FIBRLOK® mechanical single**  
splice supports (6 splices per support)
- Set of 30 FIBRLOK® mechanical ground**  
splice supports (1 splice per support)

**N801125B0000**

**N801016C0000**

**N801127B0000**

#### Mounting accessories

The BPEM II boxes are delivered as standard with two bars for wall fastening.  
These bars can be replaced by the old kits which are also usable:

- Set of 2 brackets**  
to be fixed on the rear of the box
- Wall-mounting rail**  
(compatible with kit 3 71 146 00)
- Adjustable bracket**  
For installing the boxes on supports equipped with plates

**371146000000**

**271753180000**

**271835000000**
