

FTTx – Fibre Optics Connectivity

As well as Volition™ Network Solutions, 3M™ offers a complete line of single-mode & multimode ferruled fibre optic connectors including Hot Melt and Crimplok™ connectors in ST, SC, FC and LC style. To complement this, connectors are also available terminated as pigtails or patch cords in a variety of lengths.

There is also an extensive range of mounting hardware & accessories including 19" patch panels and distribution boxes. The Fibrlok™ mechanical splice, available in single- and multimode versions for single- and multimode fibre completes the offering of Fibre Interconnect Solutions.

8.1.3 3M™ LC-Connectivity

Description

3M™ LC Connectors / Couplings / Pigtails

The LC small form factor connector has become the most popular interface for optical line equipment over the last two years and is well established in fibre backbones.

3M has expanded their attractive productline of Hot Melt fibre optic connectors and now offers also LC Hot Melt connectivity for single- and multimode applications.

The 3M Hot Melt system combines the ease of installation together with the advantage of spliceless direct termination in patch panels and TO's.

Due to it's small size, the LC-Connector allows to double the port density in 19" cabinets. By design the LC has a very low crosstalk and makes the connector the perfect choice for 1 GBit/s as well as 10 GBit/s applications.

8.2 Assembly Systems

8.2.1 3M™ Hot Melt System Universal Termination Kit

Description

3M™ Hot Melt optical fibre connector assembly system

The 3M Hot Melt system offers most convenient field connectivity for fibre optic connectors. From direct termination of breakout cables in patch panels over pigtails up to patchcords, Hot Melt connectors fit every application. The connectors are pre-filled with Hot Melt adhesive which just needs to be heated for easy termination.

All connectors have ceramic ferrules and different coloured boots enable clear port identification.. A universal termination kit plus different upgrade kits enable to install all type of 3M Hot Melt connectors.

Highlights:

- Quick, simple and safe assembly in the field or factory
- Connector, adhesive and polishing film from one manufacturer guarantees a high quality connector
- Simple polishing process, either manually or with a polishing machine
- All connectors contain a zirconia ferrule and Hot Melt adhesive
- Boots are available in various colours for definite channel separation
- Suitable for all LAN and CATV applications
- Suitable for internal or external applications

Universal Hotmelt Termination Kit

The Hot Melt Termination Kit for ST, SC, FC and LC-Connectors contains all tools and consumables, which are necessary to terminate 3M HotMelt Connectors in the field.

(LC Hot Melt available form Q2/3 2005)

PU: 1 pc

Kit content:

- Hotmelt oven with 230V power cord for europe and UK
- Connector holders for ST (6 ea.), SC and FC (4 ea.)
- Universal connector holder for ST, SC, FC connectors (during 2005)
- Polishing pad, classic, round ("one step")
- Polishing pad, UHT, soft
- Polishing film 2µm, round, light green, 200 ea
- Polishing film 0,5µm, diamond, light gray, 15 ea
- Polishing film 0,5µm, final polish, frosted, 50 ea
- Polishing film 0,05µm, light yellow, 50 ea
- Jacket stripper
- Buffer/coating stripper
- Kevlar sissors
- Universal crimp tool
- Carbide scribe blade
- Angled viewscope (200x)
- Express glue for UHT connectors
- Lint free tissues, 100 ea
- Bottles for water and isoprophyl alcohol
- Safety container for fibre stubs
- Marker
- Trainings CD and instruction manual

8.2.1 3M™ Hot Melt System Autopolisher/Tubing Kit

Description

3M Hot Melt Autopolisher / 3M Tubing Kit

The 6851-E duplex Auto Polisher is a robust polishing machine designed for field polishing of 3M HotMelt connectors with the performance of a factory polish.

The receptacle of the machine has a clamp mechanism, that allows to polish two HotMelt (ST, SC or FC) connectors of the same type at a time.

This polishing machine is designed for high volume installations of HotMelt connectors and ensures an extremely high consistency of the polishing quality.

Technical Data:

Voltage (primary)	230V/50Hz, wallsocket PS
Voltage (secondary)	15V DC / 1A, plus on centre
Dimensions:	170 x 185 x 120 cm
Weight:	1,7 kg
Timer intervals:	30, 60, 90, 120 sec.

Tubing Kit

This Tubing or Breakout Kit is for direct termination of HotMelt connectors on loose tube cables with 250µm primary coated fibres. The 900µm buffer tube slides over the primary coated fibre and offers more mechanical protection as well as better strain relief on the connector.

DE-0100-0900-4

Kit Content:

- Transparent PP-tube (60 m)
- Heatshrink tube 6,4, x 50 mm with glue (25 ea)
- Metal protection tube for the separation zone loose tube/buffer tubes (25 ea)
- Colour rings for coding (12 different colours, 10 ea colour)
- Instruction manual

8.2 Assembly Systems

8.2.2 3M™ Crimplok™ Connectors

Description

Crimplok™

The Crimplok™ connector combines the speed of non-adhesive connectors with the performance characteristics of epoxy and Hot Melt connectors. Crimplok™ Connectors are the ideal solution for emergency restoration work or for quickly making fibre connections at the desk.

Crimplok connectors were designed to:

- Save time in installation
- Provide rugged, reliable performance, meeting or exceeding current EIA/TIA 568, ISO 11801 and EN 50173 specifications.
- Install cleanly and simply with fewer parts and tools.

Available in both SC and ST, single mode and multimode connector versions, Crimplok connectors are faster to install than epoxy connectors since there is no set-up or curing time. Crimplok connectors do not require special heating tools or ovens, so time spent searching for electrical outlets is eliminated. Polishing the connector is also a simple process that can be performed in seconds.

The Crimplok connector incorporates proven 3M malleable metal element fibre gripping technology. There is no fibre splice or second joint inside the connector, so there is no added attenuation at the connection. When the conformable metal element closes, it grips a length of the fibre, eliminating fibre movement associated with other crimp-style connectors. The strength of the metallic element ensures that Crimplok connectors meet industry standards for temperature and humidity.

ST Connector

SC Connector

Highlights:

- quick, simple and safe assembly in the field
- no adhesive required
- simple manual polishing process
- all connectors contain a pre-radiused Zirconia ferrule
- anti-bend design boot
- suitable for all LAN and CATV applications
- minimal tools required
- no electricity required
- meets EIA/TIA-568 specifications

8.2 Assembly Systems

8.2.3 3M™ Fibrlok™

Description

Fibrlok™ Universal

Fibrlok is a universal mechanical splice, which can be used wherever quick and secure splice connections are required.

Fibrlok Universal splice consists of a highly resistant plastic base, body, and lid, in which a metallic element provides the connection. The metal element surrounds the optical fibres to be connected aligning the fibres precisely and permanently in place.

The universal splice utilizes a single cleave length for both 250 and 900µm coated fibres and has the ability to compensate for variations in fibre outer diameters for improved splicing yield.

The Fibrlok Universal splice can be used with multimode and single-mode fibres with 125 µm diameter and coatings of 250 to 900 µm.

Apply in

- Overhead cable joints
- In-ground joints
- Assembly shafts
- Cable branching boxes
- Building wiring

Connector type	Fibrlok™
Fibre diameter	125µm
Coating	250 to 900 µm
Life cycle	> 30 years (Arrhenius DIN/IEC 88 T1)
Assembly time	<30 s after preparation of fibre ends
Insertion loss	mean = 0,1 dB
Return loss	>35 dB from -40°C to +80°C >60 dB at room temperature
Fibre pull strength	>4,5 N, typically 13 N
Material	highly temperature-resistant plastic with aluminium alloy metal element UL 94, V-0 value
Operating temperature	-40°C to +80°C
Temperature cycle	Change of insertion loss: <0.5 dB. from -40°C to +80°C
Fungus resistance	ASTM G-21-70; value 0
Vibration	EIA standard FOTP-11, test procedure 1
Water resistance	7 days at +43° C, change in attenuation <=0.05 dB

Highlights:

- Fibrlok™ is a universal splice for both 250 to 900 µm coated fibres
- The same splice is used for either singlemode or multimode fibres
- Identical stripping lengths are used for 250/900 µm fibres
- Repositioning of fibres is possible

Fibrlok™ 2529 universal connector for optical fibres

The following diagram illustrates the distribution of results from measuring the insertion loss on 550 Fibrlok™ universal connectors (equal optical fibres, coating: 250 µm).

Mean insertion loss: 0.07 dB.

Cross-section of an open and closed Fibrlok™ Universal

To make the connection, the prepared fibre ends are inserted into the connector. Using the assembly tool, the connector lid is closed, and the metal element positions the fibres accurately together.

8.4 Distribution Boxes

8.4.1 3M™ VKA 2/GF

Description

3M™ VKA 2/GF

The VKA 2/GF optical fibre distribution box is specifically designed as an interior transfer or termination point for optical fibre runs. It is well-suited to environments where space is limited and a cost effective solution is required.

The VKA 2/GF houses two FO splicing cassettes which can hold up to 24 splice connections. With the addition of a connector mounting plate (optional) the boxes can also be used as a patch distribution frame.

Highlights:

- Splice or patch distribution frame for 24 splice connections (2 FO splicing cassettes)
- FO connector mounting plates for 12 connectors E2000/SC, ST/FC or 6 connectors SC duplex
- accommodates hybrid cables using copper connector blocks, either 2x10 pair or 1x20 pair (SID™-CD). Overvoltage protection can be used
- Lockable
- Remote monitoring via lid contact

3M™ VKA 2/GF

If hybrid cables are used, the modular design of the VKA 2/GF makes it possible for either two 10 pair or one 20 pair copper connector blocks (Quante™ SID™-CD) to be accommodated.

Protection rating: IP 40 (DIN 40050)

Typ/Bestelltext

8.4 Distribution Boxes

8.4.1 3M™ VKA 2/GF-EFM

Description

3M™ VKA 2/GF-EFM with single fibre management

The VKA 2/GF-EFM serves as a final distribution or splice distribution frame in optical fibre networks and is capable of accommodating up to 12 splice connections in six FO splicing cassettes.

A feature of the VKA 2/GF-EFM is that it provides the opportunity for both single and multiple fibre management. This type of fibre management enables the storage of the splice for a connection to be separate from all other fibres. Ideally, two fibres will be stored in one splicing cassette. Using this method to manage the fibres, existing fibre connections will not be affected, even at later extensions or service work.

Highlights:

- Single-fibre management for up to 12 splicing connections (24 fibres)
- FO cassette stack, completely removable
- Separate cable guide levels for incoming and outgoing sides
- Connector holders for SC, ST or FC connections
- Copper connector block for hybrid cables
- Lockable
- Remote monitoring via lid contact
- Utilises the same design as the VKA distribution frame

3M™ VKA 2/GF-EFM

By using different connector mounting plates, the VKA 2/GF-EFM can be used as a patch distribution frame. It is possible to install a 10 pair copper connector block (Quante™ SID™-CT) for use with hybrid cables.

Type/Order text

VKA 2/GF-EFM for 12 splice connections

8.4 Distribution Boxes

8.4.1 3M™ VKA 4/GF, 3M™ VKA 8/GF

Description

3M™ VKA 4/GF, 3M™ VKA 8/GF

VKA 4/GF and VKA 8/GF are optical fibre distribution frames capable of housing upto 48 and 96 splice connections in either four or eight FO splicing cassettes, respectively. These capacities can be further expanded to 72 or 144 splice connections by the addition of a further 2 or 4 splicing cassettes. In these cases it will not be possible to install a FO connector mounting plate.

Using optional connector mounting plates, the two splice distribution frames can be converted to patch distribution frames.

Highlights:

- Capacity as:
Patch distribution frame, 48 (VKA 4/GF) or 96 (VKA 8/GF) splice connections
Splice distribution frame, 72 (VKA 4/GF) or 144 (VKA 8/GF) splice connections
- Connector mounting plates for SC, E2000, FC or SC connections
- Copper termination for hybrid cables possible with overvoltage protection
- Remote monitoring via lid contact

3M™ VKA/8GF

The VKA 4/GF can be equipped with one, the VKA 8/GF with two connector mounting plates. For the use of hybrid cables (with copper leads), there is a provision for the installation of 10 pair copper connector blocks (SID-CT).

52138-010 30

FO connector holders 12 SC-Duplex

52138-012 30

FO connector holders 24 E2000 / SC-Simplex

52138-013 30

Installation above the FO splicing cassettes

VKA-Monitoring switch

52096-519 00

Lid contact only useable in combination with lock kit

8.4 Distribution Boxes

8.4.2 3M™ 2552SA

Description

3M™ 2552 SA Wallmount distribution box

The 3M 2552SA offers excellent fibre management in an affordable box with an attractive, low profile design able to be wall mounted anywhere in your LAN network. The box is also suitable for housing consolidation points.

The 2552SA series brings efficient use of space as well as functionality and rugged durability. The boxes have a unique sliding lid to provide easy access to couplings and fibre management.

Interchangeable connector panels are available to accommodate: ST simplex & duplex couplings, SC duplex couplings, FC flanged couplings, FC "D" mount couplings, and the Volition™ VF-45™ Socket.

Fibres can either be directly terminated or spliced to pigtails using either Fibrlok™ or fusion splicing. The 2552SA is constructed from flame retardant material.

The 2552SA is part of 3M's large family of fibreoptic products including connectors, couplings cable assemblies splices and more.

Highlights:

- Assortment of coupling plates will handle all major connector styles

Type/Order text

2552SA

Dimensions (HxWxD) :210 x 160 x 65 mm
 Weight: approx. 0,5 kg/ea.
 MOQ: 10 units

Content:
 Exchangeable face plates for:
 ST simplex /
 FC-"D" Mount /
 SC duplex plate up to 12x fibres

Ref.-No.
