A. System Overview

## One-Hole Aluminum Lay-In Lug

B1. Cable Ties

### Type LI

B2. Cable Accessories

- Used for quick installation of a continuous grounding conductor
- Made from high strength, extruded aluminum alloy to provide premium electrical and mechanical performance
- Tin-plated to inhibit corrosion
- Wide wire range-taking capability minimizes inventory requirements
- UL Listed and CSA Certified for use up to 600 V and UL temperature rated 90°C

B3. Stainless Steel Ties

C1. Wiring Duct

C2. Surface Raceway

C3. Abrasion Protection

C4. Cable Management

The use of Panduit oxide inhibiting joint compound (CMP) is recommended for pad to pad and conductor connections. See below.  
\*\*Uses slotted head set screw.

D1. Terminals

## Joint Compounds

D2. Power Connectors

### Type CMP

- Oxide inhibitor for compression conductor connections lowers electrical resistance of compression joint while sealing out air and moisture to prevent the formation of surface oxides
- Wide operating temperature range; can be used in a wide range of electrical and environmental conditions
- Packaged in convenient dispenser bottles

D3. Grounding Connectors

**UL LISTED** Grounding Clamp for Water Pipes, Bronze

**Type KP**

- Used to ground copper code conductor to water pipe or copper tube
- Cast from high strength, electrolytic bronze to provide reliable grounding connections
- Plated steel screws provide high strength and inhibit corrosion
- Accommodates a wide range of pipe, tube, rod and conductor sizes – minimizes inventory requirements
- UL Listed for grounding and bonding and suitable for direct burial in earth or concrete

| Part Number  | Water Pipe Range (In.) | Conductor Size Range | Figure Dimensions In. (mm) |             | Std. Pkg. Qty. |

## Grounding Clamp for Water Pipe with Copper Strap, Bronze

### Type KLS

- Used to ground copper code conductor to rigid conduit systems
- Cast from high strength, electrolytic bronze to provide reliable grounding connections
- Plated steel screws provide high strength and inhibit corrosion
- Pure copper contact strip included to isolate conduit system from water pipe vibrations

- High strength bronze conduit hub also included to provide durable connection of conduit to copper strap
- Accommodates a wide range of pipe, tube, and conductor sizes – minimizes inventory requirements
- UL Listed for grounding and bonding and suitable for direct burial in earth or concrete

| Part Number | Conduit Hub Size | Water Pipe Range (In.) | Conductor Size Range | Figure Dimensions In. (mm) |                |                 | Std. Pkg. Qty. |

## Grounding Clamp for Conduit, Bronze

### Type KH

- Used to ground copper code conductor to rigid conduit systems
- Cast from high strength, electrolytic bronze to provide reliable grounding connections
- Plated steel screws provide high strength and inhibit corrosion
- Includes high strength bronze conduit hub to ensure a durable connection of conduit to copper strap

- Accommodates a wide range of pipe, tube, and conductor sizes – minimizes inventory requirements
- UL Listed for grounding and bonding and suitable for direct burial in earth or concrete

| Part Number | Conduit Hub Size | Water Pipe Range (In.) | Conductor Size Range | Figure Dimensions In. (mm) |                |                |              | Std. Pkg. Qty. |

## UL LISTED Grounding Clamp for Water Pipes, Aluminum

### Type GC

- Dual-rated for grounding aluminum or copper code conductors to copper water pipe, galvanized pipe, or steel conduit
- Made from high strength, extruded aluminum alloy to provide long term durability
- Tin-plated to inhibit corrosion and oxidation and for low contact resistance
- Plated steel screws provide high strength and inhibit corrosion
- Accommodates a wide range of pipe, tube, and conductor sizes – minimizes inventory requirements
- UL Listed for grounding and bonding

| Part Number     | Conduit Pipe or Water Tube Size | Conductor Size Range | Figure Dimensions In. (mm) |             | Std. Pkg. Qty. |
|-----------------|---------------------------------|----------------------|----------------------------|-------------|----------------|
|                 |                                 |                      | L                          | W           |                |

## UL LISTED CSA CERTIFIED Grounding Rod Clamp, Bronze

### Type WB

- Used for grounding copper conductor parallel to ground rods
- Made from high strength, seamless electrolytic bronze to provide long term durability
- High strength silicon bronze hardware provides long term reliable assembly
- Accommodates a wide range of rod and conductor sizes – minimizes inventory requirements
- UL Listed and CSA Certified for grounding and bonding and suitable for direct burial in earth and concrete

| Part Number   | Ground Rod Size | Conductor Size Range         | Figure Dimensions In. (mm) |             |             | Hex Size In. | Std. Pkg. Qty. |

## Grounding Clamp with Spacer for Flat Surfaces, Bronze

### Type GM

- Used to ground copper code conductor to flat surfaces
- Cast from high strength, electrolytic bronze to provide reliable grounding connections
- High strength silicon bronze hardware for long term reliable assembly
- Accommodates a wide range of conductor sizes – minimizes inventory requirements
- Incorporates spacer plate to separate conductor from mounting surface
- UL Listed for grounding and bonding and suitable for direct burial in earth or concrete

| Part Number | Conductor Size Range | Figure Dimensions<br>In. (mm) |                |                | Hex Size<br>(In.) |      | Std. Pkg. Qty. |

## Flat Braided Bonding Straps

### Type BS

- Used to electrically bond enclosure doors, motors, and machine frames in the construction of control panels or machine structures
- Flat ferrule end design helps to reduce the effects of EMI (Electromagnetic Interference)
- Available with internationally recognized green and yellow insulation for grounding application
- Made of high conductivity copper and tin-plated to inhibit corrosion
- Seamless ferrule ends provide mechanical strength for improved reliability
- UL 467 Listed and CSA Certified

## COMPRESSION CONNECTOR CRIMPING TOOLS

Panduit offers a wide range of tools to provide solutions for installing compression lugs and splices. Panduit installation tools provide quality performance, ease of installation, and lowest installed cost. The long-term reliability of Panduit installation tools provides the highest level of service to meet and surpass customer requirements.

- Ergonomic design to minimize operator effort
- Controlled cycle mechanisms ensuring reliability and repeatability in every crimp made
- Crimping dies are color coded to easily match the compression connector to the proper die
- UL Listed and CSA Certified terminations with Panduit compression connectors, as noted

Panduit compression connector crimping tools are available in an assortment of styles including manually operated mechanical and hydraulic, battery operated hydraulic, and AC powered hydraulic to meet a variety of installation needs. Uni-Die™ Dieless Crimping Tools crimp a variety of sizes and eliminate the need to purchase crimping dies. Fully self-contained, lithium-ion battery powered crimping tools provide the ease of push button crimping with up to 35% more crimps per battery charge and up to a 30% faster crimp cycle time than comparable tools with NiCd or NiMH batteries.

## Crimping Guidelines for Panduit® Pan-Lug™ Compression Lugs and Splices

### 1. Select the proper Panduit compression connector for the conductor type and size being used.

- Panduit compression connectors are identified with the proper conductor size and conductor type marked on the tongue or barrel of the connector

• The proper conductor size and type to be used with each connector can also be found in the installation instructions included with Panduit product packaging and in the tool charts\* in this catalog

| PANDUIT PART NUMBER | STUD WIRE SIZE | WIRE RANGE-TANGING WITH OUR DRY TOOLS (SEE NOTE) | WIRE STRIP LENGTH (IN.) | CR-TOOL      |
|---------------------|----------------|--|-------------------------|--------------|
| LOG SPALICE         | 6 AWG          | ---  | 5/8                     | RED P24 (3)  |
| LCB, LCC SCLB       | 6 AWG          | ---  | 1-1/16                  | ---          |
| LCB, LCC SCLB       | 6 AWG          | ---  | 1-1/4                   | BLUE P24 (3) |
| LCB, LCC SCLB       | 6 AWG          | ---  | 1-1/2                   | ---          |
| LCB, LCC SCLB       | 6 AWG          | ---  | 1-5/8                   | ---          |
| LCB, LCC SCLB       | 6 AWG          | ---  | 1-3/4                   | ---          |
| LCB, LCC SCLB       | 6 AWG          | ---  | 1-7/8                   | ---          |
| LCB, LCC SCLB       | 6 AWG          | ---  | 1-5/4                   | ---          |
| LCB, LCC SCLB       | 6 AWG          | ---  | 1-3/2                   | ---          |
| LCB, LCC SCLB       | 6 AWG          | ---  | 1-1/2                   | ---          |
| LCB, LCC SCLB       | 6 AWG          | ---  | 1-1/4                   | ---          |
| LCB, LCC SCLB       | 6 AWG          | ---  | 1-1/8                   | ---          |
| LCB, LCC SCLB       | 6 AWG          | ---  | 1-1/16                  | ---          |

### 2. Strip the conductor to the proper strip length. As specified:

- On the Panduit product packaging label or
- On the installation instructions included with Panduit product packaging or
- In the tool charts\* in this catalog

Make sure the conductor is not stripped too long, which would result in exposed wire between the barrel of the connector and the cable insulation.

Make sure the conductor is not stripped too short, which would result in a less than complete contact area with the connector when the conductor is inserted in the barrel.

Do not nick or cut strands of conductor during crimping, which would result in a less than premium conductor termination.

Make sure conductor strands are free from corrosion.

### 3. Select the proper crimping die and crimping tool to be used with the connector.

Use crimping tools and dies that provide a UL Listed and/or CSA Certified electrical termination, to assure a safe and reliable connection.

Many Panduit compression connectors are UL Listed and CSA Certified when crimped with Panduit and specified competitor crimping tools and dies. These tools and dies are listed in the tool charts\* in this catalog. Panduit crimping tools and dies to be used with each connector are also listed on the installation instructions included with Panduit product packaging.

Panduit compression connectors are color-coded and marked with Panduit and specified competitor die index numbers. Select the proper crimping die to be used by matching the color code and die index number marked on the connector to the same markings on the crimping die.

### 4. Crimp the connector.

Insert the conductor into the barrel of the connector. The conductor should stop against the end of the barrel of the lug, or wire stop in the butt splice, upon complete insertion of the conductor in the barrel. Some lugs are offered with inspection windows that provide visual inspection of the complete conductor insertion.

Review the installation instructions included with the Panduit product packaging or the tool charts\* for the proper number of crimps to be placed in the connector. Make the first crimp in the barrel nearest the tongue of the lug, or wire stop in a butt splice, and make successive crimps in the barrel working towards the conductor entry at the end of the barrel.

| MIN. PLS (3) | LC  | FIN. PLS (3)   |
|--------------|-----|----------------|
| CD-200-2/0   | STD | CD-2001-2/0    |
| ACK P45 (3)  | (2) | BLACK P45 (3)  |
| CD-200-3/0   | STD | CD-2001-3/0    |
| ANGE P50 (3) | (2) | ORANGE P50 (3) |
| CD-200-4/0   | STD | CD-2001-4/0    |
| RPLE P54 (3) | (2) | PURPLE P54 (3) |
| CD-200-250   | STD | CD-2001-250    |
| LOW P62 (3)  | (3) | YELLOW P62 (3) |
| CD-200-300   | STD | CD-2001-300    |
| HTE P66 (3)  | (3) | WHITE P66 (3)  |
| CD-200-350   | STD | CD-2001-350    |
| RED P71 (3)  | (3) | RED P71 (3)    |
| CD-200-400   | STD | CD-2001-400    |

Identify the barrel. Use the color-coded or knurled band markings on the barrel of the connector to evenly space the placement of the crimps in the barrel.

When properly crimped, the die index number engraved in the crimping die will be embossed into the barrel of the connector. The crimp should be placed in the connector so the die index number can be easily read when the connector is installed.

\* See tool charts on pages D3.56 – D3.94.

## Crimping Guidelines for Panduit® StructuredGround™ Compression Connectors

### TAP Installation

1. Locate desired position of TAP along main wire run. Allow clearance for tap wires (and cover installation if applicable). See clear cover table on page D3.13.
2. Strip insulation from wires to the length shown in the TAP table on page D3.14. Use care to avoid damaging the conductors.
3. Position wires in the appropriate tap grooves.
4. For easier installation, apply one of the flame retardant cable ties (provided) around the wires and through the slots in the TAP. **The head of the cable tie must be positioned along the side of the TAP as shown in Figure A.** Tension and cut off excess length of tie. Additional cable ties may be used adjacent to the TAP to secure the wires.
5. Install the correct dies (see page D3.94) into the crimping tool. Position the locator die into the stationary die holder. **Note: The color code and die index number shown on the HTAP and crimping dies must match.**
6. Position the TAP against the locator in the stationary die holder of the crimping tool.
7. After crimping, if desired, cut off the cable tie head or remove the entire cable tie. **Note: In some cases, the cable tie head must be cut off in order for the crimped connector to fit inside the insulating cover.**

### HTAP Cover Installation

1. If labels are being utilized, cut labels to the dimensions shown below. **Note: When using a Panduit® Pan-Ther™ LS8E printer, the length dimensions can be easily programmed to provide cut-off marks.**
2. Position the label(s) in the pockets inside the cover and snap in the label retainer(s) as shown in Figure B. Information can be marked on the matte finish label retainers in lieu of using a separate label.
3. Position one cover half around the crimped connector assembly. Align the second cover half with the first and snap together.
4. Install the two flame retardant cable ties (provided) in the grooved areas on the cover. Tension and cut off excess lengths of ties.

Label Size Information

| Clear Cover Part Number | Label Height (Max.) | Label Length (Wrap-Around Style) | Label Length (Flat Style) |
|-------------------------|---------------------|----------------------------------|---------------------------|
| CLRCVR1-1               | .38                 | 1.56                             | 1.00                      |
| CLRCVR2-1               | .38                 | 1.87                             | 1.25                      |
| CLRCVR3-1               | .38                 | 2.37                             | 1.75                      |

See tool charts on pages D3.56 – D3.94 for selection of crimping dies and number of crimps used with specific tool and connector combinations.

## Die Type, Manual, Crimping Tool

- High quality, durable tool construction provides long term dependability

- Develops 6 tons of crimping force, crimps copper compression lugs and splices up to 500 kcmil
- Provides UL Listed and CSA Certified connections on Panduit copper and aluminum lugs, splices, and insulated terminals

| Part Number | Part Description  | Std. Pkg. Qty. |
|-------------|---|----------------|
| CT-720      | Manual crimping tool for UL Listed or Recognized and CSA Certified terminations of Panduit® Pan-Lug™ copper compression lugs and splices for #8 AWG – 500 kcmil copper code conductor and aluminum compression lugs and splices for #6 AWG – 350 kcmil copper and aluminum code conductors. Provides UL Listed terminations of Panduit® Pan-Term® #8 – #2 AWG vinyl insulated terminals.<br><br>Color-coded CD-720 crimping dies, carrying/storage case and controlled cycle mechanism must be purchased separately.<br><br>Specifications:<br>Output: 6 tons<br>Weight: 7.7 lbs.<br>Length: 26"<br>Handle span: 58" (open), 2.5" (closed)<br>Warranty: 90 days | 1              |
| CC-720      | Optional controlled cycle mechanism only. Total weight of tool with CC-720 is 8.25 lbs.   | 1              |
| C-720       | Black steel carrying case for CT-720 crimping tool.   | 1              |

For battery powered crimping tools, see compression connector tools selection guide on pages D3.34 – D3.36.

## CD-720 Crimping Dies

- Color-coded for easy matching to color-coding marked on connectors
- Embosses die index number on connector barrels to provide post crimp inspection except CD-720PV8-2

- Part number permanently marked on crimping die for easy identification
- Provides 5-sided crimp results in terminations with premium electrical and mechanical performance

| Part Number | Used to Install Panduit Compression Lug and Splice Sizes |  |                         |  | Std. Pkg. Qty. |
|-------------|--|--|-------------------------|--|----------------|
|             | Copper Conductor Size                                    | Copper Die Color and Die No.               | Aluminum Conductor Size | Aluminum Die Color and Die No.         |                |
| CD-720-1    | #8 – #2 AWG  | Red P21, Blue P24, Gray P29, Brown P33     | #6 AWG                  | Gray P29                               | 1              |
| CD-720-2    | #1 – 3/0 AWG   | Green P37, Pink P42, Black P45, Orange P50 | #4 – 1/0 AWG            | Green P37, Pink P42, Gold P45, Tan P50 | 1              |
| CD-720-3    | 4/0 AWG – 250 kcmil                                      | Purple P54, Yellow P62                     | 2/0 – 3/0 AWG           | Olive P54, Ruby P62                    | 1              |
| CD-720-4    | 300 kcmil  | White P66                                  | 4/0 AWG                 | White P66                              | 1              |
| CD-720-5    | 350 kcmil  | Red P71                                    | 250 kcmil               | Red P71                                | 1              |
| CD-720-6    | 400 kcmil  | Blue P76                                   | 300 kcmil               | Blue P76                               | 1              |

## Cable Stripping Tool for Large Cable Sizes

D2. Power Connectors

- Provides safe and easy stripping of cable insulation for cables 3/16" to 1 9/16" diameter
- Cutting blade provides circular, spiral, and in-line insulation cutting
- Spiral cut mode, tough/hard insulations peel off easily
- In-line cut mode for use with softer insulation like neoprene
- Unique blade profile for long life, low friction stripping of difficult insulations like rubber and silicon

- Cutting blade easily adjusts to proper height to cut insulation without nicking conductor strands
- Ergonomic shape for safe comfortable use
- Compact design
- Easy-fit replacement blade, one spare blade included with tool

D3. Grounding Connectors

| Part Number        | Wire Range (O.D.) | Part Description   | Std. Pkg. Qty. |
|--------------------|-------------------|--|----------------|
| <b>CST114-157</b>  | 0.18" – 1.57"     | Cable stripping tool for stripping insulation from cables 3/16" to 1 9/16" diameter. Includes replacement cutting blade. Warranty: 90 days | 1              |
| <b>CST114-157B</b> | —                 | Blade replacement kit for CST114-157 cable stripping tool.   | 1              |

E1. Labeling Systems

E2. Labels

## Wire and Cable Stripping Tools

E3. Pre-Printed & Write-On Markers

- Strips and cuts #20 – #10 AWG wire
- Lightweight and durable for comfortable long use

- Rust resistant coating included to improve durability of tool

E4. Permanent Identification

**CST101**

E5. Lockout/Tagout & Safety Solutions

**CST115**

| Part Number   | Wire Range (O.D.) | Part Description          | Std. Pkg. Qty. |
|---------------|-------------------|---------------------------|----------------|
| <b>CST101</b> | #20 – #10 AWG     | V notch wire stripper.    | 1              |
| <b>CST115</b> | #20 – #10 AWG     | Plier nose wire stripper. | 1              |

## Cable Cutting Tools

- Designed with optimal force transmission ratio and stepwise cutting to allow for one-hand operation
- Ergonomically formed, soft handle grips provide easy operation without fatigue

- All parts made of high-tempered special steel; blades and stressed parts are specially tempered or hardened for long term durability
- Not for use with steel and ASCR cable

CCT-500

CCT-320

| Part Number | Part Description   | Std. Pkg. Qty. |
|-------------|--|----------------|
| CCT-500     | Ratchet cable cutting tool cuts both copper and aluminum solid code and stranded flex cables (AL & CU cable to 1000MCM) up to 2 - 1/32" (52mm) diameter. Approximate dimensions 14" (356mm) x 5-1/2" (140mm) x 1" (25.4mm). Tool weight 29.6 oz. (840 g). Warranty: 1 year.  | 1              |
| CCT-320     | Ratchet cable cutting tool cuts both copper and aluminum solid code cables (AL cable to 600MCM and CU cable to 500MCM) from 1/4" (6mm) to 1" (25mm) and stranded flex cables from 1/4" (6mm) to 1-1/4" (32mm) diameter. Approximate dimensions 10" (254mm) x 3-3/4" (95mm) x 1" (25.4mm). Tool weight 21 oz. (600 g) Warranty: 1 year. | 1              |

## Die Type, Manual Hydraulic, 14 Ton, Crimping Tool

- Develops 14 tons of crimping force, crimps copper compression lugs and splices up to 750 kcmil
- Two-stage rapid advance hydraulic system minimizes number of pumps required to complete a crimp, saves time
- High quality, durable tool construction provides long-term dependability
- Cushioned grip prevents hands from slipping on tool, reduces fatigue
- Provides UL Listed and CSA Certified connections on Panduit® Pan-Lug™ Copper and Aluminum Lugs and Splices and Copper Taps

- Open "C-Head" design allows easy loading of crimping dies and connectors, saves time
- Uses color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools
- Rubber boot on crimp head provides abrasion protection
- Audible "pop-off" valve indicates crimp completion
- Crimp head rotates 180 degrees, provides versatility for use in restricted spaces

## **NEW!** Die Type, Lithium-Ion Powered Hydraulic, 6 Ton, In-Line Crimping Tool

- Lithium-ion battery powered, provides fingertip operation and up to 90% more crimps per battery charge than tools powered with NiCd or NiMH batteries
- Batteries incorporate LED fuel gage so battery charge level can be checked to allow for continuous operation
- In-line tool design with low profile, 180° rotating, enclosed crimp head design for reaching into tight spaces
- Approximately 2.9 second crimp cycle time provides quick terminations, 26% faster than tools with NiCd or NiMH batteries
- Lightweight and ergonomically balanced for easy operation without fatigue, weighs 7.15 lbs. with battery
- Battery charger charges expended batteries completely in 30-60 minutes
- Self-contained unit, completely portable
- Compatible with CD-2001 and CDM-2001 color-coded crimping dies to provide easy matching of crimping die to connector
- Develops 6 tons of crimping force, up to 389 crimps per battery charge using Panduit 500 kcmil copper lugs and splices
- Embosses die index number on connector barrels to provide post crimp inspection
- Provides UL Listed and CSA Certified connections on Panduit copper lugs, splices and taps
- Dies installed using spring loaded die retention pins, no need for tools
- Audible “pop-off” valve indicates crimp completion
- Tool provided with two, Milwaukee® M18™ XC high capacity lithium-ion 18VDC rechargeable batteries, battery charger, wrist strap and tool bag

CT-3001 and CT-3001/E

| PTB-HO      | —               | Streamlined holster for CT-3001 Series tools. Can be secured to installer's tool belt or ladder/fixture with quick connect hooks provided.   | 1              |

Compatible with CD-2001 and CDM-2001 crimping dies, sold separately, see page D3.42.  
 \*Tool bag also sold separately, see part number PTB-GP on page D3.55.

## Die Type, Lithium-Ion Powered Hydraulic, 6 Ton, Crimping Tool with Open “C-Head”

- Lithium-Ion battery powered, provides fingertip operation and up to 120% more crimps per battery charge than tools powered with NiCd or NiMH batteries
- Pistol grip tool design with low profile, open “C-Head” provides easy loading of crimping dies and rotates 180°, for reaching into tight spaces
- Lightweight and ergonomically balanced for easy operation without fatigue, weighs 11.75 lbs. with battery
- Self-contained unit, completely portable
- Develops 6 tons of crimping force, crimps copper compression lugs and splices up to 500 kcmil, up to 260 crimps per battery charge using Panduit 500 kcmil copper lugs and splices
- Provides UL Listed and CSA Certified connections on Panduit copper lugs, splices, and taps
- Audible “pop-off” valve indicates crimp completion
- Tool provided with two, Milwaukee® M18™ XC high capacity lithium-ion 18VDC rechargeable batteries, battery charger, shoulder strap, and tool bag
- Batteries incorporate LED fuel gage so battery charge level can be checked to allow for continuous operation
- Approximately 3.1 second crimp cycle time provides quick terminations, 18% faster than tools using NiCd or NiMH batteries
- Battery charger charges expended batteries completely in 30-60 minutes
- Compatible with CD-2001 and CDM-2001 color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools

## CD-2001 Crimping Dies

- Color-coded to provide easy matching to color-coding marked on connectors
- Embosses die index number on connector barrels to provide post crimp inspection
- Part number permanently marked on crimping die for easy identification
- Provide circumferential crimp results in terminations with premium electrical and mechanical performance

## Die Type, Lithium-Ion Powered Hydraulic, 14 Ton, Crimping Tool

- Lithium-Ion battery powered, provides fingertip operation and up to 63% more crimps per battery charge than tools powered with NiCd or NiMH batteries
- Pistol grip tool design with open "C-Head" provides easy loading of crimping dies and rotates 180°, for reaching into tight spaces
- Ergonomically balanced for easy operation without fatigue, weighs 17.9 lbs. with battery
- Self-contained unit, completely portable
- Develops 14 tons of crimping force, crimps copper compression lugs and splices up to 750 kcmil, up to 78 crimps per battery charge using Panduit 500 kcmil copper lugs and splices
- Provides UL Listed and CSA Certified connections on Panduit copper and aluminum lugs and splices and copper taps
- Audible "pop-off" valve indicates crimp completion or Ram automatically retracts when crimp cycle is complete
- Tool provided with two, Milwaukee® M18™ XC high capacity lithium-ion 18VDC rechargeable batteries, battery charger, shoulder strap, and tool bag
- Batteries incorporate LED fuel gage so battery charge level can be checked to allow for continuous operation
- Approximately 9.6 second crimp cycle time provides quick terminations, 30% faster than tools using NiCd or NiMH batteries
- Battery charger charges expended batteries completely in 30-60 minutes
- Compatible with CD-920, CDM-920, and CD-930 color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools

## NEW! Die Type, Lithium-Ion Powered Hydraulic, 15 Ton, Crimping Tool

- Lithium-ion battery powered, provides fingertip operation and up to 43% more crimps per battery charge than tools powered with NiCd or NiMH batteries
- Flip-top crimp head allows easy loading of crimping dies and connectors and rotates 180°
- Ergonomically balanced for easy operation without fatigue, weighs 24.4 lbs. with battery
- Self-contained unit, completely portable
- Develops 15 tons of crimping force, crimps copper compression lugs, splices and taps up to 1000 kcmil, up to 63 crimps per battery charge when crimping Panduit 500 kcmil copper lugs
- Provides UL Listed and CSA Certified connections on Panduit copper and aluminum lugs and splices and copper taps
- Audible “pop-off” valve indicates crimp completion
- Tool provided with two, Milwaukee® M18™ XC high capacity lithium-ion 18VDC rechargeable batteries, battery charger, and shoulder strap
- Batteries incorporate LED fuel gage so battery charge level can be checked to allow for continuous operation
- Approximately 8.8 second crimp cycle time provides quick terminations, 27% faster than tools using NiCd or NiMH batteries
- Battery charger charges expended batteries completely in 30-60 minutes
- Compatible with CD-940, CD-920, CDM-920, and CD-930 color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools

CT-2940/L and CT-2940/LE

| Part Number | Charger Voltage | Part Description  | Std. Pkg. Qty. |
|-------------|-----------------|---|----------------|
| CT-2940/L   | 120 VAC         | Terminates Panduit Compression Connectors: <ul style="list-style-type: none"> <li>• Copper compression lugs and splices for #8 AWG – 1000 kcmil code conductor</li> <li>• Copper compression lugs for #8 AWG – 777.7 kcmil flex conductor</li> <li>• Copper compression S Series, Pan-Term™ Tubular Terminals for #8 – 250 kcmil code conductor</li> <li>• Copper compression lugs and splices for 10mm<sup>2</sup> – 630mm<sup>2</sup> class 2R conductor</li> <li>• StructuredGround™ Direct Burial Compression Grounding System connectors #6 AWG – 500 kcmil code conductor</li> <li>• Copper compression CTAPF taps for #10 – 3/0 AWG code conductor</li> <li>• Copper compression CTAP taps for #8 – 4/0 AWG code conductor</li> <li>• Copper compression HTCT taps for #14 AWG – 250 kcmil code conductor, #14 – 4/0 AWG flex conductor</li> <li>• Aluminum compression lugs and splices for #6 AWG – 1000 kcmil code conductor</li> </ul> | 1              |

Compatible with CD-940 crimping dies, sold separately, see page D3.51.

Also works with CD-920, CDM-920, and CD-930 crimping dies, on page D3.50 with CD-940-DA die adapter, sold separately, see page D3.51.

## Die Type, Remote Hydraulic, 14 Ton, Crimp Head

- Develops 14 tons of crimping force when used with 10,000 psi hydraulic pump and hose, crimps copper compression lugs and splices up to 750 kcmil
- Incorporates Parker type quick-connect fittings to ease installation and save time
- High quality, durable tool construction provides long-term dependability
- Provides UL Listed and CSA Certified connections on Panduit® Pan-Lug™ Copper and Aluminum Lugs and Splices and Copper Taps
- Open “C-Head” design allows easy loading of crimping dies and connectors, saves time
- Uses color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels for post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools
- Cast in handle allows crimp head to be mounted in a bench vice

Uses CD-920 and CD-930 color-coded crimping dies with CD-940-DA die adapter. Uses color-coded CD-940 crimping dies. Crimping dies and die adapter must be purchased separately, see pages D3.50 and D3.51. CG-940 crimp force measurement gauge available, sold separately, see page D3.55.

\*CT-901RCH remote control handle available, offering one hand operation of crimp head with Panduit CT-901HP hydraulic pump and CT-900HPH hose, sold separately, see page D3.47.

## Hydraulic Pump and Accessories, Electric, 10,000 PSI

- Develops 10,000 psi of hydraulic pressure
- Easy to operate using manual switch or remote pendant supplied; or optional CT-901RFS foot switch or CT-901RCH remote controlled handle
- Factory set relief valve, pump stops when crimp is complete
- Convenient 120 VAC operation
- Incorporates Parker type quick-connect fittings to ease installation and save time
- Versatile, can be used with Panduit CT-930CH, CT-940CH, or CT-980CH crimp heads

A. System Overview

## Die Type, Remote Hydraulic, 10.5 Ton, Crimp Head

B1. Cable Ties

- Low pressure system extends life of crimp head for high volume crimping applications

- Open “C-Head” design allows easy loading of crimping dies and connectors, saves time

B2. Cable Accessories

- Develops 10.5 tons of crimping force when used with 7,500 psi hydraulic pump and hose, crimps copper compression lugs and splices up to 250 kcmil
- Incorporates Parker type quick-connect fittings to ease installation and save time

- Uses color-coded crimping dies to provide easy matching of crimping die to connector

B3. Stainless Steel Ties

- High quality, durable tool construction and low pressure hydraulic requirements provide long-term dependability and tool life
- Provides UL Listed and CSA Certified connections on Panduit® Pan-Lug™ Copper Lugs and Splices

- Embosses die index number on connector barrels for post crimp inspection

- Dies installed using spring loaded die retention pins, no need for tools

- Cast in handle allows crimp head to be mounted in a bench vice

System  
Overview

## Uni-Die™ Dieless, Manual Hydraulic, 6.2 Ton, Crimping Tool

B1.  
Cable Ties

- Dieless crimping tool design eliminates purchase or lost crimping dies, saves cost

- Provides UL Listed and CSA Certified connections on Panduit® Pan-Lug™ Copper Lugs and Splices

B2.  
Cable  
Accessories

- Develops 6.2 tons of crimping force with four point indenter system, crimps copper compression lugs and splices up to 750 kcmil

- Provides UL Listed and CSA Certified wire range-taking capability on Panduit® Pan-Lug™ Copper Lugs and Splices, minimizes connector inventory and saves cost

B3.  
Stainless  
Steel Ties

- Two-stage rapid advance hydraulic system minimizes number of pumps required to complete a crimp

- Flip-top crimp head design allows easy loading of connectors, saves time

- High quality, durable tool construction provides long-term dependability

- Audible “pop-off” valve indicates crimp completion

- Cushioned grips prevent hands from slipping on tool, reduces fatigue

- Crimp head rotates 360 degrees, provides versatility for use in restricted spaces

C1.  
Wiring  
Duct

- Incorporates aluminum crimp head and fiberglass handles, results in lightweight tool and ease of operation

| CT-980      | <p>Manual hydraulic Uni-Die™ Dieless Crimping Tool provides UL Listed or Recognized and CSA Certified terminations of Panduit® Pan-Lug™ Copper Compression Lugs and Splices for #4 AWG – 750 kcmil copper code conductor.</p> <p>Specifications:<br/>                     Output: 6.2 tons<br/>                     Jaw opening: 1.46"<br/>                     Weight: 10.5 lbs.<br/>                     Length: 13"<br/>                     Height: 12"<br/>                     Width: 3"<br/>                     Handle span: 15" (open), 5.75" (closed)<br/>                     Warranty: 5 years</p> <p>CT-980 includes:<br/>                     • Tool<br/>                     • Plastic tool case</p> | 1              |

CG-980 pressure gauge for measuring tool output force available, sold separately, see page D3.55.

## Uni-Die™ Dieless, Lithium-Ion Powered Hydraulic, 6.2 Ton, Crimping Tool

- Lithium-Ion battery powered, provides fingertip operation and up to 135% more crimps per battery charge than tools powered with NiCd or NiMH batteries
- Dieless crimping tool design eliminates the cost of crimping dies
- Provides wire range-taking capability with Panduit copper compression connectors, allows use of a minimum of lug sizes to crimp a wide range of wire sizes
- Aluminum alloy flip-top crimp head allows easy loading of connectors and rotates 360°
- Ergonomically balanced and lightweight for easy operation without fatigue, weighs 11.75 lbs. with battery
- Self-contained unit, completely portable
- Develops 6.2 tons of crimping force, crimps copper compression lugs and splices up to 750 kcmil, up to 183 crimps per battery charge when crimping Panduit 500 kcmil copper lugs

- Provides UL Listed and CSA Certified connections on Panduit copper lugs and splices
- Audible “pop-off” valve indicates crimp completion
- Tool provided with two, Milwaukee® M18™ XC high capacity lithium-ion 18VDC rechargeable batteries, battery charger, shoulder strap, and tool bag
- Batteries incorporate LED fuel gage so battery charge level can be checked to allow for continuous operation
- Approximately 3.5 second crimp cycle time provides quick terminations, 25% faster than tools using NiCd or NiMH batteries
- Battery charger charges expended batteries completely in 30-60 minutes

A. System Overview

## Uni-Die™ Dieless, Remote Hydraulic, 6.2 Ton, Crimp Head

B1. Cable Ties

• Dieless crimping tool design eliminates purchase or lost crimping dies, saves cost

• Provides UL Listed and CSA Certified connections on Panduit® Pan-Lug™ Copper Lugs and Splices

B2. Cable Accessories

• Develops 6.2 tons of crimping force when used with 10,000 psi hydraulic pump and hose, crimps copper compression lugs and splices up to 750 kcmil

• Provides UL Listed and CSA Certified wire range-taking capability on Panduit® Pan-Lug™ Copper Lugs and Splices, minimizes connector inventory and saves cost

B3. Stainless Steel Ties

• Incorporates Parker type quick-connect fittings to ease installation and save time

• Flip-top crimp head design allows easy loading of splices, saves time

PG-1SC in-line pressure gauge provides visual measurement of hydraulic output pressure, sold separately, see page D3.55.

\*For information on hydraulic pump and hose, see page D3.49.

## Pressure Gauges

- Provide easy visual reading of output force for hydraulic crimping tools
- Factory calibrated to provide accuracy and quality assurance control of crimping tools in the field

- Easy-to-read crimp force tolerance zone for applicable tools marked on gauge
- Blank dies for fixture supplied with test gauge for easy mounting and operation of gauge with crimping tool

①The CT-1700 and CT-1701 crimp die pockets are integrated into the tool frame.  
 ②CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.

③Maximum size: 500 kcmil lugs and 250 kcmil splices.  
 ④Maximum size: 250 kcmil lugs and splices. No extended wire range.

For use with  
Copper  
Conductors

ⓉHalf width dies.

ⓉRequires U die adapter.

ⓉMinimum size: #4 AWG lugs and splices.

②Half width dies.  
 ③CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.  
 ④CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.  
 ⑤Maximum size: 500 kcmil lugs and 250 kcmil splices.  
 ⑥Maximum size: 250 kcmil lugs and splices. No extended wire range.

For use with  
Copper  
Conductors

## Installation Tooling and Die Selections for: Types LCA, LCA, LCD, LCDN and SCS (continued)

①The CT-1700 and CT-1701 crimp die pockets are integrated into the tool frame.  
③CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.

⑤Maximum size: 500 kcmil lugs and 250 kcmil splices.  
⑥Maximum size: 250 kcmil lugs and splices. No extended wire range.

For use with  
Copper  
Conductors

①The CT-1700 crimp die pockets are integrated into the tool frame.

②Half width dies.

③CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.

④CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.

⑤Maximum size: 500 kcmil lugs and 250 kcmil splices.

⑥Maximum size: 250 kcmil lugs and splices. No extended wire range.

⑦Maximum size: 500 kcmil lugs and splices.

For use with  
Copper  
Conductors

|  | 500 kcmil      | 2-9/16                  |  |                         |   |  |  |               |               |

① The CT-1700 crimp die pockets are integrated into the tool frame.  
 ③ CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.  
 ④ Maximum size: 250 kcmil.

**For use with  
Copper  
Conductors**

①The CT-1700 crimp die pockets are integrated into the tool frame.  
 ②CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.  
 ③Does not include class K flex conductor with Burndy tools.  
 ④Does not include class M flex conductor with Thomas and Betts tools.  
 ⑤Does not include class K and M flex conductor with Thomas and Betts tools.  
 ⑥Does not include class K flex conductor with Thomas and Betts tools.

For use with  
Copper  
Conductors

①The CT-1700 crimp die pockets are integrated into the tool frame.  
 ②CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.  
 ③CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.  
 ⑦Does not include class M flex conductor with Thomas and Betts tools.

**For use with  
Copper  
Conductors**

① CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.

② CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.

③ Can only be crimped with CT-940CH and CT-2940 tools.

①The CT-1700 crimp die pockets are integrated into the tool frame.  
 ②CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.  
 ③CD-940 dies to be used with CT-940CH and CT-2940 tools.  
 ④Maximum conductor size: 500 kcmil class I and 750 kcmil class I, B, C, Compact.  
 ⑤Maximum conductor size: 250 kcmil class I and 400 kcmil class I, B, C, Compact.

For Burndy tooling, see pages D3.78 – D3.79  
 For Thomas and Betts tooling, see pages D3.80 – D3.81

①The CT-1700 crimp die pockets are integrated into the tool frame.

②CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA die adapter. Maximum size splice is 250 kcmil with CT-920, CT-920CH, and CT-2920 tools.

③CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.

For use with  
Copper or  
Aluminum  
Conductors

## Installation Tooling and Die Selections for: Types LAA, LAB, and SA (continued)

| <b>SAR500-350</b>   | 500 kcmil          | 350 kcmil                    | 4-1/4                               | —   | —   | CD-920-500A<br>Pink P99<br>(4)  |
| <b>SAR600-500</b>   | 600 kcmil          | 500 kcmil                    | 4                                   | —   | —   | CD-920-750, CD-940-750 <sup>③</sup><br>Black P106<br>(4)  |
| <b>SAR750-600</b>   | 750 kcmil          | 600 kcmil                    | 4-7/16                              | —   | —   | CD-940-750 <sup>③</sup><br>Red P125<br>(4)  |

②CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA die adapter. Maximum size splice is 250 kcmil with Panduit CT-920, CT-920CH and CT-2920 tools and Burndy Y35, Y35BH and BAT35 tools.

③CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.

For use with  
Copper or  
Aluminum  
Conductors

②CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA die adapter. Maximum size splice is 250 kcmil with CT-920, CT-920CH, and CT-2920 tools.

③CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.

For use with  
Copper or  
Aluminum  
Conductors

## LABELING SYSTEMS

Panduit is a global leader in reliable and innovative solutions for identification and safety. Products are engineered for a wide variety of industries and applications – including electrical, electronics, industrial and network. Panduit provides enhanced productivity, reliability, and value with leading-edge software development, materials and equipment by designing and manufacturing a full line of labeling products, software and printers to assist you with your labeling requirements.

- World-class quality – ISO 9001 and ISO 14001
- High performance and reliability
- Wide variety of system solutions to meet the most demanding requirements
- Meet and exceed the requirements of UL, CSA, ISO, NEC and OSHA
- Strong service and support network – distributor partners, knowledgeable sales people, expert technical support and world-class customer service

Panduit provides a complete range of industrial products and tools – including hand-held labeling systems, desktop labeling systems, pre-printed labels and safety systems. Use Panduit for all your identification needs for wire and cable, electrical and electronic devices, agency compliance, workplace safety and more.

## PRINTERS: THERMAL TRANSFER DESKTOP AND HAND-HELD

Panduit desktop thermal transfer printers enable fast, high quality label production for all your identification requirements. Use Panduit labeling software and desktop thermal transfer printers to produce on demand identification solutions quickly and economically. Panduit hand-held printers are designed for flexibility. Programmed with advanced functionality, Panduit printers make custom labeling easy.

### Hand-Held Printers

- Create labels at remote job sites
- Provide crisp, clear, high quality thermal transfer print
- Easily identify moves, adds, or changes

### Desktop Printers

- Compatible with Panduit® Easy-Mark™ Labeling Software
- Provide crisp, clear, high quality thermal transfer print
- Compatible with WINDOWS^ based PC operating systems

Panduit printers and our wide variety of labels provide solutions for all your project labeling needs.

^WINDOWS is a registered trademark of Microsoft Corporation in the United States and/or other countries.

## PanTher™ LS8E Hand-Held Thermal Transfer Printer and Accessories

- Cut-to-length functionality eliminates label waste and label trimming labor
- Partial cut feature available to provide tear-apart strips of labels
- P1™ Label Cassette contains an integrated memory device for automatic formatting, recall of last legend used, and number of labels remaining in the cassette
- Market specific labeling tools simplify label creation for electrical components, panel building, and construction and maintenance
- USB interface for importing data, system upgrades, and printing from a wireless laptop or desktop computer
- Prints self-laminating labels, heat shrink tubing, die-cut component labels and continuous tapes
- Fast loading label cassette includes both label material and ribbon to make changing labels easy
- Large graphic display with backlight for improved visibility

| <b>LS8-WS</b>        | Wrist strap.   | 1              |
| <b>LS8-CLN</b>       | LS8/LS8E cleaning kit – contains bottle of cleaning solution with MSDS, cleaning pen, swabs, alcohol wipes and cleaning instructions.  | 1              |

\*Cannot be used to charge batteries.

Other adapters available, replace S with A (Australia), C (China), E (Europe) and U (UK).

## Cougar™ LS9 Hand-Held Thermal Transfer Printer and Accessories

- Economical identification system provides premium quality solutions at the lowest installed cost
- Cut-to-length functionality eliminates label waste and label trimming labor
- Partial cut feature available to provide tear-apart strips of labels
- P1™ Label Cassette contains an integrated memory device for automatic formatting, recall of last legend used, and number of labels remaining in the cassette
- Prints continuous military grade heat shrink tubing
- Prints a wide variety of continuous tapes for marking of wire marking, component labeling, and safety/facility identification
- Fast loading label cassette includes both label material and ribbon to make changing labels easy

LS9Q

| Part Number     | Part Description  | Std. Pkg. Qty. |

Order number of cassettes required.

Other colors available, replace A with B (Blue), D (Green), H (Red) and I (Yellow).

## P1™ Non-Laminated Label Cassettes

- P1™ Label Cassette contains an integrated memory device for automatic formatting, recall of last legend used, and number of labels remaining in the cassette

- Fast loading label cassette includes both label material and ribbon to make changing labels easy
- Non-laminated adhesive labels for wire/cable identification

## Part Number System for Wire/Cable Labeling

### Material/Print Method Selection Chart

| Material   | Print Method | Temperature Range                  | Features   |
|--|--------------|------------------------------------|--|

## P1™ Turn-Tell™ Label Cassettes for PanTher™ LS8E Hand-Held Thermal Transfer Printer

C3. Abrasion Protection

- Fast loading P1™ Label Cassette includes both label material and ribbon to make changing labels easy
- Innovative label design allows labels to rotate for visibility from any angle, and for repositioning on the wire/cable to align legends and improve aesthetics

- Labels can be easily installed on existing terminated wires and assemblies without disconnecting the wires/cables
- Temperature range: -40°F to 200°F (-40°C to 93°C)

C4. Cable Management

D1. Terminals

D2. Power Connectors

D3. Grounding Connectors

## P1™ Marker Plate Label Cassettes for PanTher™ LS8E Hand-Held Thermal Transfer Printer

- Fast loading P1™ Label Cassette includes both label material and ribbon to make changing labels easy
- Marker plates are designed for use on larger diameter wire/cables and may be applied after all terminations are complete

- Meets requirements for MIL-STD-202F, Notice 12 Method 215J
- Temperature range: -40°F to 176°F (-40°C to 80°C)

## P1™ Flag Label Cassettes for PanTher™ LS8E Hand-Held Thermal Transfer Printer

- Fast loading P1™ Label Cassette includes both label material and ribbon to make changing labels easy
- Provides larger labeling area for small cables

- Innovative design allows flag labels to be applied in either adhesive or non-adhesive orientations
- Temperature range: -40°F to 302°F (-40°C to 150°C)

### Part Number System for Wire/Cable Labeling

A. System Overview

## P1™ Military Grade Continuous Heat Shrink Label Cassettes for PanTher™ LS8E or Cougar™ LS9 Hand-Held Thermal Transfer Printers

B1. Cable Ties

- P1™ Label Cassette contains an integrated memory device for automatic formatting, recall of last legend used, and number of labels remaining in the cassette
- Fast loading label cassette includes both label material and ribbon to make changing labels easy

- Meets print performance requirements of MIL-M-81531 and MIL-STD-202F Method 215A, Solution A, C, and D
- Meets UL Standard 224 for flammability
- Shrink ratio 3:1
- Each cassette contains a continuous roll of non-adhesive flattened polyolefin that can be cut-to-length

## P1™ Military Grade Die-Cut Heat Shrink Label Cassettes for PanTher™ LS8E Hand-Held Thermal Transfer Printer

- P1™ Label Cassette contains an integrated memory device for automatic formatting, recall of last legend used, and number of labels remaining in the cassette
- Fast loading label cassette includes both label material and ribbon to make changing labels easy
- Meets print performance requirements of MIL-M-81531 and MIL-STD-202F Method 215A, Solution A, C, and D
- Meets UL Standard 224 for flammability
- Shrink ratio 3:1
- Each cassette contains a roll of die-cut non-adhesive flattened polyolefin

### Part Number System for Wire/Cable Labeling

### Material/Print Method Selection Chart

| Material                        | Print Method | Temperature Range               | Features  |
|---------------------------------|--------------|---------------------------------|---|
| Heat Shrinkable Polyolefin (H*) | P1™ Cassette | -67°F to 275°F (-55°C to 135°C) | Durable flattened polyolefin, high quality heat shrink wire/cable labels. |

- P1™ Label Cassette contains an integrated memory device for automatic formatting, recall of last legend used, and number of labels remaining in the cassette
- Fast loading label cassette includes both label material and ribbon to make changing labels easy
- Use for identifying flat surfaces such as components, control panels, circuit boards and general labeling
- Die-cut labels designed to provide maximum aesthetic quality and appearance
- Available in polyester and vinyl cloth materials

### Part Number System for Component Labeling

### Material/Print Method Selection Chart

| Material  | Print Method | Temperature Range                  | Features  |
|---|--------------|------------------------------------|---|
| Polyester, White (YJ)<br>Silver (YM)<br>SuperTack Polyester, White (YP) | P1™ Cassette | -40°F to 302°F<br>(-40°C to 150°C) | Indoor/outdoor rated; provides durability, high temperature resistance, and dimensional stability, does not stretch or easily tear. |
| Vinyl Cloth, White (CB)   |              | -50°F to 170°F<br>(10°C to 77°C)   | General purpose material, vinyl impregnated cloth resists oil and abrasion; material can be removed, repositioned, and reused.      |

## P1™ Continuous Tape Cassettes for PanTher™ LS8E and Cougar™ LS9 Hand-Held Thermal Transfer Printers

- P1™ Label Cassette contains an integrated memory device for automatic formatting, recall of last legend used, and number of labels remaining in the cassette
- Fast loading label cassette includes both label material and ribbon to make changing labels easy
- Print custom pipe markers, voltage markers, signs and bin marker labels on demand
- Available in a variety of colors, widths, and adhesive materials including continuous polyolefin, polyester, and vinyl
- For flat label applications only

### Part Number System for Continuous Tapes

### Material/Print Method Selection Chart

| Material  | Print Method | Temperature Range                  | Features  |
|---|--------------|------------------------------------|---|
| Polyolefin, White (FJ)  | P1™ Cassette | -40°F to 180°F<br>(-40°C to 82°C)  | Indoor/outdoor rated; thin conformable material for general identification; excellent print quality.  |
| Polyester, Clear (YK)   |              | -40°F to 257°F<br>(-40°C to 125°C) | Indoor/outdoor rated; laminated label material protects legend from abrasion and chemicals; resistant to UV light chemical atmosphere and abrasion; excellent life and adhesion properties. |
| Polymer Film,<br>White (RP)<br>Orange (RU)<br>Yellow (RX)   |              | -40°F to 180°F<br>(-40°C to 82°C)  | Indoor/outdoor rated; heavy duty reflective material for flat applications and safety and facility identification; resistant to UV light, chemical atmosphere and abrasion.                 |
| Vinyl,<br>White (VP)<br>Blue (VQ)<br>Green (VS)<br>Orange (VU)<br>Red (VV)<br>Yellow (VX)<br>Black (VY) |              | -58°F to 176°F<br>(-50°C to 80°C)  | Indoor/outdoor rated; conformable material for flat applications and safety and facility identification; can be overlaminated to increase durability.                                       |

| Part Number    | Part Description                                       | Height |      | Length |     | Std. Pkg. Qty. | Std. Ctn. Qty. |

## TDP43MY Thermal Transfer Desktop Printer and Accessories

- Compact, lightweight design enables use in office or remote locations
- 300 dpi thermal transfer printer creates crisp, clear legends with superior legibility
- Up to 2.00 inches per second print speed for fast label production
- Use to print a wide variety of self-laminating labels, component labels, non-laminated labels, heat shrink labels, marker plates and continuous tapes up to 4.00 inches wide
- Easy-Mark™ Labeling Software and hybrid ribbon included with printer

| Part Number | Description   | Std. Pkg. Qty. |
|-------------|---|----------------|
| TDP43MY     | 300 dpi printer; includes printer, Panduit® Easy-Mark™ Labeling Software, RMH4BL hybrid black ribbon, AC power adapter with US and Europlug power cords, manual and quick start card. | 1              |
| TDP43ME-RS  | External label roll stand – used to rear feed labels that are supplied on 3.00" cores.  | 1              |
| TDP43M-CASE | Hardside carrying case. Accommodates printer, AC power adapter, ribbons, printer cable, labels and tools.   | 1              |
| TDP43M-ACY  | Replacement AC power adapter with power cord (US cord only).  | 1              |
| PTR-CLN     | Printer cleaning kit – contains bottle of cleaning solution with MSDS, cleaning pen, swabs, alcohol wipes and cleaning instructions.  | 1              |

## Ribbons for Use with the TDP43MY Thermal Transfer Desktop Printer

- **Hybrid** – Recommended for use with self-laminating, heat shrink, component and non-laminated labels
- **Wax** – Recommended for use with self-laminating and non-laminated labels
- **Resin** – Recommended for use with component labels, marker plates, and continuous tape

## LABELING SOFTWARE

Panduit labeling software is custom designed to address your requirements for wire/cable labeling, component identification, network administration, as well as, safety and facility identification. From control panel wire identification, terminal block and facility pipe marking to patch panel, faceplate and wire/cable marking, Panduit software is the solution for your on-demand identification requirements.

- Easy-Mark™ Labeling Software is an easy-to-use, intuitive general purpose labeling software
- CAD-Connect™ Labeling Software generates labels quickly and easily directly from an electronic CAD file

Panduit user-friendly software packages meet the unique requirements of your applications.

## Easy-Mark™ Labeling Software

B1.  
Cable Ties

- Easy-Mark™ Labeling Software simplifies label creation for the specific needs of your applications

- Easy-Mark™ Labeling Software is part of a complete line of innovative identification solutions from Panduit

B2.  
Cable  
Accessories

- Instructions and user interface are available in English, French, German, Italian, Spanish, Korean, Japanese, Chinese and Portuguese

- Supports most WINDOWS^ fonts drivers for standard thermal transfer, dot matrix, laser and ink jet, including Panduit thermal transfer printers

B3.  
Stainless  
Steel Ties

- Intuitive interview process allows automatic generation of labels and signs
- Software selects and formats the optimum label for your specific application
- WYSIWYG (What You See Is What You Get) user interface, alpha/numeric serialization, data import, symbol import

### System Requirements:

- WINDOWS^ 2000, XP, Vista, or 7; 64MB hard drive space and 64MB RAM (256MB RAM recommended)

C1.  
Wiring  
Duct

## CAD-Connect™ Labeling Software

C4.  
Cable  
Management

- Generates labels quickly and easily directly from electronic CAD files

- Exports to alternative formats such as EXCEL^ (XLS) or Text (CSV) files for future use and documentation

D1.  
Terminals

- Eliminates steps and time spent manually copying CAD identifiers into labeling software

### System Requirements:

- WINDOWS^ 2000, XP, Vista, or 7; 64MB hard drive space and 64MB RAM (256MB RAM recommended)

D2.  
Power  
Connectors

- Program combines the power of an innovative wizard interview and Easy-Mark™ Labeling Software to capture and organize identifiers from electronic CAD files to automatically create and print labels
- Compatible with full versions of AutoCAD\* 2000i, 2002, 2004, 2006, 2007; AutoCAD Electrical 2005 and 2006; AutoCAD Architectural 2007 and 2008; AutoCAD Mechanical 2007 and 2008; and Visio^ 2002 and newer versions

## LABELS: LASER, INK JET, AND THERMAL TRANSFER

Panduit provides a full line of on demand printable labels designed to meet all of your identification needs.

- Laser/ink jet labels supplied on 8.50" x 11.00" sheets and can be printed in commercially available laser and ink jet printers not sold by Panduit
- Thermal transfer labels supplied on rolls offer crisp, clear legends with superior legibility and can be printed on Panduit thermal transfer desktop printers or commercially available models
- Size illustrations are provided for reference

Panduit labeling solutions meet customer needs at the lowest total installed cost.

A. System Overview

## Laser/Ink Jet Non-Laminated Labels

B1. Cable Ties

- Labels can be printed in both laser/ink jet printers
- Use as a wrap around label or flag style labels for wire/cable labeling

- Available in polyolefin material and supplied on 8.50" x 11.00" sheets
- Panduit labeling software packages include all label formats for quick and easy label production

## Laser/Ink Jet Component Labels

- Labels can be printed in both laser and ink jet printers
- Use for identifying patch panels, faceplates, punchdown blocks and other network systems hardware
- Die-cut labels designed to provide maximum aesthetic quality and appearance
- Available in adhesive polyolefin and non-adhesive polyester materials

## Part Number System for Component Labels

### Material/Print Method Selection Guide

| Material                             | Print Method      | Temperature Range                  | Features   |
|--------------------------------------|-------------------|------------------------------------|--|
| Polyester, White (YJ)<br>Yellow (YL) | Laser/Ink Jet (J) | -40°F to 311°F<br>(-40°C to 154°C) | Indoor/outdoor rated; provides durability, high temperature resistance, and dimensional stability. Does not stretch or easily tear |
| Polyolefin, White (FJ)               |                   | -40°F to 180°F<br>(-40°C to 82°C)  | Indoor/outdoor rated; thin conformable material for general identification; excellent print quality                                |

Order number of labels required in multiples of Std. Pkg. Qty.

## Thermal Transfer Self-Laminating Labels

- Self-laminating adhesive labels supplied on rolls, include a colored print-on area and clear overlamine
- Use with Panduit RMH4BL hybrid thermal transfer ribbon

### Material/Print Method Selection Guide

| Material                                   | Print Method         | Temperature Range                 | Features   |
|--|----------------------|-----------------------------------|--|
| Self-Laminating Vinyl, White Print-On (VA) | Thermal Transfer (T) | -40°F to 200°F<br>(-40°C to 93°C) | Indoor/outdoor rated; thin and conformable; preferred material for most general wire/cable labeling. |

## Part Number System for Self-Laminating Labels

| Part Number   | Part Description  | Width |      | Length |      | Print-On Area Height |      | Min. Cable O.D. |      | Max. Wire O.D. |      | Std. Pkg. Qty. | Std. Ctn. Qty. |
|---------------|---|-------|------|--------|------|----------------------|------|-----------------|------|----------------|------|----------------|----------------|

Order number of labels required in multiples of Std. Pkg. Qty.

Use with Panduit thermal transfer hybrid or wax ribbons.

\*Labels are roll mounted on 3.00" cores; when using the TDP43MY printer and 3.00" cores, the roll stand (TDP43ME-RS) is required.

## **NEW!** Turn-Tell™ Labels

A. System Overview

B1. Cable Ties

- Innovative label design allows labels to rotate for visibility from any angle, and for repositioning on the wire/cable to align legends and improve aesthetics

- Available in P1 Cassettes for the LS8E or LS8EQ printers and in computer printable rolls, for use with Easy-Mark™ Labeling Software and desktop thermal transfer printers

B2. Cable Accessories

- Labels can be easily installed on existing terminated wires and assemblies without disconnecting the wires/cables

- Temperature range: -40°F to 200°F (-40°C to 93°C)

B3. Stainless Steel Ties

C1. Wiring Duct

C2. Surface Raceway

## Thermal Transfer Marker Plates

E1. Labeling Systems

- Non-adhesive marker plates offer crisp, clear legends with superior legibility
- Attachable in a horizontal or vertical orientation
- Available in a variety of colors and sizes

- Use with Panduit RMR4BL resin thermal transfer ribbon

- Temperature range: -58°F to 221°F (-50°C to 105°C)

## Thermal Transfer Non-Laminated Labels

- Labels offer crisp, clear legends with superior legibility
- Use as a wrap-around label or flag style marker for wire/cable labeling
- Available in vinyl cloth material for long-term or temporary labeling and supplied on rolls
- Panduit labeling software packages include all label formats for quick and easy label production

## Part Number System for Non-Laminated Labels

## Material/Print Method Selection Guide

| Material                | Print Method         | Temperature Range            | Features  |
|-------------------------|----------------------|------------------------------|---|
| Vinyl Cloth, White (CB) | Thermal Transfer (T) | 50°F to 170°F (10°C to 77°C) | Indoor/outdoor rated; thin conformable material with repositionable adhesive allows label to be removed and reused or used in temporary applications; provides durability, high temperature resistance, and dimensional stability for rough or textured surfaces; resists oil and abrasion. |

A. System Overview

## Thermal Transfer Military Grade Heat Shrink Labels

- Labels offer crisp, clear legends with superior legibility
- Meets UL Standard 224 for flammability and AMS-DTL-23053/5C (Class 1 and Class 3)
- Will meet MIL-M-81531, MIL-STD202F, and MIL-STD-883E when printed with RMH4BL or RHH4BL-S ribbons
- Shrink ratio 3:1
- Pre-cut flattened polyolefin is both thermal transfer and dot matrix printable and supplied roll mounted on plastic carrier
- Panduit labeling software packages include all label formats for quick and easy label production

- Labels offer crisp, clear legends with superior legibility
- Meets UL Standard 224 for flammability and AMS-DTL-23053/5C (Class 1 and Class 3)
- Will meet MIL-M-81531, MIL-STD202F, and MIL-STD-883E when printed with RMH4BL or RHH4BL-S ribbons

- Shrink ratio 3:1
- Pre-cut flattened polyolefin is thermal transfer printable and supplied roll mounted on plastic carrier
- Panduit labeling software packages include all label formats for quick and easy label production

### Heat Shrink Tools and Accessories

- Adjustable air intake regulator provides variable temperature adjustment within the units rated heat range
- Toggle type control switch provides hot/cold/off operation
- Replaceable brushes are easy to service and extend the operating life of the gun
- Unique suspended quick change heating element design prolongs life and eases servicing

| Part Number  | Part Description   | Std. Pkg. Qty. | Std. Ctn. Qty. |
|--------------|--|----------------|----------------|
| HSG-115V-650 | Heat gun with temperature range of 650°F (344°C) to 900°F (482°C).   | 1              | —              |
| HSG-A1       | Shrink tube reflector for tubing up to 3/4" inside diameter. Directs heat around tubing to reduce shrink time.   | 1              | 10             |
| HSG-A2       | Shrink tube reflector for tubing up to 1 1/2" inside diameter. Directs heat around tubing to reduce shrink time. | 1              | 10             |
| HSG-A3       | Shrink tube concentrator. Directs heat toward tubing and away from heat sensitive items.                         | 1              | 10             |
| HSG-A4       | Black polyethylene case stores heat gun, stand, and all three accessories.                                       | 1              | —              |

### Material/Print Method Selection Guide

| Material   | Print Method         | Temperature Range                  | Features  |
|--|----------------------|------------------------------------|---|
| Polyester, White (YJ)                                | Thermal Transfer (T) | -40°F to 302°F<br>(-40°C to 150°C) | Indoor/outdoor rated; provides durability, high temperature resistance and dimensional stability; does not stretch or easily tear.  |
| Paper, White (PB)                                    |                      | -65°F to 160°F<br>(-54°C to 71°C)  | Indoor rated; general purpose material; excellent adhesion properties when applied to a clean dry surface.  |
| Polyimide, White (KB)                                |                      | -40°F to 350°F<br>(-40°C to 177°C) | Indoor rated; ideal for electronic components and internal circuitry applications; material is intended for applications requiring solvent and high temperature resistance performance, such as the wave solder process.  |
| Vinyl Cloth, White (CB)<br>Silver (YM)<br>Clear (YK) |                      | 50°F to 170°F<br>(10°C to 77°C)    | Indoor/outdoor rated; thin conformable material with repositionable adhesive allows label to be removed and reused or used in temporary applications; provides durability, high temperature resistance, and dimensional stability for rough or textured surfaces; resists oil and abrasion. |

| C125X025KCT | Tan, polyimide label.     | 1.25  | 31.8 | 0.25   | 6.4  | 10000          | 40000          |

Order number of labels required in multiples of Std. Pkg. Qty.  
Use with Panduit thermal transfer ribbons.

Labels roll mounted on 3.00" cores; when using the TDP43MY printer and 3.00" cores, the roll stand (TDP43M-RS) is required.

Labels roll mounted on 3.00" cores; when using the TDP43MY printer and 3.00" cores, the roll stand (TDP43M-RS) is required.

## Thermal Transfer Raised Panel Labels

• Raised thermal transfer printable surface with high-tack adhesive for strong holding power

• Variety of sizes and colors for a wide range of applications

• Thermal transfer print technology provides crisp, clear, and durable text

• Use with Panduit RMR4BL-A and RMR4WH resin thermal transfer ribbons

| Part Number | Part Description | Width |    | Height |    | Print-On Area Height |    | Hole Diameter |    | Std. Pkg. Qty. | Std. Ctn. Qty. |
|-------------|------------------|-------|----|--------|----|----------------------|----|---------------|----|----------------|----------------|
|             |                  | In.   | mm | In.    | mm | In.                  | mm | In.           | mm |                |                |

Order number of labels required in multiples of Std. Pkg. Qty.

## Thermal Transfer Continuous Tapes

- Tapes offer crisp, clear legends with superior legibility
- Available in continuous color vinyl or clear polyester and supplied on rolls

- Panduit labeling software packages include all label formats for quick and easy label production

## Part Number System for Continuous Tapes

## Material/Print Method Selection Guide

| Material   | Print Method         | Temperature Range                  | Features   |
|--|----------------------|------------------------------------|--|
| Polyester, Clear (YK)  | Thermal Transfer (T) | -51°F to 275°F<br>(-46°C to 135°C) | Indoor/outdoor rated; provides durability, high temperature resistance, and dimensional stability; does not stretch or easily tear                   |
| Vinyl, Yellow (VX)<br>Black (VY)<br>Blue (VQ)<br>Brown (VR)<br>Gray (VT)<br>Green (VS)<br>Orange (VU)<br>Purple (VV)<br>Red (VW)<br>White (VP) |                      | -58°F to 176°F<br>(-50°C to 80°C)  | Indoor/outdoor rated; conformable material for flat applications and safety and facility identification; can be overlaminated to increase durability |

Order number of rolls required.

Use with Panduit thermal transfer ribbons.

Labels roll mounted on 3.00" cores; when using the TDP43MY printer and 3.00" cores, the roll stand (TDP43M-RS) is required.

## Size Illustrations of Self-Laminating Labels

The following table lists the part numbers and their corresponding dimensions as shown in the illustrations:

| Part Number | Dimensions (Approximate) |
|-------------|--------------------------|
| S050X075*   | Small rectangular label  |
| S050X125*   | Medium rectangular label |
| S050X150*   | Medium rectangular label |
| S075X075*   | Small rectangular label  |
| S075X125*   | Medium rectangular label |
| S075X150*   | Medium rectangular label |
| S100X075*   | Small rectangular label  |

## PRE-PRINTED AND WRITE-ON MARKERS

Panduit offers a variety of pre-printed and write-on marker solutions in multiple formats to meet your specific requirements.

- Marker books are a convenient pocket-sized method to identify many electrical and network components
- Marker cards are available in a variety of legends and combination packs
- Dispensers are available in both pre-printed and write-on formats for quick identification of wire/cable
- Clip-on markers provide a fast, convenient, non-adhesive method to identify wire/cable

Panduit offers a variety of innovative books, cards, clip-ons and dispensers to provide you with the wire/cable label that best fits your needs.

Full size marker – .22" x 1.38" (5.60mm x 34.90mm). Maximum wire O.D., .38" (9.50mm).

Half size marker – .22" x .69" (5.60mm x 17.40mm). Maximum wire O.D., .19" (4.70mm).

Terminal block marker – .22" x .25" (5.60mm x 6.30mm).

## Blank Self-Laminating Write-On Cable Marker Books

- 10 pages of markers per book
- Clear section of marker over laminates and protects printed legend
- Markers have ink receptive area to allow handwritten legends

A. System Overview

## Pre-Printed Marker Cards PCM Type

B1. Cable Ties

• Marker cards printed in a variety of legends allows “kitting” for project builds

• Plastic liner provides easy removal of markers while protecting unused markers

B2. Cable Accessories

B3. Stainless Steel Ties

### Material Chart

| Material           | Print Method | Temperature Range                 | Features   |
|--------------------|--------------|-----------------------------------|--|
| Vinyl Cloth, White | Pre-Printed  | -50°F to 170°F<br>(-46°C to 77°C) | Indoor/outdoor rated; conformable material with repositionable adhesive allows label to be removed and reused or used in temporary applications; provides durability, high temperature resistance, and dimensional stability for rough or textured surfaces; resists oil and abrasion. |

Marker size:

Full size marker – 1.50" (38.10mm). Maximum wire O.D. .38" (9.50mm).

\*One card each number, 25 cards per package.

\*\*One card each letter, 26 cards per package.

## Pre-Printed Marker Cards

- Choose from the many legends available in general purpose vinyl cloth, or from special materials available to meet a variety of application environments

- All markers are offered in full size – 1.50" (38.1mm) long for wire outside diameter up to 0.38" (9.5mm); half size markers for wire outside diameter up to 0.19" (4.7mm) can be ordered
- Each marker on card has a different legend

## Pre-Printed Marker Tape Dispenser

- Flexible polyester marker tape conforms tightly to wires/cables
- Dispenser allows marker tape to be cut to the exact length required for marking any size wire/cable
- Durable plastic dispenser can be attached to tool belt for industrial use

### Material Chart

| Material         | Print Method | Temperature Range               | Features  |
|------------------|--------------|---------------------------------|---|
| Polyester, White | Pre-Printed  | -40°F to 250°F (-40°C to 121°C) | Indoor/outdoor rated; laminated label material protects legend from abrasion and chemicals; resistant to UV light chemical atmosphere and abrasion; excellent life and adhesion properties. |

| Part Number | Part Description  | Roll |     | Rolls Per Legend Per Pkg. | Std. Pkg. Qty. | Std. Ctn. Qty. |
|-------------|---|------|-----|---------------------------|----------------|----------------|

## Self-Laminating Wire Marker Dispenser

- Self-laminating labels are provided in handy dispenser which protects markers when not in use
- Clear section of marker overlaminates and protects write-on legend
- Quick, easy to use for smaller installations and maintenance

### Material Chart

| Material                              | Print Method | Temperature Range              | Features   |
|---------------------------------------|--------------|--------------------------------|--|
| Self-Laminating Vinyl, White Print-On | Pre-Printed  | -40°F to 150°F (-40°C to 66°C) | Indoor/outdoor rated; thin and conformable; preferred material for most general wire/cable labeling. |

| Part Number          | Part Description   | Width |       | Length |       | Print-On Height |       | Min. Cable O.D. |      | Max. Cable O.D. |       | Std. Pkg. Qty. | Std. Ctn. Qty. |

Can be clearly identified with Panduit permanent marking pens shown on page E5.19.

## Pre-Printed Clip-On Wire Markers

- Non-adhesive markers grip tightly to wire/cable
- Markers supplied on application wand tool
- Chevron cut keeps multiple markers aligned
- Black legend is embossed into wire marker clip

### Material Chart

| Material            | Print Method | Temperature Range              | Features   |
|---------------------|--------------|--------------------------------|--|
| Non-Adhesive Acetal | Pre-Printed  | -22°F to 194°F (-30°C to 90°C) | Indoor/outdoor rated; durable material that has excellent resiliency to oils and solvents. |

## PERMANENT IDENTIFICATION

Panduit offers the widest range of permanent identification solutions in the industry to withstand the test of time and provide legibility in harsh environments. Safe, quick, and easy to install, Panduit permanent identification solutions include stainless steel and aluminum marker plates, tags, marking tools and ties to deliver improved productivity and workplace safety.

- **Factory Custom Marking Service** creates embossed or laser etched metal plates, tags, and ties to speed installation time and reduce labor costs
- **Portable on-site marking tools** for quick and easy identification on demand
- **Large identification selection** delivers maximum design flexibility to match your specific application requirements
- **Optimized for easy use** with Panduit self-locking stainless steel and aluminum ties; for details, refer to Pan-Steel® System Section B3

Panduit continues to design permanent identification products for harsh environments by addressing customer problems with innovative solutions and reliable tooling to achieve lowest installed cost.

A. System Overview

## Panduit Factory Custom Marking Service

B1. Cable Ties

Panduit factory custom marking service simplifies identification with high quality, made-to-order custom embossed marker plates and tags or laser etched cable ties, marker plates, and tags. Panduit offers rapid direct shipment with fast turn around on custom marking orders worldwide. Work with Panduit to create an effectively identified workplace.

B2. Cable Accessories

### EMBOSSING SERVICE

- Used on rectangular metal marker plates and tags which are a maximum of .020 inches (.5mm) thick and minimum .38 inches (10mm) width
- Excellent for applications that are exposed to dirt and paint
- Upper case "raised" character
- Alphanumeric and sequential numbering

### LASER MARKING SERVICE

- Used on all metal marker plates, tags, and cable ties
- BOLD block letters
- Upper and lower case character capability
- Ability to create text and graphics
- Alphanumeric and sequential numbering

B3. Stainless Steel Ties

Online form!

To select and order custom laser and embossed marker plates and tags:

Use on-line order form (C2-0677) at [www.panduit.com/permanentID](http://www.panduit.com/permanentID) to select the proper marker plate or tag for your application. Email order form to your Authorized Panduit Distributor for order placement or contact Panduit Customer Service for assistance.

#### Character sizes available:

- 1/8 inches (3.18mm) – For high character volume tags
- 3/16 inches (4.77mm) – The most common size
- 1/4 inches (6.35mm) – Larger font for greater flexibility
- 5/16 inches (7.94mm) – Maximum visibility for tags requiring only a few characters.

Panduit offers a full line of labeling products, software and printers to assist you with your labeling requirements.

See pages E1.0 – E2.30.

Panduit permanent identification products are optimized for easy use with Panduit self-locking stainless steel and aluminum ties. For details, refer to Pan-Steel® System Section B3.

## Stainless Steel and Brass Marker Plates and Tags

- Provides permanent identification of pipes, conduit, valves, cables and equipment in harsh environments
- Designed for use with Panduit® Pan-Steel® Stainless Steel Cable Ties for fast installation at lowest installed cost
- All marker plates/tags can be embossed or laser etched with Panduit Factory Custom Marking Service
- For on-site custom marking see page E4.6
- Designated plates feature easy feed design with a raised slot to simplify cable tie installation and improve productivity

## Aluminum Marker Plates – Pan-Alum™ MMP Series

- Lightweight, aluminum construction for flexibility and ease of handling
- Five color options in addition to natural aluminum provide quick visual identification, ideal for applications requiring color-coding
- Easy feed marker plate design includes a raised slot to simplify cable tie installation and improve productivity

| Part Number          | Material | Color   | Length               |                   | Width |      | Custom Marking Parameters**             |            | Used with Pan-Alum™ Cable Ties | Std. Pkg. Qty. | Std. Ctn. Qty. |

\*\*See page, E4.2 for Panduit Factory Custom Marking Service.

## **NEW!** Metal Embossing Hand Tool and Tape System

- New multi-functional cutting die design creates embossed marker plates with raised cable tie slot in one step instead of three, for faster installation
- Lightweight, compact and portable, allows user to create custom length identification on demand at remote job sites
- Embosses 3/16" characters onto stainless steel or aluminum tape, to improve visibility in applications that are subjected to dirt or paint

| Part Number     | Part Description  | Std. Pkg. Qty. |
|-----------------|---|----------------|
| <b>Tool Kit</b> |   |                |
| <b>MEHT187</b>  | Includes tool, additional marking wheel, carrying case, one roll each META (aluminum) and METS (stainless steel) tape. Characters included: A B C D E F G H I J K L M N O P Q R S T U V W X Y Z 1 2 3 4 5 6 7 8 9 / ( ) | 1              |
| <b>Tape</b>     |   |                |
| <b>META-X</b>   | .50" x 16' (12.7mm x 4.9m) aluminum tape*.  | 10             |
| <b>METS3-X</b>  | .50" x 21' (12.7mm x 6.4m) 316 grade stainless steel tape.  | 10             |
| <b>METS4-X</b>  | .50" x 21' (12.7mm x 6.4m) 304 grade stainless steel tape.  | 10             |

\*Aluminum ties are recommended for use with aluminum tape to prevent galvanic reaction (corrosion that can occur between stainless steel and aluminum in certain environments).

## Metal Indenting Machine

- Provides quick, easy, and permanent identification with Panduit® Pan-Alum™ Marker Plates and Cable Ties and Pan-Steel® Stainless Steel Marker Plates, Tags, Cable Ties and Straps
- Automatic table indexing advances material forward for convenience and improved productivity
- New, improved design features aluminum base and durable construction

## **NEW!** Portable Embossing System\*

- Easily moved from jobsite to jobsite to deliver a permanent identification solution where it's needed, when it's needed
- Creates raised characters on stainless steel and aluminum marker plates, to deliver maximum visibility for medium to high volume applications that are exposed to dirt and paint
- Improves productivity by providing a reliable connection from the embossing machine to your PC using Easy-Mark™ Software
- Easy-Mark™ Software allows for a quick print legend and exact preview saving time and reducing print costs
- Easy loading hopper allows for easy stacking of up to 200 plates, saving time and money

## LOCKOUT/TAGOUT

The Occupational Safety and Health Administration (OSHA) mandates that all energy sources be isolated and locked out to protect employees from injuries caused by the accidental startup of equipment under repair or service. OSHA 1910.147 outlines the control of this hazardous energy with an effective lockout/tagout program. Panduit offers a complete line of lockout/tagout products to aid in compliance with OSHA 1910.147 including:

- Training manuals and videos to help train employees on the requirements of lockout/tagout
- Extensive line of universal, high quality devices to lockout a variety of energy sources
- Lockout/tagout kits and stations that offer a convenient method to store and contain lockout devices, tags, and padlocks
- High quality, durable, secure padlocks in a variety of styles, colors, and keying configurations that ensure safety and security
- Extensive line of safety identification products that include tags, signs, and warning labels

Panduit offers everything you need to establish and maintain an effective lockout/tagout program. Ensure employee safety while conducting lockout/tagout procedures by utilizing Panduit innovative products and high quality materials.

A. System Overview

## OSHA Lockout/Tagout Compliance and Training Kit

B1. Cable Ties

• Takes you step-by-step through the process of bringing your company into compliance with OSHA Standard 1910.147; also provides training materials and devices for educating employees on the elements and applications of lockout/tagout

• This complete package includes:

**Training video:** DVD video “Life is on the Line” for training employees on the elements and application of lockout/tagout (LOTO)

**Compliance CD containing:**

**Training materials:** Training agenda, quiz, certificate, and key points for hands on device training

**Templates:** Step-by-step interactive presentation; facility and machine specific procedure templates; equipment, training, and inspection logs; lockout/tagout program template; periodic and lockout/tagout checklists

**Components:** Demonstration components for thorough “hands-on” training including circuit breakers, ball valves, etc., and the compatible lockout devices

## Group Lockout/Tagout Training Video

C3. Abrasion Protection

• “Your Lock is Your Key to Life” Training Program provides thorough instruction on OSHA recommended safety practices and procedures for group lockout – multi-craft/multi-shift lockout operations

This complete package includes:

- Group lockout/tagout video
- Participant guides with quizzes
- Certificate of completion cards
- Leader’s guide complete with quiz key
- Training log
- Lockout/tagout samples
- Panduit lockout/tagout bulletin
- Lockout steps wallet cards

DANGER

A LIFE IS ON THE LINE!

OSHA LOCKOUT STEPS

SHUTDOWN

Inform operator and supervisor about work to be done

- 1) Prepare for shutdown
- 2) Shutdown/turn off equipment
- 3) Isolate from energy source
- 4) Apply lockout/tagout to energy isolating device
- 5) Release all potentially hazardous stored or residual energy
- 6) Verify the isolation

STARTUP

- 1) Assure equipment operationally intact, clear all personnel & tools
- 2) Notify all affected employees about startup and lockout/tagout device removal
- 3) Assure lockout/tagout is removed from each energy-isolating device  
(See section 6(e) and 6(f) of 29 CFR 1910.147 for specific requirements of the standard)

## “No Tool” Circuit Breaker Lockout Devices

- Individual circuit breaker can be locked in the off position quickly and easily without any tools
- Compact, universal design fits a wide range of single, double, and triple handle circuit breakers
- Accommodates breaker handle sizes ranging from .30 – .60 inches (7.62mm – 15.24mm) tall and .16 – .35 inches (4.06mm x 8.89mm) thick
- Easily attached with no modifications to panel or circuit breaker and does not require holes in circuit breaker handle
- Constructed of rugged nylon and stainless steel providing strength, durability, added security and corrosion resistance

| Part Number | Part Description   | Std. Pkg. Qty. | Std. Ctn. Qty. |

## Large Handle Circuit Breaker Lockout Device

- Individual circuit breakers can be locked in the off position quickly and easily without any tools
- Compact, universal design fits a wide range of large handle circuit breakers
- Accommodates breaker handle dimensions up to .80 inches thick x 3.00 inches wide (20.32mm x 76.20mm)
- Easily attached with no modifications to panel or circuit breaker
- Constructed of rugged nylon and stainless steel providing strength, durability, added security and corrosion resistance

A. System Overview

## Plug Lockout Device

B1. Cable Ties

- Individual plugs in a wide range of sizes can be locked out to prevent energization
- Accommodates padlocks with shackle lengths of 1.50 inches (38.10mm) or greater and plugs with a hole in a blade

- Constructed of rugged polycarbonate providing strength, durability, added security and corrosion resistance

B2. Cable Accessories

## Toggle Switch Lockout Device

- Compact secure design fits most toggle switches and some small circuit breakers
- Easily attached without removal of faceplate or screws
- Accommodates switches
  - .45 – .78 inches (11.43mm – 19.81mm) tall x
  - .25 – .38 inches (6.35mm – 9.65mm) wide x
  - .25 – .40 inches (6.35mm – 10.16mm) thick
- Constructed of rugged nylon and stainless steel providing strength, durability, added security and corrosion resistance

|-------------|------------------------|----------------|----------------|
| PSL-WS      | Toggle switch lockout. | 1              | 10             |

## Toggle/Rocker Switch Lockout Device

- Toggle/rocker switches controlling electrical supply can be locked out
- Accommodates standard wall switch faceplates
- Install using faceplate screws
- Constructed of rugged polypropylene providing strength, durability, and added security

| Part Number | Part Description              | Std. Pkg. Qty. | Std. Ctn. Qty. |

Lockout single or multiple electrical disconnects

Lockout gate valves

Immobilize large or cumbersome devices, such as forklifts

## Pneumatic Energy Lockout Device

- Pneumatic energy devices can be locked out quickly and easily without costly tool modifications or inconvenient in-line valves
- When installed on the male pneumatic fitting, prevents the ability to engage into the female fitting

- Universal compact design makes the pneumatic lockout device easy to transport and install on almost any fitting, even in tight spaces
- Rugged stainless steel construction offers superior strength, durability, added security and corrosion resistance

| Part Number    | Part Description   | Std. Pkg. Qty. | Std. Ctn. Qty. |
|----------------|--|----------------|----------------|
| <b>PSL-PEL</b> | Pneumatic energy lockout device, 3.50" (88.9mm) diameter x 0.10" (2.54mm) thick. | 1              | 20             |

## Electrician Lockout Kit

## Warning Label

- Warning label prohibits tampering with push buttons during repair or service
- Write-on area for adding your own warning message
- Made of vinyl cloth material that allows label to be removed easily after repairs are completed
- Features the international prohibition symbol for “Do Not Throw Switch”

### Material Chart

| Material           | Print Method | Temperature Range                 | Features  |
|--------------------|--------------|-----------------------------------|---|
| Vinyl Cloth, White | Pre-Printed  | -50°F to 170°F<br>(-46°C to 77°C) | Indoor/outdoor rated; thin conformable material with repositionable adhesive allows label to be removed and reused or used in temporary applications; provides durability, high temperature resistance, and dimensional stability for rough or textured surfaces. |

| Part Number | Part Description | Width |        | Height |       | Markers Per Book | Std. Pkg. Qty. (Book) | Std. Ctn. Qty. (Books) |

Can be clearly identified with Panduit permanent marking pens, page E5.18.

## Circuit Breaker Directory Sign

- Adhesive paper sign designed to provide clear identification of circuit breaker connections, list up to 40 circuits
- Eliminate the guesswork when identifying power sources – a must for lockout/tagout compliance

### Material Chart

| Material | Print Method | Temperature Range                 | Features  |
|----------|--------------|-----------------------------------|---|
| Paper    | Pre-Printed  | -65°F to 200°F<br>(-54°C to 93°C) | Indoor rated; general purpose material; excellent adhesion properties when applied to a clean, dry surface. |

A. System Overview

## Non-Conductive Lockout Padlocks

B1. Cable Ties

- Non-conductive lock body and shackle provide protection against electrical hazards
- Available in six assorted colors for quick visual color identification
- Padlocks can be ordered with various keying options (keyed-alike and master-keyed)
- Key-retention feature means that key cannot be removed from padlock when open
- Six-pin cylinder design allows for a large number of key options

B2. Cable Accessories

B3. Stainless Steel Ties

| PSL-7PU-LS                           | Purple | 1 |

These locks can be ordered with various keying options (keyed-alike or master-keyed) and custom engraved. See Custom Lock Options on page E5.12 and Order Form on page E5.43.

## Laminated Steel Padlocks

- Standard locks are keyed differently – each padlock is supplied with two keys
- Hardened steel shackle with double-ball locking mechanism provides protection from cutting, prying, and rusting
- Available in six vinyl bumper colors for quick visual color identification
- Padlocks can be ordered with various keying options (keyed-alike and master-keyed)
- Galvanized layer design provides corrosion resistance in harsh environments

| Part Number                          | Color  | Std. Pkg. Qty. |

| PSL-6GR                              | Green  | 1              |
| PSL-6WH                              | White  | 1              |
| PSL-6YL                              | Yellow | 1              |
| <b>Long shackle – 2.00" (46.8mm)</b> |        |                |
| PSL-6-LS                             | Red    | 1              |
| PSL-6BL-LS                           | Black  | 1              |
| PSL-6BU-LS                           | Blue   | 1              |
| PSL-6GR-LS                           | Green  | 1              |
| PSL-6WH-LS                           | White  | 1              |
| PSL-6YL-LS                           | Yellow | 1              |

These locks are not suitable for custom engraving.

See Custom Lock Options on page E5.12 and Order Form on page E5.43.

## Lockout Hasps

- Energy sources can be locked out quickly and easily by more than one worker for group lockout applications
- Heavy duty hasps with tamper-resistant designs to deter vandalism
- Variety of lockout hasp styles and sizes to accommodate a wide range of lockout applications

| Part Number | Part Description   | Max. No. Locks | Std. Pkg. Qty. | Std. Ctn. Qty. |
|-------------|--|----------------|----------------|----------------|
| PSL-MLD     | Multiple lockout device; includes lockout hasp and 6.0' (1.8m) vinyl coated galvanized steel cable with loop-hole. | 6              | 1              | 20             |
| PSL-MLDH-X  | Multiple lockout device (hasp only).   | 6              | 10             | —              |
| PSL-1       | Hasp with 1.00" (25.40mm) diameter jaw and overlapping tabs.   | 6              | 12             | 144            |
| PSL-1.5     | Hasp with 1.50" (38.10mm) diameter jaw and overlapping tabs.   | 6              | 12             | 144            |
| PSL-1A      | Hasp with 1.00" (25.40mm) diameter jaw.  | 6              | 12             | 144            |
| PSL-1.5A    | Hasp with 1.50" (38.10mm) diameter jaw.  | 6              | 12             | 48             |
| PSL-HD1     | Heavy duty hasp with 1.00" x 1.00" (25.40mm x 25.40mm) clearance.  | 5              | 12             | —              |
| PSL-HD2.4   | Heavy duty hasp with 1.00" x 2.40" (25.40mm x 60.00mm) clearance.  | 5              | 12             | —              |
| PSL-HD3     | Heavy duty hasp with 1.00" x 3.00" (25.40mm x 76.00mm) clearance.  | 7              | 12             | —              |

A. System Overview

## Self-Laminating Padlock Labels

B1. Cable Ties

- Used to identify employees' locks; employees sign the label, attach it to the padlock, and overwrap with the clear vinyl to protect the legend
- Available in six colors for departmental coding
- One-piece design is easy to use

B2. Cable Accessories

B3. Stainless Steel Ties

C1. Wiring Duct

| Part Number | Color  | Width |        | Height |       | Std. Pkg. Qty. | Std. Ctn. Qty. |

## Custom Lock Options

Padlocks are available with the following common lock options:

C4. Cable Management

- Master keyed
- Keyed-alike
- Variety of lock sizes and shackle lengths
- Engraving available on PSL-8 Safety Lockout and PSL-7 High Security Padlocks

## Metal I.D. Tags and Collars

| Part Number | Part Description  | Std. Pkg. Qty. | Std. Ctn. Qty. |
|-------------|---|----------------|----------------|
| PSL-TG1     | Brass padlock identification tag.                                   | 12             | 48             |
| PSL-SC      | Padlock shackle collar and rivet.                                   | 12             | 48             |
| MTB1D-Q     | Marker tag, 1.00" circular, brass.                                  | 25             | 250            |
| MT172W38-C  | Marker tag, one hole, 304 Stainless Steel, rectangle, 1.72" x .38". | 100            | 1000           |

## Padlock Eyes

- Padlock eyes assist with compliance to OSHA standards requiring that equipment be modified to accept locks and lockout devices
- Surface mounted eyes are made of .13 inches (3.00mm) hard wrought steel
- Tamper resistant inside mounting eyes – 2.50 inches W (64.00mm), accept shackle diameters up to .63 inches (16.00mm)

| Part Number | Part Description  | Std. Pkg. Qty. | Std. Ctn. Qty. |
|-------------|---|----------------|----------------|
| PSL-PE1     | Padlock eyes, angled (metal mounting screws included).  | 1              | 10             |
| PSL-PE2     | Padlock eyes, straight (wood mounting screws included). | 1              | 10             |

## Chain Attachment

- Optional 9.00 inches (229.00mm) chain for permanently attaching lockouts at pre-designed locations

| Part Number | Part Description   | Std. Pkg. Qty. | Std. Ctn. Qty. |
|-------------|--|----------------|----------------|
| PSL-PC      | Heavy duty zinc plated steel chain with chain holder attached. | 1              | 10             |

## Write-On Safety Tags

B1. Cable Ties

- Meet OSHA Standard 1910.147 requirements for tagout applications
- Semi-rigid plastic tags are 3.00" (76.00mm) W x 5.75" (146.00mm) H with a .38" (9.00mm) brass grommet for greater strength and increased durability
- Tags can be attached with a lockout device or with a Panduit PLT2S nylon tie (50 lb. loop tensile strength) supplied with each tag

- PVT-\* Package consists of five tags and five cable ties
- PVT-\*-Q Package consists of 25 tags and 25 cable ties
- Can be clearly identified with Panduit permanent marking pens

## Bilingual Write-On Safety Tags

- Meet OSHA Standard 1910.147 requirements for tagout applications
- Semi-rigid plastic tags are 3.00"W x 5.75"H (76.00mm x 146.00mm) with a .38" (9.00mm) brass grommet for greater strength and increased durability

- Tags can be attached with a lockout device or with a Panduit PLT2S nylon tie (50 lb. loop tensile strength) supplied with each tag
- Package consists of 25 tags and 25 cable ties
- Can be clearly identified with Panduit permanent marking pens

## ISO Symbol Safety Tags

- Meets International Organization for Standardization (ISO) to communicate safety information
- Semi-rigid plastic tags are 3.00"W x 5.75"H (76.00mm x 146.00mm) with a .38" (9.00mm) brass grommet for greater strength and durability

- Tags have write-on surface and can be attached with a lockout device or with a Panduit PLT2S nylon tie (50 lb. loop tensile strength) supplied with each tag
- Package consists of five tags and five cable ties
- Can be clearly identified with Panduit permanent marking pens

## Lockout/Tagout Safety Signs

### Indoor/Outdoor Sub-Surface Printed Adhesive Polyester (Type PPS)

- High quality signs for use indoors and outdoors
- Excellent resistance to UV light, chemical atmosphere, and abrasion
- Excellent life and adhesion properties
- Printed graphics are protected by clear polyester laminate

### Indoor/Outdoor Rigid Polyethylene (Type PRS)

- Rugged signs for indoors and outdoors
- Abrasion resistant
- Used where adhesives will not work

### Indoor Adhesive Vinyl (Type PVS)

- Economical general purpose signs for use in most environments
- Very good adhesive properties when applied to a clean, dry surface

### Material Chart

| Material                 | Print Method | Temperature Range                | Features  |
|--------------------------|--------------|----------------------------------|---|
| Polyester (PPS)          | Pre-Printed  | -40°F to 275°F (-40°C to 135°C)  | Indoor/outdoor rated; laminated label material protects legend from abrasion and chemicals; resistant to UV light, chemical atmosphere, and abrasion; excellent life and adhesion properties. |
| Rigid Polyethylene (PRS) |              | -105°F to 250°F (-76°C to 121°C) | Indoor/outdoor rated; high quality, rugged material resistant to abrasion; use where adhesives will not work.   |
| Vinyl (PVS)              |              | -40°F to 200°F (-40°C to 93°C)   | Indoor rated; economical general purpose material; excellent adhesion properties when applied to a clean, dry surface.  |

## Jack Module Blockout Device

B1. Cable Ties

- Blocks unauthorized access to jacks and potentially harmful foreign objects, saving time and money associated with data security breaches, network downtime, repair and hardware replacement
- Compatible with most RJ45 jacks to accommodate a variety of applications and does not interfere with jack contacts

- Can be installed/removed without interfering with adjacent jacks or hardware
- May only be released with the special removal tool, ensuring the safety and security of your network infrastructure

## RJ45 Plug Lock-In Device

- Tamper-resistant design blocks unauthorized removal of cable, IP phone, other networking equipment or critical connection
- Deters unauthorized users from moving or stealing VoIP phones helping to maintain E911 service
- Compact design does not interfere with adjacent jacks, even in high-density applications

A. System Overview

## LC Duplex Adapter Blockout Device

B1. Cable Ties

- TIA/EIA-604 FOCIS-10 compliant device fits all LC duplex adapters for a variety of applications and installations
- Tamper-resistant design blocks unauthorized access to LC duplex ports to reduce the risk of damage, saving time and money associated with downtime, repair and hardware replacement

- Also functions as dust plug to mechanically protect the LC adapter optics and render it "eye-safe"
- Removal tool allows only authorized personnel to release the device, ensuring safety and security of your network infrastructure
- Available in multiple colors to match or contrast adapter colors for easy identification of blocked out adapters

B2. Cable Accessories

- Compact, low profile design allows installation or removal without disturbing adjacent ports or installed patch cords in high-density applications

B3. Stainless Steel Ties

C1. Wiring Duct

C2. Surface Raceway

C3. Abrasion Protection

C4. Cable Management

| Part Number*       | Part Description  | Color          | Std. Pkg. Qty. | Std. Ctn. Qty. |
|--------------------|---|----------------|----------------|----------------|
| <b>PSL-LCAB</b>    | Package of ten LC duplex adapter blockout devices and one removal tool. | Red            | 1              | 20             |
| <b>PSL-LCAB-AQ</b> | Package of ten LC duplex adapter blockout devices and one removal tool. | Aqua           | 1              | 20             |
| <b>PSL-LCAB-BL</b> | Package of ten LC duplex adapter blockout devices and one removal tool. | Black          | 1              | 20             |
| <b>PSL-LCAB-BU</b> | Package of ten LC duplex adapter blockout devices and one removal tool. | Blue           | 1              | 20             |
| <b>PSL-LCAB-EI</b> | Package of ten LC duplex adapter blockout devices and one removal tool. | Electric Ivory | 1              | 20             |

\*Also available in bulk packages of 100 devices and five removal tools. To order bulk package, add -C to the end of the part number.

D1. Terminals

## SC Adapter Blockout Device

D2. Power Connectors

- TIA/EIA-604 FOCIS-3 compliant device fits all SC adapters for a variety of applications and installations
- Tamper-resistant design blocks unauthorized access to SC switch and HBA/NIC ports, switch uplinks and user outlets, saving time and money associated with data security breaches, network downtime, repairs and hardware replacement
- Compact, low profile design allows installation or removal without disturbing adjacent ports or installed patch cords in high-density applications

- Also functions as dust plug to mechanically protect the SC adapters/receptacle optics and renders it "eye-safe" to prevent exposure to laser radiation and contamination on dust sensitive transceivers
- Removal tool allows only authorized personnel to release the device, ensuring safety and security of your network infrastructure
- Available in multiple colors for visual identification or aesthetics

D3. Grounding Connectors

## SAFETY AND FACILITY IDENTIFICATION

Panduit offers a full line of safety and facility identification products to ensure employee safety with an effectively identified workplace.

- Safety signs and labels offered in a variety of materials, colors, sizes and legends
- Voltage markers in adhesive and snap-on style
- Utility tapes in a variety of materials, colors, sizes and legends
- Letters and numbers in a variety of materials and sizes
- Tags in a variety of materials, colors, sizes and legends

Panduit safety and facility identification products are designed to assist you with creating a safe, compliant, and efficient workplace.

### Material Chart

| Material                 | Print Method | Temperature Range                | Features  |
|--------------------------|--------------|----------------------------------|---|
| Polyester (PPS)          | Pre-Printed  | -40°F to 275°F (-40°C to 135°C)  | Indoor/outdoor rated; laminated label material protects legend from abrasion and chemicals; resistant to UV light, chemical atmosphere, and abrasion; excellent life and adhesion properties. |
| Rigid Polyethylene (PRS) |              | -105°F to 250°F (-76°C to 121°C) | Indoor/outdoor rated; high quality, rugged material resistant to abrasion; use where adhesives will not work.   |
| Vinyl (PVS)              |              | -40°F to 200°F (-40°C to 93°C)   | Indoor rated; economical general purpose material; excellent adhesion properties when applied to a clean, dry surface.  |

C1. Wiring Duct

## Photoluminescent Safety Signs

- Used to mark egress routes, fire alarms, and fire equipment that is clearly visible for up to ten hours after power is lost
- Absorbs energy from ambient light and releases this energy in the form of a glow when power is lost
- Panduit Photoluminescent Signs meet or exceed the following safety standard specification for photoluminescent safety markings including: ASTM E 2072-00, ASTM E 2073-00, ASTM E 2030-99, DIN67510-1, IMO Resolution A.752.18, ISO/CD 15370, DIN 67510, UL 924, ASTM 162, ASTM 648, ASTM 662, MIL-L-3891 B, NFPA 101 Life Safety Code, OSHA 1910.37

### Material Chart

| Material                                 | Print Method | Temperature Range              | Features  |
|--|--------------|--------------------------------|---|
| Paper (WL1, WL3)                         | Pre-Printed  | -65°F to 200°F (-54°C to 80°C) | Indoor rated; general purpose and material; excellent adhesion properties when applied to a clean, dry surface.   |
| Polyester (WL25)                         |              | -40°F to 250°F (-54°C to 93°C) | Indoor/outdoor rated; laminated label material protects legend from abrasion and chemicals; resistant to UV light, chemical atmosphere, and abrasion; excellent life and adhesion properties. |
| Vinyl (PESW, WL32Y, WL33Y, WL35Y, WL36Y) |              | -40°F to 176°F (-40°C to 80°C) | Indoor/outdoor rated; laminated label material protects legend from abrasion and chemicals; resistant to UV light, chemical atmosphere, and abrasion; excellent life and adhesion properties. |

A. System Overview

## Reflective Tapes

- Reflective tapes can be used for illuminating or highlighting a range of objects
- Increases safety during power outages or other low light conditions
- Custom legends can be printed using a Panduit TDP43MY thermal printer
- Tapes are laminated for improved print quality and durability

C4. Cable Management

Normal Lighting

D1. Terminals

D2. Power Connectors

D3. Grounding Connectors

- Used to mark egress routes, fire alarms, and fire equipment that is clearly visible for up to ten hours after power is lost
- Absorb energy from ambient light and releases this energy in the form of a glow when power is lost
- Can be used in the Panduit thermal transfer desktop printers to create direction arrow tape, striped tape, or safety signs on demand
- Panduit Photoluminescent Tapes meet or exceed the following safety standard specification for photoluminescent safety markings including: ASTM E 2072-00, ASTM E 2073-00, ASTM E 2030-99, DIN67510-1, IMO Resolution A.752.18, ISO/CD 15370, DIN 67510, UL 924, ASTM 162, ASTM 648, ASTM 662, MIL-L-3891 B, NFPA 101 Life Safety Code, OSHA 1910.37

## Sign Panels – Blank Space for Custom Messages

### Indoor/Outdoor Sub-Surface Printed Adhesive Polyester (Type PPS)

- High quality signs for use indoors and outdoors
- Excellent resistance to UV light, chemical atmosphere, and abrasion
- Excellent life and adhesion properties
- Printed graphics are protected by clear polyester laminate

### Indoor/Outdoor Rigid Polyethylene (Type PRS)

- Rugged signs for indoors and outdoors
- Abrasion resistant
- Used where adhesives will not work

- Can be used with Panduit Thermal Transfer Desktop Printers and Easy-Mark™ Labeling Software to create your own custom signs
- Print your own legend on clear polyester tape with the TDP43MY Thermal Transfer Desktop Printer and adhere label to adhesive or non-adhesive sign panel
- Can also be used with Panduit Die Cut Letter and Numbers

### Material Chart

| Material                 | Print Method | Temperature Range                | Features  |
|--------------------------|--------------|----------------------------------|---|
| Polyester (PPS)          | Pre-Printed  | -40°F to 275°F (-40°C to 135°C)  | Indoor/outdoor rated; laminated label material protects legend from abrasion and chemicals; resistant to UV light, chemical atmosphere, and abrasion; excellent life and adhesion properties. |
| Rigid Polyethylene (PRS) |              | -105°F to 250°F (-76°C to 121°C) | Indoor/outdoor rated; high quality, rugged material resistant to abrasion; use where adhesives will not work.   |

Order number of Standard Packages required

A. System Overview

## Thermal Transfer Printable Arc Flash Labels

B1. Cable Ties

- Provide employees with the highest degree of safety through proper identification and communication
- Labels are constructed of durable polyester designed to withstand UV exposure, outdoor use, water, abrasion
- Clearly visible and recognizable hazard information to communicate arc flash hazards present
- Custom Arc Flash Hazard Labels can be printed using Panduit labeling software and desktop thermal transfer printers

B2. Cable Accessories

B3. Stainless Steel Ties

C1. Wiring Duct

C2. Surface Raceway

C3. Abrasion Protection

C4. Cable Management

D1. Terminals

D2. Power Connectors

D3. Grounding Connectors

## Laser Printable Adhesive Signs

- Signs can be printed with a standard laser printer
- Signs are 8.50" x 11.00" (215.90mm x 279.40mm) in size
- Indoor polyolefin pressure sensitive signs with square corners on stay flat liner
- 25 signs per package

E2. Labels

E3. Pre-Printed & Write-On Markers

E4. Permanent Identification

E5. Lockout/Tagout & Safety Solutions

## Wire Size Selection Guide

B1. Cable Ties

To use this guide place your wire or cable in the appropriate circle to determine wire, outside diameter.

The charts below indicate the approximate cable outside diameter or various electrical and communication cables.

B2. Cable Accessories

Diameter .10" (2.50mm)

Diameter .20" (5.10mm)

B3. Stainless Steel Ties

Diameter .28" (7.10mm)

C1. Wiring Duct

Diameter .54" (13.70mm)

C2. Surface Raceway

Diameter .94" (23.90mm)

C3. Abrasion Protection

C4. Cable Management

D1. Terminals

Diameter 1.40" (35.50mm)

D2. Power Connectors

D3. Grounding Connectors

E1. Labeling Systems

Diameter 1.90" (48.30mm)

E2. Labels

E3. Pre-Printed & Write-On Markers

E4. Permanent Identification

E5. Lockout/Tagout & Safety Solutions

F. Index

Diameter 2.40" (61.00mm)

### Electrical Cables

| Size     | Approximate Wire Outside Diameter In. (mm) |              |              |               |
|----------|--|--------------|--------------|---------------|
|          | TF   | THW          | TW           | TFN/THHN/THWN |
| 18 AWG   | .11 (2.80)                                 | .11 (2.80)   | .11 (2.80)   | .09 (2.30)    |

| 25-Pair  |                        | .42 (10.70)           | .51 (12.90)           | .54 (13.70)           | .63 (16.00)           |
| 50-Pair  | .46 (11.70)            | .66 (16.80)           |                       |                       |                       |
| 100-Pair | .63 (16.00)            | .96 (24.40)           |                       |                       |                       |
| 300-Pair | 1.07 (27.20)           |                       |                       |                       |                       |

### Coaxial Cable

| Size    | Coax        |
|---------|-------------|
| RG58/u  | .19 (4.80)  |
| RG59/u  | .24 (6.10)  |
| RG62A/u | .24 (6.10)  |
| RG6/u   | .27 (6.80)  |
| RG11/u  | .40 (10.20) |

### Fiber Optic Distribution (62.5/125)

| Size      | Non-Plenum  | Plenum      |
|-----------|-------------|-------------|
| 6 Strand  | .26 (6.60)  | .18 (4.60)  |
| 8 Strand  | .27 (6.90)  | .18 (4.60)  |
| 12 Strand | .28 (7.10)  | .21 (5.30)  |
| 18 Strand | .49 (12.4)  | .47 (11.90) |
| 24 Strand | .54 (13.70) | .52 (13.2)  |
| 36 Strand | .54 (13.70) | .52 (13.2)  |
| 48 Strand | .59 (15.00) | .56 (14.2)  |
| 72 Strand | .72 (18.30) | .71 (18.0)  |
