About Pro-face

Pro-face

**Globally Recognized,
Globally Supported,
Globally Trusted.**

- We are the leading independent global supplier of industrial computing and visualization solutions for automation and manufacturing applications.
- We are recognized worldwide for innovative designs with the industry's highest quality and reliability.
- We offer the most extensive product offering of HMI touch screens available with the highest levels of system and network connectivity.

Pro-face: A Company You Can Depend On

- More than 35 years providing industrial Human Machine Interface (HMI) technology
- Pro-face and Xycom brands: the most trusted names in the industry
- Worldwide applications support teams ready to help you
- Serving more than 50 countries, Pro-face has 17 main offices with 1200+ employees
- We speak your language:
English, Spanish, Japanese
- We have a vast distribution network to provide products quickly anywhere

Pro-face

Operator Interfaces,
Industrial PCs & Monitors

XYCOM™

Industrial PCs & Monitors

Right-size, Right-technology Visualization Solutions

A Choice of HMI Technology Solutions

Dedicated Operator Interfaces

- Performance-built, factory workhorse graphical touch screens
- Extensive hardware and software connectivity
- Use for maximum reliability and dependability of HMI applications
- 100% solid-state design

Open-Platform Industrial PCs

- Windows® XP, 2000-based industrial PC touch-screen systems
- Built to withstand high-vibration, -shock and -temperature environments
- Built-in redundancy using RAID-enabled option
- New innovative technology sends alert when PC system status is out of tolerance
- Solid-state drive options available

**The Right HMI for
the Right Application**

Operator Interface Plus Control

- Combined operator interface and PLC logic control in one package
- Supported by one software package
- Offers significant reduction in system cost and panel space
- Ultra-low maintenance

Flat-Panel Touch-Screen Monitors

- Highly detailed graphical interface with built-in touch screen
- Sizes from 10" to 19" plus built-in keypad option on some models
- Sleek, innovative styling
- Global certifications and ratings

Investment Protection

Built into every unit is investment protection. Our investment protection is all about keeping your machine current with the latest technologies while minimizing migration costs and disruptions to the existing installation.

Minimize your total cost of ownership:

- Pro-face and Xycom brand products have maintained cutout compatibility for more than 21 years
- Upgrade your machine with more capabilities without altering the original design
- Recognized by the industry for providing significant savings to our customers
- It's all included – no product migration service contracts required

No other industrial PC and operator interface supplier can guarantee long-term investment protection value backed by a 21-year track record.

**Lowering your total
cost of ownership!**

**Celebrating more than 21 years
of cutout compatibility!**

More Than an Operator Interface...

HMI Solutions for OEMs, System Integrators and End Users

OEM/System Integrator

Design

- Tools for rapid development
- Integrated solution
- Multiplatform development software
- Data management software

After-the-sale support

- Remote servicing
- Extensive diagnostic features

HMI for standalone machines

HMI for extensive networking

**Work smarter,
be informed,
make the
right choices**

Instructional HMI for a safe
and informed workforce

An Enterprise-Wide Solution

Remote Access, Monitoring and Maintenance

On-demand operator interface
Windows®-based HMIs

See the entire facility
through your HMIs

Enterprise Connectivity

End User

Production

- Increase productivity
- Decrease downtime
- Efficient maintenance
- Train/educate operators

Management

- Planning/scheduling
- Reporting
- Continuous improvement
- Make informed decisions

Innovative Operator Interface Solutions

Extensive Family of Operator Interface Solutions

✓ All the standard HMI features you expect and more . . .

- High-reliability graphic touch screens
- Sizes from 3.8" to 15" (more than 75 units)
- Direct camera input, view live video, capture images
- USB and CompactFlash® ports
- 10/100 Base-T
- RS-232/422/485 and MPI serial ports
- Up to four active protocols simultaneously

Advanced Solutions

✓ Extensive features, including:

- Built-in security tracks system changes by user ID
- Event recorder captures video of machine faults
- Device gateway: share data between different PLC vendors and other fieldbus equipment using the AGP3000 operator interface
- Built-in logic control eliminates PLC while cutting system costs
- Built-in discrete and distributed I/O options
- Real-time logic and device monitoring features help diagnose system problems

Remote PC Access Solutions

✓ RPA

- Use AGP3000 operator interface to access and control a remote computer/server
- View PDF, CAD, DOC, XLS or any file type located on a remote server PC
- Instantly update documentation to an entire plant by storing manual, data sheet, help files on one server
- Link directly to OEM Web pages for machine updates
- Remotely monitor SCADA programs while reducing SCADA licensing costs

Third-Party Device Support Solutions

✓ More than 100 drivers supported, including:

- AB native tag support for EtherNet/IP
- Modbus, Modbus Plus and Modbus/TCP
- Siemens, including PROFIBUS and MPI
- GE serial and ethernet
- Mitsubishi, Automation Direct/Koyo, Omron
- Bar-code and 2-D readers
- PLCs, temperature controllers, inverters and drives
- Fieldbus support: CANopen, DeviceNet

And many more . . .

From the Factory Floor to the Co

AGP3000 Operator Interfaces & LT3000 Logic Controllers

Advanced HMI Development

- ✓ One HMI development package
- ✓ Includes built-in logic editor for HMI Plus Control models
- ✓ Multiplatform solution: Supports both dedicated operator interfaces and open-platform industrial PCs

A complete, out-of-the-box, mul

Corporate Enterprise and Beyond

Enterprise-wide Data Management

- ✓ Cost-effective data connectivity solution
- ✓ Data collection and data sharing
- ✓ Internet data access and monitoring

Data management software

Pro-Server EX

tiplatform HMI solution package

Enterprise-wide Data Management Solutions

- ✓ **Pro-Server EX**
 - Use Pro-Server EX to enable multiple AGP HMI units to share PLC, fieldbus or HMI data over an ethernet network
 - Upload log data, recipes, images and production data to a back-office computer/server
 - Integrate shared data into Excel®, Access™ or ODBC databases, such as Oracle, wherever it is needed in the enterprise
 - Supports DDE, DLL, Access™, Excel®, OPC, SMTP e-mail, ODBC, SQL, MES and API interfaces
 - Pro-Server includes 29 predefined Excel® productivity reports
 - Use Pro-Server's API to integrate HMI data into your in-house Visual Studio™ application
 - Take advantage of instant health-alert system from select Pro-face industrial computers, reducing unscheduled system shutdowns

Internet-Based HMI Solutions

- ✓ **FTP server (built-in for ethernet models)**
 - Upload or download recipes, log files, sampling data, images, etc. to AGP CompactFlash® or USB memory device using a Web browser or FTP client
 - Secured file access using user ID and password features
 - Reduce travel costs by making maintenance changes remotely without having to be on-site
- ✓ **Web server (built-in for ethernet models)**
 - View active and historical alarms
 - Modify PLC tag or HMI symbol values
 - Use RSS alarm feed feature. Sends alarm data updates to you without the need to be logged into the AGP HMI unit.
 - View AGP HMI driver and runtime versions
 - Launch an FTP connection to the AGP to download or upload files
 - Launch GP-Viewer EX (if installed)
- ✓ **Remote access and control (GP-Viewer EX)**
 - Monitor, interact and control multiple AGP operator interfaces on a factory floor from a remote PC
 - View the same or different AGP HMI screens as the local operator
 - Remotely view production line status or diagnose problems without expense of traveling to site
 - Used as a remote operator training tool by equipment builders

Easy Maintenance Solutions

Update AGP3000 units in the field using multiple cost-effective methods. Updates can be done in the field without need for software on-site.

- ✓ **Updating field-installed HMIs**
 - Via USB memory device or CompactFlash® memory card
 - Via ethernet, USB cable, modem, serial port

Powerful Networking at Your Fingertips

HMI software solutions

Screen Editor
GP-Pro EX

Friendly HMI development environment software

GP-Pro EX software supports:

- All AGP3000 units
- All LT3000 units
- All AST3000 units
- Built-in logic editor for C-Class models
- PS3000 with WinGP

Pro-Server EX

Enterprise-wide data collecting, sharing, connectivity solution

Application software for sharing user-defined factory-floor data throughout the corporate enterprise

✓ GP-Viewer EX

- Remotely monitor and control HMI unit screens from the Internet or via an intranet

✓ WinGP

- On-demand operator interfaces
- GP-Pro EX runtime for Pro-face PS3000 Windows®-based PCs

✓ RPA software

- Harness the power of a PC through your dedicated HMI
- Access files and documentation located on a remote PC

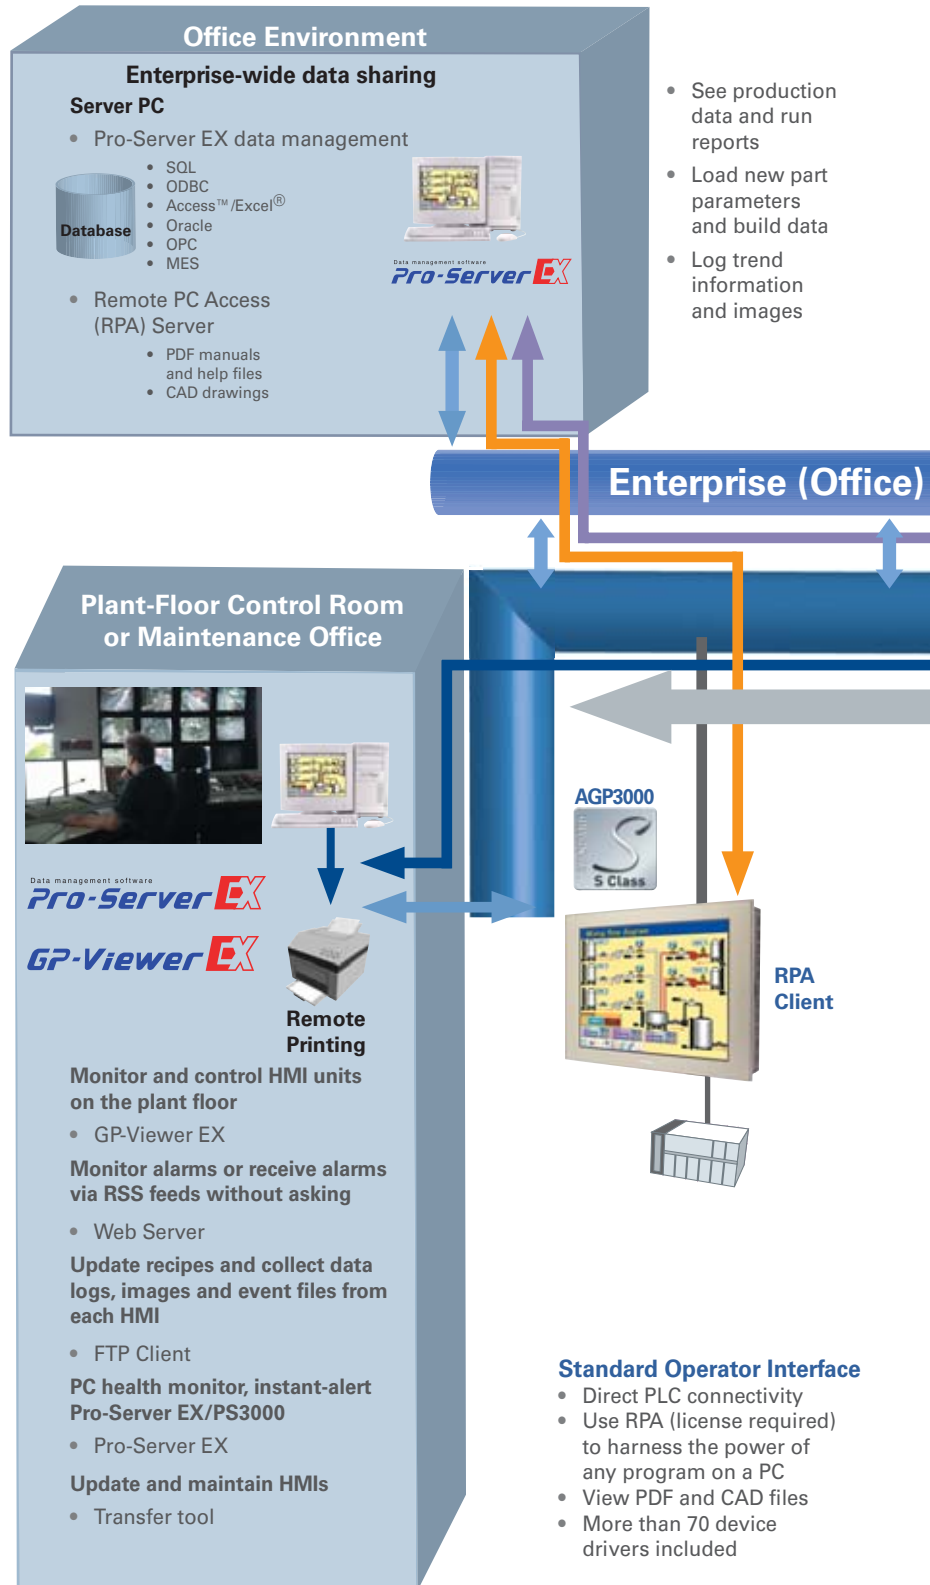

✓ Movie converter

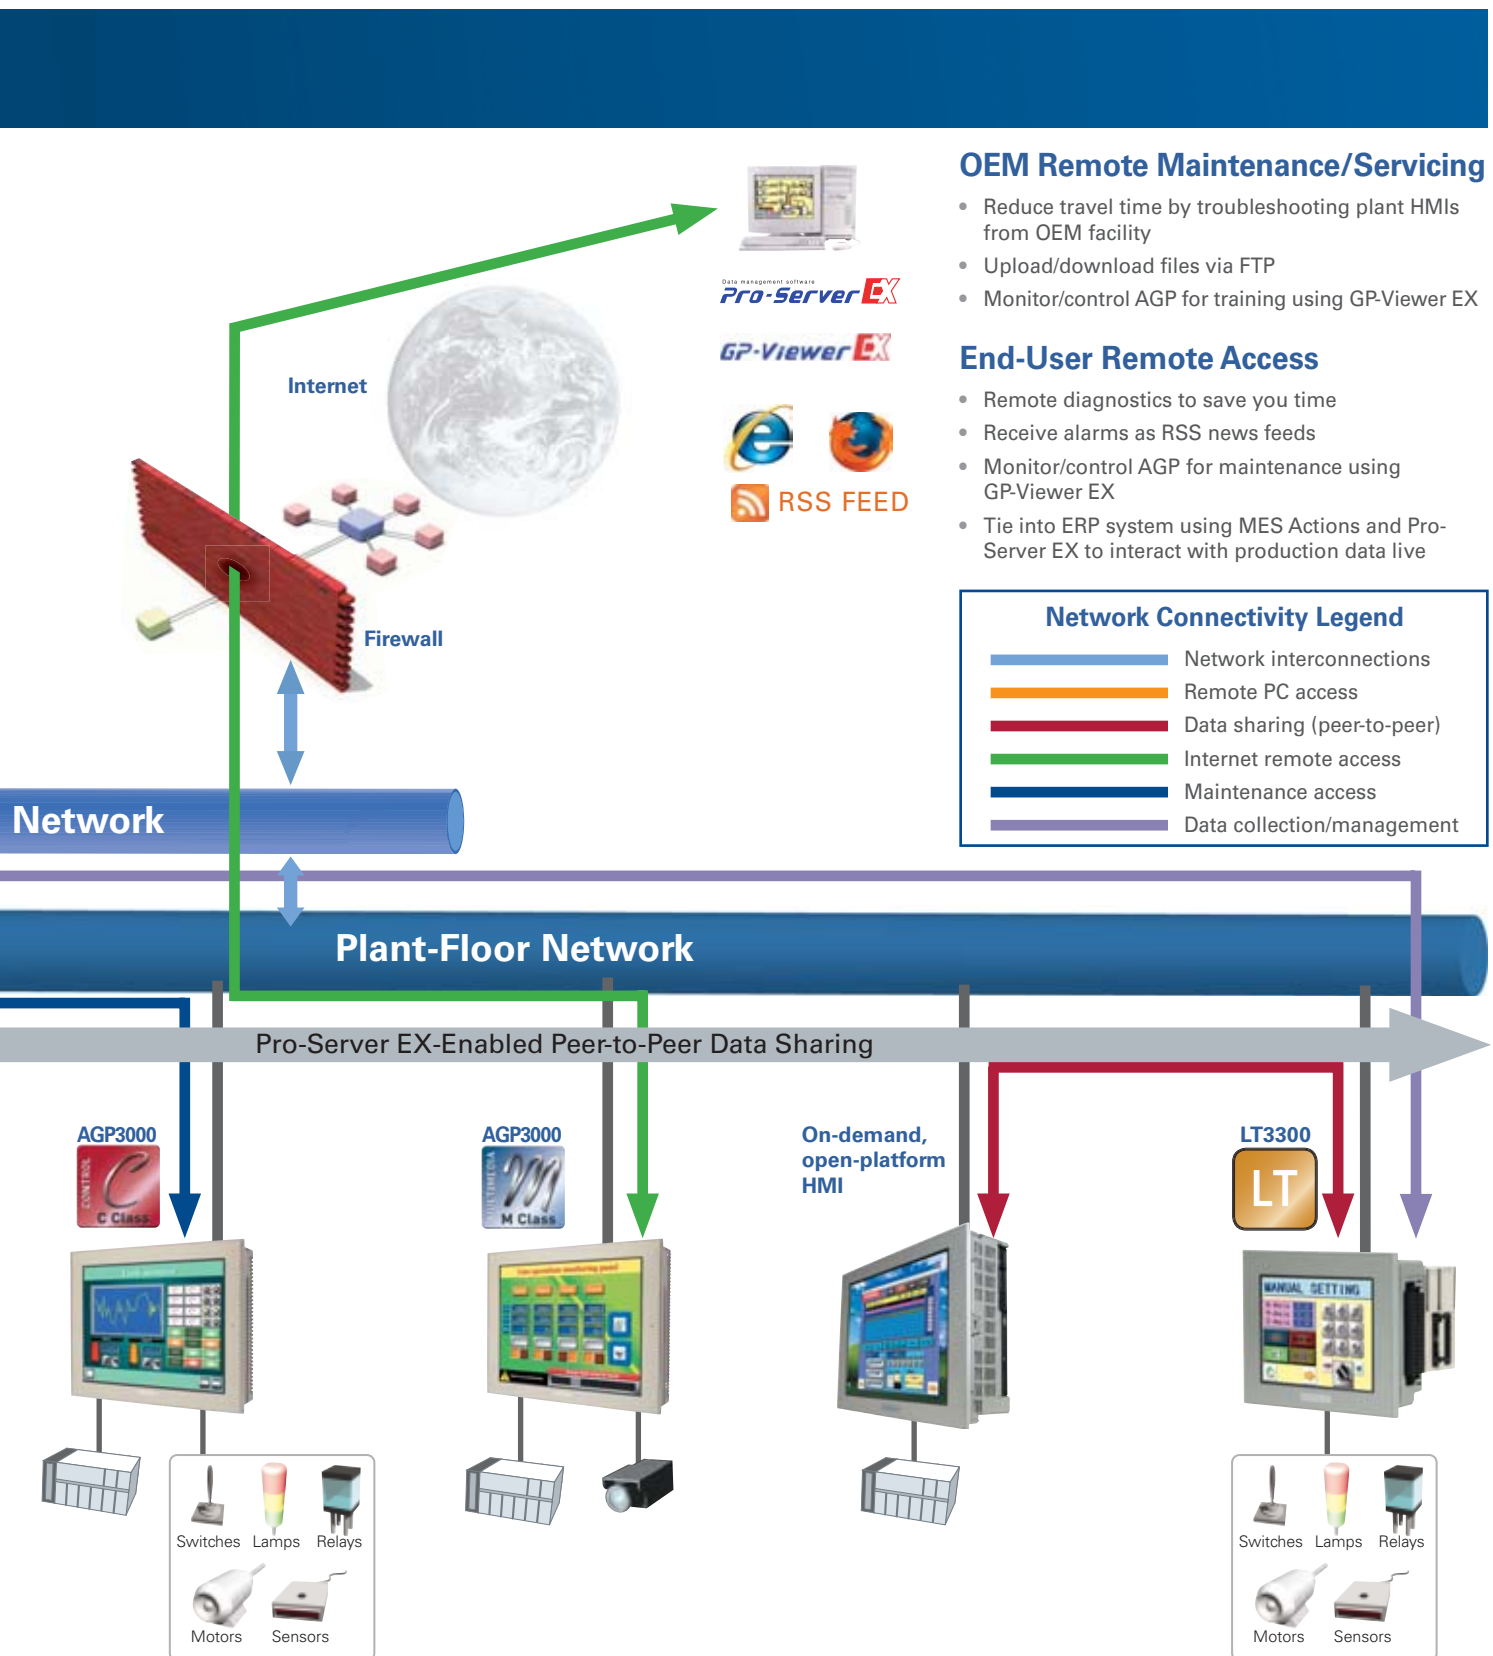

- Convert training and maintenance videos for viewing on AGP3000 displays

✓ MES license software

- Manufacturing Execution System license for Pro-Server EX

Right technology, right solutions

OEM Remote Maintenance/Service

- Reduce travel time by troubleshooting plant HMIs from OEM facility
- Upload/download files via FTP
- Monitor/control AGP for training using GP-Viewer EX

End-User Remote Access

- Remote diagnostics to save you time
- Receive alarms as RSS news feeds
- Monitor/control AGP for maintenance using GP-Viewer EX
- Tie into ERP system using MES Actions and Pro-Server EX to interact with production data live

Network Connectivity Legend

- Network interconnections
- Remote PC access
- Data sharing (peer-to-peer)
- Internet remote access
- Maintenance access
- Data collection/management

Operator Interface Plus Control

- Lower installation and setup costs
- Built-in ladder logic to enhance or replace the PLC
- Logic to reduce PLC processor loading

Operator Interface Plus Multimedia

- Video recording and playback across the network
- Inform operators and keep them safe

Open-Platform HMI: WinGP

- Pro-face PS3000 Series with WinGP
- Direct PLC connectivity
- Interact with Windows programs
- Perform "data concentrator" functions
- Instant-alert PC health monitoring

Standalone Operator Interface Plus Control

- Built-in and expansion I/O to replace the PLC
- Operator interface functions
- Powerful data collection

Building a Complete HMI Solution

Start With the HMI Development Software

Create Your Application
in Minutes

Easy as 1, 2, 3, 4

Four Simple Steps

Development

1. Set up communications

- Choose and set up PLC and third-party devices effortlessly
- System settings are logically arranged and easy to find

2. Design application/screens

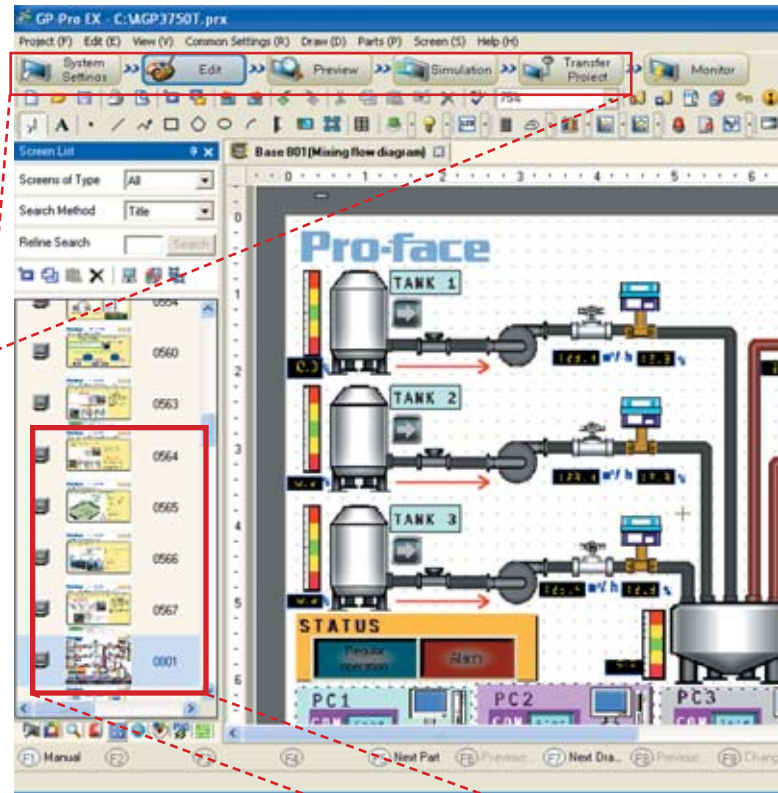

- Drag-and-drop addressing, parts and colors
- Efficient features to reduce development time
- Create consistent look and feel using the user-defined templates

3. Simulate and test

- Verify before you travel
- Debug your application without hardware
- Test without downloading

4. Download/transfer

- Tamper-proof HMI application – password-protected project source

Thumbnail View

- Visually select the screens you need
- Updated instantly
- Screen number and descriptive label are shown for clarity

Visual PLC Addressing

- ✓ Smart visual address mapping for fast PLC-address-to-part communication connections
- Drag and drop PLC address onto part to quickly link controller address to push button, tank, graph, etc.
- Gives a quick visual check on how each part is mapped to controller or I/O device
- Significantly reduces screen development time
- Quick indication of what controller addresses are still available

GP-Pro EX

Intuitive HMI Screen Development Editor

Extensive Time-Saving Features

Create consistent look and feel, detailed applications in minutes!

Resolution Conversion

- Adjusts HMI application to different screen sizes

Configurable Toolbars

- Show the toolbars you use most frequently; hide the ones you don't to free up more workspace

Workspace Tabs

- The tools you need at your fingertips
- Quickly see screen thumbnails, system settings, properties, address map, search-and-replace and more

Headers and Footers

- One-click access to multiple user-defined headers (e.g. title) and footers (e.g. menu) for perfect placement. Edits to headers/ footers update all screens simultaneously!

Multifunction Switches

- Execute multiple actions with one switch
- No need to stack switches, leading to possible operator error
- Choose Bit Switch, Word Switch, Special Function, change screen, etc.

Built-in Flexibility

Development

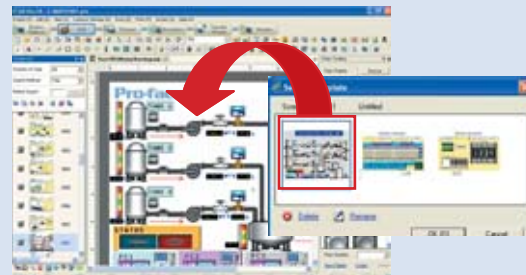

Property Window

- Quickly make changes to multiple objects with a single mouse click

Templates

- Reuse complete screens with addressing
- Create your own
- Build entire applications by using templates
- Perfect for OEMs

Search and Replace

- Easily find text anywhere in the application
- Quickly replace addresses or text throughout the application

Tabbed Interface

- Just like your Internet browser, tabs allow you to keep multiple screens, settings and other windows ready to use

Time-Saving Features

Tools to Build an Expandable HMI

Complete tools for the job...

Development

Right Technology (OEMs)

Easy Bar-code and 2-D Matrix Setup

- As simple as enabling the COM port the reader is connected to
- Data is instantly displayed on the screen or can be logged
- Use for parts tracking or identifying machine operator

CF/USB Memory Support

- OEM machine field upgrades – no software needed
- Log critical data for later retrieval and analysis
- Store images and movies

Powerful D-scripting

- Extend your serial communications capabilities!
- Write your own simple ASCII protocol to communicate to custom controllers and third-party I/O boards and interface to legacy plant-floor equipment
- Create data logging algorithms – log to internal memory, CompactFlash®, or print directly from AGP's touch screen, etc.
- Develop custom functions (macros) to execute a sequence of events

Select from various types of triggers for maximum flexibility of operations.

Right Solution (End Users)

Trending

- Logging to internal memory, CF card or USB memory
- Historical or real-time
- Up to 16 pens per trend
- One-touch trend to see value
- Pause
- Zoom
- Scroll

Alarms

- Quick visual of current, event-triggered and historical alarms
- Alarm summary
- Acknowledge alarms
- Trigger help images or movies

Recipes

- ✓ Create hundreds of recipes and load them from internal memory or CompactFlash® (CF) card
 - View all recipes on one screen, or use multiple screens
 - Transfer recipe values to and from PLC
- Create recipes via CSV files and transfer to AGP3000, or write recipes in Excel® or other documents

Security and Operation Log

- Log user ID and level to track changes

Pop-up Keypads

- Prebuilt, or design your own pop-up keypads
- Use with touch-screen or USB keyboard
- Numeric or alpha-numeric

Extensive Image Parts and Symbol Library

- More than 1,800 high-quality 3-D parts provide international recognition, overcoming language barriers
- Users can use the predefined parts or create their own
- Drag and drop directly from the library to the screen, reducing the number of mouse clicks required to create a screen
- Import JPG and BMP image files to create highly detailed HMI machine applications

Image Import

- Show machine graphics
- Help diagrams
- Exact location of maintenance zones

.JPG,
.BMP,
and .PNG

Choice of technology: Pick the right HMI for the application

Dedicated operator interfaces
for the factory floor:

- ✓ AGP3000
- ✓ LT3000
- ✓ AST3000

Windows-based for on-demand HMI:

- ✓ PS3000 Series with WinGP
- ✓ Works with third-party SCADA/
vision/motion and SPC

Multilanguage

- Supports up to 16 different languages simultaneously
- English, French, German, Russian, Spanish, Japanese, Chinese languages, and more
- Operators can view all screen images in the language of their choice

Time Scheduling

- Standardize equipment start-up times
- Monitor productivity from each production shift
- Set up periodic routine maintenance schedules
- Use time scheduler to limit access to machine operations

Cameras

- Stream video via NTSC/PAL video or over ethernet¹
- Collect pass/fail and other data via ethernet

¹ Check driver list for supported cameras

Putting It Together

- ✓ AGP3000 or AST3000 S Class, or PS3000 with WinGP installed
- ✓ GP-Pro EX software
- ✓ PLC cable:
see Accessories

The Value of a Multimedia HMI

Multimedia adds video and audio recording and playback

Efficient information at your fingertips!

- ✓ **Reduce downtime**
 - By recording video, find the cause, not the symptoms, quickly
 - Any alarm can trigger a movie playback to show operators how to resolve problems in the shortest time possible
- ✓ **Educate the workforce**
 - Reduce damaging mistakes, put training at their fingertips
- ✓ **Training where/when operators need it**
 - Make training available any time
 - New operators can rewind and playback training examples as often as needed
- ✓ **Faster maintenance**
 - Show maintenance staff the exact repair location and proper procedures
- ✓ **Improve communication**
 - Allow operators to leave messages for other shifts
 - Keep an online journal of machine activities
- ✓ **Improved safety**
 - Keep operators away from potential hazards
 - Put a camera where a person shouldn't be, remote monitoring

Make your workforce more efficient and cut down on costly 24/7 on-site technical support and training.

- ✓ **Capture the moment**
Record the events that lead to machine breakdown
- ✓ **Keep operators trained**
Provide the latest procedures at their fingertips
- ✓ **Convey information fast**
A picture is worth a thousand words; a video is worth a thousand pictures

Provide clear instructions to operators and maintenance personnel

Find root causes fast – see what happened before it happened

Reduce Downtime

- Like an airplane “black box,” record the events that led up to a fault, before the fault occurred
- The Event Recorder feature reduces the time required to find the root cause, and not the symptoms

Occurrence of a predefined event triggers GP-Pro EX to record and store videos of events before and after the occurrence (max. 120 sec.)

Fast & accurate troubleshooting

Safe and informed employees work better

Educate the Workforce

- Provide training any time, with no need for a special time or classroom.
- Refresher instructions are an easy way to keep production running smoothly
- Provide critical safety information in a clear way, right at their fingertips

It's easy to add movies to on-site instruction screens for better comprehension.

And now, you can create movie files with commercially available video software.

Note: Movie files you create must be converted with the Movie Converter EX converter tool, which requires the purchase of a license.

Whoever said, “You can’t be in two places at once” didn’t have a Pro-face AGP3000

Keep Operators Efficient

- With four camera inputs, the video mix unit keeps operators in a central location and visually shows how the rest of the machine is running
- Reduce walking time around long or large machines
- See into otherwise uninhabitable locations

Note: Not all models can connect the VM unit. Supported by AGP 10.4" and 12.1" TFT-type M, C and S classes.

Putting It Together

- AGP3000 M Class
- GP-Pro EX software
- PLC cable
- Movie Converter software (optional)
- Camera & microphone
- User-created training/help videos

Grow Your HMI Functionality: The Operator Interface Plus Control

Ladder logic and I/O directly from the HMI reduces the number of components to purchase, install and learn

Reduce system costs

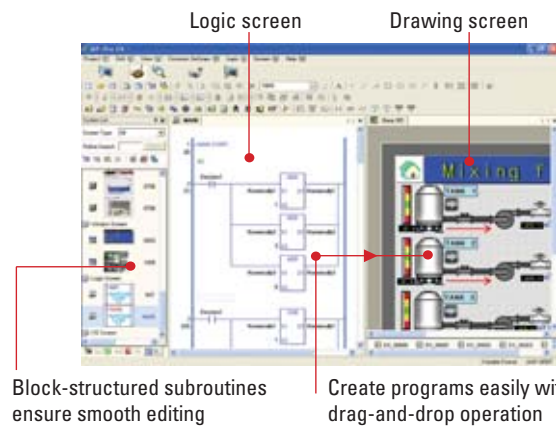

- ✓ **Eliminate the PLC**
 - Combine HMI and PLC functionality into one platform
 - Several I/O types to choose from
- ✓ **One software for HMI and logic**
 - IEC61131-3-compliant ladder logic
 - More than 100 ladder instructions supported, including PID, trigonometric and program control functions
- ✓ **Reduce part count**
 - Reduce the time to install
 - Hardware
 - Software
 - Wiring
- ✓ **Easier development and troubleshooting**
 - One database for all variables
 - No need for exporting and importing between packages

Save time and \$\$\$.

Simplify your system without losing speed and functionality.

Develop logic and HMI screens side-by-side

- ✓ Drag and drop between logic and screens
- ✓ Save costly "fat-finger" mistakes
- ✓ See everything you need without switching programs
- ✓ One database to save you time

NEW! Added instructions for greater ease of use

3 I/O options to choose from:

Reduce costs by reducing component count

EXAMPLE SAVINGS:

PLC	\$	600
PLC Software	\$	600
Annual Contract	\$	1,500
Labor	\$	500
Training	\$	2,000

TOTAL \$ 5,200

Putting It Together

- ✓ AGP3000 C Class
- ✓ GP-Pro EX software
- ✓ PLC cable
- ✓ Flex Network modules or HTB (CANopen slave) modules
- ✓ Flex Network or CANopen cables

Powerful Ladder Logic Instructions

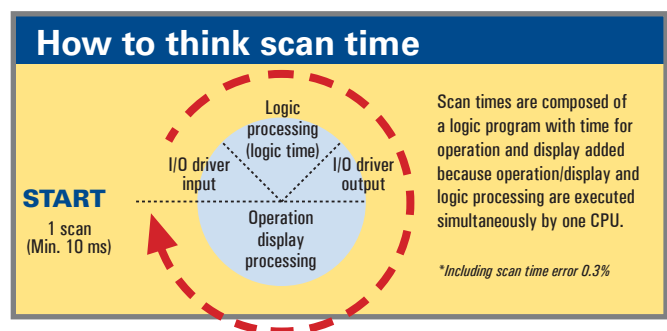

Category	Instruction Name	Instruction Notation	Ladder Symbol	
Basic Instruction	Bit Basic	Normally Open	NO	
		Normally Closed	NC	
		Out	OUT

Convert Instruction	Convert Real to Float	R2F <*P>		
	Convert Seconds	H2S <*P>		
	Convert Seconds to Time	S2H <*P>		

*Instructions with <*P> correspond to positive transition instructions (differential transition). By adding P to the end of each instruction notation (LMP, etc.), you can use the instruction as a positive transition instruction (e.g., JMPP, JSRP, etc.).

Tools for Remote Connectivity and Access

Internet HMI solutions: Your global connection!

Off-site OEM or on-site control room remote access tools, saves you time. Don't travel to the plant or walk to the production floor when you can access the information you need from your office.

GP-Viewer EX

- ✓ Remotely access and control AGP unit screens
 - View HMI screens remotely: synchronously (same screen as operator) or asynchronously (independent screens from local operator)
 - Great for OEM remote troubleshooting and travel reduction
 - Great for control room supervisor access, viewing alarms or graphs
 - Easy screen-capture capability for project documentation. Access audio and image files on CF/USB storage

Web Server

- ✓ View AGP information and alerts through a Web browser
 - View AGP alarms on any PC via Web browser or RSS reader
 - Remote troubleshooting, Web viewing of alarms; subscribe to alarm RSS feeds
 - View PLC and internal addresses for troubleshooting
 - View the screens in GP-Viewer EX while monitoring values on the AGP in a Web browser

FTP Server

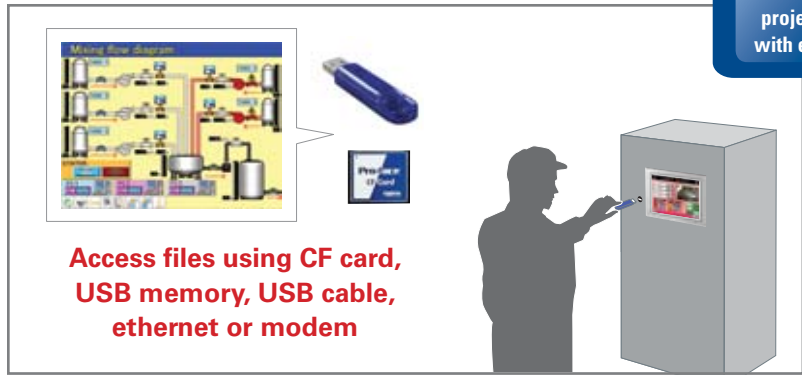

- ✓ Use a standard FTP client to update/retrieve data
 - Remotely read/write alarm, image, sampling data, recipe and video files on the CF card or USB memory
 - Remotely collect alarm or log information
 - Reduce travel to customer site

FTP Server

Transfer Tool

- ✓ Included and freely distributable project download utility
 - Great tool for maintenance personnel to transfer project to or from the HMI
 - Upload/download files from CF/USB storage
 - Allows OEM to transfer projects to end users without providing development software
 - Display model, driver & project information for troubleshooting

Transfer projects with ease

Remote PC Access (RPA)

- ✓ Harness the power of a PC from your dedicated HMI
 - View PDF, CAD, DOC, XLS or any file type located on a remote server PC
 - Instantly update documentation to an entire plant by storing manual, data sheet, help files on one server
 - Link directly to OEM Web pages for machine updates
 - Remotely monitor SCADA programs while reducing SCADA licensing costs

Control a remote PC from HMI

Stop traveling to remote sites – update and troubleshoot from your office!

Enterprise-wide Data Management Solutions

Data management software

Pro-Server EX

Data Management

Enhanced data collection and connectivity software

✓ Applications

- Share data with production and maintenance groups
- Share HMI data with another HMI
 - Peer-to-peer
- Write/log data to/from PLC
- Send instant e-mail alerts
- Collect and write data to Excel®, CSV or databases

✓ Collect and manage data

- Up-to-the-minute production data
- Upstream status information
- Necessary raw material requirements
- Snapshot images of machine faults or instructions

✓ Connectivity Support

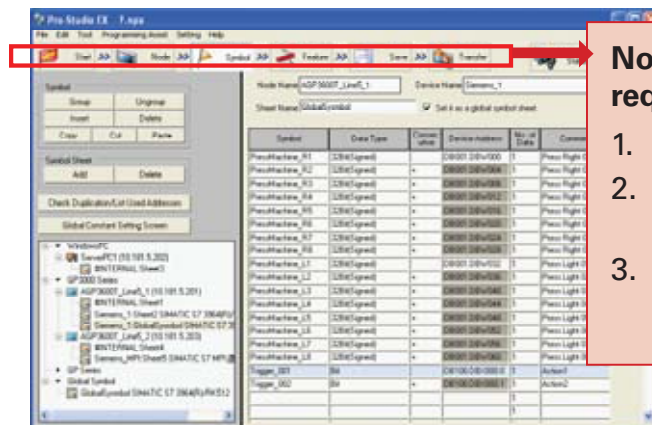

- OPC DA server
- DDE
- DLL
- API (VB, VB.NET, VC, C#.NET)
- Access™/Excel®
- ODBC, SQL, Oracle
- E-mail via SMTP
- MES actions

Collect and view up-to-the-minute, accurate data to optimize your productivity.

Information where you want it, when you want it

- ✓ Data collection/management
- ✓ Reporting
- ✓ Data sharing
- ✓ Remote IPC health monitoring
- ✓ Enterprise integration
- ✓ Save thousands of dollars per year

Fast and simple

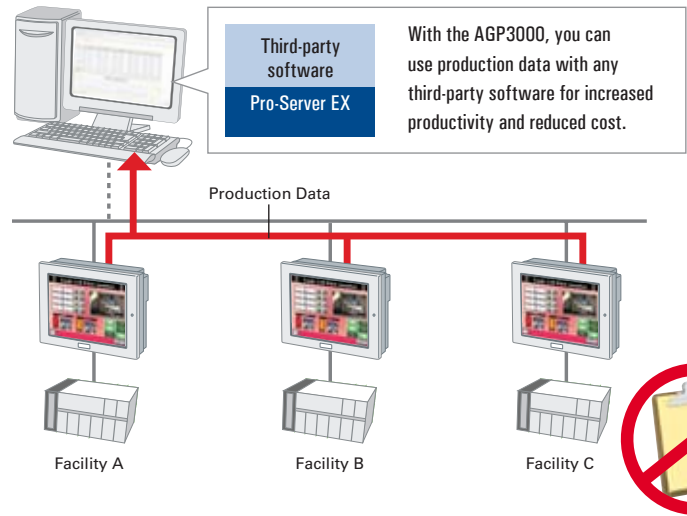

No programming required

1. Select data
2. Choose data operation
3. Update network

- ✓ Fill in the blank data configuration, no programming!
- ✓ Built-in templates save you time and get you started quickly
- ✓ Share data with Windows®-based applications
- ✓ Automatically puts DDE scripts into clipboard, ready to paste directly into Excel®

Data collection/management

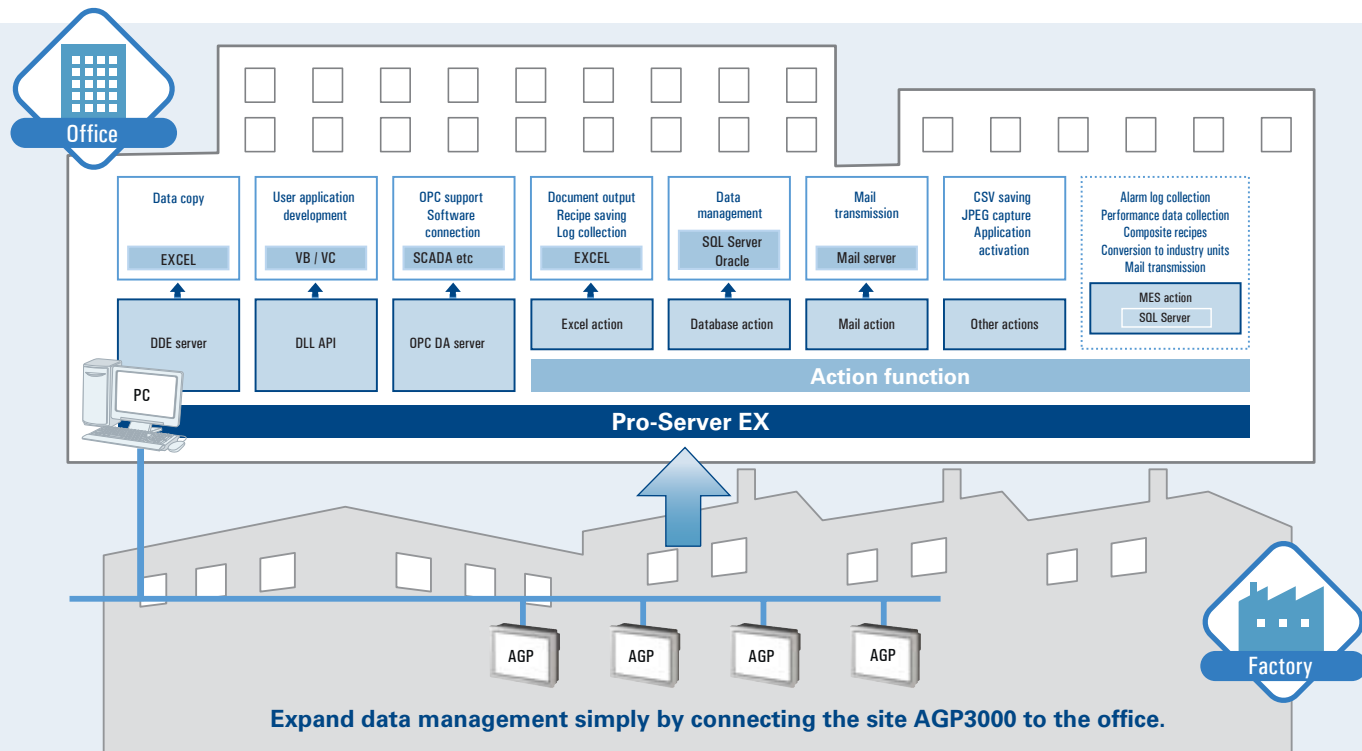

- Collect data on a remote server
- In plant or across the Internet
- Send data to another department or around the world in real-time
- Update recipes/production parameters remotely
- No more clipboard collection of data

Enterprise integration

- Connect to existing enterprise system
- Enhance existing designs
- Use common communication methods

✓ OPC DA server	✓ DDE
✓ API (VB, VB.NET, VC, C#.NET)	✓ DLL
✓ Access™ /Excel®	✓ ODBC, SQL, Oracle
✓ Image management	✓ PC health
✓ E-mail via SMTP	✓ MES

Data Where You Need It

Reporting

- Includes 29 easy-to-use Excel® report templates
 - ✓ Daily/monthly/yearly reports
 - ✓ Shift downtime
 - ✓ Failure data rates
 - ✓ Preparation time graphs
- Use prebuilt templates or customize

Data sharing – Interdevice communication

- Enable peer-to-peer data sharing
- Act as a gateway between HMIs or different brand PLCs
- Send build data directly from one HMI to the next

**Across the plant or across the world,
let Pro-face data management solutions work for you!**

Data management software
Pro-Server EX

Pro-Server EX Remote PC Monitoring

Instant Alert Notification:

Keep your machine/process running

Reduce Downtime:

Use Pro-face industrial PCs with remote health monitor

- Instant notification of Pro-face industrial PCs' health status
- Open-platform HMIs alerting you before problems occur
 - ✓ CPU and core voltages
 - ✓ Fan RPM
 - ✓ Temperatures
 - ✓ Backlight
 - ✓ SMART hard-disk monitoring
- Power off the PC remotely in a controlled manner
- The PC knows what's happening before you do – let it tell you!

Control Room

Data management software

Right-Size Operator Interface Solutions

Multimedia M Class:

Operator interface with video/audio recording/playback to reduce downtime and increase safety

Control C Class:

Operator interface and PLC controller all-in-one solution. Simplify your machine design while reducing overall system cost.

Hardware

SIO 2ch Serial Interface

COM1: RS-232C/RS-422/RS-485 serial interface. D-SUB 9-pin male connector. Communication method can be switched via software.

COM2: RS-422/RS-422/RS485 serial interface. D-SUB 9-pin female connector.

USB (Host) USB Interface (Host)

USB interface. Can be connected to USB printers, USB bar-code readers, keyboards, memory and a mouse.

CF Card CF Card Interface

Use CF cards to support data logging, recipe data and "travel-free" field updates.

Ethernet Ethernet Interface (LAN)

Ethernet communications (10-BASE-T/100 BASE-TX) interface. IEEE 802.3u-compliant. Accepts RJ-45 modular jack connector (8-pin).

Expansion Unit Expansion Unit Interface

For fieldbus networking modules, e.g. DeviceNet™, PROFIBUS communication.

VM Unit Video Mix Unit Interface

The VM unit can be connected through this interface. Four cameras can be connected to one unit.

AUX SoundOut AUX/Sound Output Interface

This interface accommodates external reset, alarm output, buzzer output and sound output.

Standard S Class:
Operator interface with extensive communications and networking capability

AST and LT Classes:
AST: Entry-level operator interfaces with serial ports and many powerful features
LT: OEM HMI touch controllers ideal for standalone machines

Hardware

Video Input Interface

Stream or record live video to solve problems quickly. See "inside" the machine or process.

DIO Interface

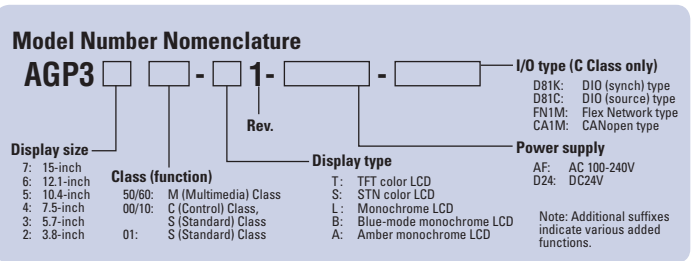

Reduce system cost by connecting directly to switches, lamps and stack lights.

Sound Input Interface

Record audio to leave messages/instructions for other operators.

FLEX NETWORK/CANopen Interface

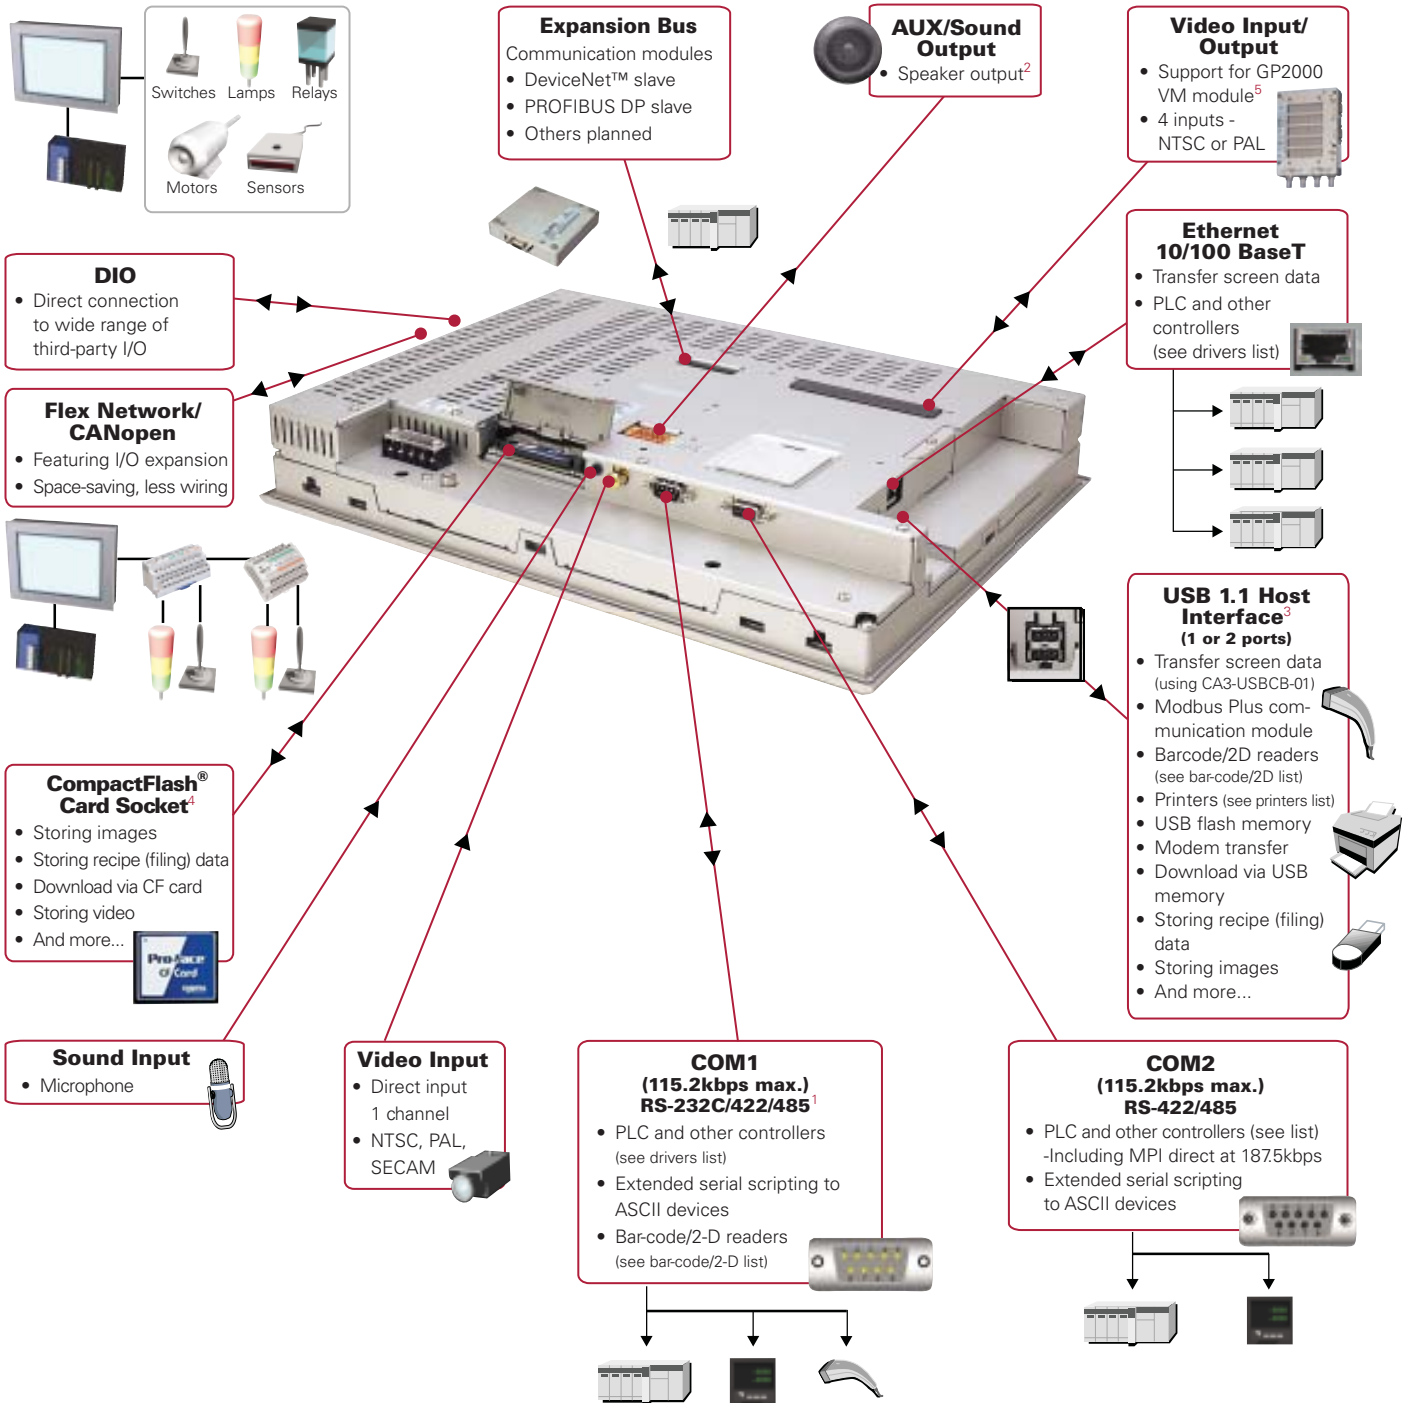

Distributed I/O architectures reduce wiring and installation costs by putting I/O where you need it.

Interface to Anything on the Factory Floor

The only HMI you need

The AGP3000's extensive array of connectivity options makes it easy to standardize on one HMI family

¹ AGP3302-B type model only has RS-232C asynchronous transmission

² AGP34xx, 35xx, 36xx and 37xx models include AUX/sound outputs

Sounds must be converted from .WAV format

³ Requires CA3-USBCB-01 for transfer of screen data

⁴ Not available on 3302B or 32xx

⁵ Compatible with AGP35xxT and 36xxT TFT display models only

• These interfaces represent the entire line of AGP3000 products. See data sheets for individual model specifications.
 • USB - See driver list for supported third-party devices
 • Up to four PLC protocols simultaneously (AGP33xx supports two).
 • Please refer to documentation for allowable configurations.

**Right-size,
right-technology
solutions**

**Consider your HMI
requirements for today
and tomorrow:**

• *What size displays do you need?*

• *What PLCs/protocols will you use?*

• *What ports (serial, ethernet,
USB, etc.) do you need?*

• *What other devices will you
need, ie bar-code, temperature
controllers or other third-party
devices?*

Operator Interface Plus Control: All-in-one-box solution

Reduce cost by reducing component count

- One development software for both ladder logic and screen graphics
- Built-in I/O interface
- Use industry-standard I/O

EXAMPLE SAVINGS:

PLC	\$	600
PLC Software	\$	600
Annual Contract	\$	1,500
Labor	\$	500
Training	\$	2,000

TOTAL \$ 5,200

Diagnostics at your fingertips

- Monitor built-in ladder logic without a laptop
- See logic flow and variable values
- No more guessing of the machine's status

Logic monitoring for AGP3000 C-Class units

Logic Display

Display ladder logic program on the operator interface so you can check status and troubleshoot without a laptop

Address Display

Display addresses used in logic program. See current values and real-time updates

Read/write PLC data directly

- Provides convenient access to PLC behind locked cabinet door
- Increase safety: Eliminate the need for personal protective equipment (PPE)
- Instant access to all I/O by creating only one graphic button

PLC Device Monitor

Display I/O from any PLC or controller without creating extra operator interface screens

Change PLC Values

Change PLC I/O, bit or word values without the need for a laptop

Not supported by EtherNet/IP™ native tag driver. Check the Pro-face Device PLC manual for details.

¹DIO: D81C=Source, D81K=Sink ²Flex Network compatible with FN distributed I/O modules

C-Class models with built-in discrete I/O

AGP3000 D81C or D81K models

- Reduces system cost by eliminating need for PLC in simple control applications
- I/O is built-in, with no extra modules needed for connection to local I/O
- Directly connect to buttons, limit switches, lamps, sensors or indicators
- Supports
 - 6 inputs/2 outputs (choose sink or source models)
 - I/O update rate = 10ms (minimum)
- Control a stack light or buzzer directly from the HMI

- ✓ Connect directly to I/O
- ✓ Eliminate or enhance the PLC
- ✓ Ladder logic included

C-Class models with Flex Network interface

AGP3000 FN1M models

- Pro-face dedicated I/O network for use in distributed I/O applications
- Uses low-cost, industry-standard, twisted-pair network wiring
- Supports:
 - 256 discrete inputs and 256 discrete outputs (512 bits)
 - 64 analog inputs and 64 analog outputs (128 words)
 - I/O update rate = 10ms (minimum)
 - Distance of up to 200 meters
- Reduces system cost by eliminating need for PLC in simple control applications

- ✓ Connect directly to I/O
- ✓ Eliminate or enhance the PLC
- ✓ Ladder logic included

Use any mix of Flex Network distributed I/O modules

Flex Network FN modules Discrete I/O

8-Relay

8-relay discrete output, 1 common
FN-Y08RL41

16-Point

16-point discrete input, 16-point sink transistor output
FN-XY16SK41

16-Point

16-point discrete input, 16-point source transistor output
FN-XY16SC41

32-Point

32-point discrete input
FN-X32TS41

32-Point

32-point discrete input, 32-point sink transistor output
FN-XY32SKS41

Analog I/O modules

2-Channel

2-channel analog input: 0-10VDC 0-20ma, 4-20ma
FN-AD02AH41

4-Channel

4-channel analog input: 0-10VDC, +/-10VDC, 0-20ma, 4-20ma
FN-AD04AH11

2-Channel

2-channel analog output: 0-10VDC 0-20ma, 4-20ma
FN-DA02AH41

4-Channel

4-channel analog output: 0-10VDC, +/-10VDC, 0-20ma, 4-20ma
FN-DA04AH11

NEW!

C-Class models with CANopen interface for distributed I/O

AGP3000 CA1M models

- CANopen-based network for use in distributed I/O applications
- Uses Pro-face CANopen slave (HTB module) or any third-party CANopen slaves
- Supports
 - 256 discrete inputs and 256 discrete outputs (512 bits)
 - 64 analog inputs and 64 analog outputs (128 words)
 - I/O update rate = 10ms (minimum)
 - Distance of up to 1000 meters
- Reduces system cost by eliminating need for PLC in simple control applications

Pro-face CANopen interface supports:

- Pro-face brand CANopen slaves (HTB)
- OR**
- Third-party CANopen slaves

Putting It Together

- ✓ AGP3000 CA1M C-Class unit
- ✓ GP-Pro EX HMI software
- ✓ HTB CANopen slave module
 - EXM I/O modules (optional)
- ✓ Third-party CANopen slaves

EXM analog and discrete I/O modules

Compatible with LT3000 units and AGP3000 C-Class CANopen units

Discrete input modules

- 8-Point**
8-point input module
EXM-DDI8DT
- 16-Point**
16-point input module
EXM-DDI16DT

Discrete output modules

- 8-Point**
8-point relay output module
EXM-DRA8RT
- 16-Point**
module
EXM-DRA16RT
- 8-Point**
8-point sink output module
EXM-DDO8UT
- 16-Point**
16-point sink output module
EXM-DDO16UK
- 8-Point**
8-point output source module
EXM-DDO8TT
- 16-Point**
16-point output source module
EXM-DDO16TK

Mixed discrete I/O modules

- 4-Point/4-Point**
4-point input / 4-point output module
EXM-DMM8DRT

Analog I/O modules

- 2-Channel**
2-channel analog input module
EXM-AMI2HT
- 2-Thermocouple or 2-Pt100/1-Channel**
2-channel temperature input / 1-channel analog output module
EXM-ALM3LT
- 2-Channel/1-Channel**
2-channel analog input / 1-channel analog output module
EXM-AMM3HT
- 1-Channel**
1-channel analog output module
EXM-AM01HT

LT3000 Series - Standalone Machine Controller

Reduce machine costs while increasing performance

- Reduce component count
- Eliminate PLC/custom controls
- Cut remote maintenance costs
- Eliminate multiple software packages and support

LT3000 Series - A space-saving control solution

Typical applications

- Motor speed control
- Wrapping machines
- Feeder machines
- Inspection systems
- Labeling machines

LT3000 Series Features

Touch-Screen Display

- Ideal for:**
- Tight spaces
 - Alternative to text displays

USB

- Data storage
- Bar-code input

Pulse Output

- Stepper: pulse out to 65 kHz
- Speed: up to 7,800 RPM
- Four-axis single-direction/Two-axis cw/ccw

Ethernet (LT3300 only)

- Ideal for:**
- Data collection
 - Remote reporting

Serial Port (LT330x only)

- Ideal for:**
- Temperature controllers
 - Drives and inverters
 - Multidrop communications
 - Sending/receiving ASCII

Expansion

- Expansion to 80 I/O points
- Ideal for:**
- Adaptive machine design

CANopen Master

(Requires optional communication module)

- Ideal for:**
- Interfacing to third-party CANopen devices
 - Enhancing your machine functionality

Built-in I/O

- 24 VDC
- Inputs for sensors, switches
- Outputs for - lamps, stack lights, valves

High-Speed Counter

- 100 Kpps input
- Ideal for:**
- Encoder output

OEM Solution Examples

Stretch wrapping

- Three drives
- Help menus
- Replace the PLC

Inspection system

- Tie into pass/fail vision sensors
- Metal detector
- Drive alarms and stack light

LT3000 I/O Options

Use built-in
or
CANopen I/O

LT3000 OEM HMI Touch Controllers

	Any/All	Any	Printer	ASCII text

Worldwide Service and Support

Service and Support Where You Need It

We have offices around the corner and around the world. We are there for you with our combination of channel partners, area sales managers, local field application engineers and a team of trained application engineers to support you before and after the sale. We're also there for you globally!

Restriction of Hazardous Substances (RoHS) is a directive of the European Union (EU).

ISO 9001:2000

Quality System Certified

ISO 14000

Quality System Certified

A global company with a local presence

Reliable operations worldwide

Pro-face products are known worldwide for their reliability, and they are just as reliable in your facility as they are everywhere else in the world. Our extensive certifications and global support network provide you complete peace of mind. Whether you're looking for HMI products for your own facility or for facilities around the world, Pro-face is there to serve you.

Committed to bringing you the best HMI products

No other HMI company will offer you more options, higher reliability or better investment protection than Pro-face. Pro-face strives to continually provide you with HMI products that have features you won't find anywhere else, like ultra-fast, 64-bit RISC processors for unmatched HMI performance, the ultimate in multimedia and connectivity capabilities, plus integrated data management solutions and other features proven to boost your productivity and reduce your costs.

Want to learn more about Pro-face?
