# Bipolar Transistors

# Digital Transistors

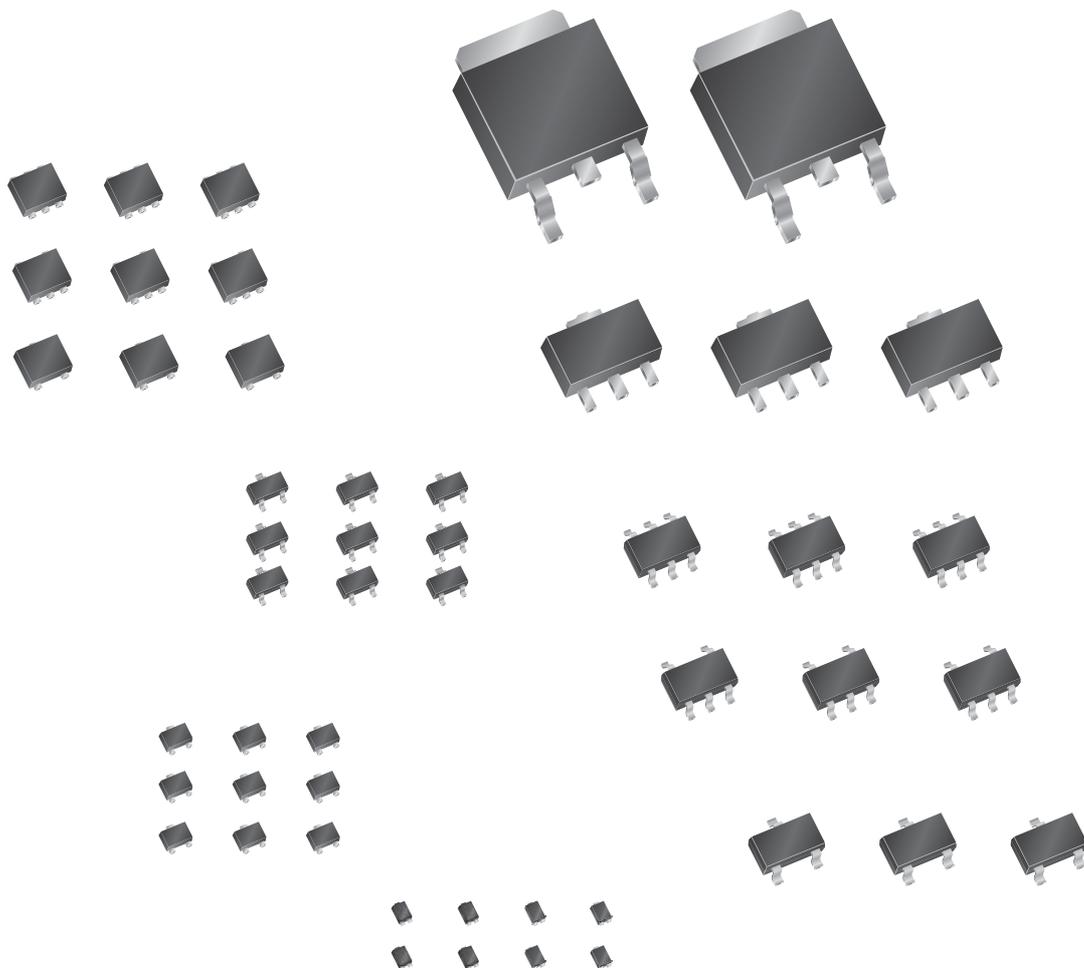

ROHM Co.,Ltd.

# Bipolar Transistors

ROHM bipolar transistors were developed to be energy efficient, highly reliable, and compact. A wide range of products are offered, from small-signal and low profile models to high power products.

# Digital Transistors

Digital transistors, pioneered by ROHM, incorporate resistor(s) for digital circuits. The broad lineup includes space-saving, ultra-compact types available in a range of internal resistance configurations.

# Ultra-Compact Package : VMN3

60% smaller mounting space,  
35% thinner

### Summary

This series of ultra-compact, low-profile transistors reduces mounting area by 60% and height by 35% compared with conventional VMT3 package types.

### Features

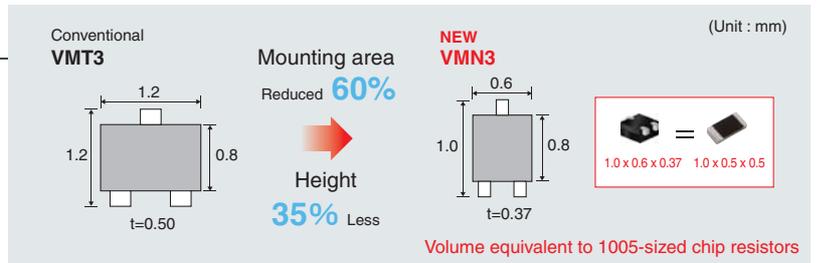

- Ultra-compact
- Low profile

### Applications

- Switching in portable devices

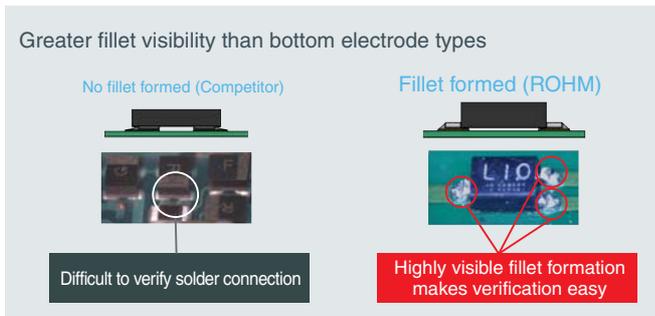

## Ultra-compact. Low profile.

Compared to the conventional VMT3 package (1.2x1.2, t=0.5mm), ROHM's new VMN3 (0.6x1.0, t=0.37mm) decreases mounting area by 60% and height by 35%.

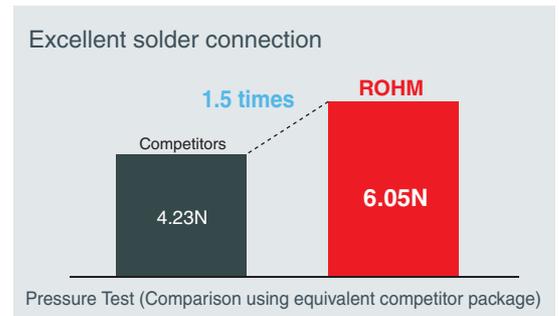

## Excellent fillet visibility and superior joint strength

# Compact Hybrid Package : VMT6

## Mounting space reduced 43%

### Summary

The new compact VMT6 complex package reduces mounting area by 43% over conventional EMT6 units and 50% compared to dual-VMT3 configurations.

### Features

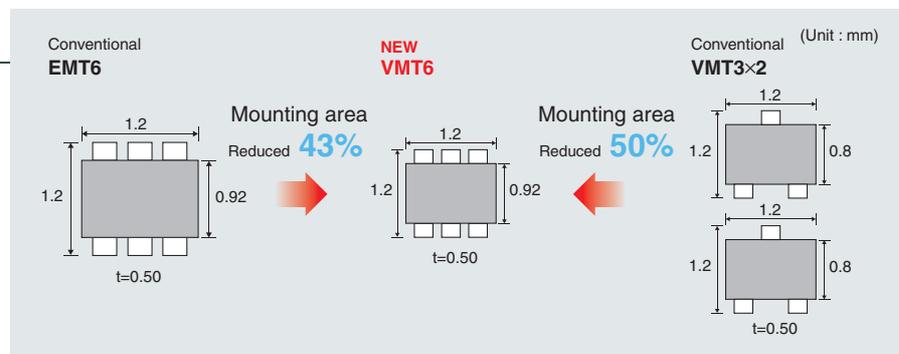

- Ultra-small
- Complex type

### Applications

- General-purpose switching applications in portable devices
- Current mirror circuits and more

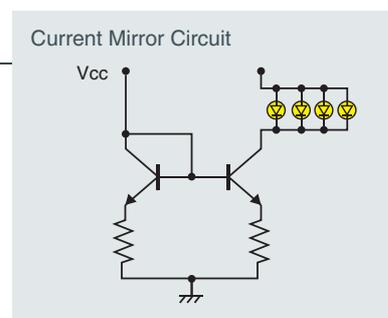

## Ultra-compact • Complex

The new VMT6 package reduces mounting area by 43% over conventional EMT6 types. In addition, making the product complex by adding an additional transistor element reduces package size by 50% over conventional dual-VMT3 package solutions (1.2x1.2, t=0.5mm).

## Guaranteed hFE characteristics

The hFE of both internal transistors are guaranteed to be nearly identical :  $h_{FE1}/h_{FE2} = 0.9-1.1$  (VT6T11, VT6T12, VT6X11, VT6X12)

# Complex Bipolar Transistors : MPT6

Mounting area and parts reduced by half

**Summary**

The new MPT6 package integrates two conventional MPT3 units, resulting in 50% smaller mounting area and 35% less height.

**Features**

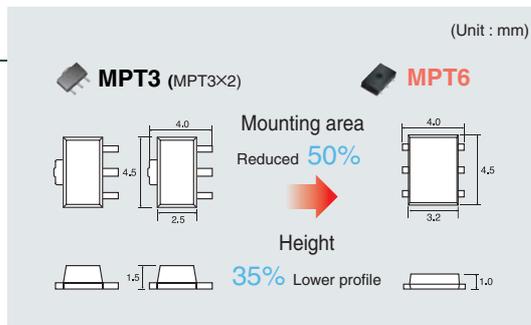

- Space saving

**Applications**

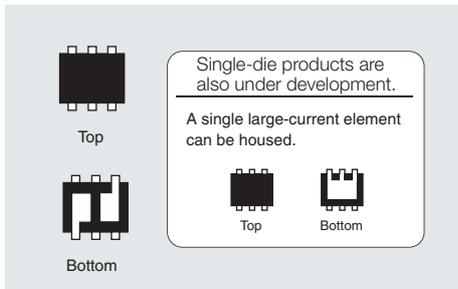

- Buffers
- Collector resonance circuits
- Motor drive circuits

## Thin, compact package

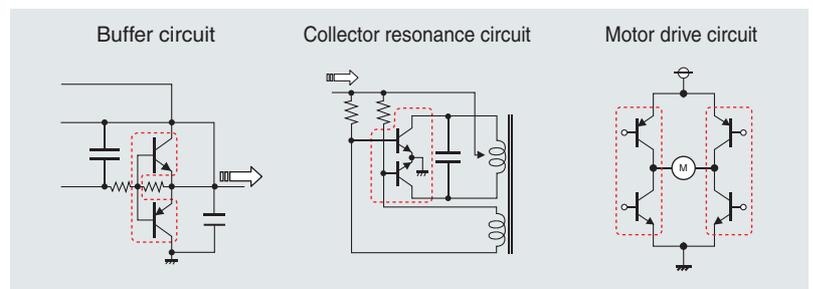

The new package makes it possible to reduce mounting area as well as the number of transistors by half.

**Dimensions**

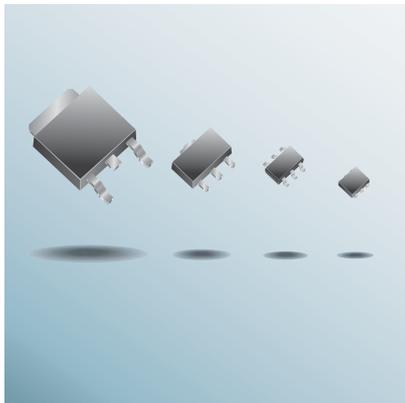

**Circuit Examples**

# Transistors for Solenoid/Motor/Relay Drive

40% smaller mounting area

### Summary

All functions required for motor drive, including the clamping diode, current limiting resistor, and protection resistor, are integrated into one package, reducing mounting area by 40% over discrete solutions.

### Features

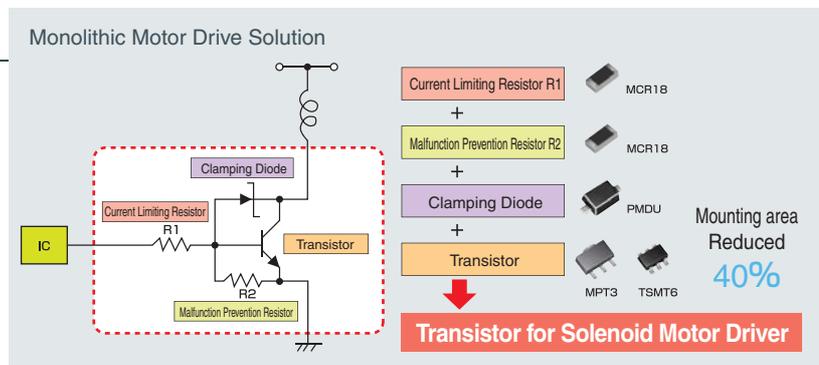

- Space saving
- High breakdown resistance
- Protection function

### Applications

- Automotive systems (e.g. motor/relay drives)

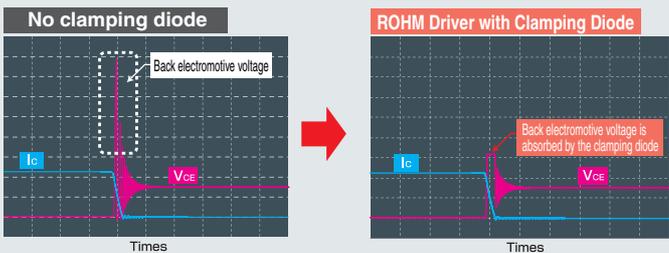

## High breakdown resistance in a space-saving design

Back EMF generated by coils in the motor is absorbed by the built-in clamp diode featuring high breakdown resistance. Current limiting and protection resistors are also integrated, reducing mounting area by up to 40%.

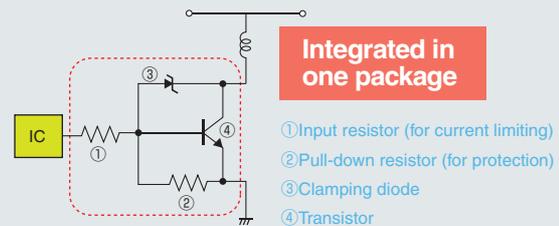

### Characteristics Comparison

The die is protected from back electromotive force by the internal clamping diode.

### Circuit Example

Motor drive circuit

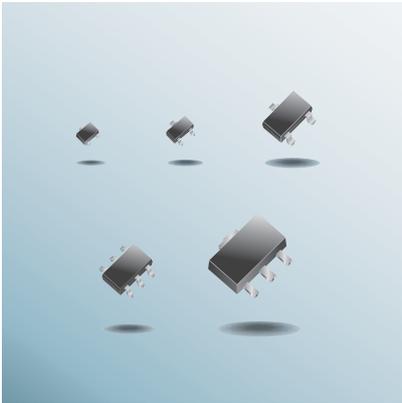

- Saves space and requires fewer parts
- Integrated clamping diode ensures high breakdown resistance
- Built-in resistor enables direct drive operation (from IC)
- Equipped with pull-down resistor to prevent noise-induced malfunctions

### Lineup

Package	Part No.	Internal Circuit	$V_{CE0}(V_{CC})$ (V)	$I_{c}(I_o)$ (A)	$h_{FE}$ (Gt)

# Low $V_{CE(sat)}$ Transistors

## 80% lower $V_{CE(sat)}$ than conventional products

### Summary

A broad array of surface mount package types are offered, from VMT3 to MPT3. Ideal for portable devices requiring low energy consumption.

### Features

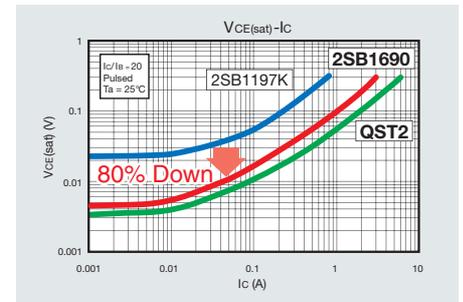

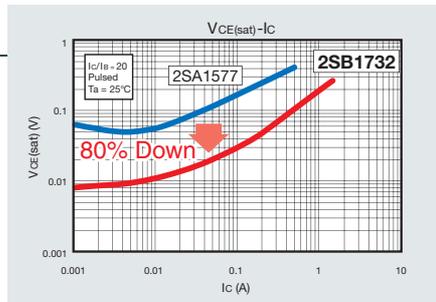

- Low  $V_{CE(sat)}$

### Applications

- Switching in portable devices
- DC/DC converters

## Low $V_{CE(sat)}$

$V_{CE(sat)}$  is reduced by 80% vs. conventional products, contributing to increased power savings. The broad lineup is available in a number of package types, including VMT3 and MPT3 with collector currents up to 6A. Optimized for a variety of applications, especially portables.

# High-Speed Switching Transistors : MPT3

Offspeed increased 35%  
for greater energy savings

**Summary**

Optimization of cell structure results in faster switching speeds and lower switching loss, reducing heat generation significantly.

**Features**

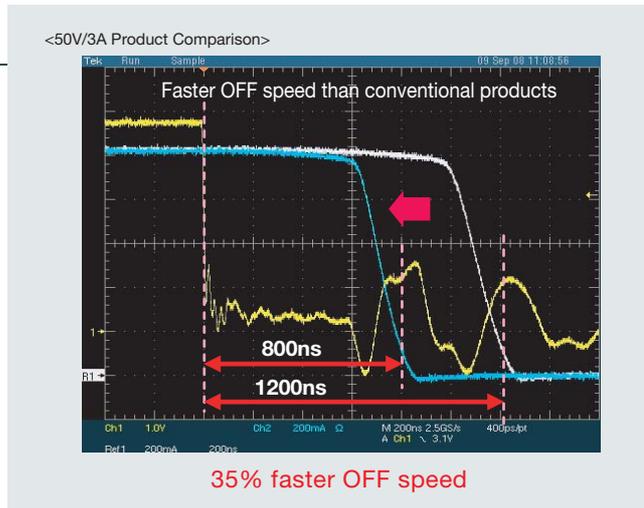

- High-speed switching

**Applications**

- Buffer circuits
- Motor drive circuits
- Power supplies, and more

## High-speed switching

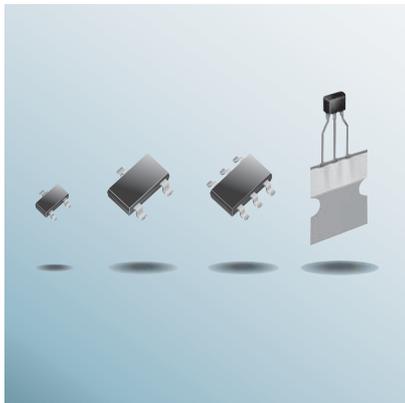

OFF speed increased by 35% for minimum switching loss and heat generation.

# Muting Transistors

## High $h_{FE}$ · High $V_{EBO}$

### Summary

High  $h_{FE}$  and  $V_{EBO}$  make this series ideal for audio muting circuits.

### Features

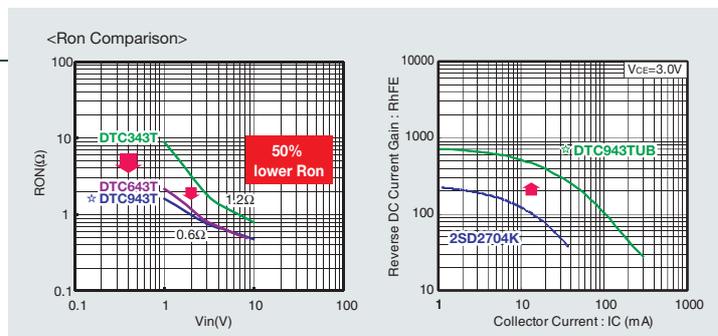

- High  $h_{FE}$
- High  $V_{EBO}$

### Applications

- Home audio
- Car audio
- Muting circuit for audio applications

## Excellent muting characteristics

ROHM's 40V-class products utilize a high  $h_{FE}$  and high  $V_{EBO}$  (12V/25V) and feature superior muting characteristics. A variety of package types are available, from the compact surface mount UMT3 to the through-hole SPT, ensuring compatibility with virtually any application.

The technical information specified herein is intended only to show the typical functions of and examples of application circuits for the Products. ROHM does not grant you, explicitly or implicitly, any license to use or exercise intellectual property or other rights held by ROHM and other parties. ROHM shall bear no responsibility whatsoever for any dispute arising from the use of such technical information.

The Products specified in this document are intended to be used with general-use electronic equipment or devices (such as audio visual equipment, office-automation equipment, communication devices, electronic appliances and amusement devices).

The Products specified in this document are not designed to be radiation tolerant.

While ROHM always makes efforts to enhance the quality and reliability of its Products, a Product may fail or malfunction for a variety of reasons.

Please be sure to implement in your equipment using the Products safety measures to guard against the possibility of physical injury, fire or any other damage caused in the event of the failure of any Product, such as derating, redundancy, fire control and fail-safe designs. ROHM shall bear no responsibility whatsoever for your use of any Product outside of the prescribed scope or not in accordance with the instruction manual.

The Products are not designed or manufactured to be used with any equipment, device or system which requires an extremely high level of reliability the failure or malfunction of which may result in a direct threat to human life or create a risk of human injury (such as a medical instrument, transportation equipment, aerospace machinery, nuclear-reactor controller, fuel-controller or other safety device). ROHM shall bear no responsibility in any way for use of any of the Products for the above special purposes. If a Product is intended to be used for any such special purpose, please contact a ROHM sales representative before purchasing.

If you intend to export or ship overseas any Product or technology specified herein that may be controlled under the Foreign Exchange and the Foreign Trade Law, you will be required to obtain a license or permit under the Law.
