Resistors

ROHM, the pioneer of chip resistors, offers a wide array of chip resistors that brings added value - in terms of greater reliability, increased miniaturization, and improved performance - to sets of all types.

Select the ideal solution from our complete lineup, including the ultra-compact MCR004 series for portable applications, the high voltage KTR series, the wide terminal LTR series that offers superior reliability, the anti-sulfuration TRR series, and low-ohmic types optimized for current detection (i.e. PMR/PML/UCR/LTR series).

We are also focused on effective use of natural resources, and provide narrow pitch taping and bulk products that reduce waste and resources considerably.

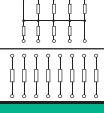

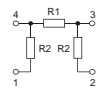

Table of Contents

| | |
|--|--------|
| Resistor Lineup | 3 to 5 |
| Nominal Resistance Values | 6 |
| Ultra-Low Ohmic Chip Resistors for Current Detection | 7 |
| PMR Series | |
| Ultra-Low Ohmic Wide Terminal Chip Resistors | 8 |
| for Current Detection | |
| PML Series | |
| Thick Film Low Ohmic Chip Resistors | 9 |
| UCR Series | |
| High Power Wide Terminal Chip Resistors | 10 |
| (Low Ohmic Type) | |
| LTR Series | |
| Anti-Surge Chip Resistors | 11 |
| ESR Series | |
| High Voltage Resistance Chip Resistors | 12 |
| KTR Series | |
| High Power Wide Terminal Chip Resistors | 13 |
| LTR Series | |

| TRR Series | |
| 0402 Size Ultra-Compact Chip Resistors | 15 |
| MCR004 Series | |
| Narrow Pitch Paper Tape Chip Resistors | 16 |
| MCR03 Series | |
| Dimensions | 17,18 |

Resistor Lineup

| Part No. | Size (mm [inch]) | Circuit | Rated power (70°C) | Tolerance | Temperature coefficient (ppm/°C) | Resistance range (Ω) | Operating temperature range (°C) | | |
|--|------------------|---|---|-------------------------------|---------------------------------------|------------------------------------|----------------------------------|----------------------------------|--|
| Compact Thick Film Chip Resistors <MCR Series> | | | | | | | | | |
| MCR004 | 0402 [01005] |  | 1/32W (0.031W) | J(±5%) F(±1%) | ±300/±250* | 10 to 3M | -55 to +125 | | |
| MCR006 | 0603 [0201] | | 1/20W (0.05W) | J(±5%) F(±1%) D(±0.5%) | +600/-200/±250* ±250 ±200/±100* | 1 to 10M 10 to 10M 10 to 1M | | | |
| MCR01 | 1005 [0402] | | 1/16W (0.063W) | J(±5%) F(±1%) D(±0.5%) | +500/-250/±200* ±100 ±100/±50* | 1 to 10M 10 to 2.2M 10 to 1M | | | |
| MCR03 | 1608 [0603] | | 1/10W (0.1W) | J(±5%) FX(±1%) D(±0.5%) | ±400/±200* ±100 ±100/±50* | 1 to 10M 10 to 10M 10 to 1M | -55 to +155 | | |
| MCR10 | 2012 [0805] | | 1/8W (0.125W) | J(±5%) F(±1%) | ±400/±200* ±100 | 1 to 10M 10 to 2.2M | | | |
| | | | | 1/10W(0.1W) | D(±0.5%) | ±100/±50* | 10 to 1M | | |
| Thick Film Chip Resistors <MCR Series> | | | | | | | | | |
| MCR18 | 3216 [1206] | |  | 1/4W (0.25W) | J(±5%) F(±1%) | ±400/±200* ±100 | 1 to 10M 10 to 2.2M | -55 to +155 | |
| MCR25 | 3225 [1210] | | | 1/8W(0.125W) | D(±0.5%) | ±100/±50* | 10 to 1M | | |
| MCR50 | 5025 [2010] | | | 1/4W (0.25W) | J(±5%) F(±1%) | 500±350/±500/±200* ±100 | 1 to 3.3M 10 to 1M | | |
| MCR100 | 6432 [2512] | 1/2W (0.5W) | | J(±5%) F(±1%) | 500±350/±500/±200/±350* ±100 | 1 to 560k 10 to 180k | | | |
| | | | 1W | J(±5%) F(±1%) | 500±350/±500/±350/±200* ±100 | 1 to 100k 10 to 82k | -55 to +125 | | |
| Low Ohmic Thick Film Chip Resistors <MCR Series> | | | | | | | | | |
| MCR01 | 1005 [0402] |  | 1/16W(0.063W) | F(±1%) | ±400 | 1 to 9.1 | -55 to +155 | | |
| MCR03 | 1608 [0603] | | 1/10W(0.1W) | F(±1%) | ±400 | 1 to 9.1 | | | |
| MCR10 | 2012 [0805] | | 1/4W (0.25W) | J(±5%) F(±1%) | 500±300/400±200/±250* | 0.047 to 0.91 0.047 to 9.1 | | | |
| MCR18 | 3216 [1206] | | 1/4W (0.25W) | J(±5%) F(±1%) | 500±300/400±200/±250* | 0.047 to 0.91 0.047 to 9.1 | | | |
| MCR25 | 3225 [1210] | | 1/2W (0.5W) | J(±5%) F(±1%) | 300±300/±200* | 0.047 to 0.91 0.047 to 9.1 | | | |
| MCR50 | 5025 [2010] | | 1/2W (0.5W) | J(±5%) F(±1%) | 500±300/400±200/±250* | 0.047 to 0.91 0.047 to 9.1 | | | |
| MCR100 | 6432 [2512] | | 1W | J(±5%) F(±1%) | 500±300/400±200/±250* | 0.047 to 0.91 0.047 to 9.1 | | | |
| Narrow Pitch Paper Tape Chip Resistors | | | | | | | | | |
| Part No. | Size (mm [inch]) | | Pitch (Taping) | Minimum Order Quantity | | | | | |
| MCR03MZPJ | 1608 (0603) | | 2mm | 10,000 pcs. | | | | | |
| MCR03MZPFX | | | | | | | | | |
| MCR03MZPD | | | | | | | | | |
| Compact Chip Resistor Networks <MNR Series> | | | | | | | | | |
| MNR02 | 1005 [0402] × 2 |  | 0.063W / Element | J(±5%) | ±300 | 10 to 1M | -55 to +125 | | |
| MNR12 | 1608 [0603] × 2 | | 0.063W / Element | J(±5%) F(±1%) | ±200 ±100 | | | | |
| MNR32 | 3216 [1206] × 2 |  | 0.125W / Element | J(±5%) | ±200 | 10 to 1M | -55 to +125 | | |
| MNR04 | 1005 [0402] × 4 | | 0.063W / Element | J(±5%) | ±200 | | | | |
| MNR14 | 1608 [0603] × 4 | | 0.063W / Element | J(±5%) F(±1%) | ±200 ±100 | | | | |
| MNR34 | 3216 [1206] × 4 | | 0.125W / Element | J(±5%) | ±200 | | | | |
| Compact 8-Element Chip Resistor Networks <MNR Series> | | | | | | | | | |
| MNR15 | 1608 [0603] × 5 |  | 0.031W / Element | J(±5%) | ±200 | 56 to 100k | -55 to +125 | | |
| MNR35 | 3216 [1206] × 5 | | 0.063W / Element | J(±5%) | ±200 | 56 to 100k | | | |
| MNR18 | 1605 [0602] × 8 | | 0.063W / Element | J(±5%) | ±200 | 10 to 1M | | | |
| Chip Attenuators <RCN Series> | | | | | | | | | |
| Part No. | Size (mm [inch]) | Circuit | No. of pins | No. of elements | Rated power (70°C) | Impedance (Ω) | Voltage standing wave ratio | Operating temperature range (°C) | |
| RCN02 | 1010 [0404] |  | 4 | 3 | 0.04W / Package | 50 | Less than 1.3 | -55 to +125 | |

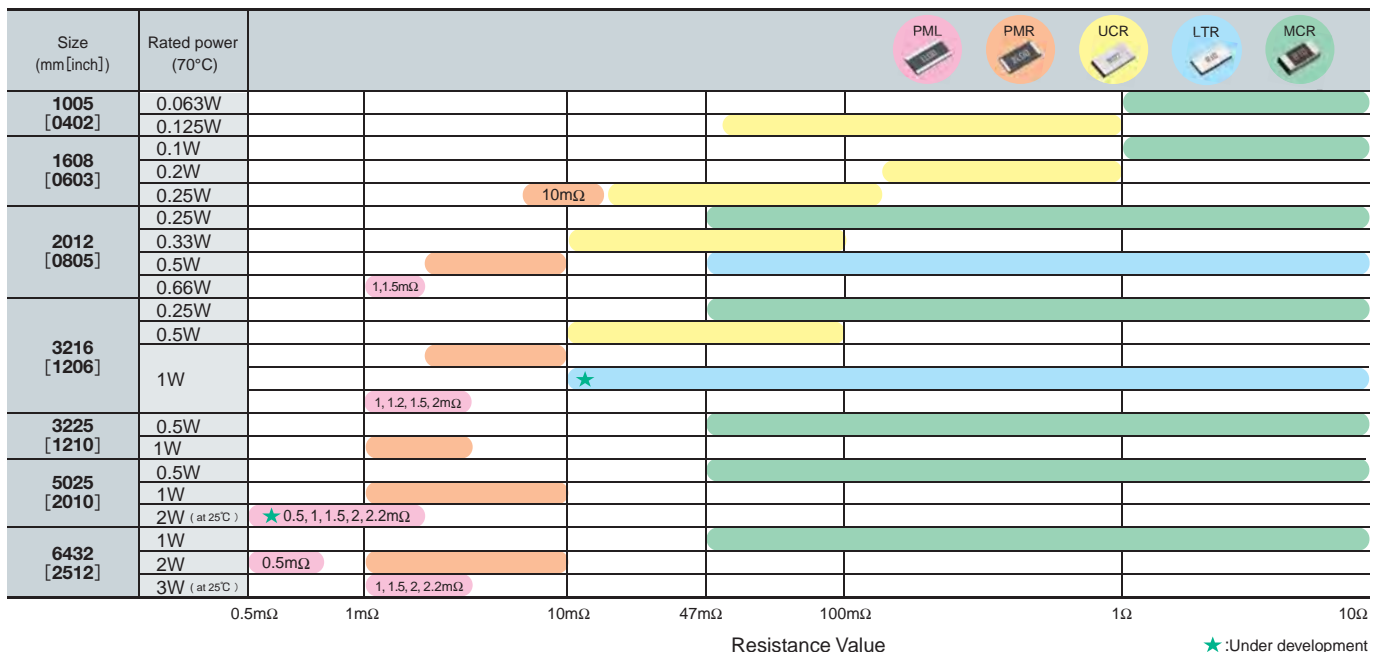

* : The temperature characteristics will vary depending on the resistance value

| Part No. | Size (mm [inch]) | Circuit | Rated power (70°C) | Tolerance | Temperature coefficient (ppm/°C) | Resistance range (W) | Operating temperature range (°C) |

Nominal Resistance Values

| | | | | | | | | | | | | | | | | | |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| E3 | 10 | | | | 22 | | | | | | 47 | | | | | | |
| E6 | 10 | | 15 | | 22 | | 33 | | 47 | | 68 | | | | | | |
| E12 | 10 | 12 | 15 | 18 | 22 | 27 | 33 | 39 | 47 | 56 | 68 | 82 | | | | | |
| E24 | 10 | 11 | 12 | 13 | 15 | 16 | 18 | 20 | 22 | 24 | 27 | 30 | 33 | 36 | 39 | 43 | 47 |
| | 51 | 56 | 62 | 68 | 75 | 82 | 91 | | | | | | | | | | |
| E96 | 100 | 102 | 105 | 107 | 110 | 113 | 115 | 118 | 121 | 124 | 127 | 130 | 133 | 137 | 140 | 143 | 147 |
| | 150 | 154 | 158 | 162 | 165 | 169 | 174 | 178 | 182 | 187 | 191 | 196 | 200 | 205 | 210 | 215 | 221 |
| | 226 | 232 | 237 | 243 | 249 | 255 | 261 | 267 | 274 | 280 | 287 | 294 | 301 | 309 | 316 | 324 | 332 |
| | 340 | 348 | 357 | 365 | 374 | 383 | 392 | 402 | 412 | 422 | 432 | 442 | 453 | 464 | 475 | 487 | 499 |
| | 511 | 523 | 536 | 549 | 562 | 576 | 590 | 604 | 619 | 634 | 649 | 665 | 681 | 698 | 715 | 732 | 750 |
| | 768 | 787 | 806 | 825 | 845 | 866 | 887 | 909 | 931 | 953 | 976 | | | | | | |

Nominal Resistance

The nominal resistance of each series is listed above. These values are based on approximations of the geometric ratios at right.

Indicated Resistances

Regarding the nominal resistances, products with a resistance tolerance of ±5% are indicated by 3 digits, while ±1% products are denoted by 4 digits. The first 2 or 3 digits (depending on tolerance type) are significant figures, while the last digit signifies the number of zeroes. In addition, an 'R' is used to indicate a decimal point.

- Ex. 1 22Ω→22×10⁰Ω→220 (Indicates a multiplier of '0' → 100)
- Ex. 2 47kΩ→47×10³Ω→473 (Indicates a multiplier of '3' → 103)
- Ex. 3 1.2MΩ→12×10⁵Ω→125 (Indicates a multiplier of '5' → 105)
- Ex. 4 2.7Ω→2R7 ('R' indicates a decimal, for resistances less than 10Ω)
- Ex. 5 1130Ω→113×10¹Ω→1131 (Indicates a multiplier of '1' → 101 - the 4 digits denote F Class products with a tolerance of ±1%)
- Ex. 6 0.10Ω→R10

| Series | Ratio | Remarks |
|------------|------------------------------|----------------------------------|
| E6 | $\sqrt[6]{10} \approx 1.46$ | |
| E12 | $\sqrt[12]{10} \approx 1.21$ | Rounded to 2 significant figures |
| E24 | $\sqrt[24]{10} \approx 1.10$ | |
| E96 | $\sqrt[96]{10} \approx 1.02$ | Rounded to 3 significant figures |

■ For the basic guidelines of the resistor, please refer to the technology report issued by JEITA (Japan Electronics and Information Technology Industries Association): JEITA RCT-2121A 'Guidelines of Notabilia for Fixed Resistors for Use In Electronic Equipment (Safety Application Guide for Fixed Resistors for Use In Electronic Equipment)'.

Notes on Rated Power

• Please reduce the load power based on the derating curve at right for temperatures exceeding the ambient temperature.

Usage Precautions

- * 1 : Please verify and confirm operation in the event of transient load pulses (large loads in a short time) while mounted in the customer's set. In addition, the performance and reliability of the product may suffer if the load voltage exceeds the rated value during steady state operation. Therefore, please ensure that the rated voltage is not exceeded.
- * 2 : The Rated Voltage (V) is calculated by $\sqrt{\text{Rated Power (W)} \times \text{Nominal Resistance } (\Omega)}$ or the Limiting Element Voltage, whichever is smaller.

Ultra-Low Ohmic Chip Resistors for Current Detection

PMR Series (1mΩ~)

Summary

These products feature a resistive element comprised of a metallic substrate with superior electrical characteristics. An original structure is utilized for low resistance values (1mΩ to 10mΩ) with improved current detection accuracy.

Features

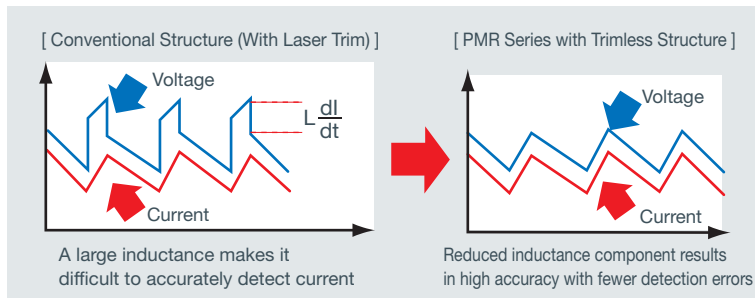

- Compact
- High power
- High performance

Applications

- Current detection sets
- Notebook PCs, HDDs, mobile phones, DC/DC converters, automotive systems, and more

Trimless design ensures greater current detection accuracy

- Ideal for high-speed switching circuits
- Excellent heat dissipation characteristics
- Stable operation, even under extreme temperature fluctuations

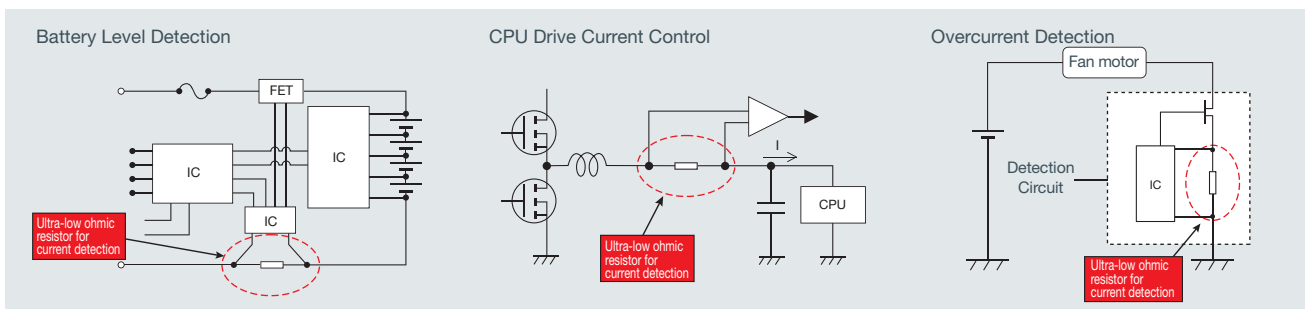

Superior resistance-temperature characteristics

- Stable resistance temperature characteristics

Circuit Examples

Lineup

| Part No. | Size (mm [inch]) | Rated power (70°C) | Tolerance | Temperature coefficient (ppm/°C) | Resistance range (mΩ) | Operating temperature range (°C) |

Ultra-Low Ohmic Wide Terminal Chip Resistors for Current Detection

PML Series (0.5mΩ~)

Summary

These low-ohmic (0.5mΩ to 2.2mΩ), wide terminal types optimized for current detection utilize a metallic substrate for the resistive element that provides excellent electrical characteristics, along with a novel design that improves current detection precision.

Features

- High power
- High performance
- High reliability

Applications

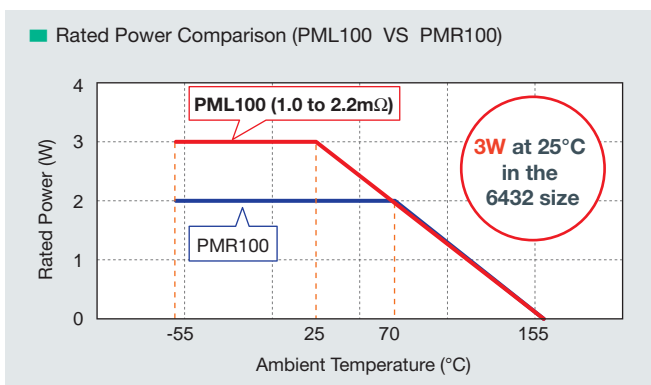

- Automotive (i.e. power steering, ECU)
- Current detection in large current motors

Wide terminal configuration improves reliability

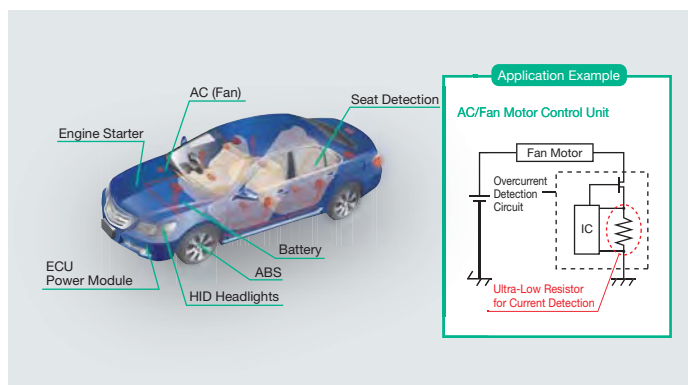

Wider contact area with the mounting plate provides a more reliable connection. Ideal for vehicle applications exposed to temperature cycling / fluctuations.

High rated power

Application Examples

Lineup

| Part No. | Size (mm [inch]) | Rated power (70°C) | Tolerance | Temperature coefficient (ppm/°C) | Resistance range (mΩ) | Operating temperature range (°C) |
|------------------|------------------|--------------------|------------------|----------------------------------|-------------------------|----------------------------------|
| New PML10 | 2012[0805] | 0.66W | J(±5%) G(±2%) | ±200 | 1.0, 1.5 | |
| New PML18 | 3216[1206] | 1W | J(±5%) G(±2%) | ±150 | 1.0, 1.2, 1.5, 2.0 | -55~+155 |
| ★ PML50 | 5025[2010] | 1.5W (2W at 25°C) | J(±5%) | ±200 | 0.5, 1.0, 1.5, 2.0, 2.2 | |
| PML100 | 6432[2512] | 2W (3W at 25°C) | J(±5%) | ±100 | 1.0, 1.5, 2.0, 2.2 | |
| | | 2W | | ±150 | | |

Thick Film Low Ohmic Chip Resistors

UCR Series (11mΩ~)

Summary

The rear-mount design ensures high detection accuracy in a range of resistances (11mΩ to 910mΩ).

Features

- Compact
- High performance

Applications

- Notebook PCs, mobile phones, HDDs, portable audio players, power supplies, motors, and more

Rear-mount configuration

The UCR series is configured with the resistive element at the base (rear).

Resistance variations minimized during mounting

The rear-mount configuration shortens the current pathway by eliminating excess components.

Higher rated power

The original structure increases the rated power.

| Size (mm[inch]) | UCR Series | ROHM's Standard Resistors |
|-----------------|------------|---------------------------|
| 1005 [0402] | 0.125W | 0.063W |
| 1608 [0603] | 0.25W/0.2W | 0.1W |
| 2012 [0805] | 0.33W | 0.25W |
| 3216 [1206] | 0.5W | 0.25W |
| 3225 [1210] | - | 0.5W |

Stable, low resistance characteristics guaranteed - regardless of ambient conditions

Lineup

| Part No. | Size (mm [inch]) | Rated power (70°C) | Tolerance | Temperature coefficient (ppm/°C) | Resistance range (Ω) | Operating temperature range (°C) |
|----------|------------------|-----------------------------------|------------------|----------------------------------|----------------------|----------------------------------|
| UCR01 | 1005 [0402] | 1/8W (0.125W) | J(±5%) F(±1%) | 0 to 300 | 68m to 91m | |

High Power Wide Terminal Chip Resistors (Low Ohmic Type)

LTR Series (10mΩ~)

Summary

These wide terminal chip resistors improve thermal dissipation for higher rated power.

Features

- High power
- High performance
- High reliability

Applications

- Automotive systems
- PCs, HDDs, mobile phones, power supplies, motors and other applications requiring current detection

Wide terminal design strong against temperature cycling

Rear-mount design improves current detection accuracy

Rear-mount construction minimizes resistance changes during mounting.

Higher rated power

| Size (mm [inch]) | General-purpose MCR Series | LTR Series |
|------------------|----------------------------|------------|
| 2012 [0805] | 0.25W | 0.5W |
| 3216 [1206] | 0.25W | 1W |

Superior resistance-temperature coefficient

| Size (mm [inch]) | General-purpose MCR Series | LTR Series |
|------------------|----------------------------|------------|
| 2012 [0805] | 500±300 (0.047 to 0.091Ω) | ±150 |
| | 400±200 (0.1 to 0.13Ω) | |
| | ±250 (0.15 to 9.1Ω) | |

Lineup

| Part No. | Size (mm [inch]) | Rated power (70°C) | Tolerance | Temperature coefficient (ppm/°C) | Resistance range (Ω) | Operating temperature range (°C) |
|----------|------------------|--------------------|------------------|----------------------------------|----------------------|----------------------------------|
| LTR10 | 2012[0805] | 1/2W (0.5W) | J(±5%) F(±1%) | ±150 | 47m to 9.1 | -55 to +155 |
| ★ LTR18 | 3216[1206] | 1W | J(±5%) F(±1%) | ±300 | 10m to 9.1 | |

Anti-Surge Chip Resistors

ESR Series

Summary

Significantly improved anti-surge characteristics have been achieved through utilization of original resistor construction and trimming processes.

Features

- Small
- Surge-resistant
- High power

Applications

- Electronic devices requiring anti-surge and anti-pulse characteristics

2kV to 5kV* electrostatic discharge resistance (*EIAJ4701-1 Human Body Model)

An electrostatic discharge resistance of 3kV has been achieved using novel construction and trimming processes, resulting in a greater degree of reliability.

| | ESR01 | ESR03/10/18 | ESR25 |
|---------------------------|----------|-------------|-----------|
| DCV (Applied Voltage) | 2kV | 3kV | 5kV |
| No. of Cycles | ±5 times | ±10 times | ±10 times |
| C (Capacitance) | 100pF | 100pF | 100pF |
| R1 (Discharge Resistance) | 1.5kΩ | 1.5kΩ | 1.5kΩ |

Significant improvement in endurance surge characteristics

Anti-surge Chip Resistors (ESR Series) vs. Conventional Chip Resistors (MCR Series)

Double the conventional rated power

A higher rated power enables smaller resistors to be used, saving space.

| Size(mm [inch]) | ESR Series | General-purpose MCR Series |
|------------------------|--------------|----------------------------|
| New 1005 [0402] | 0.2W | 0.063W |
| 1608 [0603] | 0.2W | 0.1W |
| 2012 [0805] | 0.25W | 0.125W |
| 3216 [1206] | 0.33W | 0.25W |
| 3225 [1210] | 0.5W | 0.25W |
| 5025 [2010] | - | 0.5W |

Downsizing

Lineup

| Part No. | Size (mm [inch]) | Rated power (70°C) | Tolerance | Temperature coefficient (ppm/°C) | Resistance range (Ω) | Operating temperature range (°C) |
|------------------|------------------|--------------------|------------------|----------------------------------|----------------------|----------------------------------|

High Voltage Resistance Chip Resistors

KTR Series

Summary

High voltage characteristics (more than double that of conventional products) are made possible through the use of proprietary construction and trimming processes.

Features

- Compact
- High voltage

Applications

- Camera flash circuits
- Inverter circuits
- Power supplies

High voltage resistance

ROHM's unique resistance pattern and trimming design prevent concentration of the voltage load, resulting in more than twice the voltage resistance of our own general-purpose products (MCR series).

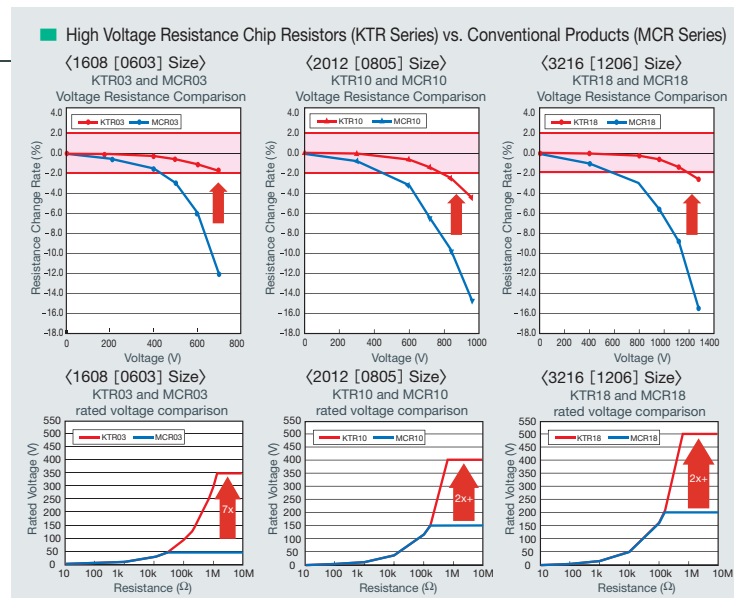

High voltage resistance circuits requiring multiple resistors can reduce the number of components by replacing conventional chip resistors with KTR series units. They are ideal for mobile products, which are becoming increasingly compact and thin.

[Limiting Element Voltage]

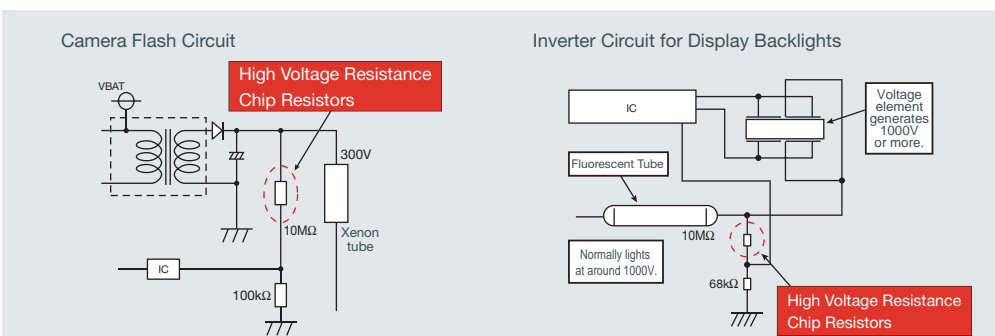

The rated voltage is defined as the maximum voltage that can be applied continuously and is calculated using the following equation:

$$\text{Rated Voltage (V)} = \sqrt{\text{Rated Power (W)} \times \text{Nominal Resistance (\Omega)}}$$

Note that the limiting element voltage of the element should not to be exceeded.

Circuit Examples

Lineup

| Part No. | Size (mm [inch]) | Rated power (70°C) | Limiting Element Voltage(V) | Tolerance | Temperature coefficient (ppm/°C) | Resistance range (Ω) | Operating temperature range (°C) |
|----------|------------------|--------------------|-----------------------------|------------------|----------------------------------|----------------------|----------------------------------|
| KTR03 | 1608 [0603] | 1/10W (0.1W) | 350 | J(±5%) | ±200 | 1 to 10M | |
| | | | | F(±1%) | ±100 | | |
| KTR10 | 2012 [0805] | 1/8W (0.125W) | 400 | J(±5%) | ±200 | 1 to 10M | |
| | | | | F(±1%) | ±100 | | |
| KTR18 | 3216 [1206] | 1/4W (0.25W) | 500 | J(±5%) | ±200 | 1 to 10M | -55 to +155 |
| | | | | F(±1%) | ±100 | | |
| KTR25 | 3225 [1210] | 1/3W (0.33W) | 600 | J(±5%) F(±1%) | ±200 ±100 | 1 to 10M | |

High Power Wide Terminal Chip Resistors

LTR Series

Summary

Placing the electrodes on the long sides of the resistor reduces the distance between the electrodes, improving temperature cycling strength.

Features

- High power
- Strong against surges
- Improved junction reliability

Applications

- Automotive systems
- Home appliances
- Power supplies and the like

Superior connection reliability against thermal cycling

- Outstanding junction reliability characteristics against heat cycling. The LTR series is highly resistant to soldering cracks caused by thermal stress.

| | Wide Terminal LTR Series | General-purpose MCR Series |
|--------------------------------------|---|---|
| Distance Between Electrodes | Short | Long |
| Effects of PCB Expansion/Contraction | Mechanical stress on junction area small | Mechanical stress on junction area large |
| Junction Reliability | Very good | Good |

Significantly higher rated power

Higher rated power makes it possible to use smaller resistors.

| Size(mm [inch]) | LTR Series | MCR Series |
|-----------------|-------------|------------|
| 2012[0805] | 0.25 | 0.125 |
| 3216[1206] | 0.5 | 0.25 |
| 5025[2010] | 1 | 0.5 |
| 6432[2512] | - | 1 |

3kV* electrostatic discharge resistance

(*EIAJ4710-1 Human Body Model)

ROHM's unique resistive element structure and trimming design ensure greatly improved surge resistance characteristics.

Lineup

| Part No. | Size (mm [inch]) | Rated power (70°C) | Tolerance | Temperature coefficient (ppm/°C) | Resistance range (Ω) | Operating temperature range (°C) |

| LTR50 | 5025 [2010] | 1W | J(±5%) | ±200 | 1 to 1M | |
| | | | F(±1%) | ±100 | | |
| | | | D(±0.5%) | ±100 | | |

Sulfuration-Resistant Chip Resistors

TRR Series

Summary

The special internal structure prevents sulfurated gases from entering, resulting in greater reliability and stabler operation in sulfur-rich environments compared to general-purpose products.

Features

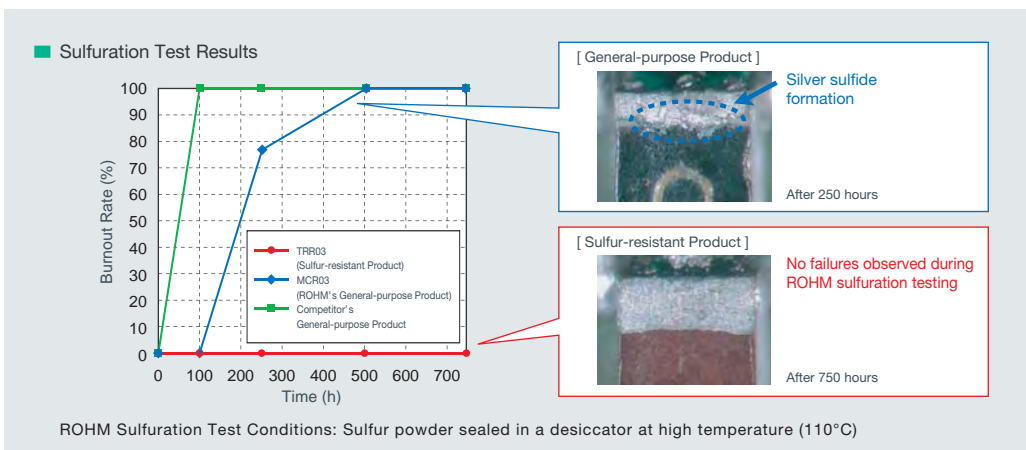

- High sulfuration resistance

Applications

- Circuits exposed to sulfur-rich environments, such as those in automotive systems.

Excellent anti-sulfuration characteristics

Until now, resistors were particularly susceptible to failure in sulfur-rich environments. In response to this, ROHM's offers the TRR series featuring an internal structure resistant to silver migration and the formation of silver sulfide, resulting in a greater level of reliability.

Lineup

| Part No. | Size (mm [inch]) | Rated power (70°C) | Tolerance | Temperature coefficient (ppm/°C) | Resistance range (Ω) | Operating temperature range (°C) |
|----------|------------------|--------------------|-----------|----------------------------------|----------------------|----------------------------------|
| TRR01 | 1005 [0402] | 1/16W (0.063W) | J(±5%) | +500/-250 | 1 to 9.1 | |
| | | | F(±1%) | ±200 | 10 to 10M | |
| TRR03 | 1608 [0603] | 1/10W (0.1W) | J(±5%) | ±100 | 10 to 2.2M | |
| | | | F(±1%) | ±400 | 1 to 9.1 | |
| TRR10 | 2012 [0805] | 1/8W (0.125W) | J(±5%) | ±200 | 10 to 10M | -55 to +155 |
| | | | F(±1%) | ±100 | 10 to 10M | |
| TRR18 | 3216 [1206] | 1/4W (0.25W) | J(±5%) | ±400 | 1 to 9.1 | |
| | | | F(±1%) | ±200 | 10 to 10M | |
| | | | | ±100 | 10 to 2.2M | |

Also compatible with jumpers.

0402-Sized Ultra-Compact Chip Resistors

MCR004 Series

Summary

ROHM's 0402-sized ultra-compact chip resistors are the smallest in the world, contributing to increased space savings in mobile devices and module products.

Features

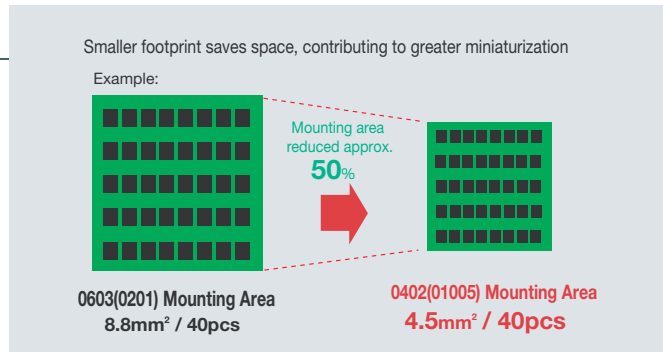

- Compact
- Space-saving

Applications

- Modules
- Portable audio
- Mobile phones
- Digital cameras

Lightweight · Space-saving

The MCR004 (0402) series reduces mounting area and weight by 56% and 72%, respectively, contributing to even greater miniaturization.

High dimensional precision

Ultra-compact chip resistors in the 0402 and 0603 size require more precise process technologies (compared to conventional processes) in order to ensure high dimensional accuracy.

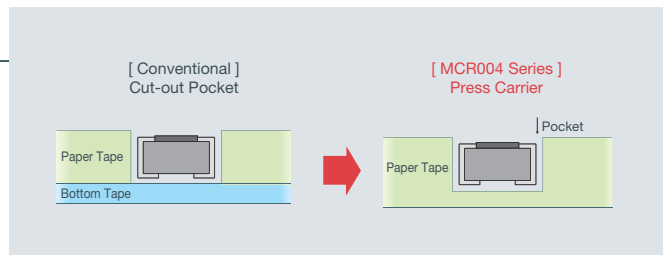

Press carrier tape applications

Press carrier tape is used in order to reduce failures during the mounting process.

— Press Carrier Tape Features —

- No adhesive substance on the bottom of the pocket (bottom tape not used).
- Highly precise pocket position.

Lineup

| Part No. | Size (mm [inch]) | Rated power (70°C) | Tolerance | Temperature coefficient (ppm/°C) | Resistance range (Ω) | Operating temperature range (°C) |
|----------|------------------|--------------------|-----------|----------------------------------|----------------------|----------------------------------|
| MCR004 | 0402 [01005] | 1/32W (0.031W) | J(±5%) | ±300 | 10 to 91 | -55 to +125 |
| | | | F(±1%) | ±250 | 100 to 3M | |

Also compatible with jumpers.

<Taping Specifications>

| Part No. | Taping No. | Taping specs | Min. order quantity (pcs) |
|----------|------------|---------------------------|---------------------------|
| MCR004 | YZP | Paper tape (2mm pitch) | 15,000 |
| | RZP | Embossed tape (1mm pitch) | 40,000 |

Narrow Pitch Paper Tape Products

MCR03MZP Series

Summary

Half the pitch of standard products results in double the quantity per reel in the same reel size (φ180mm).

Features

- Halves the number of reel changes
- Cuts the amount of packaging waste by 50%

Applications

- All products

Doubles the time between reel replacement. Cuts package waste in half.

No new equipment required · Easy to install

Improves productivity by halving the number of reel replacements

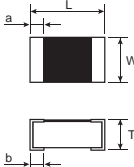

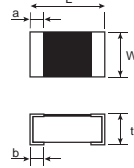

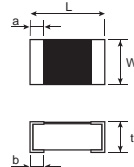

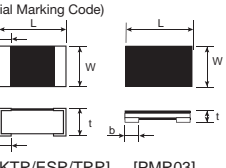

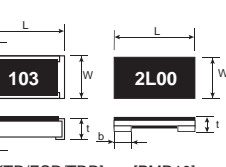

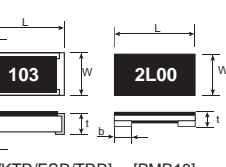

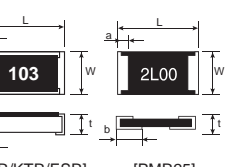

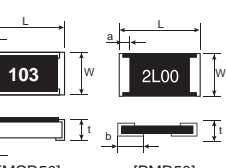

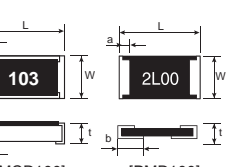

Lineup

The content specified in this document is correct as of 11th April, 2011.

No copying or reproduction of this document, in part or in whole, is permitted without the consent of ROHM Co.,Ltd.

The content specified herein is subject to change for improvement without notice.

The content specified herein is for the purpose of introducing ROHM's products (hereinafter "Products"). If you wish to use any such Product, please be sure to refer to the specifications, which can be obtained from ROHM upon request.

Examples of application circuits, circuit constants and any other information contained herein illustrate the standard usage and operations of the Products. The peripheral conditions must be taken into account when designing circuits for mass production.

Great care was taken in ensuring the accuracy of the information specified in this document. However, should you incur any damage arising from any inaccuracy or misprint of such information, ROHM shall bear no responsibility for such damage.

The technical information specified herein is intended only to show the typical functions of and examples of application circuits for the Products. ROHM does not grant you, explicitly or implicitly, any license to use or exercise intellectual property or other rights held by ROHM and other parties. ROHM shall bear no responsibility whatsoever for any dispute arising from the use of such technical information.

The Products specified in this document are intended to be used with general-use electronic equipment or devices (such as audio visual equipment, office-automation equipment, communication devices, electronic appliances and amusement devices).

The Products specified in this document are not designed to be radiation tolerant.

While ROHM always makes efforts to enhance the quality and reliability of its Products, a Product may fail or malfunction for a variety of reasons.

Please be sure to implement in your equipment using the Products safety measures to guard against the possibility of physical injury, fire or any other damage caused in the event of the failure of any Product, such as derating, redundancy, fire control and fail-safe designs. ROHM shall bear no responsibility whatsoever for your use of any Product outside of the prescribed scope or not in accordance with the instruction manual.

The Products are not designed or manufactured to be used with any equipment, device or system which requires an extremely high level of reliability the failure or malfunction of which may result in a direct threat to human life or create a risk of human injury (such as a medical instrument, transportation equipment, aerospace machinery, nuclear-reactor controller, fuel-controller or other safety device). ROHM shall bear no responsibility in any way for use of any of the Products for the above special purposes. If a Product is intended to be used for any such special purpose, please contact a ROHM sales representative before purchasing.

If you intend to export or ship overseas any Product or technology specified herein that may be controlled under the Foreign Exchange and the Foreign Trade Law, you will be required to obtain a license or permit under the Law.
