INNOVATION FIRST AND FOREMOST!

The Sperian Protection group is committed to a process of research and innovation to the great benefit of BACOU shoes.

We design and manufacture high value added shoes for professionals in response to the demands of diverse professions, specific environments and geographical areas. Our products combine the latest technology, comfort and ergonomics to satisfy the needs of all our customers.

This perfect knowledge of our partners' expectations guarantees shoes that are high-quality, reliable and hard-wearing to provide practical, comfortable and attractive protection.

All our processes of development, production and logistics are certified ISO 9001.

Our storage and distribution centre covers the whole of Europe; it combines advanced technology with a personalized service to make certain that every delivery is proof of our experience.

Finally, our specialists and sales teams remain active every day to offer you the most suitable professional solution, so individual safety is no longer a constraint.

We invite you to discover our expertise by reading the pages of our new 2009 catalogue.

Sperian, Protection you can trust.

Olivier Pérusseau

Vice President Footwear Division

>>> MARKINGS AND STANDARDS

All BACOU shoes meet Personal Protective Equipment requirements and comply with the current European standards. Foot protection is governed by three standards EN ISO 20345, EN ISO 20346, EN ISO 20347 for models launched on the market after August 2004. The EN 345, EN 346 and EN 347 standards apply to previously launched models.

PROFESSIONAL USE		CATEGORY			
EN ISO 20345: 2004	Safety footwear (200J toecap)	SB	S1	S2	S3
EN ISO 20346: 2004	Protective footwear (100J toecap)	PB	P1	P2	P3
EN ISO 20347: 2004	Occupational footwear (without toecap)	OB	01	02	03

RISKS COVERED		CATEGORIES			
	Fundamentals*	X	X	X	X
	Enclosed back		X	X	X

PROFESSIONAL USE		CATEGORY			
A	Antistatic footwear	0	X	X	X
E	Shock absorption at the heel	0	X	X	X
WRU	Resistance of the upper to water penetration and absorption	0		X	X
P	Resistance to perforation	0	0		0
C	Conductive shoes	0	0	0	0
HI	Heat insulation	0	0	0	0
CI	Cold insulation	0	0	0	0
HRO	Heat-resistant sole	0	0	0	0
AN	Ankle-bone protection	0	0	0	0
WR	Water resistance of the entire shoe	0	0	0	0
M	Metatarsal protection	0	0	0	0

* Quality and performance of the materials (leather, linings, soles, etc.), resistance to hydrocarbons, flexing and abrasion resistance, water vapour permeability, upper sole and non-slip property of the sole, etc.

X Meets minimum requirements
0 Optional

The majority of our designs are certified under the new EN ISO 20345: 2007 standard.

MARKINGS	GROUND	LUBRICANT	RUBBING COEFFICIENT ACCORDING TO EN ISO 20345: 2004/AMD 1 :2007	
			FLAT	HEEL
SRA	Ceramic plates	Sodium Lauryl Sulfate	≥ 0.32	≥ 0.28
SRB	Steel	Glycerol	≥ 0.18	≥ 0.13
SRC	Meets requirements for the 2 tests above (SRA & SRB)			

The values indicated in the table above correspond to the minimum dynamic grip effort coefficients demanded by the EN ISO 20345: 2004/Amd 1: 2007 standard in order to comply with these requirements.

> > > **TECHNOLOGY AND MATERIALS**

ELEMENTS OF PROTECTION AND COMFORT

200J toecaps

NEW

Non-metallic and ultra-light, it is unnoticeable to the wearer and suited to women's feet.

Non-metallic, 20% lighter and 30% thinner than composite toecaps.

Non-metallic and lightweight.

Steel toecap.

• **Anti-puncture midsoles**

Anti-puncture midsole in high tenacity textile fibres.

Anti-puncture steel midsole.

• **Comfort**

Lightweight.

Ergonomic and antistatic insole.

Breathability.

100% metal free shoes.

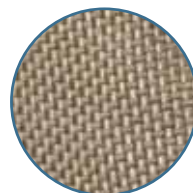

UPPER MATERIALS

SYMPATEX®

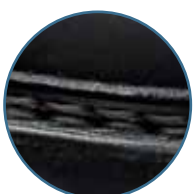

A water-tight membrane. It is wind and water resistant, and lined with a breathable mesh fabric.

CORDURA®

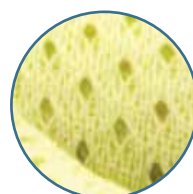

Hard-wearing fabric that resists to tearing and abrasion. It is breathable for better foot ventilation. Lightweight, easy-care and quick to dry.

DuPont™ NOMEX®

NOMEX® fibres are designed to give inbuilt protection against heat and flames. They are used for stitching in the manufacture of Rangers and boots for firefighter professionals and companies.

POROMAX®

3D textile lining with a honeycomb structure. Comfortable and absorbent, it ensures excellent breathability and evacuates perspiration. Antibacterial and anti-odour.

TEMPTATION® ELITE

Combine elegance and protection

With the brand new Temptation® Elite collection, the BACOU style teams have brought feminine elegance back to the workplace.

The Temptation® Elite shoes combine fashionable designs with discreet protection, to provide comfort and well-being for women in all situations.

WATER RESISTANT, FULL GRAIN OR NUBUCK LEATHER

- Resistant to liquid projections and tearing.
- Protects the foot from humidity.

SUEDE OR MICROFIBRE

- Adapted for use in warm and dry environments.
- Greater breathability and comfort.

HEALTHTECH® BAMBOO LINING

New ultra-resistant and absorbent lining made with bamboo fibres and polyester.

- Anti-odour and antibacterial for improved hygiene.
- Antiperspirant and heat-regulating for greater comfort.
- Bamboo liberates negative ions to promote relaxation and absorbs positive ions that are the cause of fatigue and stress.

PREMIUM 200J NON-METALLIC TOECAP

Non-magnetic, insulates from the heat and cold. Virtually undetectable and suited to women's feet.

FLEXIUM™ ANTI-PUNCTURE* MIDSOLE

High tenacity and antistatic textile fibres. Covers 100% of the sole of the foot.

- Total protection and flexibility whilst walking.

* certain models

BACOU ELITE OUTSOLE

New sole with feminine design. TPU/Nitrile sole.

- Resists abrasion, slip-resistant.
- EVA heel insert.
- Comfort and flexibility.

The Temptation® Elite collection and the other Temptation® models are recommended for:

- Transport and logistics.
- Light industry.
- Laboratories.
- Collective catering.
- Decorating work.
- Services

TEMPTATION® CITY

The Temptation® City collection includes 9 models with an urban style, combining high quality materials (full grain or nubuck leather) and optimal protection:

- **Temptation® City sole:** fine and lightweight, slip-resistant on all types of surface.
- **Leather lining** for greater hygiene and comfort.
- **200J steel toecap.**

Thanks to the classic colours and discreet lines, these shoes match any outfit.

TRIAXE® EVOLUTION

Lightweight, multi-purpose and high performance

Triaxe® Evolution shoes were designed to meet all requirements for the comfort and protection of wearers.

The whole collection is equipped with the **Triaxe® Evolution sole in PU Nitrile**. This is a versatile sole tailored to all working environments, even the most aggressive ones.

- The intermediary layer in **flexible and lightweight**, low-density PU provides additional heat insulation while ensuring the user's comfort.
- The Nitrile sole in contact with the ground ensures **exceptional adherence** on all types of surfaces and resists to acids, fuel-oil and heat by contact up to 300°C.

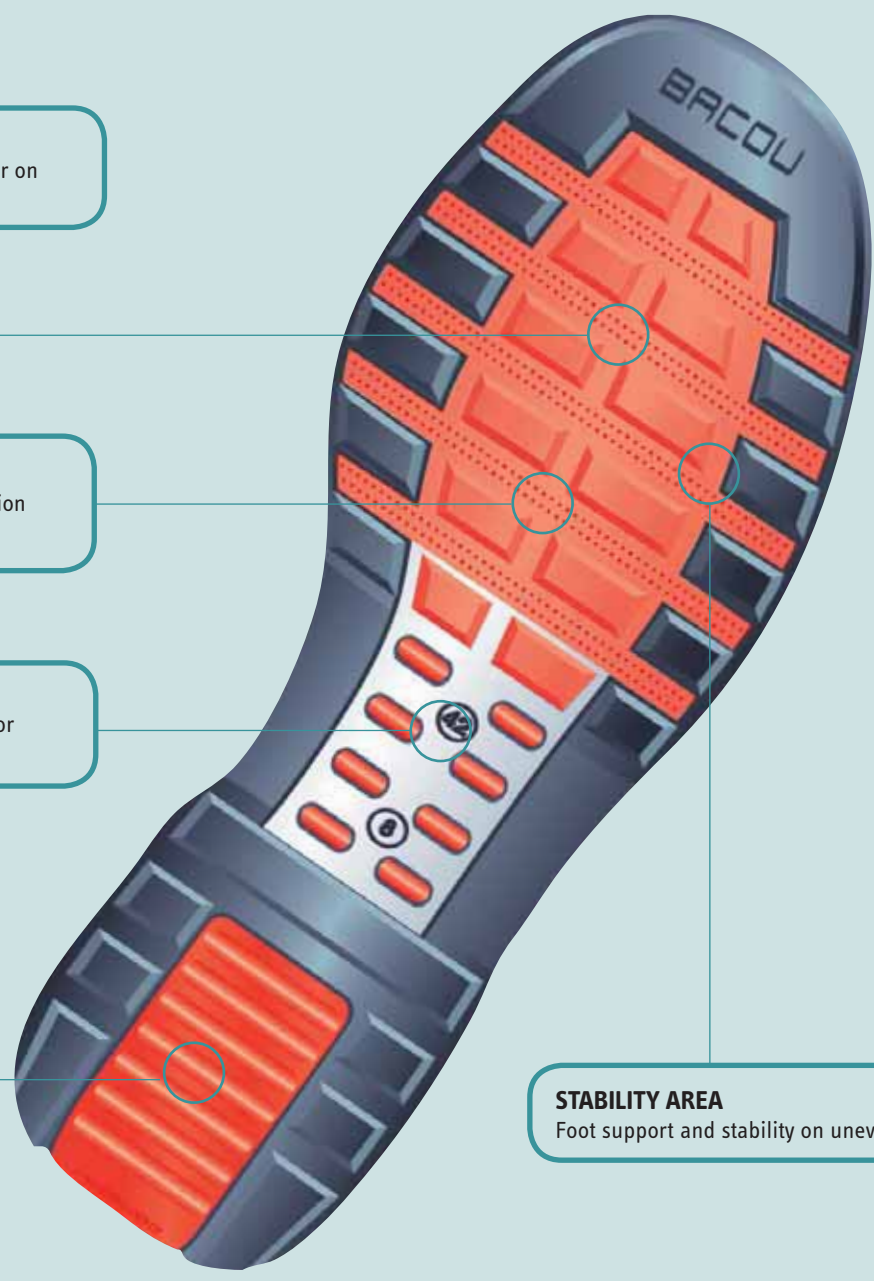

TRACTION ZONE
Grip, flexibility and resistance to wear on smooth and slippery surfaces.

SELF-CLEANING SOLE
Open design for the efficient evacuation of fluids.

GRIP AREA
Grip, stability and effective support for good balance.

IMPACT AREA
Shock and vibration absorption. Rounded heel to optimise initial contact with the ground.

STABILITY AREA
Foot support and stability on uneven ground.

TRIAXE® OUTDOOR

High-quality materials for use in extreme conditions

The Triaxe® Outdoor collection is devoted to all those working outdoors, irrespective of the weather conditions.

All the models in the collection are equipped with the Triaxe outdoor sole in PU 2D, designed specially for building and outdoor work.

- The intermediary layer in low-density PU ensures comfort and flexibility, while absorbing shocks at the heel.
- The outsole is equipped with broad, self-cleaning cleats for better stability and an excellent grip on uneven, wet or angular surfaces.

FLEXIBILITY

The flexing line is placed at the ball of the foot to facilitate walking without causing foot fatigue.

STABILITY

The rigid shell helps hold the foot in place and prevents any twisting.

GRIP

To increase the shoe's grip on difficult surfaces.

MARKED HEEL

SHOCK ABSORPTION

For a better absorption of shock and vibrations at the heel (+25%).

TRIAXE[®] SPORT

Comfort, flexibility and high quality materials

Combining high quality materials and modern design, Triaxe[®] Sport shoes provide a feeling of well-being and comfort so wearing safety equipment is no longer a constraint.

The whole collection is equipped with a Triaxe[®] Sport PU.2D sole designed specially for movement on hard, smooth and slippery industrial surfaces.

- The intermediary layer in low-density PU ensures **comfort and flexibility**, improving shock absorption at the heel.
- The surface in contact with the floor, in high-density PU, ensures an excellent grip as well as high resistance to abrasion and oils.

FLEXIBILITY

The flexing line is placed at the ball of the foot to facilitate walking without causing foot fatigue.

GRIP

To increase the grip on difficult surfaces.

SHOCK ABSORPTION

For optimal absorption of shock and vibrations at the heel (+25%).

STABILITY

The lateral stabilizer controls the foot so as to reduce the risk of twisting.

A large choice of robust models

The **stitched and cemented collection** offers a wide range of models that are both technological and attractive.

Stitched outsoles are used in manufacturing sturdy and hard-wearing shoes, worn in all weather conditions and destined for outdoor activities and aggressive environments.

Cemented outsoles are used for shoes with a lighter, practical and elegant design.

Most of the stitched models combine our unique expertise in the latest innovations regarding shoes for professionals:

- 200J non metallic toecaps
- non-metallic, anti-puncture midsoles

Thus, they provide the wearer with greater comfort and safety throughout the day.

Double stitched assembly technology

The double stitched assembly process of manufacturing guarantees wearers with a sturdy and comfortable shoe that is suitable for all grounds and weather conditions.

It provides better foot hygiene allowing the evacuation of perspiration

Stitched technology also enables shoes to be manufactured in larger sizes (up to size 51).

The stitched and cemented models provide a response to specific needs:

- **Outdoor activities in difficult weather conditions.**
- **Management staff.**
- **Specific models for fire fighters.**

NIT'LITE®

Shoes made to resist extreme temperatures

With the NIT'LITE® range, BACOU has created the first Nitrile rubber outsole with an expanded cellular structure, for even greater lightness and comfort.

Resistant to the most extreme temperatures: -30°C to + 300°C.

Resistant to grease, fuel oil and standard chemical agents.

Excellent abrasion resistance.

Good resistance in warm and damp tropical weather conditions.

Good grip coefficient: SRC according to EN ISO 20345: 2004/Amd 1: 2007.

Light and flexible as a result of its unique expanded cellular structure.

Hygiene, comfort and slip resistance

Our R&D teams have designed a range dedicated to the needs of the food industry, collective catering and advanced technologies.

All the styles in the White Range are made using materials that resist to the aggressive nature of diluted chemicals and grease.

The upper section has been specially designed to limit any possible proliferation of bacteria while facilitating the evacuation of fluids.

Those «added features» for extra comfort

Our range of accessories meet the needs of even the most demanding users: insoles, socks and oversocks, booties and laces are available in individual packaging.

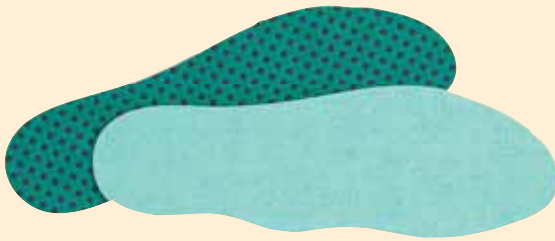

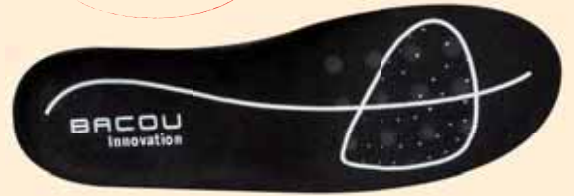

BACOU COMFORT INSOLE

36-47

- Anatomic and pre-shaped.
- Heel reinforcement and arch support.
- Antistatic and removable.
- Absorbent textile coating.

REF: 60 003 30

NEW

BACOU IMAGE INSOLE

35-47

- Light green non-woven fibres.
- Honeycomb structure, hypoallergenic.
- Impregnated with an anti-fungal and antibacterial agent.
- Neutralizes perspiration.

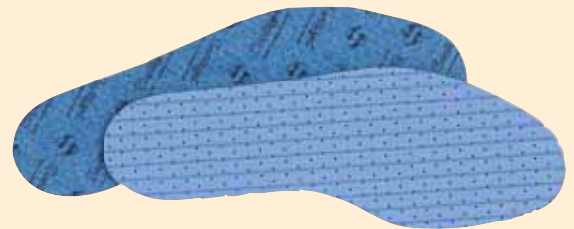

REF: 60 003 01

BACOU BLUE INSOLE

35-47

- Blue non-woven fibres.
- Linear structure.
- Fine and perforated: encourages the circulation of air inside the shoe.
- Impregnated with an anti-fungal and antibacterial agent.
- Neutralizes perspiration.

REF: 60 003 10

BACOU BAC'RUN® INSOLE

38-47

- Antistatic and ergonomic.
- Absorbs perspiration.

REF: 60 003 21

BACOU XTRA-FIT INSOLE

35-47

- Ultra breathable as a result of its micro-perforations.
- Antibacterial treatment.
- Memory foam.
- Ergonomic and antistatic.

REF: 60 003 20

BACOU FRESHNESS SOCKS

35-37 to 44-46

- Mid-high ultra comfortable socks.
- Reinforced at the ankle, heel and toe.
- Manufactured with a majority of Coolmax® technical fibres that keep the foot fresher and drier than with traditional textiles (heat regulation) by evacuating perspiration outside the fabric.

REF: 60 004 10

BACOU THERMAL BOOTIES

35-47

Bootie with three layers:

- Outer layer in cotton jersey and acrylic.
- Mid layer in insulating foam.
- Inner layer: non woven, Sanitized® treatment, polyviscose and acrylic.
- Anti-fungal, antibacterial, anti-odour.

→ *Ideal in cold and damp working environments.*

REF: 60 004 00

BACOU THERMAL OVERSOCKS

38-47

- In acrylic fibres with a fur effect over polyester jersey.
 - Protect the foot and the calf from the cold.
- *Ideal in cold and damp working environments.*

REF: 60 004 01

BACOU LACES

- A wide range of laces to meet all needs.
- Come in boxes of 25 pairs.
